EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 15th of July, on 12,075 miles, to 718,860*l*, and for the corresponding week of last year, on 11,674 miles, to 697,520*l*, showing an increase of 401 miles and of 21,340*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,462 miles, to 587,040*l*, and for the corresponding week of 1864, on 8,190 miles, to 574,036*l*, showing an increase of 272 miles and an increase of 13,004*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 24.—In the share market to-day weakness of tone affected all descriptions to a certain extent, but was a most apparent in the English railways, of which Lancashire and Yorkshire, North British, and Chatham declined ½ each, ditto (Extension) 1½, North-Western ¾, Midland (Birmingham and Derby) 1, ditto (original) a further ½, Great Western and Metropolitan further ¾ each, and Great Eastern and Great Northern (A stock) a further 1 each. In colonial, Grand Trunk of Canada receded ¼, and Great Western of Canada shares (of both descriptions) a further ⅛ each. In foreign, Antwerp and Rotterdam, Dutch Rhenish, and West Flanders declined ⅛ each. In American, Illinois Central shares relapsed 1, Virginia (6 per cent.) declined 1, and United States (5-20) further ¾. In British mines, Wheal Seton advanced 2½, and Chiverton a further ¼; and Wheal Seaton declined 5, Wheal Buller 2½, and Prosper 1¼. In foreign mines, no alteration is recorded.

TUESDAY, July 25.—In the share market to-day, although the business was of small amount, English railways closed with a rather general tendency to recovery of tone, but banks, foreign mines, and miscellaneous shares were again disposed to flatness. Of the English lines, Great Eastern and Great Northern (A stock) recovered 1 each, Metropolitan 1¼, Lancashire and Yorkshire ½, and Midland and Great Western ¼ each; Manchester, Sheffield, &c., improved 1, and North-Eastern (Leeds) and South-Eastern declined ½ each. In colonial no change is recorded, and in foreign the only movement was a further decline of ⅛ in Dutch Rhenish. In American, Erie shares (paid up) improved ¼; and Illinois Central shares further declined ½, and United States (5-20's) ¼. In British mines Great Wheal Vor advanced ½. In foreign mines Washoe Gold (of both descriptions) receded ½, and Don Pedro North de Rey and Frontino Gold ⅛ each.

WEDNESDAY, July 26.—In the share market to-day dulness was the prevailing feature, and the English, colonial, and foreign railways, as well as American securities, all closed with a flat tendency, the other descriptions showing no average alteration. Of the English lines, Metropolitan relapsed 1¾, North-Western ¼, and Midland ¾; ditto (Birmingham and Derby) declined 1 each, and South-Eastern a further ½. In colonial, Bombay and Central India, East Indian, Great Indian Peninsula, and Grand Trunk of Canada (2nd preference) declined ½ each, ditto (original stock) ¼, and Lake Huron ⅛. In foreign, Great Luxembourg and Lombardo-Venetian declined ⅛ each. In American, Erie shares (paid up) relapsed ½, and Atlantic and Great Western (New York section of both descriptions) receded 1 each. In British mines, Wheal Seton advanced 2½, Clifford Amalgamated 1, Tin Croft ½, and Chiverton ¼; Devon Great Consols receded 10, and Great South Tolgus ¼.

THURSDAY, July 27.—In the share market to-day, this being preparation day for the settlement at the end of the month, a majority of the transactions were for the account, and the variations from yesterday's closing prices indicated a continued tendency to flatness in banks and English railways, and steadiness in colonial, foreign, and American. Of the English lines, Metropolitan recovered ¼; South Devon advanced 1; and Manchester, Sheffield, &c., declined 2½, Lancashire and Yorkshire 1¼, Great Western (Oxford) and Metropolitan District (10*l*) 1 each, Great Eastern, Blackwall, Chatham (Metropolitan extension) and North-Eastern (Berwick) ½ each, Great Western (original) ¼, Midland (9*l*) ⅛, ditto (stock) a further ¼, and North-Western and South-Eastern a further ½ each. In American, Erie shares (paid up) recovered ½, Illinois Central shares improved ¾, and United States (5-20) declined ¼. In British mines, Wheal Buller advanced 3, Great Wheal Vor ½, and Chiverton a further ¼; and South Wheal Frances declined 2½, and Great South Tolgus a further ¼. In foreign mines, Val Antigoria improved ⅛.

FRIDAY, July 28.—The railway market is flat to-day, and prices declined in several instances. Metropolitan stock was especially heavy, and receded ¾ per cent. Caledonian also fell ½, South-Eastern ¼, and Great Western ⅛.

ROYAL GALLERY OF ILLUSTRATION.—A third season of Opera di Camera will be inaugurated on the 14th of next month. The present entertainment closes on the 12th, when we shall lose the services of Mr and Mrs German Reed and Mr John Parry for a time.

H. J. AND D. NICOLL, 114, 116, 118, 120 Regent street; 22 Cornhill London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

Just published, 1s. Illustrated, Second Edition.

THE HEAD AND HEART LEGACY.

"Po ssessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity wil be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction"

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

THE YOUNG MAN'S LIBRARY
OF
USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilus in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

MEXICO BY STEAM TO VERA CRUZ and RAILWAY into the INTERIOR.

The Imperial Mexican Railway Company (Limited) have the satisfaction to state that their Line of Railway has been Opened for Passengers and Merchandise Traffic over the whole distance from Vera Cruz to Paso del Macho, where the ascent from the Tierra Caliente to the healthy districts of the interior commences.

They company have arranged to despatch a Special Train from Vera Cruz on the occasion of the arrival of each Steam Packet from Europe to enable travellers to reach the interior of the country with the least possible delay.

Tickets for the special trains can be obtained at the company's offices in Vera Cruz.

W. ROSCOE, Secretary.

18 New Broad street, London, July 13, 1865.

THE ATLANTIC TELEGRAPH COMPANY.
EXTRAORDINARY GENERAL MEETING OF THE SHAREHOLDERS.

Notice is hereby given, that an Extraordinary General Meeting of the Shareholders of the Atlantic Telegraph Company will be held at the London Tavern, Bishopsgate street within, the City of London, on Wednesday the 9th day of August, 1865, at half-past one for two o'clock precisely, when the following business will be presented for the consideration of the shareholders:—

First. To convert into Consolidated Eight per Cent. Preferential Stock the Eight per Cent. Preferential Capital of the Atlantic Telegraph Company, at present consisting of 120,000 shares of £5 each.

Second. To convert into Ordinary Consolidated Stock the whole of the Ordinary share capital of the Atlantic Telegraph Company, consisting of 350 shares of the par value of £1,000, and 5,643 shares of the par value of £20, and to issue either in ordinary stock or in shares, as may be most convenient, the sum of £137,140, of ordinary capital, authorised at the Extraordinary General Meeting of March 31st, 1864, and agreed to be issued in instalments fully paid up to the Contractors from time to time after the successful completion of their contract, and if issued in shares it is intended to take power at any time hereafter to convert the said shares into ordinary stock of the Company.

Thirdly. At the said meeting the Directors also intend to seek authority from the shareholders to issue such amounts of new capital as may be required for the construction and laying of a Second Atlantic Telegraph Cable, under powers of their Act of Parliament, and to attach to such capital such privileges and such advantages and conditions as may then and there be determined. And the Directors further give notice that at the said meeting they intend to take such powers and propose such resolutions as will enable them to carry out effectually the foregoing proposals.

(Signed) JAMES STUART WORTLEY, Chairman.
GEORGE SAWARD, Secretary and General Superintendent.

12, St. Helen's place, Bishopsgate street within, London, 21st July, 1865.

THE ATLANTIC TELEGRAPH COMPANY.
CHARGE FOR MESSAGES.

From communications which have reached the Directors, it is feared that some misunderstanding may have arisen as to the nature of the Provisional Charges announced by this Company for Messages to America. The Directors therefore desire to explain—

First. That the charges are temporary only, and will be reduced as soon as they are found to be higher than is requisite to prevent delays and errors. Nothing at present is known of the amount of traffic to be expected, while it is certain that the working capacity of a single cable is very limited, and if the line were blocked with messages, especially at the onset, great delay, confusion, and disappointment would result.

Second. It should be borne in mind that for the price paid to them, the Atlantic Telegraph Company undertake to defray the charges of all other telegraph administrations, English and foreign, from the telegraph station at which the message starts to the telegraph station for which it is destined, thus relieving the sender from all further trouble in this respect.

Third. That so soon as the present cable is successful, the Directors will do all in their power to lay down a second cable immediately. The increased power so obtained will then, it is hoped, enable them so effectually to reduce the charges as to fully satisfy the public.—By order, GEORGE SAWARD, Secretary and General Superintendent.

NINETEENTH REPORT OF THE

BANK OF LONDON.

HEAD BANKING HOUSE—Threadneedle street.
CHARING CROSS BRANCH—No. 450 West Strand.

DIRECTORS.

Sir John Villiers Shelley, Bart., Chairman.
John Griffith Frith, Esq. (Frith, Sands, and Co.), Vice-Chairman.
Charles Joseph Hyde Allen, Esq., 28 Woburn place, Russell square.
John Edmund Anderdon, Esq., Woodleigh, Littleton, Chertsey.
Henry Aste, Esq., 2 Upper Park road, Haverstock hill.
Thomas Dakin, Esq., Alderman of London, Abchurch lane.
Colonel William Elsey, H.E.I.C.S., The Green, Great Ealing.
Thomas Gooch, Esq. (Gooch and Cousens, London wall).
Thomas Luce, Esq., King street, St James's, and Malmsbury, Wilts.
Henry Morris, Esq., late of the Madras Civil Service, 25 Mark lane, City.
Robert Porter Esq., 50 Old Broad street.
Alfred Wilson, Esq., Firgrove, Weybridge, Surrey.

MANAGER—Matthew Marshall, Jun., Esq.

At the Nineteenth General Meeting of the shareholders, held at the London Tavern, Bishopsgate street, on Friday the 21st of July, 1865,

SIR JOHN VILLIERS SHELLEY, Bart., in the chair,

After authentication of the register of shareholders, by affixing the common seal of the company, the following report was read by the Secretary:—

The statement of accounts, which the Directors now submit, shows that the balance of profit at the termination of the past half-year amounts to £66,547 11s 4d.

This result, after providing for current expenses, bad and doubtful debts, and rebate of interest on bills discounted not yet due, enables the Directors to declare a dividend at the usual rate of £10 per cent. per annum, and a bonus of £2 10s per share, amounting together to 20 per cent. per annum, both free of income tax. The balance, viz., £2,324 5s 2d, is transferred to the reserve fund, which, by such addition, is increased to £302,324 5s 2d.

The Directors retiring upon the present occasion are —John Edmund Anderdon, Esq.; Henry Aste, Esq.; and Thomas Dakin, Esq.; who, being duly qualified, offer themselves for re-election.

EIGHTEENTH REPORT OF THE

NATIONAL DISCOUNT COMPANY

(Limited), Cornhill, London.

DIRECTORS.

FRANCIS WILLIAM RUSSELL, Esq., M.P., Chairman.
Matthew Hutton Chaytor, Esq., Deputy-Chairman.

George Burnand, Esq.	Wm. James Thompson, Esq.
Chas. Richard Fenwick, Esq.	John Robt. Thomson, Esq.
Alexander Mackenzie, Esq.	Hy. Heyman Toulmin, Esq.
George Nicholas, Esq.	Fred. Charles Wilkins, Esq.

AUDITORS—James Morton Bell, Esq.; Joseph Robert Morrison, Esq.

MANAGER—R. P. Webber, Esq.

BANKERS.

Bank of England; the Union Bank of London.

SOLICITORS—Messrs Thomas and Hollams.

At the Extraordinary General Meeting of proprietors held at the London Tavern, Bishopsgate street, on Wednesday, 26th July, 1865, the following report was read by the Secretary:—

The Directors, in presenting the annexed statement of the accounts for the half-year ending 30th June last, feel assured that the shareholders will participate in the pleasure they have in submitting such conclusive evidence of the steady progress of the business of the Company.

The gross profits for the last half-year have amounted to £112,745 14s 9d, and, after deducting the current expenditure, Directors' and Auditors' remuneration, writing off, in their entirety, all bad and doubtful debts, and reserving for rebate of interest on bills not yet due, £36,571 1s 1d, there remains a sum of £65,339 0s 1d, which, with the addition of the balance brought forward from the 31st December last, will then amount to £70,092 0s 5d.

These satisfactory results will enable the Directors, after appropriating £60,000 to the payment of a dividend at the rate of 20 per cent. per annum, free of income tax, to carry forward to the next half-year's profit and loss account the sum of £10,092 0s 5d.

The dividend will be payable on and after the 1st of August.

NATIONAL DISCOUNT COMPANY (Limited).

33 Cornhill, July 11, 1865.

The advertisement calling the meeting, together with the report and accounts, having been read,

The following resolutions were moved and carried unanimously:—

"1. That the report and accounts now read be received, adopted, and entered on the minutes.

"That a dividend be declared on the paid-up capital of £600,000, at the rate of 20 per cent. per annum, free of income tax, payable on and after the 1st August, and that the balance of £10,092 0s 5d be carried to the credit of profit and loss new account.

"3. That the best thanks of the shareholders be given to the Chairman and Directors for the attention they have bestowed on the affairs of the Company.

"4. That the best thanks of the shareholders be given to the manager, Mr Webber, for the very efficient and able manner in which he has discharged the responsible duties that have fallen upon him during the past half-year.

"5. That the thanks of the shareholders be given to the Sub-manager (Mr Thos. Smith), Secretary (Mr Richard Price), and other officers, for their zealous services."

(Signed) FRANCIS WILLIAM RUSSELL, Chairman.

The Mercantile and Exchange Bank (Limited).

AGENTS IN INDIA.

Messrs Gillanders, Arbuthnot, and Co., Calcutta.
Messrs Ewart, Latham, and Co., Bombay.

Report of the Directors to the Second Ordinary General Meeting of Members, held at the London Tavern, Bishopsgate street, on Friday, the 28th July, 1865:—

The Directors beg to submit to the shareholders the report of the proceedings since the last general meeting, held on the 27th January, as also the accounts up to the 30th ultimo, duly audited.

In the circular issued by the Directors on the 12th May, mention was made of their inability, from the want of unanimity in favour of the measure on the part of the shareholders, to carry out the suggestion as to the reduction of the nominal amount of each share. The Directors have further to report that none of the proposals for amalgamation which they have had under consideration have as yet come to a successful issue.

With reference to the accompanying accounts, the Directors have to mention that as against the item of £191,570 9s 8d under the head of "advances on securities," the corporation holds collateral security to the nominal value of £333,585.

It will be noticed that it has been deemed advisable to write off a further amount of £1,000 from the preliminary expenses, and this reduces the amount at the credit of profit and loss on the 30th ultimo to £11,372.

Unless otherwise desired by the shareholders, the directors do not intend declaring an ad interim dividend for the past half-year.

As mentioned in the circular above alluded to, the directors have been enabled to place the securities of the Corporation on a more satisfactory footing, but from want of capital the business done elsewhere than in India has been necessarily restricted.

The transactions in Calcutta have been of a satisfactory nature; but the latest letters from our agents in Bombay bring advice of the r having been obliged to carry over some of the loans they had entered into.

Looking to the quoted price of the shares, and the natural anxiety expressed by many shareholders on that account, the directors regret that the suggestion made by them in their circular dated 12th May last, that the shareholders should satisfy themselves respecting the actual worth of the shares by reference to the official records, should have been acted upon by very few of their number

Since, however, shareholders residing at a distance may have been prevented from availing themselves of the opportunity to us offered to them, the directors would now state that if the shareholders should think it expedient to appoint a committee from their own body to inquire into the affairs of the Corporation in every particular, such a course would, probably, be satisfactory to all concerned.

BALANCE SHEET, 30th June, 1865.

PROFIT AND LOSS ACCOUNT, 30th June, 1865.

Dr.	£	s	d
To current expenses, including salaries, advertising, stationery, rent, Directors' fees, and incidental charges at head office, as also Calcutta agency	2,331	5	7
To amount paid Mr H. A. Parry, on his retirement from the office of Manager	1,000	0	0
To depreciation in the value of investments	1,050	0	0
To amount written off preliminary expenses	1,000	0	0
To balance carried to profit and loss (new account)	11,372	0	0
	16,753	5	7
Cr.	£	s	d
By balance from last account	12,971	3	3
By gross profits for the past half-year	3,782	2	4
	16,753	5	7

We have examined and audited the above accounts, and find them to be in accordance with the books of the Company, and duly substantiated by vouchers. Several of the transactions from which the profits are derived are still pending, and it is impossible to say what some of the securities, held in connection therewith, may realise. We are therefore of opinion that the balance of profits, shown by the accounts, should be carefully dealt with.

JOHNSTONE, COOPER, WINTLE, & EVANS.

3 Coleman street buildings, 25th July, 1865.

The Secretary having read the advertisement convening the meeting,

It was resolved unanimously,—

That the report and accounts now read be received and adopted.

That the remuneration of the Auditors for their services in the past half-year be £25.

That the best thanks of the meeting be given to the Chairman, Directors, and Secretary for their zeal and attention to the affairs of the corporation.

(Signed) JOHN BROWN, Chairman.

(Extracted from the Minutes.)

J. FRED. PRIGGEN, Secretary.

July 28th, 1865.

GENERAL CREDIT AND FINANCE COMPANY OF LONDON (Limited).

Notice is hereby given, that the Transfer Books of this Company will be closed preparatory to the payment of the usual ad interim dividend, from Tuesday, 1st August, to Tuesday, 8th August, both days included.—By order, R. J. BUTLER, Secretary.

27 Austin Friars, 27th July, 1865.

IMPERIAL MERCANTILE CREDIT ASSOCIATION (Limited).

At an Extraordinary General Meeting of shareholders, held at the Offices of the Association this day, Thursday, the 27th day of July, JOHN CHAPMAN Esq., in the chair, the following Special Resolution, passed at Second Ordinary General Meeting, held at the London Tavern on the 13th instant, was unanimously confirmed:—

"In pursuance of a notice forwarded to each proprietor, it is hereby determined that the following clause be substituted for the 6th of the present Articles of Association of this Company:—The Directors may from time to time make calls upon the members in respect of all moneys unpaid on their shares as the Directors may think fit, provided that no call shall exceed the sum of £5 per share, or be made payable within less time than three months after payment of the previous call; and provided also that 21 days' notice at least is given of each call; and every member shall be liable to pay the amount of calls so made to the persons and at the times and places appointed by the Directors, which said persons, times, and places shall be notified in the notices to be sent to each member."—By order of the Board,

W. C. WINTERBOTTOM, Secretary.

27 Lombard street, London, 27th July, 1865.

SIX PER CENT. GUARANTEED PREFERENCE STOCK.

(Both Principal and Interest guaranteed).

THE SCOTTISH AUSTRALIAN INVESTMENT COMPANY (Limited).

Established in 1840.

The Directors of this Company are now prepared to receive applications for further allotments of this stock, which will be inscribed on the books of the Company in the names of the allotees free of stamp duty or other charge.

The dividends are payable on the 1st January and the 1st July, by warrants on the Company's bankers, transmitted to the proprietors. They will be paid in priority to any dividends on the Ordinary stock, and will begin to accrue from the day the stock is paid for.

The six per cent. guaranteed preference stock will carry any arrear of dividend that may at any time arise, and such arrear will be paid prior to payment of any dividend on the ordinary stock.

The present paid-up ordinary capital of the Company is £300,000, with power to issue £200,000 of six per cent. guaranteed preference stock. The dividends paid on the ordinary stock since the commencement have averaged 10 per cent. per annum.

The stock is to be paid for by instalments, falling due as follows, viz., £10 per cent. on allotment; £30 per cent. on 9th October, 1865; £30 per cent. on 8th January, 1866; £30 per cent on 9th April, 1866.

Applicants who desire to pay the full amount applied for at once must state their desire on their applications, and interest will be allowed on the 2nd, 3rd, and 4th instalments, so paid in advance, at the rate of 5 per cent. per annum from the date of payment to the dates when the said instalments fall due and begin to bear interest at the rate of 6 per cent.

Forms of application may be obtained from Sir R. W. Carden and Co., Stock Brokers, Royal Exchange buildings; at the European Bank, 83 King William street, London; or from the Secretary of the Company.—By order of the Directors, C. GRAINGER, Secretary.

Offices, 1 King's Arms yard, Moorgate street, London, E.C., July, 1865.

N.B.—The Forty-fifth Dividend on the ordinary stock of the Company, at the rate of 10 per cent. per annum, will be payable at the European Bank on and after the 4th proximo.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

PROPRIETARY SCHOOL, GRAVESEND.

PROSPECTUS.

This Company has been formed for the purpose of purchasing and extending the well-known and valuable Marble Quarries at Massa-Carrara, near Leghorn, hitherto carried on by an Italian Company, as well as several other important Quarries in adjacent districts. These Quarries comprise statuary of first and a good quality, Clear White, Sicilian, Dove, and other Marbles,

Included in the purchase are extensive saw mills, recently erected, and a large stock of marble, both in blocks and slabs, and arrangements are pending for securing an extensive agency business in London.

The Marble Quarries of Carrara are the principal, if not the only, source in Europe from which white and veined marble is procurable.

Fifteen Quarries are in high production and extensively opened, and in addition there are several other new Quarries of the first importance. The saw mills are distant only three miles from the railway station at Massa, from which a railway leads direct to the shipping port of Leghorn.

The consideration for the transfer of these several Quarries, together with the saw mills, machinery, and plant of the Italian Company, and the good-will of its business, and also including the stock of blocks and slabs of marble in Italy, has been fixed at £80 000, leaving ample capital for the erection of additional saw mills, and for developing both the old and new quarries.

The colossal fortunes made by the few parties who have so long monopolised the marble quarries in Italy are a sufficient guarantee of the prospects of this Company.

The Company will annually derive two sources of profit from their operations, the one local, the other foreign, by exports to Great Britain, America, the East Indies, and elsewhere.

Taking the total annual yield of marble at 300,000 cubic palms (or 12,000 tons English), it is expected that the sale of blocks and slabs will realise a net annual profit, deducting all expenses, of £28 700 sterling; whilst, with respect to the trade with Great Britain, deducting all expenses, including management, a further profit may be confidently looked for.

Printed copies of the several reports of Messrs Weiller, Barglacchi, and Avenante, upon the value and capabilities of the property, may be had at the offices, where specimens of the marble from the quarries may be seen.

In the event of no allotment of shares being made the deposit will be returned in full. Should a less number of shares be allotted than are applied for the deposit will be made available towards the payment on allotment, and the balance (if any) returned to the applicant.

Prospectuses and forms of application for shares, in the form annexed, may be obtained at the offices of the Company, also of the Bankers, Broker, and Solicitors.

London, 21st July, 1865.

FORM OF APPLICATIONS FOR SHARES.
(To be retained by the Bankers.)

No. ——

To the Directors of the Massa-Carrara Marble Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number; and I agree to accept such shares, or any less number you may allot to me; and I agree to pay the sum of £4 per share on allotment, and to sign the Article of Association of the Company when required, and I authorise you to insert my name on the register of members for the number of shares allotted to me.

BROKERS.

Messrs Partridge and Greenfield, 21 Throgmorton street.

SECRETARY pro tem.—C. J. Cadogan, Esq.

Temporary Offices—1 Royal Exchange buildings.

Distillery—Church street, Lambeth, S.

PROSPECTUS

This Company is formed for the purpose of purchasing, carrying on, and extending the business of Hodges's Distillery, and of appropriate operations which may be connected therewith.

The world-wide reputation of this establishment is well known and appreciated. The distillery has been established and prosperously worked since 1774, and many fortunes have been realised out of the business.

This establishment, with all its current trade, will be handed over to the Company on the 1st August next, the vendor guaranteeing the Company against any loss, as to such of the assets and liabilities as it may be mutually convenient to transfer.

The property is capacious, well situated, and admirably adapted to its purpose, and it is held upon desirable titles, nearly the whole being freehold.

The plant has, with never-ceasing care and attention, been improved as fast as advantageous modifications of machinery have been introduced; and its present working capability is adequate to supply a trade of four-fold the actual returns.

The establishment is, moreover, provided with most complete independent gas and water works.

Looking at the present extent and condition of the premises, plant, and machinery, with a view to enlarged business without further outlay, the Directors feel convinced that the establishment is one of the most perfect of its kind in existence.

Relying also greatly upon the very confident expression of opinion which they obtain from gentlemen eminent in the trade as to the eligibility of the concern, the Directors sincerely believe the prospects of the Company to be more glowing than they are willing to express.

Mr Frederick Hodges, the proprietor and vendor, in retiring, desires to do so in order to relax in his application without altogether losing his interest in the business; and whilst he stipulates to retain a large share in the capital of the Company, he does not require to be paid in the sense of goodwill for the reputation and business of his house otherwise than out of the balance of net profits, hereafter realised in excess of dividends at the rates of 10 and 15 per cent. to the shareholders.

The price to be paid by the Company for this celebrated business, therefore, is simply the amount of valuation in respect of the premises and plant, as settled by the Company's valuer.

It is well understood, not only throughout the trade but also by the public at large, that distillers, like brewers, command an extension of business in proportion to the facilities and support which they can extend to the trade; and this circumstance explains the heavy capital absorbed in successful establishments of the kind, and the peculiar fitness of such business for the employment of a joint stock company's resources.

The Directors reserve power to allot 1,000 shares fully paid up.

Prospectuses and forms of application for shares can be obtained from the brokers and solicitors, as well as at the temporary offices of the Company, and from Messrs Clench, Smith, and Co., 1 Royal Exchange buildings, E.C.

Deposits upon which no allotments are made will be returned in full.

FORM OF APPLICATION FOR SHARES.

No.

To the Directors of Hodges's Distillery Company (Limited).

Per Messrs Clench, Smith, and Co.

Gentlemen,—I request that you will allot to me shares of £25 each in the above Company, having paid to your Bankers the deposit of £1 per share thereon, and in consideration of such allotment, or of any less number of shares which you may appropriate to me, I hereby undertake to pay the £4 per share then required, as also afterwards to pay any call thereon, and I further undertake to execute the articles of association when required, and I hereby authorise you to inscribe my name on the register of members of your Company.

Dated this day of 186 .

ABRIDGED PROSPECTUS.

This Company has been formed to carry out, among others, the following objects—

To facilitate the formation or execution of railways and other public works.

To provide the contractors for such works with a medium for securing prompt and effectual support to their undertakings.

To lessen the disappointments and delays often met with by contractors and others in obtaining prompt advances on railway and other securities.

Prospectuses and forms of application for shares may be had of the Secretary, the Solicitor, the Auditors, the Brokers, and at the temporary offices of the Company, where also the Memorandum and Articles of Association may be inspected.

"It is scarcely possible to overrate the value of Mr Locky's able and vigorous book, the style of which is as luminous and attractive as its learning is profound."—SPECTATOR.

THE RAILWAY CREDIT COMPANY (Limited).

Notice is hereby given, that the Share List of this Company will be closed for the United Kingdom on Monday, August 7, 1865.—By order,

G. BLIZARD COX, Secretary.

Temporary offices, 9 Finsbury place, South, E.C.

SALISBURY AND DORSET JUNCTION RAILWAY COMPANY.

ISSUE OF DEBENTURES.

Share Capital ..... £160,000.
Debenture ..... £53,300.

DIRECTORS.

Chairman—Matthew Henry Marsh, Esq., M.P., Ramridge house, near Andover.
Deputy Chairman—Thomas Pain, Esq., Ugford, Salisbury.
William Blackmore, Esq., Founders' court, Lothbury, E.C.
Samuel Cook Frankish, Esq., 23 Parliament street, Westminster, S.W.
Octavius Ommanney, Esq., Great George street, Westminster S.W.

1. This line, which is nearly 19 miles in length, will unite Salisbury, by the most direct route, with the towns of Weymouth, Dorchester, Wareham, Blandford, Poole, Bournemouth, Wimborne, Ringwood, Christchurch, Fordingbridge, and Downton. In addition to the local traffic which must arise, this railway, on the completion of the North and South Wiltshire Railway, recently sanctioned by Parliament, and which brings the Midland System into direct communication with Salisbury, must necessarily receive a large amount of the through traffic between the manufacturing districts of the North of England and France, via the ports of Poole and Cherbourg, now brought into direct communication by the establishment of a line of steamers. It will also be the shortest and best mode, as stated in the evidence adduced before the committees of the Houses of Parliament in support of the Wiltshire Railways, for the conveyance of the celebrated Isle of Purbeck clay (now carried by sea) to the potteries of South Staffordshire.

2. The construction of the line was commenced in the early part of February, 1864; the works are in a very forward state, the permanent way having been laid at both ends of the line, and it is expected that it will be completed and open for traffic by the end of September next.

3. The Company are now entitled, under the provisions of their Act of Parliament, to issue Statutory Debentures, and they invite applications for the same, in sums of £100 and upwards, for a term of either three or five years, at the option of the applicant, and bearing interest at the rate of 5 per cent. per annum. The debentures will have coupons attached for the interest, which will be paid half-yearly, on the 1st of January and the 1st of July. The first payment will be made on the 1st of January next.

4. In order that the public may judge of the security for investment offered by these debentures, which are the first charge on the line, it will be sufficient only to mention that the debenture cost of the line per mile is under £3,000, and that a gross traffic of between £5 and £6 per mile per week—which is less than is realised by any railway in England—will be more than ample, after making the usual deduction for working expenses, to pay the coupons of interest.

5. The Salisbury and Yeovil Railway, which passes through a similar agricultural district to that traversed by this line, has cost between £16,000 and £17,000 per mile. The traffic receipts on the Salisbury and Yeovil Railway for the half-year ending the 31st of December, 1864, averaged £54 5s 10d per mile per week; whilst a dividend of £5¼ per cent. was paid on the share capital in respect of the same half-year. The cost of the Salisbury and Dorset Junction Railway will be less than £11,600 per mile; and, assuming that the gross traffic receipts are only £20 per mile per week, and that it is worked by the South-Western Railway Company on the same terms as the Salisbury and Yeovil Railway, the line will yield a net revenue of nearly £11,000 per annum, which will more than suffice to pay £5 per cent. on the whole of the share capital as well as the interest on the debentures.

Applications for debentures may be made by letter to G. W. Horn, Esq., the Secretary, at the Company's offices, No. 1, Poet's corner, Westminster, S.W.]

INDIA OFFICE, 14th July, 1865.

THE SECRETARY OF STATE FOR India in Council

hereby gives notice, that he has received from the Governments of Bengal and Bombay respectively the under-mentioned Schedules, viz.:—

BENGAL.

A. Schedule of all Administrations whereof the final Balances have been paid to the persons entitled to the same, specifying the amount of such Balances, and the persons to whom paid, during the six months ending on 31st December, 1864.

B. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General on account of Estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout, and the Balances. Prepared up to the 31st December, 1864, under Section XXXIV. of Act VIII. of 1855.

C. Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General, on account of Hindoo and Mahomedan Estates remaining under his charge, together with the payments made thereout, and the Balances in hand.

D. Schedule of Balances in the hands of the Administrator-General set apart to meet the admitted claims of creditors against the Estates therein mentioned.

E. Schedule of Unclaimed Balances of Estates under 500 rupees deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's Letter of the 8th of October, 1852, interest being allowed thereon by Government.

BOMBAY.

Schedule of all Sums of Money, Bonds, and other Securities received by the Administrator-General, on account of each Estate remaining under his charge, together with the Payments made thereout, and the Balances. Prepared up to 31st December, under Section XXXI. of Act VIII. of 1855.

Schedule of all Administrations whereof the Balances have been paid to the persons entitled to the same, specifying the amount of such Balances, and the persons to whom paid. Prepared for the half-year ending 31st December, 1864, under Section XXXIV. of Act VIII. of 1855.

And that the said Schedules are open to the inspection of the public, in the Department of the Official Agent to the Administrators-General of India, at this Office.

THE TAMAR LEAD AND SILVER SMELTING COMPANY (Limited).

Incorporated under "The Companies Act, 1862."

Capital £60,000, in 5,000 shares of £12 each.

First issue 3,000 shares.

Deposit on application £1 per share, £2 on allotment, and £3 at the expiration of two months from the date of allotment.

A minimum annual dividend of 12 per cent. upon the paid-up capital guaranteed for three years.

A limited number of applications for fully paid-up shares will also be received.

Further calls (if any) on the £6 paid shares not to exceed £2 per share, and no call beyond the £6 to be made earlier than six months from the date of allotment.

DIRECTORS.

J. Burns, Esq., Hereford.
J. Harry Evens, Esq., F.S.S., F.I.A., Cheapside, and Belgrave house, Islington.
John J. P. Hitchfield, Esq., R.N., Plympton, Devon.
Edward Ramsey, Esq., Tamar terrace, Devonport.
J. Henry Rowley, Esq., 35 Poultry, City, E.C.
Sidney Smith, Esq., 5 Leonard place, Kensington.
Joseph H. Tilston, Esq., Chepstow villas, Bayswater.

BANKERS—Metropolitan and Provincial, 75 Cornhill.

SOLICITORS.

Messrs Matthews and Greetham, 68 Lincoln's inn fields.

MANAGER AT THE WORKS—Mr J. Bawden.

BROKER—Amelius George Alt, Esq., 75 Old Broad street.

SECRETARY—Mr Joseph Chenhall.

Offices—St Botolph chambers, 197 Bishopsgate street without, City, London.

This Company is established for the purchase and working of extensive smelting works, occupying an area of upwards of four acres, with convenient wharf and other premises attached, situate at Beerferries, in the County of Devon, on the banks of the river Tamar, and about 10 miles from Plymouth, which are held for a term of 21 years, under a grant from the Earl of Mount Edgecumbe, at the very low rent of £120 per annum.

It is proposed that the Company shall purchase the lease of the works and premises, and all the rights of the owners for £8,000, and in case of the second issue of shares taking place, then for the sum of £2,000, to be paid in cash or in fully paid shares at the option of the Company. As an evidence of their confidence in the undertaking the vendors will take one-half of the purchase money in paid-up shares, and will deposit in the hands of the Directors sufficient security to guarantee a minimum dividend of 12 per cent. per annum for three years.

No promotion money will be paid or incurred in the formation of the Company.

Calculations have been made of the probable profits, based on the results of other Lead and Silver Smelting Works, and from these and the reports of engineers who fully understand smelting, the directors feel justified in expecting dividends of 25 per cent. per annum.

Full particulars of the proposed operations may be obtained, and the articles of association inspected at the offices of the Company, St Botolph chambers, 197 Bishopsgate street without, City, London, and prospectuses and forms of application for shares may be obtained at the brokers, solicitors, and offices of the Company.

THE TAMAR LEAD AND SILVER SMELTING COMPANY (Limited).

Notice is hereby given that the List of Applications for Shares in this Company will be closed on Thursday next, August 3, for London, and on Friday, 4th, for the Country.—By order,

JOSEPH CHENALL, Secretary.

Offices, 97 Bishopsgate street within, E.C.

SECRETARY—H. P. Hakewill, Esq.

Temporary Offices—4A Alderman's walk, New Broad street.

PROSPECTUS.

The objects of the Company are—first, to construct a railway about nine miles in length from the "Old Port" of Marseilles to Podestat, to afford increased facilities for the commerce and manufactures of the town and port; secondly, to acquire land on both sides of the line throughout its length, for building and other purposes, to which great value will be given by the construction of the railway.

The reputation of Marseilles as the first maritime city of France is well known; second only to Paris in population and wealth, its position and capabilities give it the command of French commerce in the Mediterranean.

Within the last ten years Marseilles has been placed in direct railway communication with Paris and all parts of France: magnificent docks and warehouses have been constructed, but great and rapid as those new works have been, they are still far behind the requirements of its ever-increasing trade.

The old quarters of the town are being demolished to make room for handsome streets and public buildings. The population thus displaced are driven to the suburbs, more especially towards the south, where the lands of the Company are situate, and where a fine valley stretches from the town to the Mediterranean, with a view of the sea, and open to the refreshing breezes, which during the summer afford the only relief from the intense heat of the city.

The enormous value of ground in the town may be estimated by the fact, that for any extension, rocks 60 feet high have to be cleared away to give sites for building; it will be readily understood that such a locality is no longer suited for the erection of ordinary dwellings, or factories and chemical works, which latter, for sanitary reasons, will soon be driven from the city.

The proposed railway, after leaving the port and town of 300,000 inhabitants, will pass through the Southern suburb, which contains a population of 50,000, and follow the valley to the sea, at the "Madrague de Montredon;" from thence it will be continued for three miles along the coast to Podestat, affording sites for the erection of factories, with access to the sea, and direct railway communication with the town and port, and with the Paris, Lyons, and Mediterranean lines, by a junction with the proposed new branch of the latter to the "Place Castellane."

There are at the present time 460 factories in the town, employing nearly 10,000 workmen, and the number of factories would rapidly increase, were it not for the heavy charges to which they are subjected from the increasing value of the ground occupied, and the want of direct railway connection with the port, and with the Paris, Lyons, and Mediterranean lines. The proprietors of these establishments will gladly avail themselves of the opportunity of disposing of their present sites to great advantage, and removing to a locality combining the facilities of sea and railway communication, with perfect freedom from all the difficulties of their present position, and where land can be obtained from the Company at a tenth part of the price now paid for building ground in the town.

In order to form an opinion of the pecuniary results of the proposed operations of the Company, it will be desirable to consider separately the income to be derived from the railway, and the profit to be realised by the sale of the land of the Company.

First, with reference to the railway it must be observed, that the existing lines are connected with the new port "Joliette" and the Docks, but that the old port, which is 67 acres in extent, is entirely without railway communication or docks, no withstanding which the official statistics of the government show that during the last year for which they are published, 1863, the returns for the "Old Port" were as follows:—

Vessels.	Tons of Merchandise.
4,383 of various nations entered,	carrying 950,180
4,203 of various nations left,	carrying 693,842
8,686 Total of vessels.	Tons 1,644,022

During the same period the returns for the new port Joliette were—

Vessels.	Tons of Merchandise.
2,609 of various nations entered,	carrying 364,121
2,400 of various nations left,	carrying 330,876
5,009 Total of vessels.	Tons 694,997

But in addition to this the new port "Joliette" received and sent off 1,159,024 tons of merchandise in 1863 by 5,373 steamers, on account of the facilities afforded by the railways and docks.

It is evident from these returns that a railway to the old port must secure a very large amount of goods traffic, and from the population of the suburban district through which the line will pass, and the number of factories, &c., already established in that locality, it is calculated that the railway will produce an immediate profit revenue equal to 15 per cent. on the outlay, which income will be rapidly increased by the erection of houses and factories along the line. There will be seven intermediate stations between Marseilles and Podestat, one of which will be for the "race course" and the "public gardens," and "chateau Borelly."

The Company have contracted for the execution of the railway from the "Place Castellane" to "Podestat," at the price of £185,000.

Secondly, with reference to the profit to be realised by the sale of the land of the Company, it may be stated that all previous speculations in land at Marseilles have been successful.

The Company have contracted for the purchase of about 1,200,000 square metres of land (about 300 English acres), situate on both sides of the proposed railway, between the town and the "Madrague de Montredon;" 140,000 metres of which will be required for the construction of the line and stations, leaving 1,060,000 metres to be sold for the erection of first-class residences.

It has been estimated by competent judges of the value of building sites in the neighbourhood of Marseilles, that on the completion of the railway the whole of this land will be ready sold at the price of at least 20 francs per metre, at which rate it will produce 21,200,000 francs, or £848,000.

The Company have also contracted for the purchase of a very large tract of ground beyond the "Madrague de Montredon," through which the railway will pass to Podestat; 1,500,000 metres (about 375 acres) of this land, adjoining both sea and railway, will be at once available as sites for factories and docks of all kinds.

Estimating the selling price of this land at 10 francs per metre, a sum sufficiently low to induce the manufacturers to establish their works rapidly in the locality, it will produce a sum of 15,000,000 francs, or £600,000.

The average cash cost to the Company of the land above referred to is only 5½ francs per metre, including the houses already built thereon, and including also upwards of 10,000,000 metres of land (2,500 acres) on the coast line for three miles beyond the proposed terminus at Podestat, which will be acquired by the Company free of cost, and which will be made available at some future time by an extension of the railway and the formation of roads.

An ample supply of water, which is indispensable at Marseilles, both for houses and land, can be obtained from the existing works, which have cost the municipality more than 6,000,000 of francs.

The additional capital required for the payment of land will be raised on debentures, to be repaid out of the produce of the land sales.

The practical bearing of the land question is as follows:—Assuming the sale of the land at the low prices named, the profits arising therefrom will not only repay the whole cost of the railway, but in addition there will remain a very large surplus for division, as bonus amongst the shareholders.

The railway concession from the French Government is for the term of 99 years.

The lands of the Company will be freeholds in perpetuity, except the small portion occupied by the railway, which must necessarily be surrendered with the line at the expiration of the concession.

5,000 of the shares have been subscribed for in France, and will be issued with £8 per share paid up thereon.

3,000 shares will be reserved for issue as fully paid-up shares; leaving

12,000 ordinary shares for issue to the public.

20,000

The articles of association, and also the contract, concessions, and plans, may be seen at the offices of the solicitors, Messrs Newbon, Evans, and Co., 28 Nicholas lane, E.C.

Applications for shares in either of the accompanying forms may be made to the secretary at the offices of the Company; or to the bankers, brokers, and solicitors. But no application will be entertained unless the deposit of £1 per share on the number applied for has been duly paid to the Company's bankers. In the event of no allotment being made to the applicant, the deposit will be promptly returned in full.

SECRETARY (pro tem.,)—C. Warwick, Esq.

Temporary Offices:—No. 7 Great Winchester Street.

ABRIDGED PROSPECTUS.

The want of a public Steam Company, and a regular line between London and the East, is much felt, and there has been an urgent call for the formation of this company, which there is every reason to believe will receive the cordial support and co-operation of a large body of the merchants in the trade.

A provisional contract has been made, by which the Directors are enabled to secure, on unusually favourable terms, five new steamers admirably adapted for this trade. These steamers have been only recently launched, and having been built specially for the Mediterranean trade, there will be no difficulty in commencing operations at once. The purchase-money will be paid partly in cash, and partly in shares of the Company.

It is proposed to run a line of steamers of 2,200 tons burthen each, and 300-horse power nominal, from London to Gibraltar, Sicily, Malta, the Ionian Islands, and the principal ports of Greece, Turkey, the Black Sea, the Islands of the Archipelago, the Coast of Syria, and Egypt.

All the vessels belonging to the Company will be registered in England, and will sail under the British Flag.

Branch steamers of 1,125 tons burthen, and 180 horse power nominal, working to 500 horse power combined, will run, in conjunction with the large steamers, between all the principal ports of the Mediterranean, and Malta, Greece, Turkey, Asia Minor, the Coast of Syria, and Egypt; carrying the passengers, mails, and goods of those countries, and performing duties similar to those of the Austrian Lloyd's, and the Messageries Imperiale, but with far greater advantages.

Taking at least three voyages per year, each steamer will produce, on the above estimate, a net profit on freight alone of £12,618, which, on the cost of one of the above large steamers, amounting to (say) £45,000, is more than 8 per cent. It is therefore clear that if the steamers of the above Company perform (as they can easily do) four voyages per year instead of three, the profits will be considerably larger than the above estimate; and this is independent of the profits that the Company will reap from the commission business.

In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deficit will be in due course applied towards the payment due on allotment, and the balance, if any, returned to the applicant.

Detailed Prospectuses and forms of application for shares may be had of the Solicitors, the Bankers, Brokers, and of the Manager, at the offices of the Company, No. 7 Great Winchester street, London.

MESSRS EVERITT AND LUCAS,

MONEY BROKERS AND FINANCIAL AGENTS, ALLHALLOWS CHAMBERS, 49 LOMBARD STREET,

Are instructed to receive SUBSCRIPTIONS for 5,000 SHARES in the

CITY TERMINUS HOTEL COMPANY, LIMITED,

Cannon street, in connection with the Terminus of the South-Eastern Railway.

Incorporated under the Companies Act, 1862, with Limited Liability.

CAPITAL, £140,000, IN 14,000 SHARES OF £10 EACH.

Deposit on Application £1 per share, and £1 on Allotment.

Calls not to exceed £2 per share, and to be made at intervals of not less than three months. 9,000 shares have already been subscribed for, and the remaining 5,000 are now offered to the public.

Interest is guaranteed on the whole of the shares by Messrs Lucas Brothers, at the rate of £6 per cent. per annum, on the capital called up unti the opening of the Hotel.

DIRECTORS.

The Hon. James Byng, Shipbourne Lodge, Tunbridge, Chairman (Chairman of the South-Eastern Railway Company).
Cornelius Willes Eborall, Esq., Blackheath (General Manager of the South-Eastern Railway Company).
Freville Surtees, Esq., Chalcott House, Kingston.
John Farley Leith, Esq., Gloucester terrace, Hyde park (Chairman of the Eastern Bengal Railway Company).
Augustus Walter Arnold, Esq., 59 Harley street.

BANKERS—Messrs Hanbury, Lloyd, and Co., 60 Lombard street.

ARCHITECT—Edward M Barry, Esq., A.R.A., Old Palace yard, Westminster. | SOLICITOR—Henry Toogood, Esq., 16 Parliament street, Westminster.

AGENTS—Messrs Everitt and Lucas, Money Brokers and Financial Agents, Allhallows chambers, 49 Lombard street.

TEMPORARY OFFICES—South-Eastern Railway Terminus, London bridge.

AUDITORS—Thomas Parker, Esq., of Spring gardens; William Edwards, Esq., of the firm of Edwards and James, public accountants, 18 King street, Cheapside.

Application for shares to be made to Messrs Everitt and Lucas, Allhallows chambers, 49 Lombard street, accompanied by a payment of £1 per share, payable to the bankers of the Company, Messrs Hanbury, Lloyd, and Co., 60 Lombard street. If no allotment be made, the deposit will be returned without any deduction.

Prospectuses and forms of application may be obtained from Messrs Hanbury, Lloyd, and Co., 60 Lombard street, bankers; Henry Toogood, Esq., 16 Parliament street, Westminster, solicitor; and also from the agents, Messrs Everitt and Lucas, Allhallows chambers, No. 49 Lombard street, money brokers and financial agents.

THE

SOUTHERN INSURANCE COMPANY, LIMITED.

HEAD OFFICE, 31 QUEEN STREET, MELBOURNE.

CAPITAL, ONE MILLION.

DIRECTORS.

THE HON. S. G. HENTY, *Chairman*
FRANCIS JOHN BLIGH, ESQ, *Vice-Chairman.*
J. A. Blackwood, Esq. (Messrs McMeckan, Blackwood, and Co.)
Frederick Lamb, Esq. (Messrs Parbury, Lamb, and Co.)

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THE Bank directors have again this week raised their rate of discount, and though there was some difficulty felt at first as to the correctness of their decision, by this time it is already dissipated. Some doubt remains as to whether it would not have been better to have changed from 3 to 4 per cent. at once. But this is a minor point. On the principal question of the rise itself, opinion is, as far as we can test it, conclusively favourable.

The state of the Bank accounts is curious from more than one cause. The liabilities of the banking department are:—

	£
Public deposits	5,214,377
Private do.	14,681,727
Seven-day and other bills	557,427
	20,453,531

and the reserve of notes and coin is 6,461,318*l*, and the coin and bullion 14,457,648*l*. No bad account, but a much less good one than we have been lately accustomed to. We should give a much worse judgment if it were not for one circumstance. The active circulation is now higher than usual. At the corresponding periods of this year and former years (including the Bank post bills) it was—

	£
1865	23,203,757
1864	22,489,710
1863	22,340,809

The circulation has, we believe, been swollen by three concurrent causes:—1st. The elections. It is said to take three quarters of a million to elect the English Parliament, and new 5*l* Bank of England notes have lately been observed in places where they are, to say the least, unusual. Secondly. The harvest, which always operates at this period of the year; and thirdly, the low rate of money. The latter, though not always immediately traceable in the accounts, is sure to have a considerable effect in time. People do not economise their money so much when its of little value as they do when its of great value. The active circulation, as a rule, and subject to exceptions from incidental circumstances, is higher when money is low than it is when money is dear. It is obvious that a casual augmentation of our home circulation is a very different phenomenon from an export of gold and a consequent reduction in the Bank reserve.

As to the future, there is no ground, we think, for expecting any immediate change either way, and the permanent causes remain much as they were. The main fact brought out by recent events is the augmenting delicacy of the market. Year after year our funds are invested more and more closely, and a small change nowadays produces in consequence an effect which formerly it would have been out of reason to expect from it.

AUSTRIA:—THE NEW MINISTRY AND THEIR FIRST DIFFICULTIES.

THE new Austrian Ministry has before them a great opportunity. For four years the Rechberg-Schmmerling administration have done everything that could be done by men full of excellent intentions, and influenced by views in substance sound and progressive:—but unhappily incapable of framing or enforcing a policy in the least adequate to the gravity of the occasion. The ills which afflict Austria seem to be plain to everybody except the persons who govern the country. The Empire is being gradually destroyed by the operation of three principal evils. The first and greatest is the quarrel with Hungary. The second is the quarrel with Italy, and the consequent extravagance in armies of occupation, fortresses without number, and the extinction almost complete over large portions of country of all profitable industry. The third is the retention in most parts of the system of government of notions and maxims, and rules of practice utterly obsolete and wholly insufficient to meet the pressure which is put upon Austria by the other countries in Europe which have got rid of these relics of exploded ignorance. The revolutionary struggle of 1848-9, unfortunately for Austria, had both too much and too little success. It was strong enough to dislodge much of the masonry and cement of the old fabric, but not to clear away the ruins and rubbish. The new ideas gained an extrance, but did not become a power. By the Italian War of 1859 Austria was virtually reduced at one stroke from a first to a second class State. The difference with Hungary has rendered the largest, richest, and most loyal part of the Empire a perpetual burden and menace, instead of being an increasing source of revenue and strength.

Digitized by Google

The quarrel with Italy and the retention of Venetia has compelled the maintenance of a standing army utterly out of proportion to the population, and recruited, therefore, by a conscription so tyrannical and cruel that in no other country would it be submitted to for a month. The persistence in the old maxims of administration has inflicted upon the Empire laws which render the growth of trade and wealth almost impossible; monopolies and protective tariffs which sacrifice the millions of consumers to the few dozen of producers; and a system of finance which seems destined to illustrate every possible case of failure.

This is the dark side of the picture. If no relief could be found, it is tolerably certain that Austria must soon cease to be of any account as a European Power. But there are hopeful symptoms. The last five years have laid at least the foundations upon which measures of real recovery may rest. Parliamentary Government has become not only a law, but a vital institution. The failure of the idea of a central Reichsrath has at last led to the negotiation with Hungary for the revival of its ancient Diet. The intolerable pressure of the taxes required to maintain the armed peace with Italy has at length aroused something like a national resistance; and poverty seems likely to bring about that which common sense ought to have accomplished long ago—namely, the recognition of the Kingdom of Italy and the large consequent retrenchments in the War Department.

The Schmmerling Ministry have really broken down because they only talked about arriving at these great changes. The reconciliation with Hungary did not come, the army was not reduced, and, above all, trade did not extend, nor were the taxes made lighter. We are willing to believe that the leading members of the late Cabinet desired to arrive at the whole of these ends. But good intentions are among the feeblest qualifications of a statesman.

The immediate difficulty is, as usual in Austria, one of finance. The exchequer is empty, the people positively cannot and will not contribute more revenue, a large instalment is due at the end of the year to the National Bank, and if the public credit is not to collapse money must be borrowed somewhere. The sum wanted is not large, the occasion is urgent, and there are not wanting people who will tell the new Austrian Premier that it will be far pleasanter and easier for him to raise two or three millions sterling for a short time at spendthrift rates, than to face the whole question boldly and commence his administration with a policy intelligible at once to the Empire and to Europe.

The two imperative financial necessities of Austria at this moment are, the restoration of the currency and the reduction of the taxes. If these two things cannot be done speedily the condition of the country will go from bad to worse; and they cannot be done unless peace, loyal and lasting, be made with Hungary, and unless the army be largely reduced, which means, of course, the recognition of Italy,—a recognition now so easy after the example set by Bourbon and Catholic Spain. Moving hand in hand with these two political measures, there must be a revision of the fiscal policy of the Empire, in the sense of simplified laws of procedure and the adoption of free trade.

Austria requires a loan of ten millions to rectify its exchequer and carry out certain public works essential to the relief of large districts of the country. If the new Ministry are to do no more than follow in the procrastinating and halting steps of their predecessors, neither ten nor two millions can be raised anywhere. But let Count Mensdorf and his colleagues manifest a fixed intention of overcoming the difficulties of Austria in the way pointed out, and they will at once place the Imperial credit upon an entirely new footing in England and France; and will be able to obtain in foreign markets, and upon reasonable terms, assistance which under an opposite state of things will be wholly withheld. In this country there is the best possible feeling in favour of Austria. She is an old ally. We acknowledge her difficulties and we admire the efforts she has made to overcome them. But we cannot spend half our lives in waiting for the accomplishment in Vienna of changes which in London we should despatch in half a year. There has been quite plenty of talk and temporising: and if Austria is to have help from Western Europe—and help at present means money—she must largely improve the security she has to offer by adopting a policy which in the plainest sense means peace, progress, and retrenchment.

THE VOTE OF THE AMERICAN COMMERCIAL CONVENTION ON THE RECIPROCITY TREATY.

The proceedings of the American Commercial Convention held at Detroit, should they ever be published in this country, will be read with mingled feelings of annoyance and gratification,—annoyance at the slow spread of economic ideas in the United States, and gratification at the friendliness of tone manifested towards Canada. The Convention met on 10th July at Detroit, nominally in order to discuss the commercial position of the country, but really we imagine to calm the uneasiness felt in the West at the prospect of a termination to the Reciprocity Treaty. It will be remembered that Mr Seward, pressed by the irritation of the North at the Southern sympathies of the Canadians, by the justifiable anger excited by the "raiders," and by the Protectionists of New England and Pennsylvania, gave notice to the British Government that this treaty would terminate in March next. The farmers of the Western States submitted, for they shared in the irritation, and thought a little pressure would warn the Canadians not to trespass so greatly on their neighbours' good nature, but they were uneasy nevertheless. They did not wish to see a treaty terminated which had produced a trade valued in nine years at 91,000,000*l*, and they knew well that if the treaty were once got rid of, the Protectionists would take advantage of the opportunity to proclaim a war of tariffs, would levy duties on everything now free, and increase existing duties up to the point of prohibition. They, therefore, as soon as the war was over began to agitate for the continuance of the treaty, and called this Convention in order that a pressure might be exercised upon the Government at Washington. Delegates from all the States attended, representing every trade, and representatives from Canada also entered to discuss, though not to vote. The Convention at last numbered nearly 600 members, who sat four days, and listened to speeches, examined statistics, and discussed plans for material improvements; among them one for constructing a ship canal to evade the falls of Niagara, a project which was adopted by a heavy majority, and which would, if carried out, make a clear water-road from the ocean to Lake Erie. To show that they were not actuated by free-trade opinions, the Convention first of all passed the following resolutions, which it is said were carried "almost unanimously," and which, we imagine, will take away the breath of a few of our English friends:—

"Whereas, owing to the heavy taxation necessarily levied "upon the people of the United States to meet the interest "and expenses of the Government, it has become imperative "upon the Government to nourish and encourage the industrial "pursuits of the nation; therefore,

"Resolved, That agricultural, mechanical, mining, manu-"facturing, and all other branches of American industry "should be alike secured in the enjoyment of a permanent and "remunerative recompense, inasmuch as American labour and "its products is the main source upon which the Government "must rely for its needed revenue to meet the annual demands "upon its treasury, and its only safe dependence.

"Resolved, That in order to perform this duty as well as "meet financial necessity, a discrimination in favour of those "productions upon which American labour depends for its "permanent prosperity should be exercised by the Govern-"ment when imposing duties upon foreign imports, because "when human industry and labour languishes, its ability to "respond to the excise demands must be correspondingly "impaired.

"Resolved, That such action is now more the absolute "duty of the Government, inasmuch as her hosts of heroes "who have on the battle-field vindicated its honour and "maintained our flag, are returning to those pursuits which "they left to defend the country, and to which they now "again look for their livelihood, and which the Government, "in justice to their patriotism and its own wants, should "render as remunerative as possible.

That is to say, the six hundred picked representatives of American commerce have affirmed that if consumers are taxed to benefit producers, *both* will be the richer; that if the grass is only shifted from side to side of the field the mower will get more hay! We are not about to answer such propositions of course, but we quote them as evidence of the long vitality of one of the most singular delusions ever current among men, and also as proofs that the final resolve of the Convention did not spring from any free-trade feeling.

Digitized by Google

This final resolve was on the question of the Reciprocity Treaty, on which from the first the minds of the majority were so made up, that the Protectionist journals accuse them of unfairness. They listened very patiently to an injudicious letter from the American Consul-General in Canada, advising them not to renew the treaty, as if it were not renewed Canada would in two years be compelled to enter the Union; but they cheered the Hon. Joseph Howe, of Nova Scotia, when he declared that the British colonies would remain loyal to their own flag, and in a speech almost rude in its frankness told them that the States had benefited by the treaty much more than the Canadians had, that they had refused while England had conceded freedom of coasting trade, and that they had obtained the profit of "a balance of trade" equal to 11,000,000*l* sterling in nine years. The Americans, it must be remembered, have an idea that unless exports exceed imports, trade is carried on at a loss, but fortunately as it happens the Protectionists could not make use of this rooted prejudice. For as a statist who writes in the "Merchant's Magazine" of New York has shown, the whole trade of these fourteen and a half years between the two countries may be thus summarised:—

Canada imported dutiable goods from United States...	$125,558,434
United States imported dutiable goods from Canada...	26,912,383
Excess of dutiable importations by Canada.....	$98,646,051

The opponents of the treaty were therefore driven to talk about the hostility of the Canadians, but as they did not exactly show why it was imprudent to obtain profit out of one's foes, this argument had little weight, and the Convention passed unanimously the following resolution:—"That "this Convention do respectfully request the President of the "United States to enter into negotiations with the Government "of Great Britain, having in view the execution of a treaty "between the two countries for reciprocal commercial inter-"course between the United States and the several provinces "of British Columbia, the Selkirk settlement, and Vancouver's "Island, based on principles which shall be just and equitable "to all parties, and with reference to the present financial "condition of the United States, and which shall also include "the free navigation of the St Lawrence and other rivers of "British North America."

The notice of withdrawal of the old treaty was not of course condemned, as such a resolution would have amounted to a reflection upon the Government, which the merchants were anxious to avoid. They therefore contented themselves with asking for a new treaty, and there can be no doubt that their resolutions will greatly strengthen the hands of Sir Frederick Bruce. We find it difficult to believe, indeed, that there will be much difficulty in the face of these statistics in rearranging a treaty which all Canadians wish for and all American traders acknowledge (though on false premises) to be most beneficial to the interests of their country. The Republican party, indeed, which on matters of tariff is radically unsound, wishes its repeal; but the President is not Republican, the Democratic party is reorganizing itself, a Free-trade League is in course of formation in New York, and the South, which in the next Congress will have a heavy vote, has little or no interest in protective duties. The West, too, which is beginning to overshadow the East, is already irritated by the excessive costliness of everything which it imports, a costliness produced first by the tariffs, and secondly by the New York Railway monopoly, and the loss of the Canadian route, just when prices are most oppressive, would produce an excitement which the Washington politicians, already embarrassed by the influx of Southern voters, will anxiously avoid. We look forward, therefore, hopefully to the negotiation of a new treaty not differing seriously from the one now in force, possibly to contain more liberal arrangements for navigation, probably to contain some clause facilitating the construction of an international canal.

INDIAN RAILWAYS.

As a method of progress and education, and even as a means of security to the State and of successful government, the guarantee to the early railways of India may perhaps even now be pronounced a success. Without the State guarantee there could scarcely have been any railways in India; and although the gain in its material aspect is or will be great, the purely financial loss by the guarantee will, according to present appearances, be a material set off against it. Guaranteed Indian railways have cost much more than the estimate, and taking the facts of Mr Danvers' last report as a rule for future estimates, the ultimate outlay of capital will yet exceed any existing computation Last year the estimated cost of the guaranteed system o Indian railways was, according to Mr Danvers, 72,300,000*l*; and now it is 77,500,000*l* "for a single line as now sanc-"tioned." A few years hence, by the same rule, it may be 90 or 100 millions or perhaps more for a double line; and whatever the outlay of capital, it would now appear almost a condition that the guarantee must be extended to the entire cost as the only means of raising the money, Mr Danvers shows us very clearly that up to the present time Indian railways have proved singularly profitless adventures if regarded as commercial speculations only, and there is thus little inducement to the European capitalist to provide the money in the absence of such a positive guarantee from the State as will give him a fair annual return for his outlay, together with at least tolerable security for the return of his principal intact. This has hitherto been done, and the money has been forthcoming; but upon the authority of Mr Danvers' figures, we may almost pronounce that further capital could not be raised on any other conditions.

The present system of guaranteed railways in India comprises, according to Mr Danvers, a length of 4,917 miles, of which 3,186 are open for traffic, which it has taken fifteen years to construct. During this fifteen years the capital has been raised at intervals in England, and for a long period was wholly unproductive. The following table, the materials for which are supplied by Mr Danvers, shows with some degree of accuracy, although not with positive precision, what would be, in the absence of a guarantee, the present position of the capitalists from whom the 57½ millions of money have been obtained; and it will be admitted that there is nothing in these facts likely to tempt British capitalists to embark in railway enterprise in India without a guarantee. It will be seen that the capital raised or paid up by the bond or shareholders is given by Mr Danvers as it stood on the 30th April last, and that the net profits are those of the year ended 30th June, 1864. This discrepancy of periods renders the result less precise than might be desired, but it may be assumed broadly upon the facts given, whatever their deficiencies for a precise deduction, that the average net profits of guaranteed Indian railways does not exceed 1½ per cent. per annum upon the capital raised.

	Capital raised, 30th April, 1865.	Net Profits and Losses year ended 30th June, 1864. £	Profits per Cent. on Capital raised.
East Indian	23,942,973	372,947	1·14
Great Indian Peninsula	12,361,628	154,817	1·25
Madras	7,6·9,250	112,067	1·47
Scinde	1,978,310	6,657	0·34
Indus Flotilla	232,905	24,653	10·41
— Punjaub	1,974,157	4,763	0·16
— — Delhi	1,047,489		
Bombay, Baroda, & Central India	5,405,394	Not given.	
Eastern Bengal	1,600,000	41,025	2·50
Calcutta and South-Eastern	454,000	...Deficit 1,821	
Great Southern	885,500	13,717	1·55
	57,621,581	740,446	
Less Loss on Calcutta and South-Eastern		1,821	
Net average profit for the year		738,825	

Deducting 5,405,394*l* (the capital raised by the Baroda Company) from 57,621,581*l*, the total raised at 30th April last, there remains 52,216,187*l*, upon which the net average profit of 738,825*l* earned during the year ended 30th June, 1864, would be at the rate of 1.41 per cent. per annum.

But it will be said, perhaps, that although the profit arising from the working of Indian railways has hitherto been small, it becomes larger year by year, and that in course of time when the entire system shall be completed it will be much larger in proportion to the capital employed than at present. This, no doubt, will in the course of years prove to be the case; but up to the present time it is singular to observe how small the progress has been. The following table, in which the figures of Mr Danvers' last report are also used, shows that placing the mean number of miles in operation, side by side with the net profits, there has been very little, if any, increase of mileage gain throughout the three past financial years:—

	Net Profits Earned and Miles Worked in the Years ended 30th June, 1862. £	Miles.	30th June, 1863. £	Miles.	30th June, 1864. £	Miles.
East Indian	194,782	311	285,426	501	372,947	642
Great Indian Peninsula	86,568	438	143,048	484	154,817	Not given.
Madras	62,180	282	48,493	407	112,067	478

Digitized by Google

	30th June, 1862. £	Miles.	30th June, 1863. £	Miles.	30th June, 1864. £	Miles.
Scinde	5,442	114	18,994	114	6,657	114
India Flotilla	(Not in operation).				34,653	
Punjaub	...		4,372	43	4,763	43
Bombay, Baroda, &c.	20,778	130	62,331	166	Not given.	185
Eastern Bengal	(Not in operation).				41,025	110
Calcutta and South-Eastern, deficiency	194	Not given.	574	Not given.	1,821	Not given.
Great Southern	...		14,196	79	13,717	79

At 30th June, 1862, the net profit on the East Indian, with a mean number of 311 miles in operation, was therefore at the rate of 626*l* per mile per annum, and for the year ended 30th June, 1864, 581*l* per mile per annum, showing a decrease per mile of 45*l*.

During the same interval the net mileage profit of the Madras line has risen from 110*l* to 234*l*, but in this case the sleepers of the permanent way have decayed, and it seems evident that the cost of renewal has not been charged to the revenue accounts. It is quite a question therefore whether the net profit per mile has in fact increased.

The figures relating to the Scinde Railway alone remain for comparison, as all the others are incomplete. In this case the net profit per mile per annum on the same 114 miles was, according to the latest statement, nearly 60*l*, instead of nearly 50*l* at 30th June, 1862, and not more than a third of the mileage profit of 30th June, 1863.

As the State guarantees to these Indian railways a fixed interest, at the rate, on the average, of a fraction less than 5 per cent., it must be clear from these figures that the Government must have advanced large sums of money for interest, and accordingly we find that at the end of the year 1864 these advances amounted to upwards of 13 millions sterling, from which something over 3 millions of profits earned had been repaid, leaving the net advance about 10 millions. Henceforward the annually guaranteed interest will amount to 2,700,000*l* and upwards, minus the net earnings of the railways; and it is thus clear that for some years to come at all events, this debt for interest due by the railways to the State must go on increasing. Mr Danvers points out that year by year, as additional lines are open and traffic is developed, the revenues from the railways will approach nearer and nearer to the amount of the guaranteed interest, and that "at last the Government will not only be relieved of the annual payment altogether, but the railways will begin to earn more than the guaranteed rate, and to discharge their debt for previous advances out of half the excess of profits over 5 per cent."

Mr Danvers makes no attempt to define the period when the State may be relieved from its obligation; and indeed, in the face of a capital expenditure almost admittedly indefinite, and a profit from traffic exceptionally small on the capital already spent, any trustworthy estimate is simply out of the question. Moreover, the excessive depreciation of road attendant on the climate, the low rates of fares and tolls enforced by the State, and the necessarily high price paid for European labour, which is now found essential not only in the construction, but in the working of these railways, all tend to exceptionally small gains; and the full effect of all these elements of profit has yet to be learnt before the obligation by the State on account of the guarantee can be computed with any degree of accuracy. The people of India are taxed to pay the guaranteed interest, and to the people of India will accrue the chief advantages of a system of railways. In that aspect of the question, it would seem the wiser policy for the diplomatist to throw the chief burden upon the tax-payers, in order to teach and enrich India by railway locomotion. But if railways in India are to be made for India and the Indians, without special regard to their profits *per se*, there remains a twofold reason for the unconditional guarantee to the European capitalist who provides the money for their construction.

THE LATE MR. GEORGE ARBUTHNOT.

The permanent Civil Service is a world so unknown to the general public that men who are of the utmost utility in it and are highly valued by the most important persons in the country, often fall out of its ranks almost without notice. Such a case has just happened. Mr. George Arbuthnot, the auditor of the civil list, and one of the principal clerks in the Treasury, died a few days since at his residence at Surbiton. He was a man of singularly quiet and unobtrusive habits, but of great diligence and very great public usefulness. He was deeply interested in economical concerns, and almost the last, if not the last, of his printed official papers, was a controversy with Sir Charles Trevelyan on the Indian currency, in which he was commonly and justly thought to have much the better. Not long since, also, he wrote a series of very elaborate minutes on the intricate effects which our treaty with Japan had had upon its currency and the important consequences to our trade. This and similar difficulties were continually referred to him at the Treasury, and they were of a sort which no one else much liked to undertake. Mr Arbuthnot was private secretary to Sir C. Wood during the panic of 1848, and was then said to acquire a knowledge of the "City" by no means common in the Civil Service. He was a man of quiet and humourous sense, with much knowledge of character, who had watched acutely various changes in financial management. He was singularly respected by all to whom he was known, and a slight peculiarity of manner gave a sort of flavour to his conversation which will not soon be forgotten by those who appreciated it.

BOARD OF TRADE RETURNS.

From returns issued by the Board of Trade it appears that the total value of the exports of British and Irish produce and manufactures during the first six months of the present and two previous years was as follows:—

	£
1863	62,014,197
1864	78,047,866
1865	74,128,638

The decrease in the shipments this year, compared with 1864, amounts to 3,918,948*l*; compared with 1863, however, there is an increase of 12,114,441*l*. In June only, the shipments were:—

	£
1863	11,271,527
1864	13,978,526
1865	13,237,062

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first five months of 1865, compared with the same period of 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease £
Coffee, raw	1,079,157	1,152,872	73,715	...
Wheat	3,983,677	2,358,393	...	1,625,284
Barley	699,286	1,050,057	350,771	...

Other countries	485,511	519,676
Mixed in bond	728,785	706,580
Total of wine	14,066,968	14,443,106

BANKING PROFITS.

In our article last week on this subject, the profits of the London and Westminster Bank were stated, after deducting the amounts set apart for the purchase of Messrs Jones Lloyd's business, &c. The true amount, without such deduction, is 238,405*l.*

It may also be stated that the London and County Bank, which was not one of those enumerated in our article, has for several years set the excellent example of publishing the amount of its acceptances.

LANDLORDS AND LABOURERS.

TO THE EDITOR OF THE ECONOMIST.

Sir,—I know not who may be the contributor of the agricultural article in the Economist of this week, July 22, entitled "Landlords and Labourers," but he appears to me to write with a very imperfect knowledge of his subject, and with a bias which must tend to deprive his statements of any weight they might otherwise possess.

In the name of truth and justice I call upon him to declare from what sources of information or upon whose authority he ventures to assert that "while every landowner regards each labourer as a possible pauper, every game-preserving landowner looks upon each able-bodied labourer in his parish as a would-be poacher." The possibility of the labourer falling into pauperism, and so becoming chargeable, is precisely that which it is the object of the landowner, as of every other employer, so far as he can, to prevent; and, as a matter of fact, large numbers of aged and even infirm persons are found working upon nearly every estate in the country, whose places might be profitably supplied by the able-bodied were the strict maxims of political economy unhappily the rule of our landowners' conduct.

Then as to the charge against game preservers, they constitute 9-10ths probably of the owners of land in England, and will continue so to do as long as the love of field sports and country pursuits remains a leading characteristic of Englishmen; for remember that the use of an innocent and national recreation does not necessarily imply its abuse, and the love of shooting, so common in all classes, need not and ought not to extend to the over-preservation of hares and rabbits. As to the game preserver looking on each able-bodied labourer as a probable poacher, the accusation is as foolish as it is untrue. The best and wisest preventive to poaching is steady employment; inasmuch as the steady worker has neither the time nor the inducement to poach, and if a man is unsteady and declines work, the sooner he quits the neighbourhood the better. The Economist showed conclusively, only a few weeks ago, that cottage building and improvements were simply questions of cost, and its readers were doubtless startled by the magnitude of the capital stated to be requisite to provide improved dwellings for the ill-housed poor. It then stated as follows :—

"It is calculated that one-half the population or 15,000,000 "persons are ill-housed, that improved accommodation is "required for 2,500,000 families, at a cost of, say, 50*l.* per "family; this small outlay would require 125,000,000*l.* of "capital.

Cottage building is not in fact remunerative, but when labourers are able or willing to pay for their cottages, good cottages will be built.

Again this week, the Economist, in an article entitled "The Cottage Loan," points to a scheme by which it is proposed that public money may be borrowed for these purposes, and if the correspondent, whose statements I have ventured to challenge, will apply himself to the practical working out of such a scheme he may do much real good, and promote the great cause of "Cottage Improvement" far more efficaciously than by vilifying a class, who do not deserve them, with charges which are without foundation.—I am, Sir, your obedient servant,

M. P.

July 24.

Agriculture.

AGRICULTURAL POLITICS.

LESSON OF THE ELECTIONS.

It would require far more space than can be afforded in these columns to trace with any fulness and accuracy of detail the various and varying influences which the laws of real property, and the management of land considered as property, have upon the art and practice of agriculture in this country. Such influences are almost entirely restrictive and obstructive. They operate partly in lowering or keeping low the status of occupying farmers, and partly in limiting or preventing the productiveness of the lands they occupy. The relations of landlord and tenant, in regard to agricultural land, are more nearly akin to those which existed in the Middle Ages than persons not practically acquainted with British husbandry, and those who live or try to live by its practice, would readily believe. But though farmers as a class are much below the standard which commercially they should have attained, they are still far beyond the position in which it is the object of the landowners' system to keep them. They have, at least the most intelligent of them have, long been uneasy under the restraints to which they are subjected, and considerable numbers of them are ripe for a strong and earnest resistance against such restraints as soon as they can see their way to render such resistance effective.

Such being the state and temper of the farming classes,—classes having enormous political weight, "if they did but know it,"—let us see what, if any, are the indications afforded by the recent elections that the farmers are discovering their own power, or trying to use it on their own behalf? Hitherto, it may be said, farmers have had no politics. They have been mere adjuncts to their landlords. No practical election agent has yet troubled himself about the farmers on the county registers, except to ascertain "under" what county landed proprietor they rented, and then to attribute so many votes to each landlord as he had tenants. It

Digitized by Google

may be said that, until the last eight or ten years, the farmers have shared in all economical errors which have rendered the landed interest so uniformly destructive to national progress. And to some extent that may be true. But it is the fact that such politics as the farmers then had were simply adoptions of those of the landowners. In the conjoint resistance to measures intended for unfettering the industry and increasing the trade of this country, the farmers, as a class, scarcely dreamed that there were political as well as economical questions between themselves and the landowners which imperatively demand the aid of distinct and special representatives in order that justice may be done to the farmers' interests. Well, the farmers have latterly begun to find this out. They have talked about it for some time, but farmers are slow to act, and, perhaps, the sort of insurrection against the landlord will, which occurred in Hertfordshire in 1864, when a vacancy in the representation of that county was supplied under the pressure of the farmers by the election of a third Tory member, although the leaders of the Tory party in that county would have continued the compromise by which one member of the three was allowed to be a Liberal. The particular question on which those farmers moved was the malt tax, and that they have now discovered to be altogether a false move.

At the late general election more decisive indications that the farmers are discovering their own political power, and are disposed to use it for the maintenance of their own interests, were observable. In one of the divisions of Norfolk, Mr Read, a tenant-farmer, has been returned as member for the county, mainly by way of protest against an open and indiscreet attempt to exercise coercion on his tenants by a Liberal landowner. But it is in Scotland that the signs of this agricultural movement are most apparent, as might be expected, from the more independent position held by the Scotch farmers under the security of leases. Hence, we learn, that Mr Dyce Nicol has been brought in for Kincardineshire; Mr Carnegie, for Forfarshire; Mr M'Lagan, for Linlithgowshire; and Mr Young, for the Wigtown burghs, under the influence of the farmers, and in consequence of their concurrence with the special views of the farmers. But, unquestionably, the most striking illustration is to be found in the contest for Haddingtonshire, or East Lothian, as the county is best known to English agriculturists, to which we adverted last week. There, Mr George Hope, of Fentonbarns, a tenant-farmer of that district, was, without preparation, opposed to the old member, Lord Elcho. Now, no better farmers' candidate than Mr Hope could be found. As an agriculturist, he is eminent amongst the eminent agriculturists of East Lothian. As a political economist of long standing,—for he gained one of the prizes offered by the Anti-Corn-Law League for essays on Free-trade,—he has few equals, and he is an advanced Liberal alike on questions bearing on landed property and in general politics. To any constituency it would be a credit to elect Mr George Hope; if elected by the leading agricultural constituency of Scotland,—perhaps we might say of Great Britain,—he would have been most emphatically the right man in the right place.

His opponent, Lord Elcho, though not eminent as a politician,—even if he can be called a politician at all, for probably neither he nor any one else knows whether he is a Tory or a Liberal,—is a complete representative of landlordism as it exists in Scotland. And perhaps a few passages from Lord Elcho's speech will afford as good an illustration as can be offered of the essential differences between the views of the landlords and the tenant-farmers, where these interests are said to be, and in a sense are, identical.

The prominent topics on which the farmers most insisted are game and its preservation, the Game Laws, and the law of "hypothec," the last being a specially oppressive law of distraint for rent peculiar to Scotland.

On the declaration of the poll Lord Elcho made a long speech; all through he seemed to take the tone of an aggrieved man because he was opposed at all; and as to the particular opposition, he said, "What have I been opposed for? It is on the ground of the Game Laws and of the law of hypothec, and because I, interested as I am in land, and only in land, am supposed not to be the farmer's friend." And this was a tolerably accurate statement of the grounds of opposition. He then tried to show that on the question of Game Laws there was but a slight difference between his views and those of Mr Hope, for *during, and in consequence* of, the election contest, Lord Elcho had been compelled to accede to the present claim of the Scotch farmers that hares and rabbits shall be *excluded* from the operation of the Game Laws. He then refers to the recent report of the Royal Commission of the Law of hypothec, and afterwards added: "Let me say a word as to the result of this contest. It has been a great experiment which has been tried on my poor body.....With reference to this law of hypothec, I may look upon myself as having been a lower animal, on which Mr Hope and those other gentlemen have been trying experiments in vivisection for the benefit of themselves and the high-class tenantry..... ...How was the experiment tried? Why the *Scotsman* said that the East Lothian struggle was one between proprietors and tenants. Let us be thankful this experiment has failed on this account, that if it had succeeded it would have been tried elsewhere, and perhaps extended to England.....You would have had, if this experiment had succeeded, an attempt to set tenants against proprietors; and when they say they wish to have a portion of the farmers represented, *I say, then, you want the proprietors unrepresented.*"

Here we find a representative, not perhaps a very wise one, of the landlord interest, accepts the issue raised by the East Lothian contest, and anticipates, not without apprehension, that farmers may come to act politically in oppostion to their landlords.

That the advancement of agriculture and the elevation of the occupiers of land would result from such an opposition, no one acquainted with modern husbandry can deny.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monteur* has published the following return of the Bank of France, made up to the 3rd inst. The return for the previous week is added:—

DEBTOR:	Aug. 3, 1865. f c		July 27, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0

A comparison between the Bank return of the present week and that of last shows an increase of 18,160,000f in the discounts; a decrease of 962,000f in the stock of coin and bullion; a decrease of 689,000f in the circulation of notes; and an increase of 19,851,000f in the deposits.

It is announced that the number of bonds of the new City of Paris loan, subscribed at Paris, in the provinces, and abroad, was 895,181. This exceeds by 295,181 the number to be issued, but the proportionate reduction to which the subscriptions are to be subjected has not yet been advertised. The delay is said to be owing to the complete examination of the list of subscribers requiring time. As, however, the arithmetical operation of deciding the number of bonds to which each subscriber is entitled is not difficult to perform, and as nothing else is really necessary, the delay occasions some little surprise. The extraordinary facility with which the subscription was made, a single day sufficing for it, is regarded by one part of the financial world as a great success for the Credit Mobilier. But the other and not the least influential part maintains that the success in the long run will be of little real advantage to that establishment. Be this as it may, many of the leading banking and finance companies complain loudly of the City of Paris for having treated with the Credit Mobilier to the exclusion of themselves. They say that the City ought to have divided the loan among all the great houses; or that, its own credit being good, it ought to have tried to place it itself, and have put up the unsubscribed portion, if any, to the competition of capitalists.

On the Bourse the hostility which always exists between the Credit Mobilier and its following, and the great bankers and theirs, has been much embittered by this affair of the loan, and in consequence the efforts of the former to obtain an advance in prices have been energetically combated by the latter.

The liquidation has passed over favourably, the only incident calling for remark being the scarcity of Credit Mobilier shares in consequence of the number of buyers who have taken up their purchases. Sellers for the account were consequently compelled to come on to the market to buy, and a rise of 17f 50c on those shares, for immediate delivery, was the result.

The shareholders of the Comptoir d'Escompte held their annual meeting on Monday. The report presented by the directors stated that the total operations of the year from 1st July, 1864, to 30th June, 1865, amounted to 1,954,004,403f, of which 1,032,491,969f were discounts. The former, compared with 1863-4, presented an increase of 199,608,049f; the latter of 84,112,606f. The deposits in specie and notes received by the Comptoir were 593,396,786f, being more than double those of the year preceding; but this was owing to the payment of calls on the Mexican and Tunisian loans. In the total operations, the Indian, Chinese, and colonial agencies figured for not less than 920,711,237f, which was considerably more than in 1863-4. But in the Indian and Chinese agencies there was heavy loss, in spite, said the report, "of the restrictions made by our agents in their operations, in obedience to the formal orders which we gave them, in prevision of a crisis in India and China, to limit their business to the rigorous wants of our customers, and to the absolute necessities of the situation." The report added:—"This crisis, which we foresaw, and which all commercial Europe dreaded from the commencement of the American war, weighed entirely on us in the course of the year just passed. To an era of prosperity unprecedented in the commercial history of India, there succeeded all at once a period of disasters and ruin, in which old houses whose credit appeared immoveable were forced to suspend their payments. A considerable number of failures took place in all parts of India and China, and the shock they produced was painfully felt in the market of London, and in some of our maritime towns. With whatever prudence we conduct our operations, and whatever the vigilance displayed by our agents, we could not entirely escape in this general disaster. Like all other credit establishments we have paid our tribute to the crisis, and borne our part in the disasters. Nevertheless, in considering the gravity of the circumstances, and the enormous mass of business done, we cannot do otherwise than congratulate ourselves on having been able at this price to support the dangerous trial to which we have been subjected." On the whole, the losses in the Indian and Chinese agencies amounted to 2,604,828f, but were reduced to 1,602,146f by deducting the profits realised in others. In the expectation of loss, a sum of 160,000f was set apart in the first half-year; so that what had to be provided in the second half was 1,442,146f. Happily, however, said the report, "there were in the second half the extraordinary profits of the Tunisian and Mexican loans," the issue of which was made by the Comptoir; and out of these profits that large deficit was made up, and a remunerating dividend was secured. Moreover, hopes were expressed that by the re-establishment of confidence and commercial activity in Indo-China, the agencies will promptly repair their losses. The Indian agencies of the Comptoir are at Calcutta and Bombay; the Chinese at Shanghai and Hong Kong; the others at La Reunion, Guadaloupe and Guiana. The Chinese are the most important. In definitive, the gross profits of the Comptoir, deduction made of its Asiatic losses, were 3,131,371f 92c in the first half-year, 3,387,574f 73c in the second—total, 6,518,646f 65c. The management and outgoings absorbed 1,827,934f 33c, leaving 4,691,012f 32c for the shareholders. Of this sum, 2,200,000f were distributed in February last, and the meeting resolved, on the proposition of the directors, to divide a further sum of 2,480,000f, leaving the balance to be carried forward. The total revenue is, therefore, 58f 50c, which is 11 7-10ths per cent. per share of 500f. In 1863-4, the dividend and interest were 59f; but as the report said, very justly, "if account be taken of the low price of money in the second half of the year, and of the importance of the losses sustained in India, we cannot do otherwise than felicitate ourselves on having been able to maintain the dividend of this year very nearly on the level of that of last year." It had been expected that the report would announce the intention of the directors to demand from the Government authorisation to increase the capital from 40,000,000f to 100,000,000f, but it was silent on that matter.

An Imperial decree suppresses the surcharge of 2f the 100 kilogs (16s the ton) which the Customs tariff establishes on beetroot sugar made in Great Britain and in Holland. As regards the former country, however, the concession is merely *pro forma*, beetroot sugar not being produced there. And this decree imposes a duty of 50f 60c the 100 kilogs on refined sugar imported into France from the said two countries or from Belgium, and one of 54f 15c on sugar candies.

An official return shows that the quantity of beetroot sugar made from the beginning of the season of 1864-5 to the 30th June last was (adding the stock on hand) 164,891 tons, being more by 40,241 tons than in the season preceding. Deducting the quantities taken for consumption, distilleries, and exports, and those sent to bonding warehouses, there remained on hand about 19,000 tons, of which only 10,377 were completely finished. In the bonding warehouses the stock on the 30th June was 16,669 tons, being 13,675 less than on the same date of last year.

A number of the best workmen of the silk fabrics of Lyons and St Etienne have been engaged to go to the United States, where extensive silk manufactories have just been established.

The Charentes Railways Company makes a new call of 75f per share, but notifies that the coupon of interest due on the 1st August will be taken in deduction of it.

The Colonial Credit Foncier announces the payment from the 1st August of interest of 12f 50c on bonds of the first and second issues, and of 15f on those issued in 1865. The payment is being made by the Comptoir d'Escompte.

The interest on Treasury bills was reduced on the 28th ult. to 1½ per cent. for those of from three to five months, and to 2 per cent. for those of from six months to a year.

The report of the Great Company of Russian Railways, presented in the meeting held recently at St Petersburg, stated that the receipts in 1864 from the working of the Warsaw to St Petersburg and Moscow to Nijni-Novgorod lines were 12,222,667f, which were rather less than those of 1863. They were, however, reduced to 11,480,622f by the payment of certain sums due for preceding years, and of the expense of some buildings purchased at St Petersburg. The shares of the Company are 600,000 in number, of 500f each; and it has issued 70,000 bonds of 2,000f, and 18,877 of 500f.

The following is the market report:—

FLOUR.—At *Paris*, firmness prevails. The quotations range from about 45f to 50f the sack of 157 kilogs. Six marks, disposable, yesterday, were 50f. Type Paris, 101 kilogs, 30f.

WHEAT.—In provincial markets arrivals are insignificant and prices have almost everywhere risen. At *Paris*, yesterday, choice was 28f the sack of 120 kilogs; first quality, 27f; second, 25f 50c.

COTTON.—The market at *Havre*, in the week ending Friday, was calm, the sales being only 3,088 bales. The arrivals were 1,263. The stock was estimated at 40,830. The closing quotations were: low New Orleans, 245f the 50 kilogs; good ordinary qualities in Broach, 160f; in Tinnevelly, 155f; Madras, 160f; China, 145f; Jumel, 235f. This week, the market has been calm. Yesterday, America was 247f 50c; Pernambuco, 220f; Oomrawuttee, 170f and 165f; and for delivery from England, 160f; Tinnevelly, 155f; Madras, 172f 50c, 150f, and for delivery in September, 147f 50c; Rangoon, 117f 50c; Bengal, 105f; China, 145f.

COFFEE.—At *Havre*, in the week ending Friday, 100 sacks Gonaives, 88f the 50 kilogs in bond; 80 Cape, 85f; 3,650 Rio not washed, disposable or in the port, 77f to 85f; 277 ditto for delivery, 97f 50c; 70 Guatemala, 87f 50c; 200 La Guayra, non grages, 94f; 50 grages, 107f; 1,000 cwts English Mysore, 92f to 92f 50c; 1,100 cwts Malabar, for delivery by English ship, 95f; 150 bags ditto disposable, high duty, 91f. By auction, some different sorts of damaged were sold. The arrivals were between 12,000 and 13,000 sacks. This week, Port-au-Prince, 83f; Guatemala, 92f 50c; Guayaquil, 92f; Gonaives, 88f; Cape, 85f; Malabar for delivery, 92f 50c; Mysore for delivery, 93f. At *Nantes*, last week, 50 sacks Gonaives, 90f; 200 at prices kept secret. At *Bordeaux*, last week, 500 sacks La Guayra, grages, 104f to 106f; 1,800 Mysore, 118f; 350 Salem, 130f 50c; 300 Rio not washed, 81f; 110 Bahia, at prices kept secret. At *Marseilles*, last week, 4,200 sacks Marcaibo in the port, 85f; 25 San Yago in the port, 105f; 800 La Guayra, 102f; 1,200 yellow, 94f. By auction, 300 sacks Hayti sound, 78f 25c to 78f 50c; 531 Rio sound, 66f 25c to 75f 25c; also some damaged Rio. This week, by auction, some damaged Brazil, 64f 25c to 66f 25c.

SUGAR.—At *Havre*, in the week ending Friday, 30 casks French West India went at 49f the 50 kilogs, bonne quatrieme duty paid; after which, 161 casks went at 48f 50c. Some usine was sold at 51f 75c to 58f; 550 casks Havanna, 31f to 31f 50c, No. 12 in bond; 2,900 ditto, for, it was said, England, at prices not stated. Some damaged Guadaloupe was also sold by auction. The arrivals were about 7,800 casks. No sales this week. At *Bordeaux*, last week, 250 to 300 casks French West India, part usine, on the basis of 49f bonne quatrieme; afterwards various small lots were taken at 47f 50c, 47f 75c, and 48f; also some usine, 60f 50c to 64f; 600 bales Reunion, 51f 50c, bonne quatrieme; 2,410 casks Havana, 30f 50c, No. 12, of Holland. At *Nantes*, last week, 105 bales common Reunion, indifferent quality, 41f. There was no other sale, and prices were left nominally the same as in the preceding week, though with a downward tendency. Stocks were large. This week Reunion, low quality, 41f; French West India at prices not stated. At *Marseilles*, last week, some French West India. 27f 50c (conditions of Marseilles) for bonne quatrieme of Havre; 600 casks Havana, by Spanish ship, in the port, 29f, No. 12; two cargoes Porto Rico, for delivery by Spanish ship, 25f, bonne quatrieme of Havre. By auction, 1,128 casks Havana sound, by Spanish ship, 27f to 31f 25c for the type, 23f 75c to 29f 25c above it. This week, French West India, 27f 50c, bonne quatrieme of Havre; Havana by Spanish ship in the port, 29f, No. 12.

INDIGO.—Business at *Havre* in the week ending Friday was not active,

Digitized by Google

the sales being 3 chests old Bengal, 15 Oude, 1 Manilla, all at prices not stated. The arrivals were 7 chests from England. This week, Bengal at prices not stated. At *Bordeaux*, last week, 17 chests Bengal and 1 Java at established prices.

HIDES.—At *Havre*, in the week ending Friday, 8,422 Rio Grande salted, partly damaged and indifferent quality, went at 43f 50c the 50 kilogs; 392 Monte Video dry, 87f 50c; 2,310 ditto salted cow, 43f to 44f; 500 ox, 60f; 300 Buenos Ayres salted ox, 54f (duty paid); 400 Rio Grande dry, 79f; 525 ditto salted ox, 56f; 272 ditto ox, light, 45f; 1,040 ditto cow, 43f; 100 Valparaiso drysalted, 75f. There were, moreover, three public auctions, at one of which 59,377 were offered, but only 21,431 were taken. In this one, La Plata dry went at 62f 50c to 82f 50c; salted ox, 52f to 55f; cow, 43f 25c to 43f 75c; Pernambuco drysalted ox, 66f; cow, 60f 50c to 61f; salted, 43f; Bahia cow, 68f; Valparaiso salted ox, heavy, 51f; cow, 42f 75c to 43f; Rio Hacha dry ox, 55f to 57f; cow, 58f; drysalted ox, 55f 50c; cow, 57f 50c; Tampico dry ox, 70f to 72f; ditto cow, 69f 50c to 70f; ditto light, 75f; drysalted, 57f 50c to 60f; Spanish salted, 45f. The arrivals were about 11,000. This week, Pernambuco salted, 43f 50c; dry salted, 65f and 64f; Rio Janeiro salted ox, 51f; Monte Video salted cow, 44f and 41f; dry, 77f 50c; ox, heavy, 85f; Rio Grande salted cow, 42f; New Orleans salted, 38f 25c.

WOOL.—At *Havre*, in the week ending Friday, 260 bales La Plata unwashed, went at 1f 25c to 2f 15c the kilog; 32 bales Portugal unwashed, 1f 15c; 35 bales La Plata sheepskin unwashed, 90c to 2f 10c. Some different sorts of damaged were sold by auction. The arrivals were only 56 bales. This week, Monte Video unwashed, 175f to 260f the 100 kilogs. Buenos Ayres unwashed, 197f 50c and 180f.

TALLOW.—The demand at *Havre*, on the week ending Friday, was somewhat more active, and owing to advices from Paris prices slightly improved. 50 casks of La Plata very ordinary went at 48f 50c the 50 kilogs; 250 at 50f to 50f 25c; 335 for delivery, 51f to 51f 25c; 5 tons New Orleans, disposable, 49f 50c. There were no arrivals. This week, New York, 51f, 50f 87½c, and 51f; La Plata, disposable, 51f, and for delivery, 51f 50c. At *Paris*, yesterday, the 100 kilogs, 101f 50c, octroi duty not included.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 90 deg., 54f and 53f the hectolitre.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs, copies of two French imperial decrees of the 24th of July last, making the following alterations in the sugar duties:—1. The tax of 2 francs per 100 kilogrammes (decimes included) imposed upon the importation of raw beetroot sugar from Great Britain and Holland is abolished.—2. On and after the 1st August, the following duties (decimes included) are fixed upon refined or candied sugars imported into France, from Belgium, Great Britain, and Holland:—Refined sugar, in loaf or grain, equal to refined, 50f 60c per 100 kilogrammes; refined sugar, candied, 54f 15c per 100 kilogrammes.

Mr J. R. Scott, the Registrar of the London Coal Market, has published the following statistics of the imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during July, 1865:—

IMPORTS.

A report on the trade of the Sandwich Islands by Mr Synge, the British Consul-General at Honolulu, just published, gives a very favourable account of their general progress, and points out especially the advantages likely to accrue from their intercourse with our settlement at Victoria, Vancouver's Island. The cultivation of sugar seems to have been found extremely profitable, and to have made proportionate progress. The export, which was 3,005,603 lbs in 1862, and 5,292,121 lbs in 1863, advanced to 10,414,441 lbs in 1864. New plantations are being constantly started, and the shipments this year are expected to be far larger than the last, while the area of land still untouched by cultivation, but capable of profitably producing sugar, is supposed to be 10 to 20 times the quantity of non-yielding. Under these circumstances, and looking at the other capabilities of the country, a belief is expressed that the importance of the Sandwich Islands has been much underrated.

An elaborate report which has just been issued by Messrs Lockhart and Co., the well-known metal brokers in Liverpool, shows the wonderful progress of the Scotch iron trade in the last quarter of a century. It exhibits a reduction of "56,000 tons in the stock of pig iron in Scotland in the last six months—that the present stock bears about the same proportion to the wants of the trade, as the stock in 1852 bore to wants of that period—namely, about 7½ months consumption, and the price in that year rose more than 100 per cent., and the average price for five years 1853-57 was 70s 6d per ton." It also shows that whilst "the demand from America can hardly be worse than during the first half of this year, other important outlets are opening up to the iron trade of this country." And "the only reserve stock anywhere of consequence to draw from is Scotch pig iron." It reveals the remarkable fact, that the largest deliveries of pig iron on record, were in 1864, when the highest price was 67s 3d, and the average 57s 3d per ton with the value of money averaging 7½ per cent. Notwithstanding the stoppage for some time of the consumption of pig iron by the late "strike" among the puddlers in England and Scotland, and the forestacking of exports to the United States, the stocks of pig iron have already this year decreased in the North of England 11,000 tons, and in Scotland upwards of 60,000 tons. According to official returns, the total shipments last week were 17,179 tons, against 13,138 tons in the same period of last year, thus showing an increase of 4,041 tons. Such is the enlarging demand for iron both at home and abroad that it is now fairly in excess of the supply, and we are again enabled to congratulate the country upon the beginning of another period of prosperity in this important trade.

During the week ending Aug. 2, the imports of the precious metals were:—Gold, 192,658*l*; silver, 141,004*l*. The exports were:—Gold, 19,813*l*; silver, 54,237*l*.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,203,757	Securities	32,151,027
Public Deposits	5,214,377	Coin and Bullion	14,457,648
Private Deposits	14,681,727		
	43,099,861		46,608,675

Dated the 3rd August 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,508,814*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£613,563
An INCREASE of Public Deposits of	443,475
A DECREASE of Other Deposits of	1,258,086
A DECREASE of Government Securities of	14,700
A DECREASE of Other Securities of	112 373
A DECREASE of Bullion of	46,031
An INCREASE of Rest of	28,004
A DECREASE of Reserve of	620,791

The principal feature in the above account is the large decrease of 1,258,086*l* in the other deposits. As, however, there is an increase in the public deposits, and a diminution in the other securities, the reserve is only 620,759*l* lower. The change in the bullion is comparatively unimportant, and con-

Digitized by Google

sidering the amount of gold known to have been sent in during the week, shows that coin is being withdrawn for the harvest.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,762,268	£ 23,378,393	£ 22,340,809	£ 22,489,710	£ 23,203,757
Public deposits	5,152,221	6,161,358	5,577,268	5,155,704	5,214,377

Coin and bullion	16,231,784	17,956,938	14,848,185	12,877,433	14,457,648
Bank rate of discount	3½ p c.	2 p. c.	4 p. c.	8 p. c.	4 p. c.
Price of Consols	91¼	93¼	92⅝	89⅜	89⅝
Average price of wheat	78s 2d	57s 8d	45s 11d	44s 0d	42s 10d
Exchange on Paris (short)	25 5 10	25 17½ 25	25 25 35	25 20 30	25 15 20
— Amsterdam ditto	11 16 17½	11 15⅝ 16	11 16 17	11 13 19	11 18½ 19
— Hamburg (2months)	13 7⅝ 8	13 8 8⅛	13 8½ 8⅝	13 10 10⅛	13 10 10⅛

In the corresponding week of 1855, great anxiety had prevailed with reference to the approaching harvest, in consequence of the stormy weather. It had been resolved in Parliament to raise 7,000,000*l* in Exchequer bills. Commercial advices from India and China were more favourable. Trade was very brisk in Paris, and greater activity prevailed in the money market. The new French loan was quoted at 3¼ premium.

In 1862, the enrolments that were being made in some parts of Italy, and the activity of the Garibaldian agents, excited fears lest some untoward operations should compromise peace, and excite civil war in the dominions of Victor Emanuel.

In 1863, news of the riots in New York, on the ordering of the conscription by President Lincoln, had been received. Intelligence from Mexico had announced the progress of the French arms. In London, money was easy.

In 1864, the preliminaries of peace, and an armistice for three months, had been signed by the Plenipotentaries of Austria, Prussia, and Denmark, at Vienna. The decision of the French Emperor with reference to the Suez Canal had been published. Advices from Turin had stated the reduction of the capitation tax from 36 to 20 piastres. The missionary question between Sir Henry Bulwer and the Porte had been amicably settled. In America, President Lincoln had issued an order for 500,000 men to serve for one year. A battle had taken place before Atlanta in which which the Confederates had been defeated, with great loss. The demand for discount was moderate. The Bank had raised its rate to 7 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 1,785,597*l*; in 1862, a deficiency of 3,846,241*l*; in 1863, a deficiency of 5,362,946*l*; and in 1864, a deficiency of 7,246,072*l*. In 1865, the deficiency is 6,988,091*l*.

Discount and Money Market.—The directors of the Bank of England at their weekly Court yesterday, raised the minimum rate of discount from 3½ to 4 per cent.

Although this alteration was not altogether unexpected, it created a certain amount of surprise, since the bullion movement throughout the week had been favourable and the demand for money hardly above the average. It is understood, however, that some large withdrawals of gold are impending for Spain and possibly Brazil, and hence the directors have considered it desirable to take the earliest steps to protect their specie reserve. In the general market the effect has been to induce the dealers to act with increased caution, and only in exceptional cases business is transacted below 4 per cent. In all quarters, however, the supply of money appears be ample. Annexed are the current terms for paper of various dates :—

30 to 60 days	4	per cent.
3 months	4	per cent.
4 months	4½	per cent.
6 months—Bank bills	5	per cent.
6 months—Trade ditto	5	per cent.

Money has been in fair demand on the Stock Exchange, at 2½ to 3 per cent.

The discount houses and joint stock banks have made the usual advance in their rates of interest on deposits, the terms being now as follows :—

Joint Stock Banks	*3	per cent.
Discount houses at call	3	per cent.
Do. with seven days' notice	3¼	per cent.
Do. fourteen days	3½	per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*.

The biddings for Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were—to Calcutta, 163,500*l*; to Madras, 2,000*l*; and to Bombay, 100,000*l*. The minimum prices were, as before, 1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. Tenders on Calcutta and Madras at 1s 11⅝d will receive about 75 per cent., and on Bombay at 1s 11⅞d about 70 per cent.

There were no bullion operations at the Bank either yesterday or to-day.

The amount of bills on India for which tenders will be received on the 16th instant at the Bank of England is 250,000*l*, of which not more than 100,000*l* will be drawn on Bombay.

The return of the Bank of France for the week shows the following changes :—

	£
Increase.	
Commercial bills	720,000
Treasury balance	50,000
Current accounts	792,000
Decrease.	
Cash in hand	40,000
Advances	8,000
Notes	8,000

The subjoined notification has been issued by the authorities of the Bank of England :—

Bank of England, August 1, 1865.

Notice is hereby given, that in order to prepare the dividends due on the 10th October, 1865, the balances of the several accounts in the following funds will be struck on the night of Friday, the 1st September, 1865, viz. :—New 3 per Cent. Annuities, Reduced 3 per Cent. Annuities, Annuities for 30 years, Annuities for terms of years, India 4 per Cent stock. On Saturday, the 2nd September, the above-named funds wil be transferable without the dividend due on the 10th October next Bank stock shut Wednesday, 13th September; open Wednesday, 11th October.

Of the 50,000*l* Queensland 6 per cent. debentures offered for sale by the Union Bank of Australia, 317,100*l* was tendered for at prices ranging from par to 103*l* 5s. All tenders above the sealed minimum of 101*l* 11s 6d, representing a rather small total, were accepted.

The following are the rates of discount in the principal cities of the Continent :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	4
Madrid	9	...
Hamburg	...	3
St Petersburg	6	6½

English Funds.—Consols have been rather flat this week, owing to the rise in the Bank rate. The final price last Friday was 90⅛ to ¼, whence a decline occurred on Thursday to 89¾ to ⅞. A recovery then ensued, and the last official quotation this afternoon was 89⅞ to 90, both for money and the present account, 90 to ⅛ for September. After regular hours the tendency slightly improved. Reduced and New Three per Cents. left off at 89½ to ⅞.

India Five per Cents. were firm at 105. Exchequer bills show no change at par to 4s prem.

Foreign Stocks.—The principal movement in the foreign market has been a fall in Spanish descriptions, and in several other cases the quotations are also lower. Brazilian Four-and-a-Half per Cents., Buenos Ayres bonds, Confederate Cotton Loan, Italian and Mexican securities, have been especially dull. On the other hand, there has been a rise in Anglo-Turkish Six per Cents. and the Consolides, and in Venezuelan descriptions. The new Turkish Five per Cent. scrip remains heavy, at 6 to 5½ discount. The general business in this department has been of little importance.

The closing price of French Three per Cent. rentes on the Paris Bourse this evening was 67f 85c, showing a rise on the week of about three-eighths per cent.

The details are published of the proposed conversion and unification of the Turkish internal debt, arranged through the General Credit Company of London.

RAILWAYS AND OTHER SHARES.—The railway market continues to be chiefly influenced by the announcement from time to time of the proposed dividends. Midland stock has fallen, on an intended reduction from 7 per cent., the amount paid last year, to 6½ on the present occasion. South-Eastern and Metropolitan also show a decline, and Sheffield remains heavy. Great Eastern stock has receded, owing apparently to the distrust caused by the existing dissensions at the Board. London and North-Western at one period declined, but afterwards experienced a recovery. North British stock has been exceptionally steady. North-Eastern stocks improved this afternoon on the announcement of the intended dividends.

In colonial descriptions, Indian guaranteed securities were dull, while Canadian shares have been fairly supported.

Foreign railways have been little dealt in, and in some cases show a slight decline.

In the miscellaneous market, the chief movement this week has been a fall in the preference shares of the Atlantic Telegraph Company from ¼ to ⅜ premium, at which they stood last Friday, to 2 discount this morning, on the apprehended failure of the attempt to lay the line. Later in the day there was a rally to 1½ to 1 discount, and the final price was 1½ dis., sellers. During the last two days the question has excited the greatest interest in commercial circles, and it is generally feared that the present fault will be found irremediable at least for the present year. Telegraph Construction shares have likewise receded. The rate of insurance on Atlantic Telegraph shares at Lloyd's, has risen to fifty to sixty guineas per cent.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—In consequence of the rise in the Bank minimum, the rates this afternoon were generally higher.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The only arrivals of gold since our last circular are:—The Shannon, with 163,000*l*, from the West Indies; the City of Baltimore, with 6,000*l*, from New York; the Oneida, with 14,800*l*, from the Brazils. Owing to the rise in the rate of discount on the 27th ult. a sum of 133,000*l* in bars was purchased by the Bank, and sovereigns to the amount of 23,000*l* were also sent in. It is not likely, however, that any arrivals of the next day or two will follow, there being orders sufficiently important to absorb all gold that may come to hand this week.

Silver.—The Shannon has brought 102,500*l* from the West Indies. The greater part of the Doré portion has been sold at 61d per oz standard, and the fine at 60⅜d per oz standard. The accounts from India being decidedly more favourable, some demand for bars for export thither may probably be experienced, and the quantity of fine silver held here being but limited, a slight rise in the price is not unlikely. The Nyanza takes 10,000*l* to Madras.

Mexican Dollars.—The China exchanges having materially advanced has caused a better demand for this coin, and the price has greatly improved. About a fortnight ago sales were made at 59½d to 59⅝d per oz, and the rate gradually rose to 59⅞d per oz until the arrival of the Shannon, when the limited amount brought by her was sold at 60d per oz, and a further purchase has been effected at 60⅛d for the out-going mail to China of the 4th inst., which vessel will take 109,300*l* from Southampton.

Exchange on India for banks drafts at 60 days' sight is rather more in favour of the buyer. Our quotations are—on Calcutta and Madras, 1s 11¼d to 1s 11⅜d, and on Bombay, 1s 11½d to 1s 11⅝d. Of the Council drafts, for which tenders were received yesterday, 75 per cent. was allotted to Calcutta and Madras, at 1s 11⅜d, and 70 per cent. to Bombay at 1s 11⅞d; the rates and proportions on 19th July being—on Calcutta and Madras at 1s 11⅜d, 54 per cent., and on Bombay, at 2s, in full.

India Government loan notes show no alteration this week. The prices are—of the 5½ per Cents., 109 to 111; of the 5 per Cents, 101 to 103; and of the 4 per Cents., 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9⅜d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 5s per oz, last price; 5-franc pieces, 4s 11½d to 4s 11⅝d per oz., nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Wellesley has arrived from Melbourne with 17,000*l* in gold.

PUBLIC COMPANIES.—The meeting of the London and County Bank took place on Thursday, when the directors' report was unanimously adopted. The net profits for the half-year ended 30th June last were stated at 106,821*l*. A dividend and bonus, equal to 15 per cent. for the half-year, were declared, and 13,660*l* carried forward to new profit and loss account.

The report of the London and Glasgow Engineering Iron Ship Building Company, issued in anticipation of the meeting on the 10th inst., recommends a dividend and bonus equal to nearly 10 per cent. per annum, free of income tax.

The meeting of the London and South-Western Bank took place on Monday. The available balance of profit was stated at 5,805*l*, and a dividend was declared at the rate of 6 per cent. per annum, free of income tax.

At the meeting of the Estate Company held on Tuesday, the available balance was stated at 7,133*l*. A dividend at the rate of 15 per cent per annum was declared, leaving 3,526*l* to be carried forward.

The meeting of the Fore-street Warehouse Company took place on Wednesday, when a dividend was declared at the rate of 10 per cent. per annum for the half-year.

At the meeting of the City of London Brewery Company held on the 2nd inst., a dividend of 4 per cent. for the half-year was declared.

The meeting of the Gas Products Utilising Company took place on Wednesday. The net profits was stated at 7,499*l*, and the available balance at 4,162*l*. A dividend at the rate of 10 per cent. per annum was declared, free of income tax.

Digitized by Google

The meeting of the British Indian Tea Company took place on the 28th ult., when a dividend of 3 per cent. was declared, making, with the interim dividend paid in January last, a total distribution at the rate of 7 per cent. per annum.

At the meeting of the Midland Banking Company held on Friday, the dividend declared was at the rate of 5 per cent. per annum, free of income tax.

At the half-yearly meeting of the United Kingdom Railway Rolling Stock Company (Limited) held on Saturday last, a distribution was ordered at the rate of 7 per cent. per annum, free of income tax, leaving a balance of 299*l* to be carried forward.

At the meeting of the English, Scottish, and Australian Chartered Bank, the accounts for the half-year showed a balance of profit amounting to 22,538*l*, and a dividend was declared at the rate of 7 per cent. per annum, free of income tax.

At the meeting of the Joint Stock Discount Company held on Monday last, the proposed dividend at the rate of 6 per cent. per annum was approved.

The first half-yearly meeting of the Eastern Assam Company was held on Monday. The directors' report was adopted, and a dividend of 10 per cent. per annum, less income tax, was declared.

At the meeting of the Nowgong Tea Company of Assam held on Monday, a dividend was declared at the rate of 10 per cent. per annum, less income tax.

At a meeting of the Australian Trust Company held on the 1st inst., a distribution of 4 per cent. for the half-year was ordered.

At a meeting of the St James's Hotel Company (Limited), held on Saturday last, a dividend was declared, equal with a previous interim distribution to 10 per cent. per annum from the opening of the hotel.

The General Credit and Finance Company of London announce this afternoon an interim dividend of 2s per share, free of income tax.

At the Electric and International Telegraph Company's meeting to-day, a dividend was declared of 4½ per cent. for the past half-year; and at one of the Mediterranean Extension Telegraph, at the rate of 3 per cent. per annum.

By the prospectus of the Menai Park and Hotel Company (Limited) which has just been issued, it is proposed to raise a capital of 70,000*l* in 10*l* shares, for the purpose of purchasing an estate of some eighty acres, situated on the edge of the Menai Straits, twenty acres of which were some time since laid out and planted by the late Sir Joseph Paxton at a very large outlay, under instructions from the Chester and Holyhead Railway Company. It is proposed to sell for building purposes a portion of the estate (seventy acres) fronting nearly a mile of the Straits: the sum expected to be realised by such sale will fully repay the shareholders for the cost of the hotel itself.

The report of the second annual meeting of the Land Securities Company held on Monday last has reached us. The amount lent on mortgage is 173,208*l*. The report, as a whole, shows steady progress.

The report of the Societe Financiere D'Egypte recommends a dividend at the rate of 5 per cent. per annum. On the 30th of April the profits of the society amounted to 472.492 francs 51 centimes, but the losses incurred were from 230,000 to 240,000 francs, hence the amount carried to the debit of profit and loss was 232,492 francs 51 centimes.

The International Sugar Refineries Company, with a capital of 100,000*l*, is announced. Contracts have already been entered into for the erection of suitable buildings, and interest at the rate of 5 per cent. will be paid on all moneys paid up until eighteen months after the incorporation of the company.

RAILWAY DIVIDENDS.—The proposed dividend on Bristol and Exeter Railway stock for the half-year is at the rate of 4½ per cent. per annum, and on North Staffordshire at the rate of 3½. In the former case, the distribution at the corresponding period of last year was the same as at present proposed; in the latter it amounted to 4 per cent. per annum.

The dividend on Great Northern Railway stock for the half-year will be officially proposed at the rate of 5½ per cent. per annum, against the same distribution for the corresponding period of 1864.

The proposed dividend on the Midland stock is announced at the rate of 6½ per cent. per annum, against 7 per cent. last year.

The following dividends are proposed on the various descriptions of North-Eastern Railway stock:—

	Per Cent.		Per Cent.	
Berwick	5½	against	5½	in 1864
York	5	—	4½	—
Leeds	3¼	—	3⅛	—
Carlisle	7⅜	—	7	—
Darlington	8¼	—	8	—

FAILURES AND MERCANTILE EMBARRASSMENTS.—A further call of 40*l* per share has been made on the contributories of the Leeds Banking Company, making, with the 70*l* already called, a total of 110*l* per share.

The Manchester papers mention the failure of Messrs W. Parker and Co., manufacturers of Carlisle.

MISCELLANEOUS.—The Central Railway Company of Venezuela (Limited) have received advices by this mail from their agents of the receipt from their Government of the 9 per cent guaranteed interest for the six months ended the 24th June.

The subjoined announcement has been forwarded to the Stock Exchange:—

NEW GRANADA DEBT.—Messrs Baring Brothers and Co., have received by this mail, on account of New Granada dividends, remittances as follows:—From Custom-house of Santa Marta, 6,826*l* 5s 1d; from Custom-house of Cartagena, 226*l*; from Custom-house of Sabanilla, 331*l* 11s 7d; total, 7,385*l* 16s 8d.—London, July 29, 1865.

With reference to the Venezuela loan of 1864, the following notice has been received from the General Credit Company:—

VENEZUELA SIX PER CENT LOAN, 1864.—The General Credit and Finance Company of London (Limited) are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 8th July, 1865, of duties collected as follows, on account of the above loan:—Per statement No. 37, from La Guayra, 13,543.17 dols; per statement No. 38, from La Guayra, 6,692.29 dols; per statement No. 48, from Puerto Cabello, 5,466.40 dols; per statement No. 49, from Puerto Cabello 20,110.33 dols; total, 45,812.19 dols.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about three-tenths dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 108½ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of wheat on sale at Mark lane, to-day, was very moderate. Owing to the recent unfavourable weather for the progress of harvest operations, the trade was very firm, and an advance of 2s per quarter took place in prices, as compared with Monday. The accounts at hand this morning, however, are not unfavourable, the late rains, beyond delaying the progress of the harvest, having been productive of but little injury to the crops. In the foreign wheat trade, there was also increased firmness, resulting in an improvement in the quotations of 1s to 2s per quarter. Barley was in short supply, and the trade ruled firm, at fully late rates. Malt changed hands at an advance of 1s to 2s per quarter from Friday last. For oats, there was a good demand, and prices improved 6d per quarter. Beans and peas met a slow sale, at late rates. The flour trade was firm, at very full prices. There was no *new* home-grown produce offered for sale. This week's imports amount to 12,810 quarters of wheat; 4,000 barley; 31,670 oats; 210 sacks and 11,120 barrels of flour.

At Liverpool, this morning, the trade for wheat and flour was quiet, at Tuesday's currency. At Wakefield, an advance of 1s per quarter took place in the value of wheat.

The business done in cotton at Liverpool this week has been to a moderate extent only, the total sales reaching 42,000 bales, of which spinners have taken 30,000 bales, speculators 3,000, and exporters 9,000 bales. Quotations are reduced ⅛d to ¼d per lb. The imports of the week amount to 64,000 bales. Holders remain sanguine, expecting to do better shortly, and decline to accept any material decline. The market closes to-day quietly, but steadily. Sales, 6,000 bales.

A telegram from Bombay, via the Persian Gulf, states that the cotton trade was quiet. The export for the week ending July 29 was 16,000 bales. Freight, 20s per ton.

Our latest advices from Alexandria, viz., to July 19, report a firm market for cotton, at 17½d to 17¾d per lb, free on board, for fair open-ginned produce. Freight to Liverpool was ½d per lb. The stock of cotton on the 1st of July was 278,458 cantars.

Scarcely any change has taken place in the value of colonial and foreign grocery produce this week. As regards tea and sugar, the tendency of prices has been somewhat in favour of buyers; but, on the other hand, coffee, cocoa, and rice have readily commanded last Friday's currencies. Last week, duty was paid in London on 1,115,812 lbs of tea, whilst the export for the week ending July 20 amounted to 490,002 lbs, making a total of 1,605,814 lbs, against 1,165,599 lbs last year.

From Messrs Trueman and Rouse's circular, we extract the following:—

IMPORTS and STOCKS of SUGAR and COFFEE at the Principal European Ports, for the Six Months ending June 30, 1864 and 1865.

	Sugar.			
	Imports.		Stock, 30th June.

The accounts at hand from Greece this week, in reference to the probable extent of the *new* crop of currants, are favourable. At latest date the weather had been fine, and assuming that it continued favourable to the in-gathering of the crop, it was estimated that from 55,000 to 60,000 tons of produce would be secured, of excellent quality, and in fine condition. The following statistics are from Messrs Ferguson, Horsley, and Co.'s circular:—

Crops of Currants from 1860 to 1864.

	1860	1861	1862	1863	1864

The quarterly public sales of cinnamon were held on Monday. The supply brought forward was small, and an advance of 2d to 5d per lb took place in prices, as compared with April last. First pile Ceylon realised 1s 7d to 3s; second ditto, 1s 5d to 2s 4d; third ditto, 1s 4d to 1s 10d; fourth ditto, 1s 1d to 1s 5d per lb. The supply comprised 1,490 bales Ceylon, and 30 bales Tellicherry produce.

The public sales of colonial wool will be commenced on the 17th inst.; the arrivals amount to 117,440 bales, consisting of 34,385 bales from Sydney; 15,714 Victoria; 10,477 Van Diemen's Land; 4,116 Adelaide; 501 Swan River; 34,753 New Zealand; and 17,494 bales from the Cape of Good Hope. The trade both for home-grown and colonial wool rules quiet, on former terms.

The Liverpool public sales of East India wool were brought to a close on Wednesday. The supply offered was 13,750 bales, nearly the whole of which was disposed of. Good and fine qualities realised an improvement of 1d to 2d per lb. as compared with the rates current in April; but in the value of inferior wools no change took place.

The accounts at hand from China being favourable, the silk trade continues in a most inactive state. Prices must be considered, in a great measure, nominal; but they have a strong downward tendency. The sold and unsold stock here on the 1st instant was 6,519 bales China, and 5,090 bales Bengal produce, against 19,060 bales, and 6,763 bales respectively, in 1864.

Hemp is steady, at 28*l* to 29*l* for clean Russian qualities. Flax continues firm. For jute and coir goods, there is a moderate demand, at late rates.

Comparative Statement of Hemp, Flax, and Jute on hand in London, on August 1, 1863, 1864, and 1865, Dealers' Stock included.

In reference to the state of the leather trade last month, Messrs Powell and Co. write as follows:—The trade of the past month in leather has shown scarcely any change: the demand has continued at about the recent average extent, and prices are as nearly as possible stationary. The stocks of heavy sole leather have somewhat increased, but of almost all other articles they are limited. The market for raw goods has been steady and the alterations in prices slight.

As regards the tobacco trade last month, Messrs Grant, Hodgson, and Co. observe:—The market has presented no change, and transactions in American descriptions chiefly confined to limited selections for immediate consumption. Sales have not exceeded 400 hhds of all sorts, including 116 hhds taken for the navy. For home trade, buyers have directed their attention almost exclusively to fine and choice qualities, stock of which is becoming circumscribed, and holders disinclined to make sales at any concession on current rates; middling and ordinary sorts, both leaf and strips, remain neglected. For exportation, inquiries were made for good and fine Western leaf, but at prices considerably below the views of holders. In most growths, other than American, a large business has been transacted at very full prices, and in some instances at an advance on previous rates. Imports, 568 hhds. Deliveries, 876 hhds, against 939 hhds in the corresponding month of last year. Stock, 19,484 hhds, against 15,610 hhds in 1864; 16,966 hhds in 1863; 20,643 hhds in 1862; 22,375 hhds in 1861; and 14,466 hhds in 1860.

Scotch pig iron has advanced to 54s 9d, cash, mixed numbers. Most other metals have ruled inactive, and, in some instances, prices have shown a slight downward tendency. The stock of spelter on the 1st inst. was 7,503 tons, against 7,115 tons on July 1, current year, and 12,091 tons on August 1, 1864. The following table, from L. Th. van Houten's circular, relates to Banca tin in Holland:—

	1865	1864	1863
	slabs	slabs	slabs
Import in July	10,741	2,616	4,408
Previously this year	105,019	99,672	60,770

Total stock	200,467	162,753	137,869
Quotation, July 30	56fl	62½fl	74½fl

Turpentine is firmer, French spirits having realised 48s on the spot, and 46s per cwt for arrival. Linseed oil is now worth 32s, and foreign refined rape, 47s per cwt, on the spot. Tallow has commanded more attention, and St Petersburg Y.C. is now selling at 41s 9d to 42s per cwt, on the spot.

Owing to considerable arrivals from New Orleans and other ports in the Southern States, as well as to somewhat extensive Government sales, the cotton trade at New York, during the week ending July 22d, ruled heavy, at a decline in prices of 3 cents per lb. In the trade for cotton goods, however, there was a fair amount of activity, and the quotations ruled firm. For woollen goods, there was an active demand; certain descriptions—chiefly fancy cassimeres—sold freely, somewhat extensive purchases having been made by buyers from the West and South-West at enhanced rates. Silk goods continued scarce, and commanded, consequently, high prices. As regards the various articles of food and drink, the markets, with the exception of those for flour and spring wheat, which, in consequence of a less active export inquiry, were much quieter, were tolerably firm, the business transacted having been of fair average extent at full quotations. The iron trade was very firm on higher terms, and there was also a good demand for tin plates at very full prices. The rates current for money were as follows:—Prime short-dated paper, 6½ to 7; three to four months' ditto, 7 to 8 per cent. The stock of bullion in the banks on the 15th ult. was 4,080,100*l*.

THE COTTON TRADE

LIVERPOOL—August 4.

At the time of our going to press, our usual Liverpool cotton report had not arrived. By telegraph we learn that the market has been inactive throughout the week; the demand very general but chiefly limited to the supply of immediate wants, more holders having offered their stocks freely, though without great pressure to sell; the week closes with a general decline; sales, 42,110 bales; speculation, 3,100; export, 8,790; actual export, 8,905; imports, 63,992; estimated stock, 347,580. Quotations—Sea Island, 24d to 69d; Upland, 14½d; New Orleans, 10d to 21d; Maranham, 15d to 20d; Bahia, 16d to 18½d; Egyptian, 8d to 24d; Surat, 5½d to 6d per lb.

Digitized by Google

LONDON—August 4.

Subjoined is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The demand has been very languid throughout the week, but the firmness of holders has prevented any general decline in prices; Western Madras, however, below good fair, and all the grades of Coconada, have declined ¼d, and Bengal ¼d per lb, from the quotations of Friday last.

NEW YORK—JULY 22.

The arrivals of cotton this week have been somewhat extensive: they amount to 15,219 bales, 6,700 bales of which are from New Orleans, 977 Savannah, and 2,332 bales by rail. This additional supply raises the quantity received since Sept. 1, 1864, to 286,900 bales. The trade since our last report has exhibited less firmness, and prices show a fall of 3c per lb. The sales are estimated at 10,000 bales. Government have disposed of 5,953 bales at public sale. The rates now current are as follows:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a full average business doing in goods this week, both for home use and export, and prices have been well supported. The iron trade has shown rather more firmness, and the demand for coals for export purposes has been tolerably active.

MANCHESTER, Aug. 3.—The same dull, languid aspect of the market has presented itself which has been visible for the past three or four weeks. Still little, if any disposition is shown to take lower prices, but manufacturers are slightly lessening their production as contracts cease. The effect of this is cheifly seen in 32's twist, which is quite ¼d per lb down. But other classes remain nominally steady, though without buyers. There has continued a partial desposition to purchase for China if rates should give way The non-receipt of overdue India letters has caused buying for the East to be very limited. Printing cloths, T cloths, and domestics have become almost unsaleable.

BRADFORD.—There is very little demand for wool, and where sales are effected staplers have to submit to lower prices. Many, however, decline to accept lower rates. The worsted yarn department is exceedingly quiet. The piece department, except in plain goods, is very active. Makers of fancy geods, and especially of lenos, glaces, and mohair reps, have received large orders and are well employed, and will be so for months to come. Prices are rather easier. The trade is sound and healthy.

LEEDS.—As the woollen cloth trade here is rather more active than it was a few weeks ago, there is more business doing directly between manufacturers and merchants than usual. Hence the public markets in the cloth halls have been rather quiet, yet the tone of the markets has been firm as to prices, and a fair amount of business has been done.

ROCHDALE.—There is a slight falling off in the flannel trade just now, so far as the public market is concerned, but there is a satisfactory amount of business doing to order, and the manufacturers keep well employed. The Yorkshire goods trade keeps rather flat, and prices are nominally as last week. Woolstaplers adhere to last week's quotations, but manufacturers purchase cautiously.

HUDDERSFIELD.—Selections of black doeskins, middle-priced fancy trouserings, and some few fancy coatings are made, and business has assumed a more lively aspect. There is rather more doing by the local country houses, and travellers' orders are getting heavier and more numerous.

CARDIFF.—The ironworks have been better employed, and an increased quantity of puddled iron has been turned out. Stocks of iron, more especially puddled, have been considerably reduced. Rails are quoted 6*l* 17*s* 6d to 7*l* 7*s* 6d per ton at the works, and bars 7*l* to 7*l* 5*s*. In tin plates few makers have made any large sales, in consequence of buyers declining to give the full advance asked.

LEICESTER.—There is no material change in the hosiery trade. Business at the warehouses continues tolerably brisk, and manufacturers confine their production to orders on hand, no stocks being allowed to accumulate. In the country districts business is in a satisfactory state, and the operatives are fully employed. Worsteds command high rates, spinners being well engaged. There is not much doing in wools, and late quotations are maintained.

NOTTINGHAM.—The lace trade remains on the whole quiet. Some orders are in the market for the Continent, and also for America. For the home market there is about an average business doing, the present time being usually a quiet season of the year. Black silk laces are selling well; there is a little doing in narrow edgings. A few silk mechlins are also finishing. Manufacturers are in most cases finishing to order, and no stocks are allowed to accumulate. The hostery trade continues active, most departments being well employed. Orders are plentiful and the operatives continue well employed.

SHEFFIELD.—A brisk trade is being done with Germany in saws, files, and heavy tools generally, owing to the reduction in duties; but the steel orders are scarcely an average. There is a fair amount of activity in the trade with America in cutlery and tools; but the steel orders are still small.

BIRMINGHAM.—The foreign trade continues quiet; there is very little being done to the East Indies, and still less to America; the foreign West Indian trade is about up to the average, and a few fresh orders have just been given out on account of the North of Europe. Upon the whole, the prospects of our trade for the autumn are encouraging.

WOLVERHAMPTON.—There is a fair demand for finished iron for the Continent and most foreign markets, the orders for the United States continuing on the low scale which has prevailed for nearly the last twelvemonth, but not showing any further reduction. The home merchants are, however, buying more freely.

Digitized by Google

GLASGOW.—Iron—The pig iron market has been most inanimate. Warrants are quoted 54s 3d cash; G.m.b., No 1, 55s; No. 3 54s 3d.

BELFAST.—Prices of linens continue very firm, with a large business doing. The yarn market has been quiet, and few sales have been made either in linens or tows. In some cases a slight concession has been made, but no dispositon is evinced to press sales.

DUNDEE.—Our flax market continues quiet, quite as much in consequence of the advance required by holders as from want of buyers. There is no change to report in jute, prices being without alteration, if any, rather firm. In linens there is more doing, and for some descriptions of jute goods there is a good demand, for which an advance of fully 10 per cent. has been paid.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 22.—Moderate supplies of flour have been received this week. Owing to a material falling off in the export demand, the market has ruled heavy, and inferior descriptions of flour have suffered a considerable fall in price, whilst superior brands have also changed hands at slightly reduced quotations. Winter wheats, on the other hand, have been in good request, both for home use and export, at an improvement in value of 8 to 10 cents per bushel; but spring wheats have sold slowly on rather easier terms. For corn, there has been a good demand at enhanced rates; but at the close of the market, to-day, there was a tendency to lower prices. The receipts have amounted to 69,866 barrels of flour, 394,350 bushels of wheat, and 573,836 bushels of corn. The following are the prices current:—Flour—State, superfine brands, $5.50 to $5.95; State, extra brands, $6.35 to $6.50; State, choice brands, $6.55 to $6.75; Ohio, common brands, $7 to $7.25; Ohio, fancy brands, $7.30 to $7.40; Ohio, good and choice extra brands, $7.45 to $8.25; Michigan, Indiana, Wisconsin, &c., $5.50 to $6.75; Genesee, extra brands, $7 to $9; Missouri, $9 to $11.75; Canada, common, $6.50 to $6.70; Canada, good to choice extra, $6.75 to $8.30 per barrel. Wheat—White Michigan, $1.90; amber ditto, $1.75 to $1.80; red winter Western, $1.60 to $1.70; amber spring, $1.41; Milwaukee Club, $1.38 to $1.40; Racine spring, $1.36 to $1.39. Corn—Unsound Western, 80c to 81c; sound mixed ditto, 82c to 83c; yellow ditto, 84c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The quantity of English wheat received fresh up to our market this week, coastwise and by land carriage, has been very moderate, but in good condition. Several parcels of new have come to hand, and been disposed of at from 45s to 55s per quarter, the latter quotation being for Talavera qualities, which are not quite equal to last year's crop. On Monday, the trade was heavy, at 1s to 2s per quarter less money, compared with that day se'nnight; but, on Wednesday, owing to the unfavourable state of the weather for harvest work, factors refused to sell, except at 1s to 2s per quarter more money. At that amount of improvement, very little business was transacted. The supplies of barley have not increased, nevertheless they have been equal to the wants of buyers. In prices, no quotable change has taken place. The malt trade has continued steady at late rates. There has been a good business doing in oats at full currencies. Beans and peas have been in short supply, and limited request, on former terms. In the value of flour, no change has taken place.

The progress of harvest work has been much retarded by the changeable state of the weather. As yet, only a limited quantity of wheat has been stacked even in our forward districts. The cutting of barley, oats, and rye, has progressed steadily.

On the continent, wheat has been steady in price, with only limited quantities on offer. Barley and most other kinds of produce have sold at full currencies. The American markets come somewhat heavy.

In Scotland, nearly all kinds of produce changed hands slowly, on firmer terms.

The Irish markets have been dull for wheat and most other articles, at about stationary prices.

The accounts, generally, in reference to the total crop, continue favourable.

The supply of English wheat on sale at Mark lane to-day was limited. The trade—owing to the recent unfavourable weather for harvest operations—was very firm, and an advance of fully 2s per quarter took place in prices. For foreign wheat, the market was firm, and the quotations improved 1s to 2s per quarter. Barley was in short supply, and Monday's currency was well supported. Oats were in good demand, at an improvement of 6d per quarter. Beans and peas moved off slowly at late rates. There was a steady demand for flour, and prices ruled firm.

Mr George Dornbusch reports the arrival off coast of 29 cargoes of grain. The demand for wheat has been steady, at 1s per quarter more money, but maize has given way 1s to 2s. In the value of other produce very little change has taken place. Cotton-seed has sold at 6l 15s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is devoid of animation, and quotations have, with few exceptions, slightly given way. Consumers are buying to a fair extent, while speculation has quite subsided in the face of heavy arrivals and an increasing stock. About 2,400 casks West India had sold to yesterday, including many parcels by auction. Barbadoes, 29s 6d to 35s; grainy and crystallised West India, 37s 6d to 40s 6d per cwt, the refiners taking liberal supplies. The stock in London has been further augmented to 100,000 tons. Last year it was 90,750 tons, and in 1863, 108,300 tons. The deliveries keep steady, being 28,350 tons above those of 1864.

Mauritius.—On Tuesday, there were 8,664 bags brought to auction, when about two-thirds sold at previous quotations, chiefly low to good soft brown, at 27s to 31s. A few lots grainy white, 11s 8d duty, at 41s per cwt.

Penang.—4,980 bags, offered in the public sales, were partly disposed of, at 30s to 34s 6d, for brown and yellow.

Foreign.—169 casks Porto Rico partly met with buyers: brown and low to good yellow, 32s to 36s. Privately, about 400 casks Porto Rico have sold at 34s to 35s. A floating cargo of Havana has sold for a near continental port, No. 14, at 26s 9d; 600 boxes, No. 9½ to 10, at 23s 6d, for the United Kingdom.

Refined.—The market is steady and prices unchanged.

MOLASSES.—150 puncheons West Indian have sold at 15s to 16s per cwt.

COCOA.—Very high prices have been paid for the better qualities of Trinidad. 596 bags partly sold at 64s to 114s 6d for ordinary to fine. 363 bags Grenada sold at 52s to 56s per cwt.

TEA.—The market continues dull and unsettled, the public sales having passed off flatly. There were 22,600 packages in the catalogues, including many parcels printed "without reserve." Low black leaf congou sold at 11d to 11½d; common to fair red leaf, 11½d to 1s 1½d. Medium to fine Fow Chow scented orange pekoe, 1s 11d to 2s 3d per lb.

COFFEE.—Coloury kinds have been in good demand at full prices. 652 casks, 1,370 barrels and bags plantation Ceylon sold steadily: pale and small berry to fine, 81s to 92s. 1,536 bags native went off steadily at 67s 6d to 68s 6d; 34 casks ordinary 66s to 66s 6d. 326 casks, barrels, &c., Jamaica sold from 68s to 82s. 279 packages East India brought full rates. Shipping sorts of foreign are still dull. Of 4,550 bags Bahia, the sound portion was taken in at 56s 6d to 69s. Sea-damaged sold at proportionate prices. 913 bags Guatemala part sold at 70s to 75s. Some floating cargoes of foreign have sold on low terms, including inferior Rio at 50s 6d per cwt.

RICE.—1,362 bags white Bengal, offered by auction, were taken in at 15s 9d for good white of the new crop, and since sold at rather less. Transactions of fair extent have occurred in soft grain by private con-

SPICES.—The public sales have not presented any new feature of interest. 2,712 bags black pepper were only partly sold: Penang at 3d; Singapore at 3⅛d. 16 cases low ordinary mace brought 1s to 1s 2d. 239 bags pimento realised 2½d to 2¾d per lb. 410 barrels Jamaica ginger sold freely at 59s to 103s per cwt for ordinary to good bold quality.

CINNAMON.—The quarterly sales held on Monday went off at 2d to 5d per lb advance on Ceylon, the fine qualities showing the greatest rise. 1st sort, 1s 7d to 3s; 2nd sort, 1s 5d to 2s 4d; 3rd sort, 1s 4d to 1s 10d; 4th sort, 1s 1d to 1s 5d per lb. The quantity offered was 1,500 bales, which chiefly sold. 39 packages Tellicherry went at 1s 4d to 1s 8d per lb.

SALTPETRE.—Some business has been done in Bengal by private contract: refraction, 8¼ to 3¼, at 24s to 24s 9d short prompt. 1,200 bags Bombay at 21s to 23s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to July 29, with STOCKS on hand.

Delivered last week, 272 tons.

COCHINEAL.—865 bags partly sold, Honduras silvers being rather cheaper, from 2s 10d to 3s 5d. Teneriffe silvers, 3s 2d to 3s 3d; blacks, 3s 4d to 4s per lb. The stock is 4,920 serons, against an average of 7,780 serons in the three preceding years at this period.

BARK, &c.—Current prices: English, per load of 45 cwt delivered, in London, 16*l* 0s to 17*l* 15s; ditto Coppice, 16*l* 10s to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 0s to 7*l* 0s; ditto Coppice, 6*l* 10s to 7*l* 10s; French, 0*l* to 0*l*; Mimosa, chopped, 9*l* to 10*l* 10s; ditto, ground, 9*l* 10s to 11*l*; ditto, long, 7*l* to 9*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto, Sardinian, 8*l* 10s to 9*l* 10s; Valonia, Smyrna, 16*l* to 20*l* 0s; ditto, Camata, 16*l* to 20*l* 0s; ditto, Morea, 12*l* 0s to 18*l* 0s; Divi Divi, 10*l* to 13*l* 10s; Myrabolans, 12*l* to 14*l* 10s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 20*l* 10s to 21*l* 10s; ditto, free cubes, 26*l* to 28*l*; ditto, Cutch, 24*l* 0s to 25*l* 10s per ton.

DRYSALTERY GOODS have been inactive. 900 bales low Gambier offered by auction, were taken in at 21s to 21s 6d per cwt.

METALS.—The business of this week has been of very moderate extent, and the markets remain quiet. No change of interest has transpired in the iron trade. A few contracts have been made in spelter at 21*l* 15s to 22*l*. Present stock 7,500 tons, against 12,100 tons in 1864. Foreign tin is firm, but not much in demand. Straits, 90*l* 10s per ton cash. Copper and lead are inactive.

JUTE.—7,900 bales offered by auction sold at full rates to 10s advance, from 10*l* 5s to 22*l* per ton for low to fine. A large business is reported done for arrival.

MANILLA HEMP.—Several parcels have sold during the week at 30*l* 10s to 32*l* 5s per ton, and the market is steady. Russian firm. Petersburg clean, 29*l* 10s to 29*l* 15s per ton.

OILS.—Olive and common fish oils remain dull. Rape is in good demand at higher rates. Foreign brown 44s on the spot and forward. Refined on the spot, 47s. English, 46s. Linseed oil steady, at 32s to 32s 3d on the spot; 32s 9d for delivery to the end of the year. Palm steady, at 36s 6d Fine cocoa-nut in better demand: Cochin, 45s; Ceylon, 43s per cwt.

PETROLEUM.—The trade are showing more disposition to buy as the season approaches, and higher prices have been paid, fine refined selling at 2s 5d to 2s 6d per gallon on the spot; for delivery last three months 2s 4½d is demanded; there are free buyers at ½d less. Crude is worth 20*l* per tun. Crude coal oil is saleable at 10*l* 10s to 11*l* per tun, and refined at 1s 10d to 2s 2d per gallon.

TALLOW.—The market has been firmer. 1st sort, Petersburg Y.C., 41s 9d to 42s; last three months, 42s 9d to 43s; January to March, 43s 3d to 43s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, July 31, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet, some of the lower qualities being cheaper. 3,496 bags Mauritius only partly sold. Several parcels of plantation found buyers, making the week's business 3,200 casks.

COFFEE.—970 cases 298 bags East India were chiefly disposed of at 80s 6d to 86s 6d. 369 bags native Ceylon were bought in and afterwards sold at 67s 6d for good ordinary.

COCOA.—322 bags Trinidad sold by auction on previous terms.

RICE.—2,435 bags white Bengal were taken in at 14s to 15s. Privately more inquiry for soft grain and cleaned sorts.

DRYSALTERY GOODS.—279 bales Bengal safflower sold at 4*l* 2s 6d to 7*l*. 1,180 bags Cutch were bought in, chiefly at 26s per cwt.

SHELLAC.—700 chests partly sold at rather irregular quotations.

OILS.—258 casks Cochin cocoa-nut offered by auction were taken in at 46s. 144 casks palm partly sold at 36s 6d to 36s 9d per cwt.

TALLOW.—Town advanced to 44s 6d. The public sales, comprising 780 casks, went off at previous rates to 1s per cwt advance.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains unaltered. In Dutch crushed some resales have taken place of H.R., No. 1, at 28s 9d present delivery.

GREEN FRUIT.—The price of lemons is well supported. Some parcels Naples, Palermo, and Lisbon, sold by Keeling Hunt at public sale, fully sustained the advanced price obtained of late. More speculative inquiry for Barcelona nuts. The reduced stock on hand, and the advance in invoice price on the other side, has caused an improvement of 1s to 1s 6d per bag. Para in moderate demand.

ENGLISH WOOL.—Very little doing.

COLONIAL WOOL.—The next public sales will commence on the 17th July. 117,440 bales have arrived. Market quiet, but firm.

FLAX.—Market very steady.

HEMP.—Market very firm, and a large business done during the week.

SILK.—The market still continues extremely quiet, and no further advices from China.

TOBACCO.—Our market continues in an extremely inanimate condition, but prices remain unchanged.

METALS.—Nothing of moment has occurred in metals during the week. Copper is still very dull of sale without alteration of prices. Iron is barely so well in demand for manufactured, but Scotch pig has rallied from 3d to 6d per ton. Tin is very heavy, and in English there is a disposition to give way in prices to secure orders. Spelter and lead are steady in price, with moderate demand. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	6
Fat by ditto	2	1½
Yellow Russia	43	6
Melted stuff	34	6
Rough ditto	19	0
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, July 31.—The total imports of foreign stock into London, last week, amounted to 21,100 head. In the corresponding week in 1864 we received 14,014; in 1863, 13,194; in 1862, 13,074; in 1861, 13,191; in 1860, 13,484; and in 1859, 11,626 head.

Our market to-day was heavily supplied with foreign stock; but the quality of both beasts and sheep was very middling. Sales progressed slowly, but at full prices. The arrivals of English beasts fresh up this morning were again very moderate for the time of year, and most breeds came to hand in middling condition. Prime Scots, Shorthorns, Devons, &c., sold readily at fully late rates. Otherwise, the beef trade was in a sluggish state, at about last week's currency. The value of the primest stock ranged from 5s 4d to 5s 6d. In some instances 5s 8d per 8 lbs was realised. The supply from Scotland was prime; from Ireland very moderate With English sheep we were again but moderately supplied, and we observed no improvement in their general quality. Downs, half-breds, and Lincolns changed hands freely at full prices. Inferior breeds were dull, and rather cheaper. The top quotation was 6s 4d per 8 lbs Lambs—the supply of which was only moderate—were in fair request at late rates, viz., from 6s to 7s per 8 lbs. There was a fair demand for calves, at full quotations. The top price was 5s 2d per 8 lbs. The demand for pigs was in a sluggish state on former terms.

SUPPLIES.

	Aug. 1, 1864.	July 31, 1865.
Beasts	5620	5940
Sheep and lambs	27120	27950
Calves	368	429
Pigs	340	450

THURSDAY, Aug. 3.—Our market, to-day, was but moderately supplied with beasts, chiefly in middling condition. Prime breeds sold freely, at very full prices. Otherwise, the beef trade was heavy, at late rates. The show of sheep was rather limited for this time of year. Downs and half breeds moved off steadily, at full quotations. Long-woolled sheep were a dull inquiry, at late rates. Lambs commanded very little attention, at from 6s to 7s per 8 lbs. The demand for calves was far from active, at late currencies. Pigs commanded full prices. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

Lambs, 5s 4d to 6s 4d.

HAY MARKETS.

THURSDAY, Aug. 3.—The supplies of hay and straw on sale have fallen off. The trade is far from active: nevertheless prices have somewhat improved.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Old hay	100 to 126	105 to 130	100 to 126
New hay	95 to 112	100 to 115	95 to 112
Old clover	95 to 140	120 to 147	120 to 140
New ditto	100 to 126	105 to 130	100 to 126
Straw	28 to 33	30 to 36	28 to 33

HOP MARKET.

FRIDAY, Aug. 4.—The supply of hops on sale continues unlimited. For all qualities the trade is firm, and late rates are well supported. A parcel of new Kent produce has been disposed of at 10*l* per cwt.

Digitized by Google

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Aug. 4.—Moderate supplies of potatoes are on sale. The trade is steady, at the annexed rates:—Regents, 60s to 120s; Shaws, 50s to 80s per ton.

COAL MARKET.

FRIDAY, Aug. 4.—Wallsend Haswell, 20s; Hetton, 20s; South Hetton, 20s; Hartlepool. 19s 9d; Braddyll's Hetton, 19s 3d; Cassop, 19s 3d; Hetton Lyons, 18s; Heugh Hall, 19s; Kelloe, 19s; Eden Main, 18s 6d; Pensher Primrose, 18s 6d; Russell's Hetton, 18s 9d; South Hartlepool, 19s; South Kelloe, 19s; Tunstall, 18s; Tanfield Moor Butes, 14s; Wylam Moor, 16s 6d; West Wylam, 16s; Bates Tanfield Moor, 14s per ton. Ships at market, 37; sold, 22; gas contracts, &c., 11—34; unsold, 3; ships at sea, 25.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 4.—Our public sales of East India wool terminated on the 2nd inst., and the result must on the whole be considered satisfactory. Of the whole quantity offered, viz., 13,750 bales, only a few hundred bales were withdrawn. The advance on all good wools is quoted at from 1d to 2d per lb if compared with April sale-rates; inferior wools, however, have not changed in value. Next week the sales of miscellaneous kinds of foreign wool will be held from the 7th to the 10th inst.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 4.—The market is moderately attended, weather brilliant. Wheat slow at Tuesday's rates. French flour 6d dearer; American unchanged. Beans, oats, and oatmeal moderate retail sale, at late rates. Very little doing in Indian corn; mixed American, 31s 9d; Galaty, 33s.

The Gazette.

TUESDAY, Aug. 1.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 22nd of July, on 12,079 miles, to 742,657*l*, and for the corresponding week of last year, on 11,660 miles, to 711,275*l*, showing an increase of 419 miles and of 31,382*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,462 miles, to 601,869*l*, and for the corresponding week of 1864, on 8,176 miles, to 574,036*l*, showing an increase of 286 miles and an increase of 16,059*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 31.—In the share market to-day continued dulness prevailed, and English railways and American securities were weaker at the close, but banks and miscellaneous shares were rather firmer, and the other descriptions closed without average change of prices. Of the English lines, Midland relapsed 1, and Lancashire and Yorkshire, North-Western, and Metropolitan ½ each; and Manchester, Sheffield, &c., declined ½, Great Western and South-Eastern ¼ each, and Great Northern (A stock) a further 1. In colonial, Great Western of Canada shares (paid up and new) improved ½ each; and Eastern Bengal further declined ½. In foreign, Dutch-Rhenish receded ⅛. In American, United States (5-20) further declined 1, Illinois Central (shares) ¾, and Erie shares (paid up) ¼. In British mines, East Caradon improved ½, Prosper ¼, and Chiverton a further ½; and Wheal Seton and Wheal Bassett declined 5 each, and West Chiverton, 2½. In foreign mines, Frontino Gold further improved ½; and Luisitanian receded ¼.

TUESDAY, Aug. 1.—In the share market to-day the business was little better than nominal in amount, but colonial and foreign railways showed steadiness at the close, while in the other descriptions the movements of the closing prices in either direction were nearly equally balanced. In English railways, Great Northern (A stock) recovered 1½, and Midland ¾; Chatham (Metropolitan Extension) advanced 1¼, and Caledonian ½; and Edinburgh and Glasgow and Great Western (South Wales) declined 1 each, Great Eastern and North Staffordshire ½ each, Midland a further ¼, and South-Eastern further ¾. In colonial, Great Southern of India improved ½, and Buffalo and Lake Huron ⅛. In foreign, Dutch-Rhenish recovered ⅜, and Great Luxembourg and Lombardo-Venetian improved ¼ and ⅛ respectively. In American, Illinois Central (6 per cent.), and Pennsylvania Railroad (2nd mortgage) advanced 1 each, and Marietta bonds are now quoted ex coupons. In British mines, Great Laxey improved ½ and East Caradon a further ½, and North Roskear declined 2, Nangiles 1, and Great Wheal Vor ½. In foreign mines, Frontino Gold further improved ½, and St John del Rey receded 1.

WEDNESDAY, August 2.—In the share market to-day there was no particular feature, the tone of yesterday being generally maintained, but with the exceptions of a tendency to weakness in British mines, and to firmness in miscellaneous shares. In English railways, Metropolitan District (paid up) improved ½, Lancashire and Yorkshire ¼, and Great Northern (A stock) further 2½; and South Devon declined 1, Great Western ¼, Midland (9*l*) ⅛, and ditto (stock) and South-Eastern a further ¼ each. In colonial, Great Indian Peninsula and Bombay and Central India improved a ½ each, and ditto (F shares) ¼; Buffalo and Lake Huron relapsed ⅜, and Great Western of Canada shares (paid up and new) receded ½ each. In foreign railways and mines no alterations are recorded. In American, United States (5-20) advanced ¼; and Virginia (6 per cent.) declined 1. In British mines, Wheal Buller improved 1, and East Lovell ½; and South Caradon declined 15, West Seton 5, and Chiverton ¼.

THURSDAY, August 3.—In the share market to-day dulness was very general, which affected with flatness all the descriptions except banks and miscellaneous shares. In the English railways, North-Western improved ¼, and Great Northern ½; ditto (A stock) relapsed 1, and Metropolitan declined 1¾, ditto (extension) ⅛, Great Eastern and North British ½ each, Great Western (Oxford) 1, and Midland a further ¼. In colonial, Bombay and Central India and Great Indian Peninsula relapsed ½ each. In foreign, Imperial Mexican receded 1, and Antwerp and Rotterdam, Dutch Rhenish, and Lombardo-Venetian ⅛ each. In British mines, Great Wheal Vor improved ½, and Wheal Buller further 4, and Stray Park and Wheal Mary Ann declined 2 each, Nangiles 1, and South Condurrow ¼. In foreign mines, Frontino Gold improved ⅛, and United Mexican declined ½.

FRIDAY, Aug. 4.—The railway market was inactive to-day, the principal stocks showed no variation, with the exception of a decline of ¼ per cent. in Metropolitan. Lombardo-Venetian Railway shares were inquired for, while East Indian stocks shows a drooping tendency. Other foreign and colonial lines were quiet.

Examined and found correct { J. B SMITH, A. RICARDO, T. W. KOUGH, JOHN O'MEARA, J. N. M'KENNA.

By these accounts the proprietors will observe that the net profits of the bank for the half-year just closed amounted to £94,416 13s 10d, as compared with a profit of £88,567 1s earned for the corresponding half-year of 1864.

The Directors declare their ordinary and extraordinary dividends at the same rate as for the previous half-year.

For the half-year ending 30th of June the dividend on the old shares is accordingly at the rate of 8 per cent. per annum, with an extra dividend of 16s per share, making together £2 per share for the half-year, and the dividend on the new shares is declared pro rata at £1 13s 4d per share, the dividends on both being free of income tax.

The increase to the rest or undivided profits will, therefore, after the payments of these dividends, amount to £21,083 7s 2d on the half-year, a result which, having regard to the unusually low rates of interest prevailing during the half-year, the Directors consider extremely satisfactory.

The proprietors will have observed by the balance sheet to the 30th of June that the general business of the bank has increased considerably during the past half-year, affording the most satisfactory evidence of the appreciation by the public of the policy of the Directors and of the facilities for business which a large capital enables this bank to offer its customers.

Two Special General Meetings of shareholders have been convened for the 22nd and 23rd of August next respectively, to enable the Directors to issue 10,000 £50 shares (£30 paid up on each), which it is intended to distribute amongst the shareholders, without payment, in the nature of a bonus of one new share to each proprietor for every four shares standing to his name in the register of the Company on the 31st day of August, 1865.

On payment of the call, due on the 22nd of July, the shares heretofore called "new shares" become assimilated to the old shares of the bank, £30 being paid up on each £50 share, new and old.

The 10,000 shares now proposed to be issued as Bonus Shares, and to be presented to the shareholders without any charge or payment whatever, will be in every respect equivalent to the existing shares of the bank, so that, when this operation is carried out, the capital of the bank will consist of 50,000 £50 shares, £30 paid up on each, or one million and a half sterling; whilst the rest, now amounting to £807,600 15s 6d, although to be diminished by £300,000 transferred to capital account, and £73,333 6s 8d dividends now declared, will stand at £434,267 8s 10d.

The Directors have nothing to add to these statements except the assurance of their continued confidence in the progressive prosperity of the bank, and to inform the proprietors that the dividends and extra dividends are now payable at the Head Office, 13 Old Broad street, E.C., and at the several branches of the bank.

Approved by the Court,
HARVEY LEWIS, Chairman.
M. J. POWER, Secretary.

London, July 31, 1865.

N.B.—The dividends are now payable.

REPORT OF THE DIRECTORS OF THE

CONSOLIDATED BANK

(Limited), presented to the proprietors at the Half-yearly meeting, held in Manchester, July 26, 1865.

The Directors beg to lay before the proprietors the Statement of Accounts and Balance Sheet of the Bank for the half-year ending 30th June, 1865.

	£	s	d
After payment of current expenses, interest to customers, income tax, Directors' remuneration, and providing for rebate of interest and bad debts, there remains a net profit on the half-year of	59,984	18	5
The unappropriated balance on 31st December, 1864, was	1,827	15	7
Making together a total of..... available for distribution.	61,812	14	0

With this sum your Directors propose to deal as follows:—

	£	s	d
To declare a dividend at the rate of 10 per cent. per annum, and a bonus of 2s per share (being an additional 5 per cent. per annum), free of income tax, requiring	£45,000 0 0		
To carry to reserved fund.....	10,000 0 0		
To carry forward to next account	6,812 14 0		
	61,812	14	0

With the addition now proposed, and with interest which has been added at the rate of 5 per cent., the reserved fund will stand at £70,065 16s

J. P. HEYWOOD, Chairman.

LONDON AND SOUTH-WESTERN BANK (Limited).

Report presented to the Shareholders at the Fourth Ordinary General Meeting, held at the London Tavern, Bishopsgate street, on Monday, the 31st July, 1865.

The Directors have the pleasure to submit to the proprietors the balance sheet for the half-year ending 30th June last.

Notwithstanding the low rates of interest which have prevailed during the past half-year, and the consequent decrease of profits, it will be seen from the balance sheet that, after making provision for bad and doubtful debts, the gross profits for the half-year, including the sum of £1,660 18s 4d brought forward from last account, amount to £19,517 12s 3d, and that, after deducting interest paid to customers and all charges for expenses, there remains an available balance of £5,805 9s 1d.

The Directors recommend that £4,686 13s 4d be appropriated to the payment of a dividend at the rate of 6 per cent. per annum, free of income tax, that £856 11s 7d be set aside on account of rebate of bills not due, and that the balance of £312 4s 2d be carried to profit and loss new account.

The Directors have to report a large and steady increase of business, and avail themselves of this opportunity to remind the shareholders that by exerting their influence in extending the operations of the bank, and introducing customers, they will largely contribute to its prosperity.

The dividend will be payable at the head office, or at any of the branches, on Tuesday, 8th August next.

We have compared the above statements with the books and vouchers at the head office, and with the returns received from the several branches, and have found the same correct.

(Signed) EDWIN H. GALSWORTHY, HENRY HOWELL HEWLINGS, } Auditors.

Dated this 27th day of July, 1865.

The foregoing report having been taken as read, and the seal of the Company affixed to the register of transfers, the following resolutions were proposed and unanimously adopted:—

1. That the report and balance sheet and statement of accounts now read be received and adopted; that a dividend for the half-year at the rate of 6 per cent. per annum, free of income tax, be declared and paid on the old and new shares.

2. That the thanks of the meeting be given to the Auditors, Messrs Edwin Henry Galsworthy and Henry Howell Hewlings, for their careful attention in auditing the account, and that they be presented with fifty guineas for their valuable services.

3. That the thanks of the proprietors be given to the Board of Directors for the able manner in which they have conducted the affairs of the Company.

4. That the best thanks of the proprietors be given to George Augustus Addison, Esq. (the General Manager), to George Plater, Esq. (the Sub-Manager), to the branch managers, and other officers of the bank, for the zeal and ability with which they have discharged their respective duties.

(Signed) J. F. VESEY FITZGERALD, Chairman.

The Chairman having quitted the chair, it was resolved and carried unanimously:—

5. That the cordial thanks of this meeting be given to the Chairman for his able and courteous conduct in the chair. (Signed)

GEORGE PAULET, Vice-Chairman.

The meeting was afterwards made extraordinary, when the following resolutions were proposed and unanimously adopted:—

1. That in lieu of the words "January" and "July" in the 44th Clause of the Articles of Association, the words "February" and "August" be substituted; and in lieu of the word "January" in the 73rd Clause of the Articles Association, the word "February" be substituted.

2. That in lieu and in substitution of clause 79 of the Articles of Association of the Company, the following clause be adopted, viz.:—

"From and after the 31st day of December, 1864, there shall be paid to the Directors, as and by way of remuneration for their services, the sum of £2,000 per annum, and such remuneration may, from time to time, be increased by the shareholders at any general meeting."

At the Half-yearly Meeting of the proprietors, held on Thursday, the 3rd August, 1865, at the London Tavern, Bishopsgate street, the following report for the half-year ending the 30th June, 1865, was read by the Secretary,

W. CHAMPION JONES, Esq., in the Chair:—

REPORT.

The Directors have the pleasure to submit to the proprietors the balance sheet of the bank for the half-year ending 30th June last.

They have also to report that, after payment of all charges, interest to customers, and making ample provision for bad and doubtful debts, the net profits amount to £106,321 3s 1d, which, added to £18,629 12s 3d brought forward from the last account, makes a total of £125,450 15s 4d for appropriation.

The Directors have accordingly declared the usual dividend of 6 per cent., with a bonus of 9 per cent., making together 15 per cent. for the half-year, which will amount to £111,790 8s 4d, and leave £13,660 7s to be carried forward to profit and loss new account.

They regret to announce the decease of their esteemed colleague Edward Huggins, Esq., and have to report that Edward John Hutchins, Esq., has been elected a Director in his stead.

The dividend and bonus (together £3 per share), free of income tax, will be payable at the Head Office, or at any of the branches, on and after Monday, the 14th instant.

At the Fourth Ordinary General Meeting of shareholders, held at the London Tavern, on Monday, the 31st July, 1865,

W. C. BROWN, Esq., in the Chair,

the following report of the Directors and statement of accounts were read:—

1. It is with great satisfaction, considering the difficulties which had to be surmounted in connection with the recent and protracted commercial crisis, that the directors find themselves enabled to present a statement of accounts showing a gross profit of £54,073 16s 3d, inclusive of £3,243 2s 11d brought forward from last account. After deducting the rebate of interest on bills not due, and the current expenses, the balance has been appropriated for the payment of a dividend at the rate of 6 per cent. per annum, or 6s per share,* carrying forward £6,573 4s 7d to profit and loss new account.

2. The Directors have set aside an amount as provision against loss in respect of bad debts which they consider will be amply sufficient for the purpose. Of the amount of the Company's claims against the Leeds Banking Company more than 10s in the pound has been already received, and there is no doubt of the entire amount being realised, with interest.

3. Mr Joseph Bravo and Mr H. V. East have been elected to fill the vacant seats at the Board caused by the retirement of the late Mr T. W. Henderson and the death of the late Mr J. H. R. de Castro.

W. C. BROWN, Deputy Chairman.

H. J. WESTRUP, Secretary.

DEBENTURES.

THE CREDIT FONCIER OF

MAURITIUS (Limited).

Subscribed Capital £500,000

Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley. Cornhill, E.C.

SOCIETIE FINANCIERE

D'EGYPTE.

The Directors beg to inform the shareholders that in conformity with the resolution passed at the General Assembly of the 31st July, the Coupon No. 3, upon all shares, £10 paid, is payable at the rate of 6s 7½d per share, being 5 per cent. Interest upon F 150 for 12 months, and upon F 100, from the 27th Feb. to 30th April.

This Dividend is payable at the offices of the Agents of the Societie, The Imperial Mercantile Credit Association, 27 Lombard street, London, and at the offices of the Societe in Paris and Alexandria.

A translated copy of the report is at the disposal of the shareholders upon application at the offices of the Imperial Mercantile Credit Association.

ABRIDGED PROSPECTUS.

The objects of the Company are—first, to construct a railway about nine miles in length from the "Old Port" of Marseilles to Podestat, to afford increased facilities for the commerce and manufactures of the town and port; secondly, to acquire land on both sides of the line throughout its length, for building and other purposes, to which great value will be given by the construction of the railway.

The reputation of Marseilles as the first maritime city of France is well known; second only to Paris in population and wealth, its position and capabilities give it the command of French commerce in the Mediterranean.

Within the last ten years Marseilles has been placed in direct railway communication with Paris and all parts of France: magnificent docks and warehouses have been constructed, but great and rapid as those new works have been, they are still far behind the requirements of its ever-increasing trade.

The old quarters of the town are being demolished to make room for handsome streets and public buildings. The population thus displaced are driven to the suburbs, more especially towards the south, where the lands of the Company are situate.

The proposed railway, after leaving the port and town of 300,000 inhabitants, will pass through the Southern suburb, which contains a population of 50,000, and follow the valley to the sea, at the "Madrague de Montredon;" from thence it will be continued for three miles along the coast to Podestat, affording sites for the erection of factories, with access to the sea, and direct railway communication with the town and port, and with the Paris, Lyons, and Mediterranean lines, by a junction with the proposed new branch of the latter to the "Place Castellane."

The Company have contracted for the purchase of about 1,200,000 square metres of land (about 300 English acres), situate on both sides of the proposed railway, between the town and the "Madrague de Montredon;" 140,000 metres of which will be required for the construction of the line and stations, leaving 1,060,000 metres to be sold for the erection of first-class residences.

It has been estimated by competent judges of the value of building sites in the neighbourhood of Marseilles, that on the completion of the railway the whole of this land will be readily sold at the price of at least 20 francs per metre, at which rate it will produce 21,200,000 francs, or £848,000.

The Company have also contracted for the purchase of a very large tract of ground beyond the "Madrague de Montredon," through which the railway will pass to Podestat.

The average cash cost to the Company of the land above referred to is only 5½ francs per metre, including the houses already built thereon, and including also upwards of 10,000,000 metres of land (2,500 acres) on the coast line for three miles beyond the proposed terminus at Podestat, which will thus be acquired by the Company free of cost, and which will be made available at some future time by an extension of the railway and the formation of roads.

Prospectuses and forms of applications for shares may be had of the Secretary at the offices of the Company; or of the bankers, brokers, and solicitors. But no application will be entertained unless the deposit of £1 per share on the number applied for has been duly paid to the Company's bankers. In the event of no allotment being made to the applicant, the deposit will be promptly returned in full.

THE MARSEILLES EXTENSION RAILWAY and LAND COMPANY (Limited)

The Share List of this Company will be closed for London this day, Saturday, the 5th inst., and for the Country on Monday next, the 7th inst.

Aug. 5, 1865. H. P. HAKEWILL, Secretary.

MENAI PARK AND HOTEL COMPANY (Limited).

Capital £70,000, in 7,000 Shares of £10 each.
Deposit £1 per Share on application, and £1 on allotment.
Calls not to exceed £2 per Share, and to be made at intervals of not less than three months.

Interest at Six per cent. per annum will be allowed upon the Deposits and Calls, as well as upon payments in anticipation, until the opening of the Hotel.

Incorporated under the "Joint Stock Limited Liability Act," which expressly limits the liability of each shareholder to the amount of his subscription.

PROSPECTUS.

This Company is formed—

1. To carry out a contract made with the London and North-Western Railway Company, for the purchase of a Freehold Estate on the edge of the Menai Straits, in the county of Carnarvon, consisting of about 80 acres of valuable building land, 20 acres of which were, some time since, planted and laid out by the late Sir Joseph Paxton, at a very large outlay.

2. To devote a portion of the Estate lying nearest to the Menai Bridge Station of the London and North-Western Railway Company, to the purposes of a first-class Hotel, with appropriate gardens, pleasure grounds, and other conveniences, and to erect, furnish, and maintain such Hotel and grounds.

3. To dispose of the residue of the estate by way of absolute sale, or to lease the same for the erection of villa and other residences, and to otherwise encourage building thereon, as from time to time may appear most judicious or desirable.

4. To take a lease for 99 years on agreed terms of the refreshment rooms to be erected by the London and North-Western Railway Company, at their Menai Bridge Station, and to manage them in connection with the Hotel, the Railway Company having agreed that they will improve and maintain their Menai Station as a first-class station, at which four-fifths of all passenger trains, not being express, mail, or excursion trains, will stop.

5. To erect private and other baths, both salt and fresh water, as well as to construct open bathing places in the grounds on the edge of the Straits.

The picturesque features of Carnarvonshire, with its invigorating climate, have long won for that county a large share of the public favour and in the vicinity of the more romantic and accessible spots, the demand for further first-class hotel accommodation and private residences has become a matter of notoriety. Few sites have proved more attractive than those which the banks of the Straits possess, and the estate which has been secured for the purposes of the present Company is confessedly unrivalled in point of situation and general eligibility.

The property thus available lies between the Menai and Britannia Bridges, and is skirted on one side by the Menai Straits, and on the other by the London and North-Western Railway. The whole estate commands extensive views of the principal objects of interest and natural beauty with which the district abounds. The Pass of Llanberis, Snowdon, Bangor, and Beaumaris, are all in its immediate vicinity. The Harbour of Holyhead may be reached by railway in an hour, and Liverpool and Manchester in three hours.

The promoters have carefully collected and examined the data upon which they rest their anticipation of the profitable nature of the undertaking, and they can see no reason why the advance which of late years has taken place in the value of building sites at the more celebrated watering places of England should not, within the next few years, be equally realised for this Company; still less do the promoters believe that the success which has invariably attended the establishment of good hotels, in co-operation with our great railways, will be wanting in the present instance.

There already exists a large demand for land in this locality, and the shareholders may therefore confidently expect to derive a handsome profit from the sales and rental of the estate.

It is an important consideration that the London and North-Western Railway Company, who have a direct interest in the success of this project, are disposed to give it their cordial support.

The Directors, under power conferred upon them by the Articles of Association, will pay interest at 6 per cent. per annum upon all calls and deposits till the opening of the Hotel, which, it is expected, will take place in the course of eighteen months. Shareholders desirous of paying up in anticipation of the future calls, can do so, and interest will be allowed thereon at 6 per cent.

Should no allotment be made the deposit will be returned in full, and if a greater number of shares be applied for than is allotted, the surplus deposit will be applied in diminution of the payment to be made in respect of the deposit on allotment.

The Articles of Association may be seen at the Company's offices, and at the solicitors, as well as the several brokers.

Application for shares, accompanied with the deposit, to be made in the annexed form to the Bankers, Brokers, or the Secretary, from whom prospectuses may be obtained.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Menai Park and Hotel Company (Limited).

Gentlemen,—Having paid to the sum of pounds, being a deposit of £1 per share on shares in the above Company, I request that you will allot me that number, and I hereby accept such shares, or any less number which may be allotted to me, subject to the Articles of Association, and I further request that my name may be placed on the register of shareholders for the shares so allotted.

SOLICITORS.

Messrs Hancock, Sharp, and Hales, 25 Birchin lane, London.

SECRETARY (pro tem.)—C. Warwick, Esq.

Temporary Offices:—No. 7 Great Winchester Street.

ABRIDGED PROSPECTUS.

The want of a public Steam Company, and a regular line between London and the East, is much felt, and there has been an urgent call for the formation of this Company, which there is every reason to believe will receive the cordial support and co-operation of a large body of the merchants in the trade.

A provisional contract has been made, by which the Directors are enabled to secure, on unusually favourable terms, five new steamers admirably adapted for this trade. The purchase-money will be paid partly in cash, and partly in shares of the Company.

It is proposed to run a line of steamers of 2,200 tons burthen each, and 300-horse power nominal, from London to Gibraltar, Sicily, Malta, the Ionian Islands, and the principal ports of Greece, Turkey, the Black Sea, the Islands of the Archipelago, the Coast of Syria, and Egypt.

All the vessels belonging to the Company will be registered in England, and will sail under the British Flag.

Branch steamers of 1,125 tons burthen, and 180 horse power nominal, working to 500 horse power combined, will run, in conjunction with the large steamers, between all the principal ports of the Mediterranean, and Malta, Greece, Turkey, Asia Minor, the Coast of Syria, and Egypt; carrying the passengers, mails, and goods of those countries, and performing duties similar to those of the Austrian Lloyd's, and the Messageries Imperiale, but with far greater advantages.

Taking at least three voyages per year, each steamer will produce, from a carefully prepared estimate, a net profit on freight alone of £12,618, which, on the cost of one of the above large steamers, amounting to (say) £45,000, is more than 28 per cent. It is therefore clear that if the steamers of the above Company perform (as they can easily do) four voyages per year instead of three, the profits will be considerably larger than the above estimate; and this is independent of the profits that the Company will reap from the commission business.

In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment due on allotment, and the balance, if any, returned to the applicant.

Detailed Prospectuses and forms of application for shares may be made to the Solicitors, the Bankers, Brokers, and to the Manager, at the offices of the Company, No. 7 Great Winchester street, London.

Brussels—My Messrs J. Matthieu and Sons.

The law of the 17th (29th) of March, 1865, creates the Grand Livre de la Dette Generale de l'Empire Ottoman, and that of the 18th (30th) March ordains the inscription of a sum of 40,000,000 medjidies d'or, composed of 29,000,000 intended for the unification of the internal debts of the Empire; of 4,000,000 issued by public subscription; and of 7,000,000 intended for public works, and only to be issued as follows:—2,000,000 at the soonest one year after the subscription of the 4,000,000; 3,000,000 at the expiration of two years, and 2,000,000 at the expiration of three years.

According to the law of 17th (29th) March, no further inscription can be made in the Grand Livre except in virtue of a special law legally published, and after sufficient provision has been made for the interest and sinking fund new inscription.

The general debt inscribed in the Grand Livre is guaranteed by the reserve fund, by the general revenues of the Empire actually unencumbered, and by the revenues already charged as they become available by the amortisation of the existing foreign debts, of which they constitute the special guarantee.

The debt inscribed on the Grand Livre is to be amortised in 37 years by means of redemption (rachat), and the numbers of the bonds redeemed will be published by the special council charged with the superintendence and control of all the operations of the sinking and reserve funds.

The bonds bear an annual interest of 5 per cent. payable in gold on the 1st (13th) January and the 1st (13th) of July of each year, at Constantinople, London, Paris, Amsterdam, and Frankfort-on-the-Maine, at the fixed rate of 110 gold Medjidies,=£100 sterling=2,500 francs.

By the provisions of the law of the 19th (31st) March, 1865, the conversion of the principal classes of internal debts, viz., of the Eshami-Djédidés of the four issues of the Tahvilati-Mumtazes, and of the 10-year Serghis will be effected on the following conditions:—

Against 100 gold Medjidies of Eshami-Djedide (consolides) of the 1st, 2nd, 3rd, and 4th issues, there will be delivered 121 gold Medjidies of the general debt, equal to £110 sterling, or to 2,750 francs.

Against 100 gold Medjidies of Tahvilati-Mumtaze, there will be delivered 143 gold Medjidies, equal to £130 sterling, or to 3,250 francs.

Against 11,000 piastres of 10-years Serghis (on scneliks), there will be delivered 110 gold Medjidies, equal to £100 sterling, or to 2,500 francs.

The Bonds of the General Debt form three classes, viz.:—

		£	francs
Bonds of 110 Gold Medjidies =		100 sterling =	2,500
— 55 —		50 —	1,250
— 11 —		10 —	250

Each bond will be separately inscribed in the Grand Livre, and will be signed by the Minister of Finance, by the Governor of the General Debt, and by a Controller delegated by the Grand Council.

The first Coupon of Interest on the Bonds of the General Debt being due the 1st (13th) July, 1865, the bearers of the old Bonds will receive from the Commissioner-delegate at the time of versification of their bonds, special coupons representing the interest due to them in virtue of the law of 19th (31st) March, 1865.

These Coupons will be payable at the Imperial Ottoman Bank at Constantinople, London, and Paris, on presentation, except the special Coupons relating to the arrears of interest on the Ten-years' Serghis, and due the 1st (13th) January and 1st (13th) July, 1866, which will be paid on their respective dates due in accordance with Art. 7.

In virtue of Articles 11 and 13 of the law of the 19th (31st) March, 1865, all securities of the internal debts, to whatever class they may belong, not presented for conversion within the period of three months from the opening of the conversion; that is to say, between the 3rd (15th) August and the 2nd (14th) November following, will not be convertible, except with a reduction of 10 per cent., and only during the period of one month and a half from the 2nd (14th) November, 1865. On the expiration of this second period the operations of the conversion will be declared closed.

In order to facilitate the operation of the conversion and to avoid the necessity of issuing Provisional Certificates, and sending the original bonds for verification to Constantinople, the Imperial Ottoman Government has appointed, besides the Commissioners-delegate, verificators to attend at London and Paris during the whole period appointed for the conversion, to verify the bonds presented for conversion.

Securities presented elsewhere than at Constantinople, London, and Paris, will be transmitted for verification to London, except those presented at Alexandria, which will be sent to Constantinople.

Definitive bonds of the General Debt of the Ottoman Empire, with coupons for 37 years, now in course of manufacture, will be delivered as soon as ready in exchange for the securities presented for conversion.

In the meantime, the securities presented will receive, at the time of verification an official stamp and the signature of the Commissioner-delegate, attesting their verification, to be exchanged by the bearers for the definitive bonds of the general debt.

Forms of application for conversion may be obtained at all the offices where the conversion will take place.

Copies of the laws may be obtained at the same places, and also at the offices of the solicitors, Messrs Baxter, Rose, Norton, and Co., No. 6 Victoria street, Westminster.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,
JAMES MACDONALD, General Manager.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

TO GENTLEMEN SEEKING

preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

WHERE SHALL WE DINE?

Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file; Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

THE ECONOMY OF LIFE:

SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will preceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS,

AND HOW BY PATIENCE THEY BCEAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notion of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

CARSONS' ORIGINAL ANTI-

CORROSION PAINT.—Walter Carson and Sons beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.

March 1, 1865, 9 Great Winchester street, E.C.

CARSONS' ANTI-CORROSION

PAINT, specially manufactured for out-door work, s the best and cheapest. All colours. So simple in application that any person can use it. Full instructions are given. No agents. All orders to be sent direct.

CARSONS' ANTI-CORROSION

PAINT is twice as durable as genuine white lead. SEE TESTIMONIALS.

CARSONS' ANTI-CORROSION

PAINT. 3 cwt carriage free to any station in England and Wales, and most seaports in the United Kingdom. (See list.

CARSONS' ANTI-CORROSION

PAINT. Patterns, prices, and testimonials sent post free.

CARSONS' ANTI-CORROSION

PAINT for all OUT-DOOR WORK.

CARSONS' ANTI-CORROSION

PAINT for WOOD WORK.

CARSONS' ANTI-CORROSION

PAINT for PARK FENCING.

CARSONS' ANTI-CORROSION

PAINT for FARM BUILDINGS and IMPLEMENTS.

CARSONS' ANTI-CORROSION

PAINT for IRON WORK.

CARSONS' ANTI-CORROSION

PAINT for POROUS BRICKS effectually resists weather and excludes damp. 3 cwt carriage free to most parts of the United Kingdom.

CARSONS' ANTI-CORROSION

PAINT for FRONTS of HOUSES.

CARSONS' ANTI-CORROSION

PAINT for BRICK, STONE, and COMPO.

CARSONS' ANTI-CORROSION

PAINT for CONSERVATORIES.

CARSONS' ANTI-CORROSION

PAINT for HOTHOUSES.

CARSONS' ANTI-CORROSION

PAINT lasts twice as long as any other; established 70 years; is only half the expense in application; is the most effectual in resisting weather; and will keep for years in a dry place. All orders to be sent direct to WALTER CARSON and SONS.

LA BELLE SAUVAGE YARD,
Ludgate hill, E.C.,
Three doors East of Railway Viaduct.

PRIZE MEDAL AWARDED.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues by post free.

Also, Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands Canteens, &c., by post free.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THERE is no tendency to a great change in the money market. On the contrary, everything as much as usual at this period of the year. But at the same time there are increased symptoms that our capital is very narrowly used up. The least extra demand for domestic or foreign business immediately produces an effect which it did not use to produce, and which could scarcely be anticipated from it. The bullion in the Bank of England is at a point at which it could not bear much further reduction, especially if it were caused by a foreign demand. Some loans, one to Buenos Ayres, which is said to be in the hands of Messrs Rothschild, who are sure to get the money, are talked of. But it is too soon to speculate on their effects. Altogether it may be safely said that there is no tendency in money to become cheaper, and if it change either way it would change to become dearer.

ARE FEDERAL BONDS A SAFE SECURITY?

MR WALKER, the Inspector of the Banks of Massachusetts, whose name is very well known in economical circles in this country, has contributed an "Essay on American Finance" to the *Revue des deux Mondes*, on which our contemporaries have lavishly commented. He, of course, maintains that the securities of his country are thoroughly trustworthy, and that the debt which they represent is a burden which in a few years she will easily bear. He gives us a kind of "dissolving view" of the debt, showing how soon its incidence will be almost unfelt in such a country. He makes up from the annual valuations to which all American property is subject the following table:—

Years.	Debt.	Annual Interest.	Wealth of the Loyal States.	Production of the Loyal States.	Proportion of Interest to Production.
	£	£	£	£	
1865.....	466,8[illegible]0,000	26,920,000	3,480,000,000	832,680,000	2.88 to 100
1866..	540,000,000	29,706,000	3,764,400,000	1,011,960,000	2.93 to 100
1867.....	648,000,000	35,640,000	4,084,400,002	1,094,480,000	3.25 to 100
1870.....	...	...	5,230,800,000	1,401,840,000	2.54 to 100
1880.....	...	...	10,461,600,000	2,803,680,000	1.36 to 100
1884.....	...	...	13,746,000,600	3,443,040,000	1.03 to 100

and he justly reasons that so slight a burden in comparison with such large wealth may easily be borne by that wealth.

These tables and others of a similar kind which Mr Walker gives us, have been ably criticised by some of our contemporaries. They have said that Mr Walker did not make sufficient allowance for the effects of the war, that his estimate of augmenting wealth was sanguine, that the future progress of the country would not be as rapid as the past progress, that he did not allow enough for the cost of defeat in the South and the cost of conquest in the North. We own that we hardly think numerical anticipations of this sort subjects for precise computation. They have a value as aids to the imagination; they enable us not only to know but to feel that the pecuniary progress of the United States is inconceivably rapid, but they can scarcely be rigorously scrutinised. There is no available test by which we can measure their exact correctness or their possible incorrectness. One thing may be said with great certainty. The United States will not be nearly as rich now there has been a war, as they would have been had there been no war. They have invested destructively much capital, which would have been invested productively, and therefore they will be far less rich. Mr Walker is right in saying that the Federal States are not "exhausted"; war does not exhaust countries which are not its theatre and whose credit it has not deranged. It only withdraws some part of the annual productions from uses economically advantageous to uses economically disadvantageous. But when that production is as ample as in America this diversion does not cause poverty, it only retards the creation of wealth.

A more business-like way of viewing American finance is also given by Mr Walker. He says that the American revenue in the current year will be—

	£
Internal taxation.....	56,000,000
Customs and sale of lands.....	14,000,000
Total revenue	70 000,000

And even if the interest on the American debt, after the reduction of the currency, should amount to thirty-eight millions, and they should find it necessary to augment their military and naval expenditure very largely, the expenditure may be reckoned at—

	£
Interest.....	38,000,000
Cost of Government.....	25,000,000
	63,000,000

We do not give these figures as more than rude approxim[illegible]

Digitized by Google

tions. But of the principal fact there is no doubt: the United States are now raising a very large revenue indeed, and are able to raise a very large revenue. 2*l* 10s a head on 30 millions of people is seventy millions, and even if we add State taxes and municipal taxes, 3*l* a head would be quite enough for what is required. The taxation of the different countries in Europe was made up not long since by Mr Norman.

TOTAL REVENUE (exclusive of Loans), Average Taxation per head of Population, and Public Debts—1861.

Countries.	Total Revenue.	Average Taxation per head of Population.	Public Debt. Amount.	Public Debt. Interest equal per head of Population.
	£	s d	£	s d
United Kingdom	67,460,000	43 0	805	18 3
France	74,000,000	39 7	373	10 7
Austria	29,910,000	17 0	227	5 6
Prussia	22,660,000	22 4	40	2 6
German Confederation, ex Austria & Prussia	18,480,000	20 0	76	3 3
Russia	48,400,000	15 0	136	2 7
Holland	9,120,000	50 7	107	15 3
Belgium	5,920,000	25 0	22	6 2

though to these are to be added all local and parochial taxes. The earning power of an average American is far greater than the average earning power of any one in Europe, and as far the economical part of the question, as far as concerns the pecuniary ability of the United States to pay their large debt, there can, we believe, be no doubt whatever. They have the means to pay if they wish to pay. Will they then wish? The answer to this question could only be completely given by one who felt he could foresee the whole future history of America. We are speaking of a young, and, therefore, untried nation with a most peculiar and wholly untried Constitution. We are asking what will be the future career of a new nation in new circumstances, and without supernatural communications, rational certainty is impossible, and rational doubt is very reasonable.

It is certain that the Americans have a singular reserve of character and power for a day of difficulty. Just when in the old world we prove that their case is hopeless, their difficulties superhuman, their strength but little, on a sudden they exert an energy which no one expected, which has never been exerted in that mode before, which they themselves could not explain, yet they possess. They vanquish the difficulties of the future by a latent power, and, after our late experience, we must give credit to an almost unlimited extent to the wonderful capacity of the nation with the greatest faculty of earning which the world has ever seen placed in the most productive place which the world has ever contained. The motive, too, is enormous in the case we are considering. The United States are the most energetic business people of the world in the place where business is most profitable. If they can only get capital they can do anything: they ought, therefore, to be borrowers from all the world. If they establish their credit they will borrow as they like, for they have the means of paying higher interest than all others. But if they lose their credit at this critical juncture they will lose it for indefinite years. The present debt is mostly held at home, and if the interest on it is not paid, no foreigner will, within any time we need think of, trust them with a farthing.

But though the powers of the Americans are great, and their motives to solvency very great, we must not forget their difficulties are great also. The undertaking they now have in hand is very different from the undertaking in which they have lately succeeded. By an immense spasmodic effort they have just terminated a great war; they have now to begin the slow process of paying much money over many years. It would be a singular strain to any nation to quadruple, and more than quadruple its annual taxation. Before this war the annual taxation of the Federal Government was less than 14,000,000*l*. now it must be much more than 60,000,000*l*.

The singularity of the crisis aggravates the difficulty. The cost has been incurred to conquer the resisting South, but will the South consent to pay the cost of conquering itself? The late war was justly described as a war for the acquisition of a difficulty, that difficulty has now been acquired. In a few months we shall have the Southern members who used to rule Congress once more in Congress. There will not be in a position of authority, but they will be a strong, a vigorous, and probably a united majority. During the last four years they have been incurring great hardships, while the North was in comparison quite at ease. The debt which they incurred for securing what they thought their independence has been dishonoured and swept away; and they are now asked to pay another debt for securing what they think their dependence. They have had to repudiate the price of liberty, and they are required to pay the price of annexation. It is hardly possible that they should be willing to do so. If American nature be like other human nature, the Southern vote must be a vote against a payment of the money lent to keep down the South. That the money was borrowed at home is in this aspect no additional difficulty. The proud Southerner who is now conquered by the Yankee whom he used to despise, naturally will not wish to *pay* that Yankee. If he cannot beat him in wars, at least by politics he may make him lose his money.

Possibly, now that the South are again involved in the Union they feel so much pride in as to overcome all latent repugnance and all natural animosity. But if they do not they have the best of all instruments of repudiation ready to their hand, *the currency*. It is not at all necessary that a vote for non-payment of interest should be carried in form. All that is needful is that unlimited notes should be issued for the interest now payable in notes, and that payment in notes should be authorised where payment in specie is now required. A few years of this is quite as effectual as any direct repudiation, and far less clumsy. Benjamin Franklin showed the advantage of it years ago.

In England, we have been led to form good notions of political economy by years of suffering and years of discussion. But America has never felt suffering and has never heard any discussion. She is perfectly ignorant of the elements of finance; she does not comprehend even the vital advantages of free trade. She has to reform her currency,—a painful, difficult, and arduous task. What will be so easy as for an unanimous active Southern minority to delay that reform and possibly augment the depreciation?

The form of vote will be very invidious. The Southerners have only to vote against all taxes. The Government have no financial representative in the Chamber, and no recognised means of making a majority and keeping a majority as we have in this country. Here, if Parliament could not enable the Prime Minister to pay the interest on the debt, he would at least dissolve and see whether the whole nation wished to pay or did not wish to pay, but in America the President must take the will of Congress *as it stands*, he cannot send it back to its constituents. He is at the mercy of a body in which there must be a minority hostile to honesty, and the indissoluble existence of which makes it the best conceivable arena for the worst tactics and the lowest politics.

The proper course, therefore, is to watch carefully and patiently the gradual progress of events in this new and strange scene. We must neither let our admiration of the natural wealth of America distract our attention from its political difficulties, nor our distinct perception of those difficulties make us forget their wonderful capacity for conquering in an unforeseen manner what seem almost insuperable obstacles. A financial problem, equally interesting and equally important, has perhaps never been presented to the civilised world.

THE INSECURITY OF THE PRESENT STATE OF RAILWAY DEBENTURES.

CAPTAIN JERVIS has publicly accused the directors of the Great Eastern Railway of exceeding their borrowing powers. They are, it is officially stated, preparing to reply to him. But in what a situation are the lenders to the Company thus placed? The goodness of their property, the repayment of their money are to be the subject of a complicated controversy between the directors of the Company and the Deputy Chairman of the Company. The Deputy Chairman says, bad securities have been issued, the directors deny that bad securities had to be issued; and the world is to judge between them.

But no such controversy ought to be possible. The railway companies ought not to be able to entrap the public, or to be alleged to entrap the public. We proposed in an elaborate article two years since, that there should be an effectual registry at the Board of Trade of all debentures. Until that is the case we may call them *in*securities with almost as much propriety as securities.

THE COMPLEXITY OF OUR EDUCATIONAL INSTITUTIONS AND THE REASON FOR IT.

THE Committee on the Education Department appointed last Session after Mr Lowe's resignation was not able to make a final report, and had time only to "report the evidence" to the

Digitized by Google

House. That evidence is however exceedingly well worth reading. Blue books generally are very valuable when conspicuous statesmen are examined as to the duties of the offices they have filled. In this case we have the evidence of Mr Lowe, Mr Bruce, and Mr Adderley, who have been Vice-Presidents of the Committee of Council for Education, and Lord Russell, Lord Granville, and the Marquis of Salisbury, who have been Presidents, and the authentic information they give us is quite opposed to the common notion of the working of the Education Department, and gives besides a most curious insight into the natural and almost necessary manner in which complexity grows in England. The whole Education Department was created some 26 years ago, when Lord Russell was Home Secretary, and it is already as complex as if it had come down from the middle ages.

The education,—at least a part of the education,—of the poor, might seem at first sight to be a very simple matter. There is a vast mass of ascertained knowledge which everybody admits to be true, which everybody admits to be valuable, which can only be well learnt in childhood, which every parent the least well off in the world begins to teach his child as soon as that child can learn. The civilised part of the world are quite agreed as to the truth and as to the value of common elementary knowledge, and it might seem simple to say that such knowledge should be forthwith taught to poor children as well as rich children. Nobody can deny that arithmetic is true, and no one can deny that it is useful to the poor; and no one could therefore be expected to deny that it was desirable to teach arithmetic to the poor. But it *is* denied. A vast number of influential people say that you must not teach arithmetic, or writing, or reading, or any common knowledge, unless you teach certain tenets at the same time. Archdeacon Denison speaks out with that intellectual frankness which is characteristic of him, and which his more adroit associates describe as want of judgment. He observes:—"I should say, if I have a child to teach anything, I must "educate him; I must exercise my free conscience just as a "parent exercises his. My conscience tells me, that if I am "to have anything to do with the child, it must be on my "own terms, and I cannot take him on any other terms." Which is as much as to say that arithmetic is not to be taught, unless something else is taught with it. And though in its bare form this proposition has an unpleasant sound, it is at bottom the belief of the ruling classes,—of almost all the classes of this country. People who agree with Archdeacon Denison in nothing else agree with him in this. Only they do not wish to teach his "something" along with arithmetic, but a different "something." Every sect almost wishes to annex its dogmas to sums in long division: and as long as this is the case, a national system—we do not say of education, for that is a high word—but of instruction, is impracticable. We cannot hope to teach religion to our people, we cannot hope to teach morals to our people, for we have not even agreement enough among ourselves to teach sums and reading to our people.

But if we cannot teach as a nation, we can assist as a nation, and this is what we are trying to do. We have an Education Department, which is really a department *in aid*. It gives money to those who bring other money; it helps those to educate who are already educating or attempting to educate. And the natural result of all this is complexity. If we had a national system, we should have a simple rate like the Poor Law rate, and a single Minister like the head of the Poor Law Board to represent it in Parliament. We should have a local school in every parish, a local Board in every Union, a superintending Board in London to prevent abuses, and secure unity,—a responsible Minister in Parliament to *prove* on occasion to the nation that this was done. But now we have to assist various sorts of people on various grounds in various stages of want. One wants a school built, another helped,—and the degree of aid wanted varies in countless cases. Before the Revised Code there were even artificial complexities, little grants for "maps" and such matters. But even now the grant to education, though only 600,000*l*, is regulated by 151 rules, and some of these are little Acts of Parliament in themselves, with many minor provisions and clauses. "It is "an education in itself," Mr Lowe tells us, "to learn the "Education Department," and he is one of the quickest learners in England.

And complicated as are the conditions on which State aid is granted to education, the department charged with fixing and administering these conditions is, at least, as complicated. It has been generally thought that the visible person, the Vice-President, who answers questions in the House of Commons, was the authority who framed the regulations and the Minister who carried them out. There were known to be other authorities, but it was thought that they were but nominal. Mr Lowe was one of the best abused men in England; he was believed to be the main and responsible author of the Revised Code; that its good was his good, and its evil his evil. But it now appears that his powers were but limited. He considered that it was his duty to administer the department under his superiors; that he had to take the opinion of the Lord President on all important matters; that the office may be described as a succession of "sieves" picking out the larger matters; that acting in conjunction with the Lord President, and even in some manner over him, there is the "Committee of Council," an actually consultative and legislative body, though generally regarded as a theory and a form. Lord Robert Cecil asks Mr Lowe:—"At the time "when that modification of the Revised Code was made at "the instance of the right honourable member for the Univer-"sity of Cambridge, by which managers were allowed to place "children where they liked, did you anticipate that you would "have to make, or that you should make any such modifica-"tion as is contained in these rules?" And Mr Lowe replies:—"I do not suppose that I ever thought about it one "way or the other. I may explain how that was done. The "debate took place, as the noble Lord will remember, and was "to be continued another day; the Cabinet met, and came to "a certain conclusion as to what terms were to be offered, "of capitulation, if you please, and I offered those terms as "I was directed to do; they were not my terms, but were "dictated to me by my official superiors, and I offered them. "I had nothing to do with the construction of those rules, I "only told the tale as it was told to me." But people at the time certainly thought that Mr Lowe was much more than a mouthpiece. They fancied that anything unpleasant was not only of his saying, but of his making.

The best of all illustrations and the best way of showing that the responsibility of the President is a true and not an imaginary responsibility, is Lord Granville's. He is asked as to the responsibility of the Vice-President and he replies: "I "think that he is clearly responsible to the House of Commons, "being the representative of the department to which he "belongs; but I think that there is much greater responsi-"bility attaching to the Lord President, whose orders he is "obliged to carry out, and whose authority I consider to be "supreme. I may illustrate that by referring to what took "place last year. A vote of censure was passed on the de-"partment, as I conceive, somewhat under a misapprehension "of the facts. Mr Lowe went out of office, and I did not go "out, but I had no doubt that it was my duty to resign. I "went immediately to Lord Palmerston the next day, and did "resign, but he begged me not to do so; and I said, that my "withdrawal of my resignation must depend entirely upon the "willingness of the Government, in some way or another, to "seek for a re-consideration of the subject by the House of "Commons, and ultimately by the decision of the House of "Commons, in that respect. I considered that I was bound "to resign. My opinion (and I was very much biassed by "the great regret which I felt in separating from Mr Lowe) "was, that he was wrong in resigning as he did; but the "question which he put, as his ground for resigning, was "one of personal feeling as to his own honour in the Com-"mittee. I think that, technically, I was the person who "was bound to resign, and that he might technically have re-"tained his office." The public at large were little aware that the responsibility of Lord Granville was so close. It would have created a movement of surprise even in "well-informed" circles if he had resigned when Mr Lowe resigned.

Beside this complicated Parliamentary staff there is a large body of Examiners and Inspectors, many of them of great ability, and almost all of considerable attainments. At the head of these is the permanent secretary, Mr Lingen, who transacts the greater part of the common official business of the office and superintends its "immense correspondence." The permanent officials of the Council are a distinct variety of our Civil Service of considerable importance, and with some marked characteristics of their own. A more complex machinery for distributing minute sums of money to little schools could not easily be found.

Digitized by Google

The defence of the complexity is, that the work, though not of great magnitude, runs into great detail, and therefore requires a large number of well-trained and well-paid officials, and that it involves decisions both delicate and difficult, which need the care and attention of great Parliamentary statesmen. In the first place, the Committee of Council is said to be necessary. The duties of the Education Department are in fact legislative. It would be quite impossible either to fix or to modify the arrangements upon which the department grants its aid, as often, as carefully, and as tentatively as such arrangements ought to be modified, if each new rule and each change of an old rule had to be brought before the House of Commons. Whatever once existed would have a bad tendency to exist for ever, as hardly any Minister would take the trouble and risk the defeats which a Parliamentary discussion of a matter so technical, yet so involved in feeling, would necessarily involve.

First. As to the Committee of the Privy Council. The meetings are not at all matters of bare form. They are real discussions, not only of large matters of principle, but of important matters of detail. They really legislate for education as far as education is legislated for. Lord Russell particularly remembers that on the occasion of the Revised Code, Mr Gladstone, who seldom misses a chance of labour, went "very much into detail" to show what the result would be of giving such and such pence to such and such a child, or of refusing such and such pence. The legislation on education is legislation on a very troubled matter. There are difficulties and dangers hanging round the minutest regulations. Religious feeling and pecuniary feeling, the two keenest feelings of human nature, are both aroused, and cause a storm of opposition every now and then about a petty rule which a common bystander can hardly understand, and which a philosophic bystander may think to be very immaterial. If one public functionary, say a Lord President, had the power of absolute legislation on such a matter, he might often be wrong, he might often forget how delicate a matter he was dealing with, how many and how curious were the prejudices with which he was concerned. Secondly. The Committee of the Council is a Committee of the Cabinet, a permanent and standing committee, and such a committee is said to be and probably is of the utmost advantage. Lord Granville tells us, "I feel "that if I was at the head of the department as sole minister, "whether I was the Secretary of State for Education, or "Under Secretary, or in a position something like that of the "President of the Poor Law Board or the President of the "Board of Trade, nothing would induce me, upon questions "of so much importance, and which are so likely to be dis- "cussed as to any change, to pass measures without the con- "sent and sanction of the Cabinet. I am quite sure that if "I took such measures, except, perhaps, it was one involving "a very great and definite principle, before the whole Cabinet, "they would probably get wearied with it, and would not "pay much attention to it; and I think that a suggestion "would be made either by myself, or by Lord Palmerston, "or by somebody else among my colleagues, that it would be "best to take a Committee of the Cabinet to discuss the point. "It is a common thing to call Committees of the Cabinet. I "have been on Committees of the Cabinet at different public "offices, and every year there are such committees at the "War Office, the Admiralty, at the Treasury, and at other "offices, almost as often as the Committee of Council is as- "sembled; but I think it is a very great advantage to get "together a certain number of people from different offices, "who are either themselves connected with education or take "an interest in it, and to have them cut and dried, as it were, "ready to your hands, instead of having a new committee for "the purpose." The truth is, that education being a matter very interesting but very technical, is very likely to bring a Minister "into a scrape." He may be in a minority on such a matter in the House of Commons before he knows. Accordingly, he is properly conscious that he may have the concurrence of his colleagues beforehand. If he did not tell them first, he would be thrown over afterwards. And such a Committee of the Cabinet as Lord Granville describes, seems the best means of getting the real assent of such Ministers as really think about it.

With a characteristic eye for the follies of mankind Mr Lowe believes there is another use in the Committee. "I "think," he says "that the majority of clergymen think that "there is always a Board sitting round a table with green "cloth, and wax candles burning." And that he thinks beneficial. Very likely there is a use in conveying to rural districts a formidable image of dignified consideration, but only Mr Lowe would have expressed it in that manner. He has driven the idea home better than any one else would have driven it, but if they get hold of the saying, he will make enemies of the country clergy, and most English statesmen would prefer to be mysterious rather than pay such a cost for being expressive.

Next, as to the President. We are told that he is necessary too. At least it is necessary that the head of the Education Department should be in the Cabinet. Else he could not get their attention; and we have shown that he ought to have their attention. Mr Lowe, as acute an observer as is to be found, is quite clear about this. "I think," he says, "that if a Minister not being a member of the Cabinet, had "to meet the Committee of Council, he would be very much "wanting in weight and influence with them, and I think "that, probably, he would get very little attention from "them." Or, again, as to the Cabinet itself:—"He would "draw up a memorandum, which might be presented to the "Home Secretary, who would probably know very little about "it, and it would receive very little attention; it would be a "very different thing from a Cabinet Minister himself pre- "senting it." And if the head of the Education Department is to be in the Cabinet, it is certain that he must be there as something else also. The principal work, though very nice, is very small, and by itself is not enough to employ a Cabinet Minister as a Cabinet Minister ought to be employed.

Again, as to the Vice-President for Education. He may be presumed to be necessary, because he was made of late years from a feeling that he was neceesary. It is clearly requisite that on a matter so perplexed with detail, and touching such sensitive feelings, that some one who quite understands what was done, and was a party to its being done, should explain what has been done in the House of Commons. The questions were never answered rightly before there was a Vice-President, for the Home Secretary, responsible for twenty other different matters, could not accurately answer minute inquiries as to this, and there are a hundred people who cry out "bad faith," if these answers vary from the truth in the barest iota.

As to the responsibilities of the Vice-President, Mr Lowe is at issue with his successor, Mr Bruce, and with all the other official witnesses. He thinks the Vice-President a pure subordinate, and the other thinks as that takes a large share in the conduct of the business in the House of Commons. he has a share in the responsibility also. Mr Lowe looks at the matter legally. He says, by the patent the President is responsible when present, and the Vice-President is to act under his direction when he is there, and for him when he is not. And in mere law such may be the case. But Lord Russell is right in saying that there is great use in having "something undefined." In complicated institutions like this Education Department, there must be an elastic element to vary with times and seasons and the accidents of personal character. As Lord Granville observes—"Supposing, for instance, "that instead of having had Mr Lowe or Mr Bruce, who are "men not only of ability, but men of considerable official "experience, some young man had been appointed as Vice- "President, who had made a very brilliant speech in Parlia- "ment, and whose services it was thought desirable to "secure for the Government, but whose judgment and "accuracy I had had no means of testing, I have not the "slightest doubt as to what I should have done. As soon as "he was appointed, without feeling any sort of unnecessary "distrust of him, I should have requested that all the busi- "ness should be transacted as we do it in the Science and "Art Department; that is to say, by a meeting of the Board, "which consists of the Lord President and the Vice-Presi- "dent, and in that case I should have been always certain "that there was no decision which had not been superin- "tended by myself." The Vice-President may be in strictness like an Under-Secretary, but then an Under-Secretary's duties vary with circumstances, and in this case the Under-Secretary, if he is to be so called, is placed in a post of singular prominence, singular opportunities of distinguishing himself, and therefore of singular responsibility.

On the whole, therefore, the constitution of the Education Department seems to be adapted to the present state of education in England. It is complex, because it has to do a

Digitized by Google

delicate work in a complex society, and each part of the organisation has, upon interrogation, shown that at least it contributes to the accomplishment of the aggregate task.

INFANTICIDE AND ILLEGITIMACY.

It seems probable that on the re-assembling of Parliament some effort will be made to deal with the crime of child murder. It is not a new crime, nor is it certain that it has greatly increased; but it has recently become very obvious, and it is the habit of English people to deal with evils only when they are forced on public attention. The case of Charlotte Winsor, the terrible statements of Dr Lankester, who asserts persistently that there must be, from the records of his court, 12,000 women in London who have murdered their children, and some calculations, certainly inexact and probably exaggerated, as to the connection between the crime and some causes of death which appear too frequently in the returns, have shocked the public conscience; and though the public mind is still far from decided on any particular course, it is still improbable that the Session will pass over without some new effort. Indeed, the statements made by Mr Justice Willes on the Western Circuit as to the imperfection of a law which punishes the concealment of the body of a child but does not punish mere concealment of birth, and which leaves it doubtful whether the killing of a half-born baby is legally a crime at all,—if it is one it is abortion and not murder,—necessitate legislation. It is, therefore, highly expedient that the public should inform itself of the facts of the case, and not be led away by sentimental exaggerations to miss the point at which it intends to aim. That point is, we think, pretty clearly to be seen through the haze of discussion, and may be shortly stated thus: the country intends to put down child murder by any means which will not involve a great relaxation of the social penalties on unchastity. So strong is the public dread of being led by their horror of one crime into increasing the other, that there is a tendency to remain inactive out of sheer fear of action, and we shall probably have speeches opposing all plans from a vague dread of increasing that prevalence of illegitimacy which one paper already asserts is so enormous among us. We shall be told to rely on education, and gradual improvement, and the rest of those vague phrases by which a terribly over-conscious age tries to make itself believe that progress is not a tide which ebbs and flows, but a rushing stream. It is this waste of power in vague talk which we want to avoid, and we, therefore, call the attention of sensible men to the figures compiled some time since by Mr W. G. Lumley, secretary to the Poor Law Board.

It is as demonstrable as anything in social statistics can be that illegitimacy is not a special English characteristic, that it is not on the increase, that it is as fixed a quantity in proportion to population as the number of suicides, that it can be affected by legislation in a certain direction, and that education and civilisation, so far from eradicating, tend slightly, but visibly to increase it. We will give the facts which in our judgment support each of those assertions. First, England stands fifth in Europe in the scale of morality, the only countries which show a better return being Sardinia, Holland, Spain, Switzerland, and Tuscany, and in all these, except Holland and Switzerland, there are believed to be many more adulterine births, and at least as much general vice as in England. The following is a comparison with the countries most like our own in creed and social character:—

	Proportion of Illegitimates to Children.
England	6.5
Denmark	9.351
Hanover	9.89
Prussia	8.44
Sweden	9.39
Saxony	15.98

England, therefore, being among Protestant countries the best. Moreover, illegitimacy does not increase, but, if anything, slightly declines, through the returns we quote present the usual mysterious phenomenon that vice bears an unvarying relation to number:—

Year.	Gross Number of Registered Births.	Proportion per Cent. of Illegitimate Births to Gross Number Registered.
1841	248,554	6·37
1842	517,739	6·7
1843	527,325	6·8
1844	540,763	6·8
1845	543,521	7·0
1846	572,625	6·7
1847	539,965	6·7
1848	563,059	6·5
1849	578,159	6·8
1850	593,422	6·8
1851	615,865	6·8
1852	624,012	6·8
1853	612,391	6·5
1854	634,405	6·4
1855	635,043	6·4
1856	657,453	6·5
1857	663,071	6·5
1858	654,481	6·6
1859	689,881	6·5

Again, from the date of the law passed in 1844, under which the guardians were prohibited from prosecuting the father, and the whole burden of the action, both of affiliation and maintenance, was thrown upon the woman, pauper illegitimacy steadily decreased.

Years.	Total illegitimate Children.	Percentage on Population.
Jan., 1849	17,028	.12
July, —	14,639	.10
Jan., 1850	15,897	.11
July, —	13,419	.09
Jan., 1851	14,419	.09
July, —	12,819	.08
Jan., 1852	13,808	.09
July, —	12,309	.08
Jan., 1853	12,741	.08
July, —	11,119	.07
Jan., 1854	13,461	.08
July, —	12,705	.08
Jan., 1855	14,528	.09
July, —	13,080	.08
Jan., 1856	15,378	.09
July, —	12,325	.07
Jan., 1857	14,397	.08
July, —	11,761	.07
Jan., 1858	14,417	.08
July, —	11,448	.06
Jan., 1859	12,353	.07

It is, however, by comparing counties that we obtain the most remarkable result. Striking off the Metropolis, in which the ratio of education is very high and that of illegitimacy very low—a fact, unfortunately, not due to virtue, but to the prevalence of the great sin of great cities—we find that "in Cumberland, Westmoreland, Hereford, the East "and North Riding of Yorkshire, the illegitimacy is very "high, and so is the standard of education, and the prudence "in marrying. But in Monmouthshire, Cornwall, Lancashire, "Staffordshire, the education is low, the illegitimacy is also "low, but there is a high proportion of early marriages. In "Norfolk, however, the state of education as regards the men is "far below the average, though as regards the women it is "above it. There the number of men who marry under age "is rather above the average, but that of the women is below "it. This county has long been distinguished for the high "rate of illegitimacy."

Education, therefore, by developing the fear of poverty, postpones the age of marriage and consequently increases the temptation to vice, a result which, could we collect statistics from the professional classes alone, would be proved to be an almost unvarying law. No influence in the way of packing or density of population has any appreciable effect, some of the thinnest districts being among the worst, and Scotland, which is much less packed than England, being much lower in the scale of this form of morality. Indeed, so slight is any recognisable influence, yet so permanent are the ratios in some localities, that the Registrar-General is half inclined to attribute the differences to race, and believe that there is more illegitimacy among Danes than Saxons, and so on, a somewhat far-fetched theory.

Should these figures prove, on inquiry, to be supported by those in the latest returns, they must be taken to point directly to certain conclusions of great value to the Legislature. One is, that it is hopeless to think of extinguishing child murder by extinguishing illegitimacy, that condition being rather more frequent as civilisation advances. It is also hopeless to attack it by laws for the prevention of crowding, which has clearly nothing to do with it. No legislative movement in fact has any effect unless it brings home to the man and the woman the heavy penalty which may follow upon indulgence, and it is not proved that an addition to these penalties may not be followed by an addition to the number of murders. It is, therefore, essential, if we would act efficiently, to act upon

Digitized by Google

the mother *after* the child has been born, either by making coercion steadier and more severe, or by relieving her of the care of her child, or by relaxing the rules which forbid parish aid for the keep of the child while the mother continues at work.

Each of these plans has its own very grave drawbacks. It is very difficult to apply steady coercion while juries are so unwilling to convict, and while the public secretly feels its conscience shocked at the impunity conceded to the father while such a heavy penalty is exacted from the mother. It is equally difficult to relieve the mother of her babe without decreasing the restraints on licentiousness,—restraints, it must be added, as necessary on women as on men,—and without rousing among the married to whom children are a heavy burden a savage idea that they are punished for being chaste. No poorhouse relieves *them* of their babes. And lastly, a separate allowance for an illegitimate child, if granted out of the "house," will in the end make large illegitimate families a source of profit, and restore the worst abuse of the old poor law. The single object, therefore, must be to discover some plan which, while diminishing the burden upon the mother, shall diminish no sexual restraint,—a problem the solution of which has taxed for years the wisest heads on the Continent, and if taken up seriously here, will probably overtax ours.

Agriculture.

THE CATTLE PLAGUE.

A GREAT danger has lately arisen in the now prevalent murrain amongst the dairy cows in and around London, and many instances of serious loss have occurred, but as yet there is reason for believing that the disease has not extended much, if at all, beyond the metropolis and its immediate vicinity. It will be well, however, that all purchasers of cattle should avail themselves of every possible precaution, first, in ascertaining as well as may be where the purchased animals have come from, and secondly, in carefully isolating them for a considerable period from their own stock. It seems that the disease is propagated by contact or close vicinity to infected animals, and consequently farmers must not only rigidly exclude all strange cattle from their own herds, but must prevent any of their own animals coming in contact or mixing with other herds or cattle. All that Government can do by orders in Council under existing Acts of Parliament, and by circulating information on the subject, appears to have been done. In such cases the best protection is to be found in the vigilance of the owners of stock as well as the dealers in cattle. At the same time the greatest attention should be paid to the health and comfort of stock. Good food, full supplies of water, and ventilation are most essential to the well-being of cattle, and these are points on which more than ever farmers should now bestir themselves. The farmers in various districts are meeting and combining in measures calculated to afford them protection.

The following passages from the letter addressed by the Clerk of the Privy Council to the Royal Agricultural Society, merit careful consideration:—

"It is of the first importance that all farmers, cowkeepers, or dealers in cattle, when purchasing new stock, should for several days, not less than twelve or fourteen, keep the cattle apart from the rest of their stock, until in fact there is reason to think that the new purchases are free from the disease.

"If a farmer, cowkeeper, or salesman should be desirous to get rid of any animals suffering from the disease in question, or even any which may have been in close contact with animals suffering from that disease, it should be impressed upon him, as a public duty, that, at the present juncture, he should not send them to markets or other places where they would be brought into contact with other animals, but should cause them to be slaughtered at once, and thus do what he can to prevent the spreading of the disease.

"Particular attention should be paid to the cleansing of all yards, sheds, and other places where cattle are kept; and this cleansing should be especially insisted upon where there has been any manifestation of this disease. These places should be disinfected by the free use of chloride of lime or other allied compounds. It is also of great importance that all diseased animals should be as quickly as possible removed to as great a distance from the healthy as circumstances will allow; and all indirect as well as direct communication be strictly prevented between them. The animals which are the most severely affected having at once been killed and buried, their skins may be preserved to the owner by being placed in a disinfecting fluid as soon as removed from the body.

"That it is advisable to kill the diseased animals at once is best shown by the circumstance that it rarely happens that where the disease is allowed to run its natural course, deaths are at a lower rate than 80 per cent., and also by the fact that every diseased animal is a continuous source of danger by disseminating the elements of the infection."

The symptoms of the disease, as described by Professor Simonds, should be carefully studied by every cattle owner:—

"Variations in the earliest indications of the disease will be manifested, these depending somewhat on the severity of the attack, but more especially on the circumstance as to whether the digestive or respiratory system is the chief focus of the malady.

"As soon as the affection declares itself the animal ceases to take any kind of food, and in most cases even refuses water. Rumination is suspended, and the animal stands with its head drooping and the ears drawn back. If made to move it shows great prostration of strength, and frequently staggers as if about to fall. The skin is hot in places, and often remarkably so between the limbs, the hind ones in particular. An exudation early takes place from these parts, and is succeeded by cracks and sores. The hair is staring, especially along the upper part of the neck, shoulders, and back. The extremities are cold, even at the commencement of the disease, and in a later stage the increased heat of the surface of the body gives place to a remarkable coldness, especially along the course of the spine.

"Tears trickle from the eyes, which are red and expressive of suffering, and a watery discharge flows early from the nostrils. There is a continuous increase of these secretions, which become more or less purulent in the advanced stage of the malady. The mouth is hot, red, and 'furred,' often presenting here and there raw-looking spots, especially on the inner side of the lips and along the roof. The breath is fœtid. The respiration is increased, and generally accompanied with a moan in the advanced stages. A slight cough is also present in some cases. The pulse is quick and weak, and scarcely to be felt, excepting at the heart, even at the commencement of the disease.

"The bowels are sometimes torpid at the outset, but diarrhœa, leading to dysentery, mostly follows, the evacuations being slimy, liquid, and of a dirty yellow colour, occasionally tinged with blood. Tenesmus is likewise present as a rule. Slight tremors of the muscles of the shoulders and thighs are to be observed in some cases, and so also in an emphysematous condition of the skin along the upper part of the back. In milch cows the secretion of milk is quickly arrested, a remarkable diminution in the quantity taking place, as one of the early indications of the attack. As the disease advances towards a fatal termination, the prostration of the vital powers becomes more marked, the breathing short, quick, and more painful, the alvine evacuations fœtid and more slimy, and the surface of the body deathly cold. The animal will sometimes sink as early as 12 hours from the commencement of the attack, but in many cases the disease will be protracted to the fifth or sixth, and occasionally to the eighth or ninth day.

"The period of the incubation of the disease is found to vary, the majority of animals sickening on the tenth day after exposure to the infection, but some have been attacked on the seventh day."

Let every farmer and dealer recollect that severe penalties are incurred by selling diseased cattle, and that each man, who may be so unfortunate as to get a diseased animal, will find that it will be far safer honestly to incur the first loss by destroying it than to attempt to shift the loss to some one else by a surreptitious sale.

Foreign Correspondence

[FROM OUR OWN CORRESPONDENT.]

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 10th inst. The return for the previous week is added:—

DEBTOR.	Aug. 10, 1865. f	c		Aug. 3, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2

The Bank return, compared with that of last week, shows a decrease of 6,883,000f in the stock of coin and bullion; a decrease of 9,385,000f in the discounts; a decrease of 674,000f in the circulation of notes, and a decrease of 18,822,000f in the deposits.

The Bourse has been but thinly attended during the past week, this being the time at which the majority of speculators take their annual holidays. In business, nevertheless, there has been a certain degree of activity, without, however, any marked fluctuations in prices. The speculators for a fall in Credit Mobilier shares have been punished severely by being called on by buyers to deliver the shares sold. This has caused loud complaints, and the Credit Mobilier being supposed to be at the bottom of it has been much censured. It is, however, perfectly legitimate, though forming what in the legal profession would be called sharp practice. On Monday it was announced that the subscriptions to the new City of Paris loan will have to be reduced by 38 per cent., but in case the reduction should not give a precise number of bonds, the subscriber is to receive a bond for every fraction, however small it may be. The number of subscribers was 85,596. On that day the new bonds were admitted to official quotation on the Bourse lists; they opened at 458f 75c, and closed at 456f 25c. To-day they stand at 461f 25c. The quotations are as follows; those of the Comptoir l'Escompte are ex-dividend.

In a meeting of a Scientific Congress at Rouen, just held, M Pouyer-Quertier, the well-known chief of the Protectionist party in that city, delivered a speech, in which, after much abuse of the commercial treaty with England, he declared that in the College de France at Paris, the professors of Political Economy teach that if a man and a horse be in danger of drowning, it will be better to save the horse than the man, because the former is capital, and the latter is not. It is quite certain that such an economic absurdity can never have been proclaimed in the College de France, where no less a personage than M. Michel Chevalier is responsible for the teaching of political economy. As it is hard to believe that M. Pouyer-Quertier can himself credit the allegation he made, it must be assumed that his object in making it was to mislead the ignorant and violent workers in the manufactories of Rouen and the neighbourhood. This would be a bad act at any time, and it will appear particularly so when it is remembered that the Rouen workmen have suffered more than any others of their class from the cotton famine.

Although the directors of the Comptoir d'Escompte, in the report presented to the shareholders in the recent meeting, said nothing of an increase of capital, the Chairman, M. Pinard, stated, in answer to a question, that a committee of the directors has been charged to examine into the propriety of making one.

A meeting of the shareholders of the Libourne and Bergerac Railways, just held, has sanctioned the new loans recently ordered by the directors, albeit serious irregularities had been committed respecting them. In the expectation that the meeting would be a disorderly one,—the shareholders having the gravest reasons to complain of the manner in which the affairs of the Company have been managed,—a large body of police was present, but there was no need for its services.

A banker of Poictiers, of the name of Hastron, who was for some years mayor of the city, has suspended payment and taken to flight. Petty traders will be, it is said, the chief sufferers. The liabilities are estimated at 1,800,000f (72,000*l*); assets not stated.

The Filature de Lin Company (Flax Spinning) of Amiens has declared a dividend of 56f for 1864-5.

The Coal Pit Company of the Rive de Gier having realised profits of 454,706f (including the balance brought forward) in the first six months of 1865, has resolved to distribute 320,000f to the shareholders, being at the rate of 4f per share.

The National Bank of Belgium for the first six months of 1865 has realised clear profits of 2,196,496f: in the same period of last year the profits were 3,152,706f.

Customs returns, just issued, show that the value of all sorts of goods taken out of bond for consumption was, in the first six months of the present year, 1,261,161,000f, whilst in the corresponding period of 1864 it was 1,182,415,000f; of 1863, 1,144,066,000f; and of 1862, 1,080,160,000f; and they show likewise that the value of exports of French productions was, in the first six months of this year, 1,382,904,000f; in the same period of 1864, 1,452,636,000f; of 1863, 1,208,274,000f; and of 1862, 1,052,953,000f. The decline in the exports of the present year compared with last has been much remarked; but the wonder is that, taking into account the state of foreign markets, and the depression which has existed at home, it was not greater.

The following is a detail of the principal imports:—

	First six months of 1865. francs.		First six months of 1864. francs.		First six months of 1863. francs.
Wool	108166000	...	83293000	...	89799000
Silk	128698000	...	113373000	...	140378000
Sugar	74223000	...	76038000	...	69687000
Coffee	42072000	...	40622000	...	40082000
Cotton	187708000	...	182427000	...	126634000
Jute	4391000	...	3359000	...	1693000
Flax	51945000	...	36428000	...	25929000
Hemp	4537000	...	1874000	...	1889000
Oleaginous seeds	23872000	...	21273000	...	24764000
Hides	55982000	...	53679000	...	57268000
Cattle	34113000	...	36655000	...	30691000
Timber	40162000	...	37726000	...	40553000
Coal	61922000	...	52437000	...	50331000
Pig iron	4573000	...	1994000	...	10995000
Iron	1534000	...	606000	...	2314000
Indigo	15955000	...	10838000	...	13111000
Copper	16744000	...	17861000	...	16581000
Hemp, flax and jute yarn	5234000	...	2162000	...	3050000
Cotton yarn	3380000	...	5473000	...	3734000
Woollen yarn	6452000	...	5737000	...	5624000
Goats' hair yarn	2908000	...	2200000	...	1939000
Flax and hemp tissues	6405000	...	7170000	...	5496000
Silk tissues	2964000	...	2519000	...	2021000
Hair tissues	2308000	...	2908000	...	3189000
Woollen tissues	18873000	...	15116000	...	16045000
Cotton tissues	3469000	...	4678000	...	3451000
Cutlery	95000	...	99000	...	108000

In the above, the reader will particularly notice the articles pig iron, yarns, tissues, and cutlery. The Protectionists used to maintain that the commercial treaty with England would cause France to be inundated with such things, and yet the import of these is, it will be seen, perfectly insignificant.

Subjoined is a detail of the principal exports of French productions:—

	First six months of 1865. francs.		First six months of 1864. francs.		First six months of 1863. francs.
Silk tissues	164512000	...	220587000	...	180534000
Woollen tissues	151142000	...	166652000	...	125195000
Cotton tissues	48711000	...	37222000	...	38063000
Flax and hemp tissues	12068000	...	10161000	...	9325000
Woollen yarn	10745000	...	8602000	...	723000
Cotton yarn	1227000	...	898000	...	863000
Flax and hemp yarn	8354000	...	17090000	...	5549000
Prepared skins	29712000	...	29634000	...	23259000
Articles in skin & leather	41192000	...	44714000	...	40792000
Tools & other articles in metal	17374000	...	21237000	...	19188000
Turnery, toys, buttons	74855000	...	75822000	...	60453000
Artificial flowers, &c	10246000	...	9121000	...	4193000
Furniture	9501000	...	8949000	...	5645000
Ready-made clothes and linen	45452000	...	51037000	...	37123000
Wines	124409000	...	133076000	...	118919000
Brandies	31335000	...	50227000	...	36511000
Refined sugar	45173000	...	27228000	...	40497000
Native beetroot sugar	787000	...	1771000	...	4239000
Native rosin	13045000	...	16305000	...	12907000
Eggs	17474000	...	14461000	...	12380000
Butter	21326000	...	15811000	...	14166000
Wool	18058000	...	34270000	...	17612000
Silk	50848000	...	41740000	...	40517000
Oxen	14757000	...	9930000	...	7661000
Rags	6228000	...	5109000	...	2196000
Timber	14307000	...	16163000	...	14854000
Paper and pasteboard	8295000	...	9250000	...	8351000
Perfumery	6727000	...	6654000	...	6179000
Soap	3532000	...	4241000	...	4080000
Chemical productions	27138000	...	23719000	...	19698000
Oil cake	5075000	...	3445000	...	3878000
Grain and flour	37385000	...	37001000	...	23168000

The decline in silk and woollen tissues, and in wines and brandies, will be noticed; but what will perhaps principally attract attention is the increase of cotton yarn and tissues—an increase which proves that the French can compete better in foreign markets as regards these articles than was at one time thought possible.

Digitized by Google

The following is an account of the precious metals, which are not included in the totals of Imports and Exports given above:—

	First six months of 1865. francs.	First six months of 1864. francs.	First six months of 1863. francs.
Imports.			
Gold—Bullion	31,419,324	58,862,541	51,914,142
Coin	216,180,438	175,435,785	172,663,620
Silver—Bullion	51,566,439	31,747,642	14,150,549
Coin	77,537,395	111,621,744	67,274,168
	376,703,596	377,667,712	306,002,479
Exports.			
Gold—Bullion	21,812,700	17,792,352	40,414,899
Coin	143,378,619	134,439,765	151,210,844
Silver—Bullion	25,100,742	67,593,116	57,339,346
Coin	36,683,881	118,685,136	48,981,530
	226,975,942	338,510,369	297,946,619

It will therefore be seen that in the present year the imports have exceeded the exports by nearly 150,000,000f (6,000,000*l*).

The market report is as follows:—

FLOUR.—At *Paris*, yesterday, six marks disposable were 50f 50c the sack of 157 kilogs. Type Paris the 101 kilogs, 31f. Other sorts firm.

WHEAT.—The quotation at *Paris*, yesterday, was choice 28f the sack of 120 kilogs; first quality, 27f; second, 25f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, amounted to 2,645 bales, the greater part Asiatic, and the arrivals were 4,655, most of which wasfrom Bombay and England. The stock was estimated at 39,670 bales. The closing quotations were 3f lower for low United States; 5f lower for Brazil, Peru, Cayenne, and Bengal; 10f lower for Egypt; 5f to 15f French West Indies. No change in Madras and other sorts of India and China. Low New Orleans was consequently 245f the 50 kilogs; good ordinary Broach, 160f; Tinnevelly, 153f; Madras, 170f; China, 145f; Egypt, 225f. This week, the market has been dull, and yesterday New Orleans was 222f 50c; Jumel, 205f; Oomrawuttee, 125f to 167f 50c; Tinnevelly, 147f 50c and 145f; Madras, 157f 50c and 142f 50c; and for delivery in August, 157f 50c, in September 147f 50c; China, 135f.

COFFEE.—At *Havre*, in the week ending Friday, the demand was good. 1,100 sacks Port-au-Prince, 82f to 83f 50c the 50 kilogs in bond; 600 Jacmel, 81f 75c; 1,405 Cape, 83f 50c to 85f; 100 Gonaives, 88f; 1,100 Santos, 79f; 414 La Guayra, 85f to 100f; 40 Central America, 85f; 90 Guatemala and Guayaquil, 92f to 92f 50c; 250 Malabar, for delivery, 92f 50c; 500 English cwts Mysore, 93f. By auction, some damaged Rio was sold, the arrivals were about 10,500 sacks. This week, Cape, 85f; Rio, 71f 50c, 77f, 81f, and washed, 99f; Santos, for delivery, 80f; Cazengo, high duty, 85f; Port-au-Prince, 83f 25c; Jacmel, 81f; Gonaives, 87f. At *Nantes*, this week, a small lot of Guadaloupe habitant, 140f, duty paid; also, by auction, some damaged Hayti. At *Bordeaux*, last week, 1,775 sacks, Mysore, 118f; 400 La Guayra, gragé, 105f; 700 gragé and non-gragé, 95f to 116f; 75 Reunion, not washed, at established prices; also, some Santiago and other sorts at prices not stated. This week, La Guayra, 104f 50c; Santiago, 115f. At *Marseilles*, last week, there were no sales except one by auction of some damaged Rio.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 1,471 casks Havana, 30f 50c, No 12, in bond; and some French West India usine, 57f, duty paid. The arrivals were about 2,000 casks and 1,222 sacks. This week, Mauritius T.Q., 26f, in bond; French West India, 49f, bonne quatrieme; Pernambuco, 25f 50c. At *Nantes*, last week, 400 sacks Reunion inferior, 41f; 1,084 sacks and 958 barrels common, 41f 50c to 42f; 4,660 sacks Mayotte on the basis of 48f, bonne quatrieme; some French West India, 48f, bonne quatrieme; and some usine, 51f to 64f 50c. At *Bordeaux*, last week, 297 casks French West India, 95f, bonne quatrieme; a quantity of usine at 115f, 117f, and prices not stated. At *Marseilles*, last week, 600 casks French West India, for delivery, 27f 50c, bonne quatrieme of Havre; 2,500 Havana, by Spanish ship, 29f, No. 12; 400 Porto Rico, by French ship, 26f 50c, bonne quatrieme of Havre.

INDIGO.—At *Havre*, in the week ending Friday, about 40 chests Bengal were sold at prices kept secret. The arrivals were only 2 chests. This week Bengal at prices not stated.

HIDES.—The sales at *Havre*, in the week ending Friday, were 475 Monte Video dry, 77f 50c the 50 kilogs; 400 ox, heavy, 85f; 2,880 salted La Plata ox, 52f to 54f; cow, 44f; calf, 41f; 1,250 Rio Grande salted ox, 56f; 2,400 cow, 43f to 43f 50c; 516 Rio Janeiro salted ox, 51f; 3,550 Pernambuco drysalted, 64f to 65f; 600 salted, 43f 50c; 2,095 Bahia dry ox, 70f; 809 Valparaiso drysalted ox, 74f; 115 New Orleans salted, 38f 25c. The arrivals exceeded 4,500. This week, Buenos Ayres salted ox, 52f 50c; dry, 85f; Tampico dry, 70f; Valparaiso salted ox, 53f; Pernambuco salted, 25f 50c; drysalted, 64f; Monte Video salted cow, 44f; dry, 86f and 72f: New York salted, 39f.

WOOL.—The sales at *Havre*, in the week ending Friday, were 515 bales La Plata unwashed, 1f 75c to 2f 60c the kilog; 16 washed, 2f 20c; 72 Chili unwashed, 2f 20c. The arrivals were 13 bales. This week, Buenos Ayres unwashed, 160f to 225f the 100 kilogs; Monte Video washed, 220f; ditto unwashed, 190f and 200f; Rio Grande unwashed, 150f; La Plata sheepskin unwashed, 135f.

TALLOW.—At *Havre*, in the week ending Friday, the demand was active. 145 pipes La Plata, disposable, 50f 75c to 51f 50c the 50 kilogs, duty paid; also 350 pipes and 90 casks, for delivery, same prices; 90 casks New York, 50f 87½c to 51f 50c. No arrivals. This week, New York a la marque, 51f 50c; La Plata, for delivery, 51f 12½c, 50f 75c, and 51f 50c. At *Paris*, yesterday, the 100 kilogs, not including octroi duty, were 102f.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, 90 deg., disposable, 51f to 50f the hectolitre.

COMMERCIAL AND MISCELLANEOUS NEWS.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 22nd day of July, 1865:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.

Caledonian Banking Company	53434	73434	44627
Central Bank of Scotland	42933	62691	28215

From Bombay we have letters to the 27th of June. In reference to the money market, Messrs Stoehr, Prieger, and Co., write as follows:—For many weeks past sinister rumours were afloat about the position of the Bank of Bombay, who had granted enormous loans on personal security, many of which are, for the present at least, unrecoverable. The distrust at last became so great, that two of the leading Exchange banks withdrew their deposits, and the consequence was that the return of the 7th instant was one of the most unfavourable ever issued by any bank, showing in one week a decrease at the head office and branches of 92 lacs in deposits and 72 lacs in cash. A suspension of cash payments was seriously apprehended, and probably prevented only by the resolution of the Central Government to assist the Bank of Bombay in her present difficulties to the utmost extent of its ability. This measure has allayed the most immediate apprehensions, but confidence is yet far from being restored, and while there is abundance of money in some quarters, it is withheld, because everybody distrusts everybody around him. Some of the banks, for instance, have unusually large funds, and amongst the natives "hoarding" is again becoming worse than ever; but all this money is for the present unavailable just for those who are most in want of it, *i.e.*, cotton dealers and shippers, and speculators. Exchange—The whole of this business is now in the hands of four or five banks, who alone have in the present crisis preserved their credit and means unimpaired. They have it, consequently, much their own way, and instead of making as formerly a difference of ½ to 1 per cent. between their own bills and credits and documents they now obtain one of 1 to 3 per cent. Bank bills opened at 2s and close at 1s 11$\frac{13}{16}$d; credits at 2s 0$\frac{1}{8}$d, close at par; documents at 2s 0$\frac{1}{2}$d to 2s 0$\frac{5}{8}$d.

A report of the Calcutta money market, dated June 22, says:—The supply of specie continues in excess of requirements, and as yet we are unable to report any improvement in the demand for money. On the 15th the Bank of Bengal reduced its rates one per cent., but quotations outside continue without alteration. From Bombay we hear of further serious failures, and that rates of interest and discount are 4 per cent. in excess of those ruling here, but as the Bank of Bombay is said to have received assistance from Government as well as from the Bank of Bengal, further advance in the value of money there is probably checked. Government securities have maintained their value; there are buyers to-day at 9 per cent. prem. for 5½ per Cents., but the demand is limited. Share Market—The principal feature in the share market is the recovery of Bank of Bengal shares which have been freely dealt in at the improved quotations; Salt Water Lake shares are also in better demand. Exchange has fluctuated little since our last; 1st class credits have been taken at 1s 11$\frac{15}{16}$d, but to-day we would quote them at 2s to 2s 0$\frac{1}{16}$d, and 1st class bank bills at 2s.

Annexed are the returns of the Bank of Bengal for the weeks ending June 6 and June 13:—

Liabilities.	June 6.	June 13.
Proprietors' capital, paid up	£2,200,000	£2,200,000
Reserve fund	174,854	174,854
General treasury balance at head office	851,225	740,180
Do. at branches	836,007	649,682
Other deposits at head office and branches	2,290 893	2,591,892
Bank post bills, &c.	11,564	11,898
Bank notes outstanding	27,955	27,578
Sundries	127,926	132,023
	6,520,424	6,528,102
Assets.	**June 6.**	**June 13.**
Government securities, investment No. 1	£313,721	£313,721
Loans on Government securities at head office and branches	1,127,650	1,081,410
Accounts of credit on ditto	184,967	158,894
Mercantile bills discounted at ditto	768,755	716,904
Dead stock ditto	40,517	40,511
Stamps ditto	1,044	1,012
Balances with other banks	40,919	44,705
Sundries	36,071	36,377
Treasury reserve in coin at head office	151,225	40,180
Cash and currency notes at head office and branches	3,855,535	4,024,385
	6,520,422	6,528,199

Messrs Dymes and Co., writing from Madras, on the 27th of June, thus allude to the state of the money market:—On 20th instant the bank reduced its rates one per cent. all round, they now stand at six per cent. for advances on Government securities, and eight per cent. on private bills. Madras Bank shares are steady at 70 to 72 premium. Government paper is rather lower at 8¾ to 9½ premium for 5½ per Cents., 2¾ premium for 5 per Cents., and 10½ discount for 4 per Cents. Exchange—After declining to 2s 0$\frac{1}{8}$d to 2s 0$\frac{3}{16}$d for first-class credits, is somewhat firmer at 2s 0$\frac{7}{16}$d to 2s 0$\frac{1}{4}$d. Documents 2s 0$\frac{3}{8}$d. The banks have reduced their drawing rate to 1s 11$\frac{3}{4}$d 6 months' sight. Sovereigns, 10.6 rs. each.

Digitized by Google

Subjoined is Messrs Sharp and Co.'s circular of bullion movements at Hong Kong for the fortnight ending June 13:—Gold—There have been no fresh arrivals from San Francisco, but the advanced rate for rupees has caused the price to fall. The receipts amount to $120,000 worth, and the exports, including those per Jeddo on the 30th ultimo, and excluding those to leave to-morrow, to $290,000. Silver—The transactions have been unimportant, as the market is bare of bar silver. We have received $90,000 in Sycee, and exported $150,000. Dollar Currency—As usual at this season, the large export of dollars to the tea ports still continues, and with the increased activity in silk, there has been a better demand for clean coin for Shanghai. The imports represent $520,000, against $1,580,000 sent away. Carolus dollars are again inquired for. Discounts and Mortgages—Money for short is still very cheap, say 3 to 4 per cent. For longer periods and mortgages, 8 to 9 per cent. Exchange.—Sterling has gradually advanced during the mail; the business transacted has, however, not been large, the unfavourable news received from India tending to diminish confidence. Closing Quotations—On London, 6 months' sight, 4s 6d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 218 rs; on Shanghai, 15 days' sight, 72¼ tls; on ditto, 30 days' sight, 73 tls; on Singapore, 3 days' sight, 2 per cent. prem.; on ditto, 15 days' sight, 1½ per cent. prem.; bar silver, 9⅓ per cent. prem.; Sycee, 8 per cent. prem.; Mexicans, unopened invoices, 2 per cent. prem.; ditto, Shanghai currency, 2½ per cent. prem.; gold leaf, $22.85 per tael; sovereigns, $4.55 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 5 per cent. prem.; Union Dock shares, 8 per cent. prem.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 9th day of August, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,995,060	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,345,060
		Silver Bullion	...
	27,995,060		27,995,060

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384,209
Rest	3,517,879	Other Securities	21,341,857
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,264,739	Notes	5,872,930
		Gold and Silver Coin	878,330
Other Deposits	14,688,181		
Seven Day and other Bills	553,527		
	38,577,326		38,577,326

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,575,657	Securities	31,823,066
Public Deposits	5,264,739	Coin and Bullion	14,223,390
Private Deposits	14,688,181		
	42,528,577		46,046,456

Dated the 10th August 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,517,879*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£628,160
An INCREASE of Public Deposits of	50,362
An INCREASE of Other Deposits of	6,454
No change in Government Securities.	
A DECREASE of Other Securities of	327,961
A DECREASE of Bullion of	234,258
An INCREASE of Rest of	9,065
An INCREASE of Reserve of	389,942

The principal change in the above return is the decline in the bullion, owing partly to the shipments of gold to Brazil and partly to the demand for coin for the harvest. A satisfactory increase has taken place in the reserve. The reduction in the other securities indicates the diminished demand for money.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,496,617	£ 22,920,727	£ 21,937,198	£ 21,881,314	£ 22,575,657
Public deposits	6,266,890	6,338,546	5,754,863	4,963,222	5,264,739
Other deposits	11,604,444	14,594,854	13,578,358	14,419,766	14,688,181
Government securities	12,766,624	10,986,097	11,088,426	11,097,095	10,384,209
Other securities	14,239,692	18,846,255	18,472,407	21,108,551	21,341,857
Reserve of notes & coin	9,781,865	10,361,651	8,429,704	5,909,285	6,851,260
Coin and bullion	16,275,295	17,778,846	15,049,819	12,609,925	14,223,390
Bank rate of discount	3½ p. c.	2 p. c.	4 p. c.	8 p. c.	4 p. c.
Price of Consols	91⅝	93½	93	89¼	89⅜
Average price of wheat	77s 7d	57s 10d	46s 3d	44s 1d	42s 6d
Exchange on Paris (short)	25 7½	12½ 25 20	27½ 25 30	35 25 25 35	25 17½ 25
— Amsterdam ditto	11 16	16½ 11 15½	16 11 17	17½ 11 19	12 11 18½ 19¼
— Hamburg (3 months)	13 7½	8 13 8	8¼ 13 8½	8 13 10	10½ 13 10 10¼

In the corresponding week of 1855, harvest prospects in the United States were favourable. Great mining speculations continued in Jamaica. An important debate on Indian finance had taken place in the House of Commons.

In 1862, Garibaldi had issued his proclamation, and King Victor Emanuel had published a counter-proclamation from Turin. Clandestine enrolments were being made by Garibaldian agents in Italy. Money was abundant in London, but the stock markets were dull.

In 1863, the Confederate loan had fluctuated considerably on the recent Confederate defeats, touching 35 discount. The stock markets were also rather unsettled, from apprehensions regarding the Polish question.

In 1864, the Danish Rigsdag had been opened by the King, The Ionian deputies had arrived at Athens, and had taken the oath of allegiance. A new Greek Ministry had been formed. The chiefs of the Polish National Government had been executed at Warsaw. The King of Ava had granted a perpetual concession for railways, telegraphs, and collieries in Burmah. In America, General Sherman was drawing his lines closer around Atlanta. Wilson's cavalry had routed the Federals at Decabur and captured their camp. General Grant had blown up a Confederate fort at Petersburg, and carried a line of Confederate entrenchments. The Bank of England had raised its rate from 7 to 8 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 2,635,248*l*; in 1862, a deficiency of 4,251,401*l*; in 1863, a deficiency of 4,894,049*l*; and in 1864, a deficiency of 6,688,785*l*. In 1865, the deficiency is 6,653,676*l*.

DISCOUNT AND MONEY MARKET.—The demand for money has remained quiet throughout the week, with a considerable supply of available capital, but holders continuing cautious; comparatively little business has been done below 4 per cent., even in the best short-dated paper. To-day there was rather less ease than yesterday, owing to the prospective effect of a payment to-morrow of 500,000*l* on account of the shares of Overend, Gurney, and Co. Annexed are the quotations for paper of various dates:—

30 to 60 days	4 per cent.
3 months	4 per cent.
4 months	4⅛ per cent
6 months—Bank bills	4⅛ 5 per cent.
6 months—Trade ditto	5 ½ per cent.

On the Stock Exchange, in consequence of sales of money stock to-day, the rate for loans advanced this morning to 3½ to 4 per cent., but receded in the afternoon to 3 to 3½.

Annexed are the rates of interest allowed on deposits:—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3½ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*.

About 10,000*l* in gold was withdrawn from the Bank to-day for exportation. There were no operations yesterday.

The Imperial Ottoman Bank have received advices of the usual monthly payment by the Government at Bucharest, of 5,300*l* on account of interest, and 1,400*l* for the sinking fund, of the Danubian loan.

Of the 500,000*l* Queensland Six per Cent. debentures offered by tender at the Union Bank of Australia on the 1st instant, 300,000*l* having been sold at and above the bank's minimum of 101*l* 11s 6d within the extension of time stated on the day of tender, the directors have advanced the price for the remainder to 103*l* 10s.

The Bank of France returns for the week shows the following changes:—

	£
INCREASE.	
Treasury balance	130,000
DECREASE.	
Cash in hand	272,000
Commercial bills	376,000
Advances	20,000
Notes	40,000
Current accounts	752,000

The Committee of the Stock Exchange have appointed Thursday, the 10th instant, a special settling day in the shares of Moore, M'Queen, and Co. (Limited), not to be marked in the official list. The Committee have also resolved that in consequence of a "material variation" between the prospectus and the articles of association, a settlement in the shares of the Russian Iron Works Company (Limited) be refused. The Committee have also appointed Thursday, the 17th instant, a

Digitized by Google

special settling day in the scrip of the Metropolis Sewage and Essex Reclamation Company, not to be marked in the official list.

The following are the rates of discount in the chief cities of the Continent, showing no material alteration :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4⅝ 5
Brussels	4	3½
Madrid	9	...
Hamburg	...	3
St Petersburg	6	6½

ENGLISH FUNDS.—Consols this week have been exceedingly flat, and show a decline of fully a half per cent. The fall has been chiefly caused by some large deliveries of stock at the settlement just completed, sales having been effected both for the Court of Chancery and, it is said, to wind up the estate of the late Mr R. Thornton. A portion also of the considerable amount of stock taken up on speculation at the preceding account is also believed to have been realised. At the same time the changeable state of the weather and the absence of business cause a somewhat unsettled feeling. This afternoon a large sale of New Three per Cents. caused increased heaviness, and the final quotation for the account was 89⅜ to ½, being at the lowest point during the week. For money the last price was 89¼ to ⅜. Reduced and New Three per Cents. were quoted 89⅛ to ⅜.

India Five per Cents. have been rather dull at 104¾ to 105, and Exchequer bills have fallen, in sympathy with Consols, to 2s discount to 2s prem.

FOREIGN STOCKS.—An unofficial announcement that no funds had been provided for the dividend and redemption of the Confederate Loan due 1st Sept. next, and that there is little prospect of any future payments on this stock, has caused a decline in the bonds to the nominal price of 6, but even at this depressed quotation it would be impossible to effect large sales. Mexican securities have been dull on the latest news from America of the hostile feeling between the Imperial troops and the Federal army posted on either side of the Texan frontier. Brazilian and Egyptian stocks have been more offered in each case from the anticipation of a new loan. Turkish Five per Cent. Scrip continues heavy, on the official announcement of the new conversion scheme. In almost all other descriptions there has also been a lower tendency, especially this afternoon.

The closing quotation of French Three per Cent. Rentes on the Paris Bourse this evening was 67f 85c, showing a fractional decline compared with yesterday, but no alteration from the price of last Friday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The principal change this week has been a fall in Midland stock, the half-yearly report just issued being unfavourably viewed. Most of the other leading descriptions are also lower. Great Western, on the other hand, has shown comparative steadiness. Business in this department continues limited, and the daily transactions are of even less importance than customary at this period of the year.

In colonial descriptions, Indian guaranteed stocks have been rather flat. There has been scarcely any movement in the foreign market, and prices are fairly supported.

In miscellaneous shares, attention has been chiefly directed to the new Atlantic Telegraph preference issue, which at one period fell to 3 discount, owing to the expected confirmation of the news of the break in the cable. This afternoon, however, there was a recovery to 2½ to 2⅜ dis. Telegraph construction shares have receded to 1 discount.

Metropolitan Sewage shares have been in demand to close speculative accounts for the fall, and have risen to 10 to 11 premium.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.

FOREIGN EXCHANGES.—The rates this week have again been firm.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—The Wellesley has brought 17,000*l* from Melbourne; the Persia has brought 20,000*l* from New York; the City of Washington has brought 14,000*l* from New York. These amounts have not been nearly sufficient to supply existing orders, and about 120,000*l* in coin and bars have been withdrawn from the Bank for export. The demand for abroad still continuing, it is not likely that any immediate arrivals will find their way to the Bank. The La Plata has taken 121,750*l* to the Brazils.

Silver.—The demand for India has been sufficiently active to clear this market of all fine bars; the price, however, has remained at 60½d per oz standard, and we consider the market firm at this rate. The steamer Delta, leaving Southampton on the 12th instant, will take about 100,000*l* to Bombay, the rise in the exchanges from that place causing shipments thither. The La Plata has taken 8,000*l* to the Brazils.

Mexican Dollars.—Further orders for this coin for China have been executed at 60¼d and 60⅜d per oz; the demand having been tolerably active, this market has been cleared of all parcels excepting those that are held for much higher rates. The French steamer has arrived at St. Nazaire from Vera Cruz, bringing 110,000*l* in dollars, but we do not hear of any lower quotation than 60¼d per oz.

Exchange.—We have not any alteration to report, the rates remaining the same as last quoted by us, viz.,—on Calcutta and Madras, 60 days sight, 1s 11¼d to 1s 11⅜d, and on Bombay 1s 11¼d to 1s 11⅜d.

India Government loan notes are lower in price, there being considerable amounts for sale. We quote the 5½ per Cents., 108 to 110; the 5 per Cents., 100 to 102; and the 4 per Cents., 88 to 90.

Digitized by Google

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9¾d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0¾d per oz std, last price; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 5s 0¼d per oz, last price; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 8 per cent.

The outgoing steamer Delta, with the mails for Bombay, will take 121,600*l*.

RAILWAY DIVIDENDS.—It is officially announced that the dividend for the half-year on South Devon Railway stock will be at the rate of 2½ per cent. per annum, against 1⅝ for the corresponding period of 1864.

The dividend on the London and Blackwall Railway stock is officially announced at the rate of 3¾ per cent. per annum, against 3⅝ for the corresponding period of 1864.

The dividend on the London and North-Western Railway stock is officially announced at 6 per cent. per annum, carrying forward a balance of 10,711*l* 1s 6d.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The failure has been announced of Mr Baldwin von Bartels, of Primer's court, Old Broad street. The liabilities are estimated at about 70,000*l*, and the assets showing a dividend on the claims of about 70 per cent. are almost exclusively in Buenos Ayres and Monte Video.

A petition has been presented for the winding up of the Land Drainage and Improvement Company of Denmark, and will be heard before Vice-Chancellor Sir W. P. Wood on the 18th instant.

Mr Arthur Cooper has been appointed by the Master of the Rolls, official liquidator of the Chesterfield and Midland Silkstone Colliery Company (Limited.)

PUBLIC COMPANIES.—The report of the London and Lisbon Corkwood Company, to be presented at the meeting on the 10th instant, shows an available balance of 5,751*l*. A dividend at the rate of 7½ per cent. per annum is recommended, making a total distribution of 15 per cent. for the year, free of income tax.

The half-yearly meeting of the European Bank was held on Monday last, when an interim dividend of 5 per cent. per annum, free of income tax, was declared.

At the first annual meeting of the Thames Plate Glass Company (Limited) held on the 4th instant, a dividend of 5 per cent. per annum, free of income tax, was declared for the six months ended 30th June.

At the meeting of the Albion Bank, held on Tuesday last, the gross profits were stated at 6,244*l*. A dividend at the rate of 5 per cent. per annum was approved.

The first meeting of the shareholders of the Southwark Insurance Corporation was held on Tuesday, wnen the directors' report was adopted, and a dividend of 5 per cent. ordered on the paid-up capital.

The directors of the Agra and Masterman's Bank (Limited) have anncunced an *ad interim* dividend of 10 per cent. per annum, and a bonus of 15s per share, being together equal to 16 per cent. per annum.

At the meeting of the Midland Wagon Company, held on the 9th instant at Birmingham, a dividend at the rate of 15 per cent. per annum was declared for the past half-year, and a sum exceeding 7,000*l* was carried to the credit of contingent and other funds of similar character.

The meeting of the London and Glasgow Engineering and Iron-Ship-Building Company took place on Thursday. The directors' report was adopted, and a dividend and bonus equal to nearly 10 per cent. per annum were declared, free of income tax, leaving 1,617*l* to be carried forward.

At an extraordinary meeting of Halcomb and Co., Sack Contractors (Limited) held on Thursday last, it was resolved to expunge from the articles of association a clause giving the directors power to deal in the shares of the undertaking with its own funds.

At a meeting of the Oil Seed Crushing Company to-day, the report recommending a dividend at the rate of 8 per cent. per annum, free of income tax, was agreed to.

A prospectus has been circulated by the London Financial Association of a short Irish Railway of 12 miles, called the Belfast and Bangor Railway and Land Company, with a capital of 1,000,000*l*, of which 600,000*l* is be first issued in shares of 20*l*. The railway already exists as a single line, but this is indequate for the traffic, and the proposal is to buy it with 400,000*l* in shares of the new Company, and to employ the additional capital in laying another set of rails and increasing the rolling stock, and also in purchasing lands for an hotel, winter gardens, an esplanade, &c. The population of Belfast is 190,000, and Bangor is described as its place of sea-side resort. The population of Dublin is 254,000. The cost of the present line per mile will be, including everything, 50,000*l*, while that of the Dublin and Kingstown was 65,000*l*.

At the annual meeting of the Royal Insurance Company, it was stated that the profits on the life branch for the past five years amounted to 168,958*l*, and that the fire premiums for 1864 reached 406,404*l*.

The share list of the Menai Park and Hotel Company (Limited) will close on the 16th instant. The shares are quoted 1¼ to ¾ prem.

MISCELLANEOUS.—Notice has been given that the coupons on the Egyptian Government loan of 1862, together with the bonds drawn for redemption, will be payable at the office of Messrs Frühling and Göschen on and after the 1st proximo.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 108¼ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

JAPAN.—Arrangements have been made with the French Post Office, by which, in future, letters and printed papers may be forwarded to Japan by a new line of French Mail Packets established between Shanghai and Yokohama. The French Packets leave Marseilles on the 19th of each month. Letters, &c., intended to be forwarded by them must be specially addressed, "by French Mail Packet from Marseilles," and must be posted in, or reach London, at the latest, in time for the day mail to France of the 18th of each month, or when that date falls on Sunday, in time for the night mail of the 17th.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Included in the small supply of home-grown wheat on sale a Mark lane to-day were a few samples of *new* produce, chiefly red, but they were held at high prices: fine red at 50s, and fine white at 56s per quarter. For old English wheat, resulting from the unsettled state of the weather, the trade was very firm. Millers, however, were by no means inclined to comply with the demands of factors, and only selected produce commanded more money, the quotations as regards fine wheats being 1s per quarter higher than on Monday. Holders of foreign wheat were very firm, but only fine parcels changed hands at an advance in price of 1s per quarter. The barley trade was firm at fully late rates. Oats were in steady request at full currencies. Beans and peas supported Monday's quotations. For flour, there was a fair demand, and prices ruled firm. This week's imports consist of 14,020 quarters of wheat, 3,360 barley, 32,670 oats, and 10 sacks of flour.

At Liverpool, this morning, a large business was done in breadstuffs. Wheat advanced 3d to 4d per cental; flour, 6d per barrel and 1s per sack, as compared with Tuesday. At Wakefield, wheat was 1s per quarter dearer than on Friday last.

A fair amount of business has been transacted in the Liverpool cotton market during the week, resulting in total sales of 65,000 bales, of which spinners have taken 49,500 bales, speculators, 4,500 bales, and exporters, 11,000 bales; quotations are unchanged for all descriptions except Bengal, which are about ¼d per lb dearer. The week's import amounts to 85,500 bales, and the stock as estimated to-day is 348,000 bales. The market closes with a very firm tone, with hardening prices. Sales 10,000 bales.

From New Orleans, to July 26, we learn that the stock of cotton was about 50,000 bales, and the price of middling quality, 41 cents per lb. The arrivals from Sept. 1 to July 20, amounted to 139,727, and the exports during the same period to 103,477 bales. At Mobile, on the 26th ult., the stock was 25,000 bales, the value of middling produce being 39 cents per lb. The arrivals of cotton at Savannah, for the week ending July 22, were about 3,000 bales: strict to good middling sold at 43c to 46c, and Sea Island at 55c to 65c per lb.

We have letters from Bombay to June 27. Owing to favourable advices from Europe, the demand for cotton had been decidedly active. The quality of the produce on offer was by no means satisfactory, and good and fine parcels changed hands at an advance of 58 to 60 rupees, whilst inferior descriptions realised an improvement in value of about 30 rupees per candy. Both European and native houses were extensive purchasers. The following tables of prices and exports are from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, June 22.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0¼d Freight 1d. per lb

The latest price for cotton at Tinnevelly is 120 rupees per candy. At Colombo, business has been done at 130 rupees.

There was a decided improvement in the market for Manchester goods at Bombay towards the close of the month of June. The business doing was somewhat extensive, and the quotations had

Digitized by Google

an upward tendency. The following prices of grey shirtings are from Messrs Rennie, Scovell, and Co.'s circular:—

No.	Inches.			Per Piece.	
			lbs	oz	s d
13	39	14 by 11	6	0	10 4½
18½	39	14 14	7	0	12 10½
24	39	16 15	8	0	15 1
27	38	16 16	8	8	15 6½
32	39	19 19	9	9	18 11
41	45	14 10½	7	0	11 11
45	44	14 12½	8	0	13 9½
49	44 to 45	16 16	9	8	17 5
57	50	16 17	10	6	19 6½

The Calcutta cotton market, during the week ending June 22, ruled quiet, but at an advance in prices of 1 tael per picul. The export from June 1 to June 20 was 1,545 bales to England, and 2,638 bales to China.

The arrivals of the *new* crop of cotton at Madras, during the fortnight ending June 26, were limited, but the quality of the produce was good. The market ruled quiet, at 9½d for Western. The stock of all kinds was estimated at 10,000 bales.

According to letters from Shanghai, dated the 5th of June, the business doing in cotton at that port was limited, and very few shipments of produce had been made to Europe during the preceding fortnight. Annexed is the table of exports:—

EXPORTS of COTTON from SHANGHAI, from Oct. 1 to May 30.

	Great Britain. bales of 400 lbs.	Coast Ports. bales of 400 lbs.
1864–5	51,901	38,445
1863–4	107,007	72,970
Decrease in season 1864–5	55,106	34,525

We learn from Yokohama that so little business was doing in cotton that prices were quite nominal. The export from June 1, 1864, to May 27, 1865, was 17,109 bales to England, and 7,552 bales to Hong Kong—total, 24,661 bales, against 67,746 bales in 1863-4.

The colonial and foreign grocery produce markets have been very quiet, and on comparison with Friday last, prices show, in some instances, a slight decline. The principal change, however, is confined to raw sugar, most qualities of which are about 6d per cwt lower than at the close of last week. Tea may be considered steady; but coffee, cocoa, and rice, are decidedly firm in value.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to July 31, 1864 and 1865, with STOCK on hand on August 1, 1864 and 1865.

	86,620,000	95,637,000	97,709,000

Postal advices from China state that the shipments of tea from all ports to Great Britain for the season concluded on the 30th of May, had amounted to 118,214,200 lbs, against 118,572,100 lbs 1863-4. The export to the United States had been 17,046,600 lbs and 25,312,300 lbs in 1864-5 and 1863-4 respectively. The new season had opened with considerable firmness, and at high prices; the demand for green teas for export to the United States had been somewhat active. By telegraph we learn that the export from all ports from June 1 to July 5, had reached 20,250,000 lbs.

Advices from Port Louis, Mauritius, report very little change in the state of the sugar trade of that port. The demand for most qualities of produce was limited, yet prices ruled firm. The extent of the *new* crop was estimated at 140,000 tons. Annexed is the table of shipments:—

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st of August to 1st of July.

Annexed is a statement showing the extent of the imports of coffee, sugar, cotton, hides, and rice, at Hamburg, during the seven months ending July 31, in each of the last five years, as well as the stocks of certain of those articles on the 31st ult.:—

IMPORT from Jan. 1 to July 31.

	1861.	1862.	1863.	1864.	1865.
Coffee, British tons	28,750	27,450	25,000	19,800	32,750
Sugar	20,000	17,500	23,500	10,500	16,250
Cotton bales & serons	67,000	29,900	57,000	83,000	90,000
Hides (kips not included)	240,600	266,000	210,000	147,700	278,400
Rice tierces	730	112	...	...	...
Rice bags	71,500	131,400	130,400	125,000	90,000
STOCK, July 31.					
Coffee, British tons	11,000	8,500	7,500	4,250	14,000
Sugar	6,750	5,500	7,500	1,500	1,250
Cotton bales & serons	13,000	...	1,900	1,500	500

The supply of *new* coffee on sale at Colombo, during the fortnight ending July 1, was very limited. Plantation produce sold at 12s 4d to 12s 7d per bushel; native ditto, unpicked, 45s; picked and dried, 50s 6d to 52s per cwt. The following table of shipments is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from COLOMBO from Oct. 1 to June 30.

The following table, from Messrs Jackson and Till's circular, shows the quantities of rice afloat to Europe on the 1st inst., compared with the corresponding date last year:—

	1865. tons.	1864. tons.
From Calcutta	3,793	5,388
Madras	...	160
Rangoon	31,815	53,712
Akyab	60,244	81,495
Bassein	24,341	30,567
Moulmein	580	3,520
Java	1,112	1,205
Totals	121,885	175,047

The public sales of colonial wool will be commenced on Thursday next, the 17th inst. The arrivals now comprise 123,532 bales, consisting of 36,341 bales from Sydney and Queensland, 15,713 Victoria, 6,001 South Australia, 501 Swan River, 104,700 Tasmania, and 19,524 bales from the Cape of Good Hope. The business doing in wool, both English and colonial, is limited, at last week's currency.

The total quantity of wool offered at the recent public sales held at Liverpool was 33,706 bales, of which 13,741 bales were from the East Indies. East India sold at 3¾d to 22d; Persian, 8d to 18d; Donskoi fleece, white, 10d to 13¾d; ditto autumn and lambs, 9½d to 11d; Cordova and Santiago, 9d to 13½d per lb.

The silk trade continues very quiet, the business doing in all descriptions is extremely limited, and prices must be considered, in a great measure, nominal; they show, however, a reduction of about 10 per cent. from the late highest point. The subjoined table, showing the state of the London warehouses on the 1st inst., is from Messrs Durant and Co.'s circular,—

STATE of the SILK WAREHOUSES.

	Sold Stock. Aug. 1, 1865. bales.	Aug. 1, 1864. bales.	Unsold Stock. Aug. 1, 1865. bales.	Aug. 1, 1864. bales.
Bengal	3,474	3,126	1,616	3,594
China	2,200	7,718	198	3,819
Japan	2,404	4,033	1,602	2,444

Canton	7	235	394	1,859
Chinese thrown	4	132	103	657

Advices from Shanghai are to June 16. During the fortnight preceding that date, considerable business had been done in *new* silk, at high prices; the shipments had been about 4,000 bales. The estimates as regards the extent of the new crop varied from 45,000 to 50,000 bales; but it was asserted that the production of fine qualities had been limited. The shipments during the last two seasons were as follows:—

	Raw. bales.	Thrown. bales.	Coarse. bales.	Japan. bales.	Total. bales.
1864-5 (to May 26)	24,624	15	69	14,798	39,506
1863-4	26,224	102	39	10,670	37,035

The opening prices of the present season were:—Tsatlee, No. 3, 445; good No. 4, 420; No. 4½, 405; and No. 5, 390 taels per picul. A telegram, *via* the Persian Gulf, dated July 5, advises an active market, at enhanced quotations.

From Yokohama, we have intelligence to May 27, and during the preceding fortnight, the silk trade had ruled active, with an upward tendency in prices. The settlements reached 1,200 Japanese bales, leaving a stock of similar extent, and of fair average quality. The rates current in Mexican dollars, duty not paid, at latest date, were:—

	Best. Per picul. dollars.	Medium. Per picul. dollars.	Inferior. Per picul. dollars.
Maibash and Sinchu	690 @ 710	660 @ 680	620 @ 650
Ida	...	660	680	620	650
Sodai	...	550	600	...
Oshiu	650	670	620	640	580	600
Koshio	...	540	580	...
Mashta	...	570	590	...
Echizen	620	640	550	600	...
Hatchojee	540	560	...	...

At Calcutta, during the month of June, the supply of silk on sale had been exceedingly small. There had been scarcely any demand either for fine or inferior qualities, and the latter had somewhat declined in price. The shipments to Great Britain from Jan. 1 to June 20 were 4,761 bales, against 4,869 bales from Jan. 1 to June 30 last year.

The following is from Messrs Churchill and Sim's circular:—

STOCK of WOOD at the PUBLIC DOCKS on August 1.

	1865.	1864.	1863.
Foreign deals pieces	860,000	801,000	1,098,000
Battens and boards	1,440,000	1,030,000	1,029,000
Fir timber loads	45,600	42,300	67,000
Colonial pine deals & battens pieces	275,000	516,000	389,000
Spruce ditto	251,000	758,000	687,000
Pine timber loads	14,600	8,400	4,500
East Indian teake	19,800	13,000	22,200

The metal trade has been very quiet. Scotch pig iron has sold at 54s 6d cash, mixed numbers; spelter at 21*l* 17s 6d per ton, on the spot; Banca tin, 95*l*; and Straits at 90*l* cash. Linseed oil has advanced to 32s 3d per cwt, on the spot, and olive oils have changed hands at enhanced rates. French spirits of turpentine are quoted at 47s per cwt on the spot.

The tallow trade—owing to the progress of the disease amongst cattle throughout the country, has been firmer. St Petersburg Y.C. is now quoted at 42s 6d per cwt, on the spot. At St Petersburg, the price has advanced to 46½ silver roubles, cash.

Trade at New York, during the week ending July 29, was somewhat unsettled. Speculative transactions had increased to some extent, and, in consequence, prices had fluctuated considerably. The markets in which the greatest animation prevailed were those for cotton and breadstuffs. As regards cotton, the increased activity resulted chiefly from a somewhat extensive export demand; but in wheat and flour—although the export inquiry was by no means extensive—considerable business was transacted, speculators having entered into large operations, anticipating an important rise in prices, owing to the prevalence of rains in the wheat-growing districts. Metals continued to advance in price, and petroleum had sold freely for export on higher terms. For money there was an improved demand: the best short-dated paper was quoted at 6½ to 7; 3 to 4 months' ditto, 7 to 8 per cent. The stock of bullion in the banks of New York city on the 22nd ult. was 4,066,580*l*, and the balance in the sub-treasury, 10,615,100*l*. The shipments of specie from January 1 to July 22, were 3,689,230*l*; against 6,122,580*l* in 1864, and 4,727,460 in 1863.

THE COTTON TRADE

LIVERPOOL—August 11.

The cotton market was dull in the early part of the week, and with a limited business and abundant supply, a general decline was submitted to; but on Wednesday the demand revived, the sales have since been large, and prices have generally recovered the quotations of last week. The demand for Sea Island has been good, and former rates are generally supported. American has been in good request, and after declining ¼d to ½d per lb closed at last week's rates. In Brazil the transactions have been extensive, and prices remain with little alteration. In Egyptian a large business has been done, and after considerable fluctuations from day to day prices are quoted the same as at the close of last week. Smyrna, owing to the limited supply, maintains full prices. The demand for Surat in the early part of the week was very limited, and prices declined about ½d per lb. During the last two days the inquiry has been more active, but prices are still rather below last week's quotations. China has been in fair request, and after some slight fluctuations, closed steadily.

To arrive, several transactions have been reported during the week, particularly in Egyptian, and the last quotations were yesterday for Egyptian, fair open, shipped or shipping, and ship named, 17¼d per lb, on Wednesday; Paraïba, first quality, ship named, 17d; and yesterday, Western Madras, fair new, ship named, 12d; and Oomrawattee, fair new merchants, ship named, 11½d per lb.

The sales of the week amount to 65,270 bales, including 4,490 on speculation, and 12,860 declared for export, leaving 47,920 bales to the trade. The sales to-day will amount to about 10,000 bales.

NEW YORK—July 29.

The arrivals of cotton at this port during the present week have been large, viz., 18,220 bales. The chief source of this supply is New Orleans, the receipts from which port have been 8,586 bales. The arrivals from Mobile has amounted to 1,619 bales; from Savannah, 1,395 bales; from Charleston, 420 bales; and by rail to 3,730 bales. In the early part of the week, the trade was dull, at 46 cents for middling Upland. During the last few days the market has presented a more active appearance, and business of fair extent has been done for export: middling Upland produce is now worth 48 cents per lb. The import since Sept 1, 1864, is now 340,015 bales. The prices current to-day are as follows:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

MARKETS IN THE MANUFACTURING DISTRICTS

The demand for goods in most of the leading markets has shown signs of improvement, and prices generally have been well supported. In all quarters stocks are very moderate. Coals have moved off freely, at full quotations; whilst the sale for iron has continued moderately active.

MANCHESTER, August 10.—This week, after several weeks stagnation, has resulted in a very considerable amount of business at an average reduction of nearly ½d per lb. On Tuesday manufacturers came to market with the intention of accepting lower prices, the lower prices brought in buyers, and on Tuesday afternoon and yesterday sales were larger and more general than for some time past. Prices are now firmer in consequence, indeed for both yarns and cloth many quotations are advanced, but buyers do not follow. The sales have been pretty equally in yarns for Germany, India, and the home trade, India and China shirtings, jacconets, T'cloths, and printers. But neither the number of looms standing, nor the unprofitableness of the trade, can be said to have diminished.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There is certainly more inquiries for wool. Very bright wools are more in request, and prices are extremely firm. There is more inquiry for yarns; the principal business is in home spinnings, export merchants are not yet buyers. The characteristics of the piece market have not altered. Foreign, American, and home buyers have cleared all stocks of fancies.

LEEDS.—There is a steady demand for all wool black cloths, and a moderate demand for unions, and of neither class of goods are the stocks in the hands of manufacturers large. Strong meltons keep in fair request, and the same may be said as to most of the soft classes of overcoatings for the colder season of the year.

NOTTINGHAM.—The demand for hosiery yarns was quiet, at little or no alteration from late rates. There is very little change to quote in the value of silks. Brown nets had a dull sale; fine numbers, however, were a shade dearer. Other descriptions tending downwards.

ROCHDALE.—A good few small assortments of goods were purchased, the chief kinds of fabrics being fancies, both low and medium qualities. Merchants, however, did not operate very freely, though a better disposition was shown than for the last few market days. The manufacturers keep well employed, and the deliveries to order are to a full average extent. The Yorkshire goods trade of low woollen fabrics in this market is dull and prices nominally the same as last week. Wool is firm in price, and business is steady without being positively brisk.

HUDDERSFIELD.—The principal part of the demand has been for heavy goods, suitable for winter wear, in medium and better class fancies, but sales have also been effected in black doeskins of medium quality; the amount of business done in low goods has been limited.

BIRMINGHAM.—The trade of this town has improved; the country orders have come in more freely, and most of the manufacturers are better engaged than they have been at any time since the commencement of this quarter. The demand for material has slightly increased.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 29.—Heavy rains having prevailed throughout a considerable part of the wheat-growing districts, there has been much more firmness in the trade for flour and wheat, and prices have improved. A fair but by no means extensive business has been done for export. The largest transactions have been on the part of speculative operators. The receipts during the week have been as follows:—Flour, 64,518 barrels; wheat, 161,160 bushels; corn, 476,920 bushels. The prices current are as follows:—Flour—State, superfine brands, $6 to $6.75; State, extra brands, $7 to $7.15; State, choice brands, $7.20 to $7.05; Ohio, common brands, $8.25 to $8.50; Ohio, fancy brands, $8.63 to $8 65; Ohio, good and choice extra brands, $8.70 to $10; Michigan, Indiana, Wisconsin, &c., $6.10 to $7.60; Genesee, extra brands, $7.60 to $9.50; Missouri, $9.75 to $12.50; Canada, common, $7.10 to $7.60; Canada, good to choice

Digitized by Google

extra, $7.10 to $9.25 per barrel. Wheat—Inferior white Michigan, $1.85; amber ditto, $2 to $2.10; red winter Western, $1.85 to $1.95; amber spring, $1.62; Milwaukee Club, $1.57 to $1.61; Chicago and Racine spring, $1.55 to $1.60. Corn—Sound mixed Western, 90c to 92c, unsound ditto, 87c to 90c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, have been very moderate, and chiefly composed of last week's produce in excellent condition. Although the demand has been far from active, factors succeeded in obtaining on Monday 2s to 3s per quarter more money than on that day se'nnight. Foreign wheats have risen about 2s per quarter, with a fair consumptive inquiry. The supplies have not increased. Scarcely any English barley has been on show. Of foreign, the receipts have been moderate. On the whole, the barley trade has ruled steady at full quotations. Malt has realised rather more money, with a good demand. The oat trade has continued in a healthy state at full quotations. Both beans and peas have moved off slowly, but at fully late rates. English flour has advanced 2s per 280 lbs, and American 1s to 2s per barrel.

The local markets have been steady for wheat, at 1s to fully 2s per quarter more money. All kinds of spring corn have ruled very firm.

On the Continent, the value of wheat has had an upward tendency. Advices from New York state that both wheat and flour were higher in price.

Fair progress has been made in harvest-work this week. There is, however, a very large quantity of produce in the fields. The wheat crop is turning out well.

In Scotland, wheat has sold on higher terms, and all other kinds of produce have realised very full prices.

The Irish markets have been moderately active. Wheat has sold at enhanced rates, and other articles have continued steady.

Fresh up to our market, to-day, the arrivals of old English wheat were limited. Owing to the unsettled state of the weather, both red and white qualities were held at enhanced rates. Sales, however, progressed slowly, at an advance for good and fine wheats of 1s per quarter. The foreign wheat trade was very firm, and, in some instances, a similar improvement took place in the quotations. Barley was firm, at fully late rates. For oats, there was a steady demand, and Monday's currency was well supported. Beans and peas changed hands at the full prices of Monday. The flour trade was firm, at full quotations. A few samples of *new* red wheat were on offer.

The annexed return shows the per centage of wheat and flour imported from each country during the first six months of the present year:—

Mr George Dornbusch reports the arrival off coast of 17 cargoes of grain, and an advance in the value of wheat of from 6d to 1s per quarter. Other kinds of produce have ruled about stationary. Cotton-seed has sold at 7*l* 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is rather quiet, prices being in some cases a trifle lower, and the public sales have passed off without much animation. Some parcels of Jaggery Madras went off at fair rates. 1,720 casks West India had sold in three days, including Barbadoes at 30s to 35s per cwt. Floating cargoes of foreign have found buyers upon rather lower terms. The total deliveries in London exceed those of last year by 29,500 tons, and the stock on the 5th inst. had increased to 102,100 tons.

Mauritius.—At auction, 2,363 bags chiefly sold, from 27s 6d to 30s 6d; grainy and crystallised, 33s 6d to 37s per cwt.

Bengal.—261 bags sold at 33s 6d to 36s for low to good grainy yellow.

Madras.—7,166 bags all sold at and after the sales: Jaggery, 24s to 26s 6d per cwt.

Penang.—2,250 bags were withdrawn.

Foreign.—Three floating cargoes of Cuba have sold, for the United Kingdom, at 22s. Two of Havana, No. 12 to 12½, at 25s. By auction, 4,050 bags, imported from Mozambique, part sold at 30s to 35s 6d per cwt.

Refined.—The market is quiet, and prices have rather tended downward.

RUM.—A Government contract for 50,000 gallons is declared; tenders to be sent in on the 28th inst. The market has been firm. Some sales of East India are reported: Penang, 1s 6½d; Mauritius, 1s 7d to 1s 7½d per proof gallon.

COCOA.—Higher rates have been paid for the better sorts of Trinidad. 956 bags sold by auction at 63s to 111s. 89 bags Grenada sold at 54s to 58s. 102 bags Guayaquil were bought in at 70s per cwt.

COFFEE.—The Dutch sale, on Wednesday, went off rather lower for pale sorts, good to fine being steady. This market is unsettled, quotations occasionally favouring the buyers. 1,100 casks 88 barrels 183 bags plantation Ceylon sold at 80s to 86s, for low middling to good.

Digitized by Google

Of 320 casks 2,871 bags native, the greater part sold at 66s to 69s. Some very low bought in at 65s to 65s 6d. A few lots fine realised 70s 6d to 74s 6d. 401 packages East India sold, including Cannon's Mysore, at 99s. 55 packages Jamaica obtained previous quotations. The cargoes recently sold have included very low Rio at 45s 6d, and one superior at 68s per cwt. Particulars of these sales are now reported with great irregularity.

TEA.—The market has been dull by private contract, and the general quotations show little variation to notice. 546 packages of Indian growth in public sale found buyers, and the fine descriptions obtained steady rates. The deliveries in London in seven months were 6,000,000 lbs larger than in 1864. Present stock of 95,000,000 lbs, about the same as at the corresponding date of last year.

RICE.—Several parcels of soft grain have changed hands during the week at 9s to 9s 9d. The market is firmer, owing to the unsettled weather at harvest-time, but little speculation prevails. 2,437 bags Bengal, by auction, partly sold; fine white of the new crop, 16s; broken white, 13s 6d. A floating cargo of Necrancie Arracan sold at 10s 6d per cwt for a near continental port.

SPICES.—215 cases cassia lignea, offered by auction, sold at 1s advance, fair second pile obtaining 83s to 84s. 392 barrels Jamaica ginger were disposed of on barely lower terms for the common qualities: ordinary to good, 61s to 125s. 150 bags African were bought in at 37s per cwt. 2,240 bags Singapore pepper were chiefly taken in at 3d to 3⅛d. 133 bags Malabar pepper were held at 4½d. 168 bags Singapore white sold steadily at 5⅜d to 5½d per lb. Nothing of interest has occurred in pimento or other spice.

SAGO.—559 boxes 235 bags sold steadily as follows: small grain, 19s 6d to 20s; bold, 21s to 21s 6d per cwt.

DRYSALTERY GOODS remain inactive.

METALS.—The markets remain in a very quiet state, and quotations are generally unaltered this week, few comparatively sales being effected. Straits tin has sold at 89*l* 10s per ton cash.

JUTE.—The sales passed off with less animation than expected, after the recent active demand, and reports of a deficient crop. Prices, however, showed little variation, and 16,281 bales about half sold: low to fine, 11*l* 10s to 23*l* 5s per ton.

MANILLA HEMP is very firm, but the demand not active. 1,168 bales offered by auction about half sold, at 32*l* 5s per ton, for good roping.

SALTPETRE.—50 tons Bengal, refraction 8¾ to 8½, have sold at 24s. 50 tons low, in course of landing, at 24s per cwt.

OIL.—Linseed is steady, at 32s on the spot; 32s 6d to the end of the year. Rape oil active, especially brown. English and foreign sold freely, at 44s for delivery. On the spot buyers at 44s 6d for both. Cocoa-nut quiet. Palm steady, at 37s per cwt for fine. Olive oils remain steady and in fair request at the quotations. No change of interest has occurred in fish oils, but E.I. is in good demand, at 30*l* to 30*l* 10s per ton.

TALLOW.—The market continues firm. This morning, 1st sort Petersburg Y.C. is quoted 42s 9d; October to December, 43s 9d; January to March, 44s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, August [illegible] 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is unchanged to-day. Some parcels of West India by auction partly sold, and the week's transactions reach 2,334 casks. 2,280 bags Mauritius by auction partly met with buyers. 533 bags Bengal brought 37s 6d to 38s 6d for good white Benares (11s 8d duty).

COFFEE.—108 casks 32 barrels and bags plantation Ceylon by auction sold at steady rates. 751 bags native at 67s 9d to 69s 6d. 1,612 bags Costa Rica at 67s 6d to 81s 6d per cwt.

COCOA.—273 bags Grenada brought 52s to 56s per cwt.

GINGER.—279 barrels Jamaica sold at 58s to 77s per cwt.

GAMBIER.—1,400 bales were bought in at 21s 6d per cwt.

OILS.—718 casks palm by auction sold: Accra, 29s 9d to 34s 3d; Lagos, fine, 37s to 37s 6d per cwt.

PETROLEUM.—American refined on the spot 2s 7d. For delivery in the last three months 2s 5d per gallon demanded.

TALLOW.—Town melted rose to 45s 9d, and 827 casks various sorts by auction went at 9d to 1s per cwt advance.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains unaltered. No demand for Dutch crashed.

GREEN FRUIT.—Lemons of good quality bring high prices, those of inferior quality sell in character; but as some parcels are received in transit for New York, no great reduction in price can be expected. Some parcels from Lisbon, Naples, and Palermo, sold by Keeling and Hunt at public sale, went at prices nearly equal to those obtained last week. More speculative inquiry for nuts, and some parcels of Barcelona and Para have been sold, the prices being considered safe.

DRY FRUIT.—Currants show a little firmness, but business is limited, and prices now ruling are 2s to 3s below this time last year. Raisins are steadier, and a fair amount of Turkey have been sold at low rates during the week.

ENGLISH WOOL.—Market unchanged.

COLONIAL WOOL.—The market is without change.

FLAX.—Market very firm.

HEMP.—Market firm, and a good business done during the week.

TOBACCO.—The market for American tobacco has not presented any change, and sales have continued of a very limited character. Other growths have been in good demand, and a large business transacted at full prices.

LEATHER AND HIDES.—During the past week a little more general business has been doing at about former rates. The supply was good at Leadenhall on Tuesday, and there was a fair attendance of buyers. The articles most wanted were good crop hides, 45 lbs and 50 lbs, light common English butts, and calf skins of light and middle weights.

METALS.—The market for metals has kept steady. Copper is unchanged, but still dull of sale. Iron is a shade easier to buy. Tin is unchanged in English, whilst holders of Straits have yielded 10s a ton to induce some sales. Lead is in fair request still. Spelter steady, and tin plates the same.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	9
Fat by ditto	2	2½
Yellow Russia	44	3
Melted stuff	24	6
Rough ditto	19	0
Greaves	19	0
Good dregs	6	9

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 7.—The total imports of foreign stock into London, last week, amounted to 26,400 head. In the corresponding week in 1864 we received 14,629; in 1863, 15,775; in 1862, 10,802; in 1861, 9,697; in 1860, 15,057; and in 1859, 10,662 head.

There was a large supply of foreign stock on offer in to-day's market, and sales progressed slowly, on rather lower terms. Its general quality was very middling. The arrivals of beasts fresh up from our own grazing districts were only moderate, and the condition of all breeds was by no means first-rate. Prime Scots, Herefords, Devons, and Shorthorns moved off steadily, at full prices, the top figure being 5s 6d per 8 lbs; otherwise, the beef trade was in a sluggish state, and, in some instances, prices had a drooping tendency. Several bullocks, suffering from disease, were seized by the authorities, and immediately slaughtered. By some persons it is described as "gastric fever." We were fairly supplied with sheep; but at least a moiety of them were of inferior quality. Downs, half-breds, and other prime breeds sold freely, at extreme rates. Inferior sheep were dull, and 2d per 8 lbs lower. The highest price was 6s 4d per 8 lbs. The supply of lambs was limited. Prime qualities of lamb moved off freely at 6s 8d to 7s—in some instances at 7s 4d per 8 lbs. Inferior breeds were dull, at late rates. Calves were in fair supply, and sluggish request, at last week's prices. Pigs were in moderate demand, at full quotations. The supply was good.

SUPPLIES.

	Aug. 8, 1864.	Aug. 7, 1865.
Beasts	6680	6734
Sheep and lambs	30640	26570
Calves	361	317
Pigs	470	390

THURSDAY, Aug. 10.—There was about an average supply of beasts on sale here, to-day, in somewhat improved condition. All breeds moved off heavily at a decline in the quotations, compared with Monday last, of 2d per 8 lbs. The show of sheep was moderate, and the mutton trade was very dull at 2d per 8 lbs less money. The top figure was 6s 2d per 8 lbs. Very few lambs were on offer. Sales, however, progressed slowly at barely late rates. Calves were in good supply, and sluggish request, on former terms. No quotable change took place in the value of pigs or milch cows.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Aug. 11.—The plantation accounts are very favourable, and it is anticipated that picking will commence about three weeks earlier than usual. The demand for hops, therefore, rules quiet, but without leading to any quotable change in prices from Monday. The market continues to be scantily supplied with produce.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Aug. 11.—These markets are moderately supplied with potatoes. Most qualities are in fair demand at our quotations. The supplies are almost entirely confined to home-grown produce. Re- gents, 70s to 100s; Shaws, 60s to 80s per ton.

HAY MARKETS.

THURSDAY, Aug. 10.—Very moderate supplies of hay and straw have been on sale in the various markets this week. The trade has ruled quiet, but at full prices.

Per load of 36 trusses.

	Smithfield. s	s	Cumberland. s	s	Whitechapel. s	s
Old hay	100	to 126	105	to 130	100	to 126
New hay	95	to 110	100	to 115	95	to 110
Old clover	95	to 140	120	to 147	120	to 140

COAL MARKET.

FRIDAY, Aug. 11.—Wallsend: Haswell 20s—Hetton 20s—South Hetton 20s—Hartlepool 19s 9d—East Hartlepool 19s 9d—Cassop 19s—Tees 19s 9d—Framwellgate 18s 3d—Hetton Lyons 18s—Heugh Hall 19s—Kelloe 19s—Eden Main 18s 6d—South Hartlepool 19s—Tunstall 18s 6d—Byass's Bebside West Hartley 16s 9d. Ships at market, 40; sold, 21; gas contracts, &c., 15—36; unsold, 4; ships at sea, 65.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 11.—The public sales, the third series of the year, closed on Thursday. The total quantity of the different descriptions put up was 18,600 bales, of which, however, only a comparatively small portion has been knocked down. Russian wools sold well: Cordova, the lower qualities of Oporto, Georgian, Turkey, Surat, Egyptian, &c., met with some demand, but the great bulk had to be withdrawn for want of proper competition.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 11.—Wheat large business done, at 3d to 4d advance since Tuesday. Flour in good demand; barrels 6d and sacks 1s dearer. India corn steady; mixed, 31s to 31s 6d; Galatz, 32s. Beans, oats, and oatmeal rather firm.

The Gazette.

TUESDAY, Aug. 8.

BANKRUPTCIES ANNULLED.

F. Grace, late of Oxford, veterinary surgeon—M. Shield, late of Victoria street, Westminster, railway contractor—B. Taylor and Sons, Stainland, Yorkshire, woollen manufacturers.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 29th of July, on 12,079 miles, to 753,782*l*, and for the corresponding week of last year, on 11,660 miles, to 721,432*l*, showing an increase of 419 miles and of 32,350*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,462 miles, to 617,053*l*, and for the corresponding week of 1864, on 8,176 miles, to 596,771*l*, showing an increase of 286 miles and an increase of 20,282*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 7.—The share market was very quiet to-day, and with the exception of some of the banks the closing prices in the several descriptions were but little disturbed. Of the English railways, Manchester, Sheffield, &c., improved ¾, South-Eastern ½, and North-Western a further ½; and Great Eastern relapsed ½. In colonial, Buffalo and Lake Huron, and ditto (preference) improved ⅛ and ½ respectively, and East Indian and Great Indian Peninsula receded ¼ each. In foreign, Dutch Rhenish and West Flanders improved ¼ each, and Pernambuco declined ¼. In American, United States 5-20's further advanced ⅜, Erie shares (paid up) relapsed ¼, and Illinois Central shares declined ½. In British mines, Wheal Buller further improved 1; and Chiverton and East Caradon declined ¼ and ½ respectively. In foreign mines, Washoe Gold (ordinary) improved ½, and Frontino Gold a further ¼.

TUESDAY, Aug. 8.—In the share market to-day there was no recovery of animation, and it closed with a general slight tendency to depreciation in the final quotations. In English railways, North-Western, Manchester, Sheffield, &c., and South-Eastern relapsed ¼ each; and Scottish Central declined 2½, Great Northern (A stock), North-Eastern (Berwick), and ditto (York) ¼ each, and Lancashire and Yorkshire and Midland ¼ each. In colonial, Grand Trunk of Canada (third preference, of both descriptions) went down 1½ each, and ditto (fourth preference, of both descriptions) ½ each. In foreign, Northern of France left off ½ better, Great Luxembourg ⅛ better, and Sambre and Meuse ⅛ lower. In American, Erie shares (paid up) recovered ¾, and Illinois Central shares further declined 1½. In British mines, Great Laxey improved ½, and East Grenville receded ⅜. In foreign mines, St John del Rey declined 2.

WEDNESDAY, Aug. 9.—In the share market to-day dulness was the only feature, which, however, only slightly affected the closing prices of the several descriptions. In English railways, the only alterations were a decline of ½ in Metropolitan, and of a further ½ each in Manchester, Sheffield, &c., and South-Eastern. In colonial, the only movement was an advance of ½ in Great Southern of India. In foreign, there was only a decline of ½ in Bahia, and in American a relapse of ¼ in Erie shares (paid up). In British mines, Providence improved 1 and Tin Croft ½, and West Caradon and Wheal Mary Ann declined 1 each, and East Caradon ½. In foreign mines, Santa Barbara improved ⅛, and Cape Copper receded ¼.

THURSDAY, Aug. 10.—In the share market to-day there was a merely nominal amount of business, resulting in a general slight tendency to depreciation at the close. Of the English railways, Manchester, Sheffield, &c., recovered ½; Caledonian improved ½; and Midland, North-Eastern (Berwick), and ditto (York) receded ½ each, and Great Western, Lancashire and Yorkshire, and North-Western ¼ each. In colonial, Scinde, Delhi (stock), and Punjaub declined ½ each. In foreign, Sambre and Meuse closed ⅛ better, and Pernambuco ½ lower. In American, United States' (5-20's) receded ¼, and Erie shares (paid up) a further ½. In British mines the only alteration was a decline of ½ in Great Wheal Vor, and in foreign a decline of ⅛ in Montes Aureos.

FRIDAY, Aug. 11.—The dealings in British railway securities were upon a very limited scale, and prices in most instances were unaltered. The variations in the chief lines showed a fall of ¼ per cent. in South Eastern, and ⅛ in Lancashire and Yorkshire and Great Eastern. London and North-Western stock was quoted 122½ to 123; Great Western, 64⅝ to ⅞; Midland, 129½ to 130; Lancashire and Yorkshire, 118¾ to 119¼; South Eastern, 81¼ to ¾; Metropolitan, 134½ to 135; Great Northern, 131 to 132; ditto A, 143¼ to ¾; London and South Western, 99 to 100; Great Eastern, 46¾ to 47¼; and Caledonian, 132½ to 133½. Foreign and colonial railway securities ruled quiet, at the closing quotations of yesterday.

During the week ending Aug. 9, the imports of the precious metals were:—Gold, 63,677*l*; silver, 27,549*l*. The exports were:—Gold, 661,067*l*; silver, 124,818*l*.

SKIN DISEASES AND THEIR REMEDIES.

By ROBERT J. JORDAN, M.D

Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood, causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.

"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—MEDICAL TIMES AND GAZETTE, August 4th, 1860.

To be had direct from the Author, 27 George street, Hanover square, London, W.

NEW EDITION.—POST FREE.

GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive).

Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.

These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.

London:—27 Harley street, Cavendish square, W.
City Establishment:—36 Ludgate hill.
(Four doors from the railway bridge).
Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.

Messrs GABRIEL guarantee every case they undertake.

EAST INDIAN RAILWAY COMPANY.

Chord Line from the Barrakur to Luckieseral, with a Branch to the Kurhurbalee Coal Fields, about 148 miles.

The East Indian Railway Company will be prepared on the 9th November next to receive Tenders for the construction of the above work.

Plans, sections, drawings, and specification of the work to be erected, together with the general conditions of contract, may be seen at the Company's Offices, on and after the 2nd October next, between the hours of 10 and 4 o'clock. A copy of the specification, &c., may be had on payment of £5 5s.

Tenders, in sealed envelopes, and marked on the outside, "Tender for the Chord Line," &c., must be delivered to the Secretary, in terms of the specification, on the 9th of November next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 27th July, 1865.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

BIRMINGHAM MEETING,

6th to 17th SEPTEMBER, 1865.

Reception Room, Exchange Assembly Room, New street.

President—JOHN PHILLIPS, Esq., M.A., LL.D., F.R.S., F.G.S., &c., &c., Professor of Geology in the University of Oxford.

The objects of the Association are:—To give a stronger impulse and more systematic direction to scientific inquiry; to promote the intercourse of those who cultivate Science in different parts of the British Empire, with one another, and with foreign philosophers; to obtain a more general attention to the objects of Science, and a removal of disadvantages of a public kind which impede its progress.

GENERAL ARRANGEMENTS.

Wednesday, September 6.—President's Address, at Eight, P.M., in the Town Hall.

Sectional Meetings daily, as usual, from the 7th to the 12th, inclusive.

Wednesday, September 13.—Concluding General Meeting.

Thursday, September 7.—Soiree in the Town Hall.

Friday, September 8.—Evening Lecture in the Town Hall.

Monday, September 11.—Evening Lecture and Soiree.

Tuesday, September 12.—Soiree in the Town Hall.

Saturday, September 9.—Excursions to Warwick, and Stratford-upon-Avon; Coventry and Kenilworth; Worcester and Malvern; and to Wroxeter, Shrewsbury, Wenlock, the Wrekin, and Coalbrookdale.

Thursday, September 14.—Excursions to Dudley Caverns, the South Staffordshire Coal Fields and Ironworks; and to Lichfield, Walsall, Cannock Chase, and the Burton Breweries.

On and after August 7th, until September 2nd, Life Members who intend to be present at the meeting may receive their tickets by applying to the General Treasurer, and returning to him their Life Member's Invitation Circular; Annual Subscribers who wish to receive their tickets must return their Invitation Circular, with £1 enclosed, to the General Treasurer, W. Spottiswoode, Esq., 50 Grosvenor place, London, S.W.

The Executive Committee at Birmingham will elect new members and associates on the following conditions:—

1. New life members for a composition of £10, which entitles them to receive gratuitously the reports of the Association which may be published after the date of payment.

2. New annual subscribers for a payment of £2 for the first year. These receive gratuitously the reports for the year of their admission, and for every following year in which they continue to pay a subscription of £1, without intermission.

3. Associates for this meeting only for a payment of £1. They are entitled to receive the report of the meeting at two-thirds of the publication price.

Ladies may become Members on the same terms as Gentlemen. Ladies' Tickets (transferable to Ladies only) may be obtained by Members, on payment of £1.

After September 2nd, personal application for Tickets must be made at the Reception Room (the Exchange), Birmingham, which will be opened on MONDAY, September 4th.

Gentlemen who have in any former year been admitted Members of the Association may, on this occasion, renew their Membership, without being called upon for arrears, on payment of £1.

Without a proper ticket, obtained as above, no person will be admitted to any of its meetings.

Members and Associates intending to be present at the meeting are requested to apply to Local Secretaries, No. 32 New street, Birmingham, who will assist them in procuring lodgings, and will forward a railway pass entitling the holder to obtain from the principal railway companies a return ticket at a single fare, available from Monday, September 4th, to Saturday, September 16th, inclusive.

G. D. BOYLE,
J. H. CHAMBERLAIN,
WM. MATHEWS, Jun.,
} Local Secretaries for the meeting.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

MENAI PARK AND HOTEL COMPANY (Limited).

Capital £70,000, in 7,000 Shares of £10 each.
Deposit £1 per Share on application, and £1 on allotment.
Calls not to exceed £2 per Share, and to be made at intervals of not less than three months.
Interest at Six per cent. per annum will be allowed upon the Deposits and Calls, as well as upon payments in anticipation, until the opening of the Hotel.
Incorporated under the "Joint Stock Limited Liability Act," which expressly limits the liability of each shareholder to the amount of his subscription.

DIRECTORS.

ARCHITECT.

John Barnett, Esq., 3 Verulam buildings, Gray's Inn, London, W.C.

SECRETARY.

James Hutt Esq. (Firm of Messrs Hutt and Browne.)
Offices—2 Westminster chambers, Victoria street, Westminster, S.W.

ABRIDGED PROSPECTUS.

The objects of this Company are to carry out a contract for the purchase from the London and North-Western Railway Company, of about 80 acres of freehold land (20 acres of which were laid out some years since by the late Sir Joseph Paxton), situate between the Menai and Britannia bridges, over the Menai Straits, in the County of Carnarvon, to erect and maintain, on a portion of the land, a first-class Hotel, and to dispose of the residue for building purposes.

The property is admirably adapted for the objects contemplated, being close to the junction of the line to Carnarvon with the main line of the Chester and Holyhead Railway (the London and North-Western Company undertaking to make their station at present on the property a first-class station, and to stop at it four-fifths of their ordinary passenger trains), thus affording easy access to all the points of interest in North Wales and the locality.

There exists a large demand for building land in the locality, and well as for further hotel accommodation, and there can be no doubt that a considerable sum will be realised by the sale of surplus property.

Interest, at six per cent. per annum, will be paid on deposits and calls, and on payments in advance of calls, till the opening of the hotel, which it is expected will take place in about eighteen months.

Detailed prospectuses, with forms of application for shares, may be obtained, and the articles of association seen at the brokers', and at the Company's offices.

Application for shares, accompanied with the deposit, to be made in the annexed form to the Bankers, Brokers, or the Secretary, from whom prospectuses may be obtained.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Menai Park and Hotel Company (Limited).

Gentlemen,—Having paid to the sum of pounds, being a deposit of £1 per share on shares in the above Company, I request that you will allot me that number, and I hereby accept such shares, or any less number which may be allotted to me, subject to the Articles of Association, and I further request that my name may be placed on the register of shareholders for the shares so allotted.

Name in full .....
Address .....
Profession or business .....
Usual signature .....
Date .....1865.

MENAI PARK AND HOTEL COMPANY (Limited).

NOTICE.—No further applications for shares in this Company can be received after Wednesday next, the 16th instant.—By order,

JAMES HUTT, Secretary.

2 Westminster chambers, Victoria street, S.W., August 9th, 1865.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

CONVERSION AND UNIFICATION

of the INTERNAL DEBTS of the OTTOMAN EMPIRE.—Notice is hereby given, that the CONVERSION of the INTERNAL DEBTS of the OTTOMAN EMPIRE, in accordance with the laws of the 17th (29th), 18th (30th), and 19th (31st) March, 1865, will be OPENED on Tuesday, the 3rd (15th) August, 1865, in the cities and by the establishments hereinafter mentioned:—

Constantinople—By the Provisional Agency of the General Credit and Finance Company of London, at the Building of the late Exhibition, Place de l'Hippodrome.

London—By the General Credit and Finance Company of London, 27 Austinfriars.

Paris—By the Société General pour favoriser la Développement du Commerce et de l'Industrie en France, 68 rue de Provence.

Amsterdam—By the Banque de Crédit et de Depots des Pays-Bas.

Frankfort-on-Maine—By Messrs Von Erlanger and Sons.

Alexandria—By the Anglo-Egyptian Bank.

Vienna—By the Credit Anstalt of Austria.

Turin—By the Credit Mobilier Italien.

Geneva—By the Banque de Credit Genevois.

Brussels—My Messrs J. Matthieu and Sons.

The law of the 17th (29th) of March, 1865, creates the Grand Livre de la Dette Generale de l'Empire Ottoman, and that of the 18th (30th) March ordains the inscription of a sum of 40,000,000 medjidies d'or, composed of 29,000,000 intended for the unification of the internal debts of the Empire; of 4,000,000 issued by public subscription; and of 7,000,000 intended for public works, and only to be issued as follows:—2,000,000 at the soonest one year after the subscription of the 4,000,000; 3,000,000 at the expiration of two years, and 2,000,000 at the expiration of three years.

According to the law of 17th (29th) March, no further inscription can be made in the Grand Livre except in virtue of a special law legally published, and after sufficient provision has been made for the interest and sinking fund new inscription.

The general debt inscribed in the Grand Livre is guaranteed by the reserve fund, by the general revenues of the Empire actually uncencumbered, and by the revenues already charged as they become available by the amortisation of the existing foreign debts, of which they constitute the special guarantee.

The debt inscribed on the Grand Livre is to be amortised in 37 years by means of redemption (rachat), and the numbers of the bonds redeemed will be published by the special council charged with the superintendence and control of all the operations of the sinking and reserve funds.

The bonds bear an annual interest of 5 per cent. payable in gold on the 1st (13th) January and the 1st (13th) of July of each year, at Constantinople, London, Paris, Amsterdam, and Frankfort-on-the-Maine, at the fixed rate of 110 gold Medjidies, = £100 sterling = 2,500 francs.

By the provisions of the law of the 19th (31st) March, 1865, the conversion of the principal classes of internal debts, viz., of the Eshami-Djédidés of the four issues of the Tahvilati-Mumtazes, and of the 10-year Serghis will be effected on the following conditions:—

Against 100 gold Medjidies of Eshami-Djedide (consolides) of the 1st, 2nd, 3rd, and 4th issues, there will be delivered 121 gold Medjidies of the general debt, equal to £110 sterling, or to 2,750 francs.

Against 100 gold Medjidies of Tahvilati-Mumtaze, there will be delivered 143 gold Medjidies, equal to £130 sterling, or to 3,250 francs.

Against 11,000 piastres of 10-years Serghis (on senelliks), there will be delivered 110 gold Medjidies, equal to £100 sterling, or to 2,500 francs.

The Bonds of the General Debt form three classes, viz.:—

			£		francs
Bonds of	110	Gold Medjidies =	100	sterling =	2,500
—	55	—	50	—	1,250
—	11	—	10	—	250

Each bond will be separately inscribed in the Grand Livre, and will be signed by the Minister of Finance, by the Governor of the General Debt, and by a Controller delegated by the Grand Council.

The first Coupon of Interest on the Bonds of the General Debt being due the 1st (13th) July, 1865, the bearers of the old Bonds will receive from the Commissioner-delegate at the time of verification of their bonds, special coupons representing the interest due to them in virtue of the law of 19th (31st) March, 1865.

These Coupons will be payable at the Imperial Ottoman Bank at Constantinople, London, and Paris, on presentation, except the special Coupons relating to the arrears of interest on the Ten-years' Serghis, and due the 1st (13th) January and 1st (13th) July, 1866, which will be paid on their respective dates due in accordance with Art. 7.

In virtue of Articles 11 and 12 of the law of the 19th (31st) March, 1865, all securities of the internal debts, to whatever class they may belong, not presented for conversion within the period of three months from the opening of the conversion; that is to say, between the 3rd (15th) August and the 2nd (14th) November following, will not be convertible, except with a reduction of 10 per cent., and only during the period of one month and a half from the 2nd (14th) November, 1865. On the expiration of this second period the operations of the conversion will be declared closed.

In order to facilitate the operation of the conversion and to avoid the necessity of issuing Provisional Certificates, and sending the original bonds for verification to Constantinople, the Imperial Ottoman Government has appointed, besides the Commissioners-delegate, verificators to attend at London and Paris during the whole period appointed for the conversion, to verify the bonds presented for conversion.

Securities presented elsewhere than at Constantinople, London, and Paris, will be transmitted for verification to London, except those presented at Alexandria, which will be sent to Constantinople.

Definitive bonds of the General Debt of the Ottoman Empire, with coupons for 37 years, now in course of manufacture, will be delivered as soon as ready in exchange for the securities presented for conversion.

In the meantime, the securities presented will receive, at the time of verification, an official stamp and the signature of the Commissioner-delegate, attesting their verification, to be exchanged by the bearers for the definitive bonds of the general debt.

Forms of application for conversion may be obtained at all the offices where the conversion will take place.

Copies of the laws may be obtained at the same places, and also at the offices of the solicitors, Messrs Baxter, Rose, Norton, and Co., No. 6 Victoria street, Westminster.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,
JAMES MACDONALD, General Manager.

THE BELFAST AND BANGOR RAILWAY and LAND COMPANY (Limited).

Capital, £1,000,000; first issue £600,000, in 30,000 shares of £20 each.

20,000 shares paid up in full will be reserved for exchange with the shareholders of the Belfast, Holywood, and Bangor Railway Company.

10,000 will be issued to the public, on which £2 will have to be paid on application and £3 on allotment. It is anticipated that a further call of £5 only will be made.

DIRECTORS.

The Hon. Stuart Knox, M.P. for Dungannon, Montague square, London.
William Dargan, Esq., Dublin.
William Coates, Esq., Glentoran, Belfast.
John Henry M'Kenzie, Esq., Gresham House, London.
William Montague Baillie, Esq., Bristol.

ARCHITECT AND ENGINEER.

Charles Lanyon, Esq., Belfast and Dublin.

SECRETARY—F. Pembroke Jones, Esq.

Offices—1 Threadneedle street, London.

The experience of the last few years proves that for railway companies suburban and metropolitan traffic is the most remunerative. What might have been the profits made had the taking of building land by railway companies been allowed, needs but the simple fact stated, that land at the various suburban termini of the London railways has, in many cases, more than trebled in value

This association is formed to carry through a scheme which embraces the possession of a line of railway starting from the large manufacturing town of Belfast to Bangor, via Holywood, having not only a large and increasing suburban, but seaside traffic, both for permanent residences and excursions; also the advantage of land with sea frontage for building purposes. Its success can therefore hardly admit of a doubt. That portion of the railway, 4¼ miles of which (from Belfast to Holywood) has been open since 1848, yields an enormous return on its cost of construction, and since the 18th May last, by the opening of an additional 7¼ miles to Bangor, nearly 70 per cent. on previous traffic has been gained, and without a very large increase of rolling stock the numbers seeking conveyance cannot be carried. This line, which is at present single, will therefore at once be doubled, and ample rolling stock provided.

The traffic returns show, in the 4¼ miles, the following results:—

			Passengers.	Increase.
Week ending June	4,	1865	10,041	
—	— 5,	1864	6,478	
				3,563
—	— 11,	1865	11,389	
—	— 12,	1864	7,246	
				4,134
—	— 18,	1865	12,298	
—	— 19,	1864	6,080	
				6,218
—	— 25,	1865	14,809	
—	— 26,	1864	6,958	
				7,851
—	July 2,	1865	11,691	
—	— 3,	1864	6,497	
				5,194
—	— 9,	1865	13,224	
—	— 10,	1864	10,065	
				3,159

69½ per cent. exclusive of any goods traffic.

The mileage traffic over the 7¼ miles will undoubtedly more than double the above when this Company has provided means for its development.

Belfast is acknowledged to be one of the most prosperous cities in the United Kingdom. With the adjoining manufacturing towns it has a population of 190,000. The population of Dublin is 254,000. The cost of the Dublin and Kingstown line of railway, unsurpassed as an investment (the £100 stock being now £200), was £65,000 per mile. The cost of the railway from Belfast to Bangor for a double line is, including building land, £50,000 per mile, and there are in Belfast alone above 40,000 mill hands, all of whom are discharged from work at one o'clock on Saturday afternoon, and resort in such numbers to Bangor, that during the year 1864, previous to the opening of the railway beyond Holywood, no less than 208,000 persons visited Bangor by steamer alone, exclusive of those by the road. The steamer conveying these large numbers was only five months on the station. The large manufacturing towns of Lurgan, Lisburn, and Portadown also contribute to the Bangor traffi

The Belfast, Holywood, and Bangor Railway Company have, by a bill passed this session, become possessed of the 4¼ miles from Belfast to Holywood, and thus secured 12 miles of rail, giving direct communication from the great manufacturing town of Belfast to Bangor, which town may fairly be considered the Brighton of Belfast. It can be reached in twenty minutes. Its beauty of scenery is unsurpassed. Bathing can be had at all states of the tide, and it is very popular with all classes for residences and excursions.

When this Association has carried out its plans of having first-rate hotel accommodation, bathing places at Holywood and Bangor, winter gardens, concert room, and esplanade, the result cannot fail of being highly remunerative to the shareholders. The traffic, when all the arrangements have been carried out, has been estimated by competent judges at a minimum of £1,500 per week, which will pay as high a rate of dividend as the shareholders in the Dublin and Kingstown Railway receive.

The demand for houses at Bangor and along the line is so great that in the small town of Bangor, as it at present exists, rates are paid for houses for the summer season far beyond those of the most fashionable English watering places, and farmhouses along the line are fully occupied by visitors.

An agreement has been entered into by which this Company will acquire not only the twelve miles of railway from Belfast, via Holywood, to Bangor, but also become the owners of very valuable building land on the sea shore at Bangor, with a further quantity at Holywood, and the power of taking further eligible sites. The shareholders in the railway company taking their shares at par in this Company, and the vendors of the land above-mentioned show their confidence in the undertaking by accepting the whole of the purchase money in shares. Investors thus have the benefits arising from a productive line of rail, and also the large profits which are so well known to be made from investments in land adjoining such a line of railway.

Eminent contractors have gone over the works, and are prepared to enter into a contract to double the line, supply all the necessary additional rolling stock, and to construct the esplanade, roads, hotel, baths, and other public buildings, and pay to the shareholders 6 per cent. on the paid-up capital for three years from Sept. 1, 1865.

An influential committee in Belfast will be formed.

The plans, reports, and other particulars, may be seen at the offices of the Company.

Prospectuses and forms of application may be obtained at the London Financial Association (Limited), South Sea House, Threadneedle street, the Bankers, Brokers, and Solicitors of the Company.

1 Threadneedle street, August 10, 1865.

FORM OF APPLICATION FOR SHARES.

(To be retained by the Bankers.)

To the Directors of the Belfast and Bangor Railway and Land Company (Limited).

Gentlemen,—Having paid £ to your Bankers, I request you will allot me shares in the above-named Company, and I agree to accept such shares or any lesser number that may be allotted to me, to become a member of the Company, and to sign the articles of association when required; and I hereby authorise you to place my name on the register of members, in respect of the shares so allotted. In the event of your alloting me a lesser number of shares than applied for, I authorise you to apply the deposit, so far as may be necessary, towards the payment due on allotment.

COMPANY OF LONDON (Limited).

Notice is hereby given, that in conformity with the 80th Clause of the Articles of Association, the sum of 2s per share, free of income tax, being payment on account of Dividend for the current year, at the rate of 5 per cent. per annum for six months, will be paid on the 15th August next to all shareholders registered in the books of the Company on the 1st instant.

For this purpose the Transfer Books of the Company are closed from the 1st to the 8th instant inclusive.—By order,

R. J. BUTLER, Secretary.

27 Austinfriars, E.C., August 3, 1865.

THE IMPERIAL MERCANTILE

CREDIT ASSOCIATION (Limited).

Capital subscribed, £5,000,000. Paid up, £500,000.

DIRECTORS.

JOHN CHAPMAN, Esq., Chairman.

Xenophon Balli, Esq.	Capt J. Gilbert Johnston
E. J. Coleman, Esq.	G. G. Macpherson, Esq.
Mr Alderman Dakin	W. Scholefield, Esq., M.P.
James Dickson, Esq.	Sir S. D. Scott, Bart.
P. D. Hadow, Esq.	H. D. Seymour, Esq., M.P.
J. O. Hanson, Esq.	Joseph Thornton, Esq.
G. F. Holroyd, Esq.	Alfred Wilson, Esq.
J. G. Homère Esq.	M. Zarin, Esq.

MANAGERS.

Henry J. Barker, Esq., and T. Fraser Sandeman, Esq.

SOLICITORS.

Messrs Ashurst, Morris, and Co.; and Messrs Edwards and Co.

The Association receives money on deposit, for fixed periods; makes advances on approved securities, negotiates loans, and undertakes general financial business.

W. C. WINTERBOTTOM, Secretary.

27 Lombard street, E.C.

DEBENTURES.

THE CREDIT FONCIER OF

MAURITIUS (Limited).

Subscribed Capital	£500,000
Paid-up and invested	£100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

SIX PER CENT. DEBENTURES,

for Five, Seven, or Ten Years.

NATAL LAND and COLONISATION COMPANY (Limited).

Capital, £365,500, in 36,500 shares of £10 each; half called-up.

BOARD OF DIRECTORS.

Sir James D. H. Elphinstone, Bart., Chairman.

J. P. Brown-Westhead, Esq.	J. T. Mackenzie, Esq.
The Hon. F. C. Drummond.	William Miller, Esq., M.P.
Fred. Bolleau Elliot, Esq.	The Hon. William Napier.
John Gillespie, Esq.	

BANKERS.

Messrs Smith, Payne, and Smiths.
The London and County Banking Company.
Offices—41 Threadneedle street.

The Natal Land and Colonisation Company ISSUE DEBENTURE BONDS, bearing interest at the rate of 6 per cent. per annum, payable half-yearly, at Messrs Smith, Payne, and Smiths, on the 1st of Jan. and the 1st of July, for periods of five, seven, and ten years, and in amounts of £100, £200, and £500, payable to order or bearer.

The money so raised is for investment in the British colony of Natal, in loans on first mortgages of real property valued as for forced sale, at from two to three times the amount of the sums advanced.

The assets of the Company as against the total authorised amount of £250,000 of debentures may be thus estimated:—

	£
Property in Natal mortgaged to the Company (yearly increasing in value), valued as for forced sale at, say, not less than	625,000
Uncalled capital of the Company	182,500
Land in the possession of the Company taken at cost price	95,000
Balance of share capital, cash, effects, and securities	87,500
Total	990,000

Forms of application to be obtained at the offices of the Company.—By Order.

London, Aug., 1865. G. E. BREFFIT, Secretary

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

HAMBLY HOUSE SCHOOL,

STREATHAM COMMON.

This School, established in 1775, boasts of one of the most delightful and healthy situations near London, and is conducted on principles calculated to meet the requirements of the great mercantile community of the metropolis. The Principal guarantees a superior style of Writing, combined with a thorough knowledge of French and Accounts, at terms ranging from 30 guineas upwards, the table kept being most excellent. The favourite recreation of his pupils is cricket, at which they have won the last thirteen matches they have played with other schools. Prospectus, with numerous references, and view of house, on application.

PROPRIETARY SCHOOL,

GRAVESEND.
Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

HUMIDIC COPYING BOOK

(Patent) does not require damping, produces instantaneously copies of letters, invoices, &c, when written with copying ink, and avoids the trouble of wetting every leaf as hitherto. Price, style, and size, as the old style of letter copying book.—NISSEN and PARKER (sole proprietors), Stationers, 43 Mark lane, London.

CRAMER AND CO.'S GREAT SALE

of SECOND HAND PIANOFORTES, at their Gallery, 207 and 209 Regent street. The instruments are all by the very best makers, have been returned from the season's hire, and will be sold at the most moderate prices. The sale will continue until the 3rd of October. The number of instruments to select from is quite unprecedented.

COUNTRY AND TOWN

Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

LAMBERT BROTHERS,

WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

London: Tweedie, 337 Strand

PRICE 6d EACH VOLUME.
Preparing for Publication,

THE YOUNG MAN'S LIBRARY OF USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE:

SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS,

AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE TWO PESTILENCES.

We are threatened at the same moment by two pestilences not wholly dissimilar in character—one attacking man and the other attacking beast. As to the cholera we have had a good deal of experience, but all that we know as to the origin of the disease may be summed up in two propositions.

1st. That it appears to originate in certain atmospheric and climatic influences, and makes at each appearance a kind of geographical passage, picking out as it passes predisposed individuals in predisposing localities.

2ndly. That proximity to persons already suffering from the disease, though not at all necessary to its generation, does nevertheless promote its generation. Predisposed individuals in bad places will have the disease though there may be no one else ill of it in that place, but they will be more likely to have it after some one else has brought it, and when fright and rumour are busy in all the district.

Those propositions are generally admitted as to the cholera, and we quite understand that we can only busy ourselves to protect human life according to the best rules which our past experience and improved medical science place at our disposal. It ought to be the same with the new plague, the cattle disease, but, unfortunately, there is a disturbing influence.

The late high price of meat has produced a trade in imported animals to which we have several times drawn attention, but of which the general public is little aware. The figures are :—

Living Animals Imported in the Six Months ending 30th June.

	1863.	1864.	1865.
Oxen, bulls, and cows	24,108	47,966	74,392
Calves	11,147	15,928	18,785
Sheep and lambs	110,636	129,350	250,212
Swine and hogs	982	18,802	38,706
Total animals	146,873	212,046	382,095

And it is of great permanent importance that the trade should not be checked. The high price of meat is a severe tax on the straitened classes of the community, and diminishes its consumption just when for the public welfare it ought to be promoted and increased. It is the most anxious class of the community who ought to have the most nutritious food, and it is exactly from them that a very high price in all cases takes it away. But though this importation is very beneficial to and popular with the consumer, it is not equally beneficial to the home producer. Augmenting a trade must excite some jealousy. In the best English markets the English producer has now a rival, and he used to have no rival. It is very natural that when there is the shadow of a reason, he should endeavour to exclude that rival.

Nobody sells men, and therefore no one wishes to prevent the cholera by excluding travellers from the continent, but many people sell cattle, and some of these wish to exclude the cattle disease by prohibiting the import of cattle. The reasons for doing so are not dissimilar. The cholera "comes "from abroad," and appears first in a country more distant from England, then in one less distant, and at length reaches England itself. But, in all likelihood, it is the causes of the disease which travel, not the sufferers from it. By painful experience on past occasions, we have come to be sure the cholera does not come in by ships or sailors, but some influence far more subtle and much less easy to exclude. As to the new cattle disease, we have not had an equal experience, but every indication indicates a similar conclusion.

There is, however, no reason to argue from analogy, which, though probably instructive, still *may* be deceptive. The argument against the suggested prohibition of foreign cattle is much simpler and less refined. It is this. Those who propose that prohibition must prove that the disease originates in the quarters on which they wish to enforce the prohibition, and they cannot prove it. There are, to say the least, two opinions among all the best people on the subject. We believe the better opinion is that the cattle disease is communicated as the cholera is communicated; but be that as it may, the advocates of prohibition cannot prove that it is solely communicated by importation. There is a vast mass of evidence—perhaps conclusive evidence—the other way. Thus, at the Mansion House meeting, Dr Tripe, of Hackney, said :—"There were 82 cowhouses in the "Hackney district, and there had been 64 deaths, while 114 "cows had been destroyed in consequence of the disease, "making nearly a sixth part of the whole of the cows in the "district which had suffered more or less from the complaint. "He had not been able to ascertain any instance of infection "from without. In one case, where 32 cows had been "destroyed, the disease had originated with two heifers which "had never left the pasture in which they were bred and "born. In another case, six cows out of 110 were left in a "shed. Some had died, and the others had been sent to "market. In that case there had not been a single fresh head

Digitized by Google

"of cattle for months, and the disease broke out in a place "where there could have been no means of infection. One "man, who kept 38 cows as a rule, had lost 60 in 12 months. "On the other hand, it was remarkable that not one case had "occurred in small dairies. The epidemic had only been severe "where there had been a large aggregation of cows." And Mr Harvey, the chairman of the Mutual Cattle Assurance Society, writes from Norwich thus:—"With respect to "foreign cattle, I am not inclined to believe that this disease "is in any way introduced into this country by animals im- "ported from abroad, and I think that we ought to be very "cautious in giving currency to that idea. The foreign cattle "trade is not only a very large trade, and one which exercises "a most beneficial influence on our country, but it is a "rapidly increasing trade, and one which it would be most "disadvantageous to check. In no part of the world is there "less disease among cattle than in Holstein and Jutland, "and the other parts of the Continent from which "we derive the bulk of our beasts; and the expe- "rience of the cattle trade in London bears out the "conclusion that they arrive here untainted by disease." And a crowd of similar instances might be given. Those who wish to break up a great and valuable trade are bound to have effectual and conclusive proof that what they recommend is necessary. Such a course cannot be adopted upon a mere theory,—we cannot ruin people upon a guess which may, after all, turn out a wrong guess. In fact, a great many most competent persons firmly believe that a prohibition of importation would not stop the cattle disease, and, while that is the case, such import cannot be prohibited.

Our position, then, is plain. We must put aside all anti-commercial proposals and suggestions, and prepare ourselves to combat the animal disease as we know we must combat the human disease. In both cases our powers are but small, but we must trust in Providence and do as much as we can.

CAN THE STOCK EXCHANGE COMMITTEE PROTECT THE PUBLIC?

THE great increase in the number of new companies, and the variety of their qualities, has created a good deal of controversy on the Stock Exchange. Their committee has rules of various kinds of which it is the object to protect the public against fraudulent undertakings, and it has been much discussed whether such rules are beneficial or not beneficial. One side argues that these rules do not protect the public, or if they do, that it is no business of the Stock Exchange or of any one else to protect the public. The other side says both that the Stock Exchange ought to protect the public as far as if can, and that it does so by its present rules. The magnitude of the interests concerned makes the question thus opened well worth careful consideration.

By its essential nature the Stock Exchange is an association of dealers and brokers, who have a remedy for breach of contract far more quick, and at least as stringent, as any law. If one "member" does not perform his contracts with any other member, he is declared a "defaulter," is expelled, and no other member will deal with him any more. In consequence, he is unable to continue his business. This is the only market for shares in London, and if he cannot deal there he cannot deal at all. To be a "defaulter" is to be a ruined man; and it is greatly to the advantage of the public that it should be so. The Stock Exchange is a "club," of which all the members are bound to perform their contracts under peculiar penalties; and as it is of great importance to the purchasing and selling public that such contracts should be performed, it gains greatly by these penalties. In so far as it creates an additional motive to honesty amongst its own members, the association called the "Stock Exchange" is unquestionably beneficial.

But in addition to this jurisdiction the Stock Exchange and the committee, which is its executive, have, in a half accidental and anomalous manner, acquired another jurisdiction. They say what contracts shall be made—they decide which shares shall be dealt in and what not dealt in. The mode in which they obtain this jurisdiction is curious. By the custom of the place, no bargain in new shares is to be completed on a given day, it is to be completed on a "settling "day," at the time of the bargain unknown, and afterwards to be fixed by the committee. In the case of what it thinks bad companies and dishonest undertakings, the committee does not fix a settling day, and so all bargains fall to the ground. The committee, in this manner, take the responsibility of deciding what contracts are beneficial and should be performed, and what injurious and should be quashed.

It is certain that the maintenance of this remarkable jurisdiction is supported by the best feelings of many influential persons. The lower class of public companies are the last things a man of high mind wishes to have to do with; and are among the things that such a man most wishes to do away with. And such men naturally catch at any preventive machinery, however peculiar its nature, by which these bad schemes may be checked. It is with great regret that we are compelled to differ from persons whom we so much respect, animated by feelings in which we entirely sympathise.

It is a very dangerous thing to wish to be wise for others. In business it is desirable that each person should mind his own business. If any particular body of men take upon them the task of protecting the rest of the world, they place themselves in a position of great odium and also a position of great helplessness. Nothing can be greater than the odium in the present case. The committee of the Stock Exchange are, of course and by necessity, men largely engaged in Stock Exchange operations,—living its life, influenced by its rumours, breathing almost without knowing it its intellectual air. Such a body may be impartial, but it will never be thought to be impartial. Our judges guard themselves with even pedantic caution from the possibility of sinister interest. The late Lord Cottenham stopped a great Canal case which he was hearing in the middle, because it appeared that some shares in it had been once conveyed to him as a trustee or in some such capacity. He would not hear out a case in which any one could say, however absurdly, that he had any selfish interest however minute. But it is inevitable that the committee of the Stock Exchange will always be *thought* to have an extreme interest in the causes on which they decide. "They may not," it will be said, "have any transactions "themselves in the shares of prohibited companies, but they "are mixed up with those who have." In such a case nobody can ever prove a negative. And while such possibilities exist, the tribunal will never be fully respected. Nobody can keep two minds. If you have an interest, in the long run that interest will tend to rule and bias you; and no wise man will place himself in a position where he has to give a judicial decision in opposition to an inevitable secret and insinuating feeling.

In some respects, too, the position of the committee of the Stock Exchange is more likely to create odium than that of an ordinary Judge. A Judge administers a system of laws known to, published among, canvassed by all the world. But very few people know what the rules of the Stock Exchange are. They are scarcely matter of public comment. They are the rules of a special club, the articles of a particular association, and we have heard it stoutly contended that no one not belonging to the association has any business with them. At all events they are not like Acts of Parliament proposed in the face of day and discussed in every aspect by all who care for them. The Stock Exchange rules may be learnt by inquiry in the City, but they are not known to or accessible by one in a thousand of those affected by them; and the Committee are, therefore, in the vexatious position of administering an unknown, undiscussed, and partly distrusted code under an ineradicable suspicion of having themselves a large sinister interest in what they decide.

If a great object were at stake, it would be intelligible that for the public benefit some persons might undertake so disagreeable a function. But is there any such object? If it were possible effectually to protect foolish people or unenquiring people from losing their money, it might be thought a duty to do so. But are the public protected? Will not all manner of foolish people lose money on the Stock Exchange till the end of time? How much has been, during the last two years, extracted from the pockets of honest people by bad companies, all unprohibited by the Stock Exchange, and many quoted in its authoritative list. The best way of selling bad shares, as every one knows, is to run them up to a fictitious premium, but this no committee, no jurisdiction will ever prevent. So long as there are knaves, and so long as there are fools in the world, this single expedient will secure to the crafty the funds for a moment in the custody of the unwise. The Stock Exchange committee cannot prevent, and well know that they do not prevent, the baser part of their own body from taxing the unwary part of the nation.

Digitized by Google

But it may be said though the committee do not completely protect the public, yet they partly protect it. It prevents the very worst companies, although it does not prevent all the bad. Though they cannot do everything, nevertheless they do something. But we fear they mislead the pubic. They *eliminate the warnings*. The effect of the committee's legislation (according to the best description which can be given of it) is to strike out one or two flagrant cases, and leave all the rest untouched; ninety-nine little frauds get through and one great fraud is detected. But it is the great fraud which awakens the public. As the cholera makes people keep their cities clean, which no accumulation of little diseases ever could or will, so a great exaggerated delusion, when detected, rouses mankind, and incites them to caution for the future. We do not wish any bad company to succeed, but if any is to succeed we wish it to be an exceedingly bad one; we wish it to be one which would create a stir, be written about in the papers, and be talked of in society. Yet it is exactly this very worst class of companies that the present system claims to prevent: it is *their* detection which its admirers advance as its characteristic excellence.

Again, the very existence of a test gives a sort of sanction to those who pass it. All the members of the Stock Exchange committee would, we are sure, agree with us that their means of detecting fraud are of the most feeble and ineffectual description. But the general public thinks them much greater than they are. "It is regularly quoted, you know," the country dabblers say, and so long as the committee exercise any sort of paternal and protecting function, they will always excite hopes they cannot gratify, and diffuse a confidence which they well know to be ungrounded.

But it will be said in some cases which have just happened, where the prospectus has been held to vary from the articles of association, would you have had a settlement granted? We would have no discussion in this case or in any case as to whether there should be a settlement or not. All new shares should be settled for as soon as they are allotted, just as old shares are. And we add that, paradoxical as it may seem, we should be glad to see a monstrous case of deviation between the prospectus and the articles of association brought by real suffering and the loss of some money to the notice of the public. Nothing less will ever warn the public how necessary it is in all cases to make themselves acquainted with the articles of association in new companies, and how much, in countless cases, there is hidden there which the world never knows. It is only a rare and flagrant case of fraud that needs an actual statement in the prospectus which is contradicted by the "articles;" for all common frauds, it is enough to omit what is in the "articles." Yet it is the flagrant case, the warning and purging instance, which here, as elsewhere, the committee's legislation singles out for isolated destruction. They leave the hundred instances of moderate evil which elicit no remark and stimulate no corrective attention, but they eradicate the outrageous monstrosities which every one will hear of and perhaps some people will heed.

For a short time a deference to old and natural feelings will doubtless continue the existence of this anomalous jurisdiction, but before long we expect to hear that the Stock Exchange has confined itself to its legitimate function of enforcing honesty among its own members, and has abandoned all idea of protecting or guarding the public at large.

THE PROBABILITIES OF AN AMERICAN INVASION OF MEXICO.

THE public mistakes a little the character of the transactions upon the Rio Grande, and it is not unnatural they should. In any other country than the United States, the collection of a large army upon a frontier, followed by a letter from its general stating that he desired to cross that frontier, and accompanied by a general expression of a national wish that the frontier should be crossed, would be a prelude to invasion. It seems clear that all these things have occurred upon the Mexican boundary; that the Union has an army there of some 70,000 men, under General Sheridan; that General Sheridan has publicly expressed his opinion in favour of expelling the Emperor of Mexico; and that Americans, in all their journals and public meetings, are endorsing that opinion. Nevertheless, so remarkable is the situation in the Union, so unique are the conditions under which momentous affairs are there transacted, that it is by no means certain that all these signs mean war—the balance of probabilities, indeed, leaning slightly the other way. Nothing, in the first place, is more remarkable in America than the compromise her institutions have secured between military individualism and obedience. Several times during the recent war, generals have been employed to carry out a policy of which they openly disapproved, and have carried it out successfully; and General Sheridan will wait for orders just as patiently as if he had not said that the orders ought to be issued. Then as to the army, it must not be forgotten that Texas is full of emigrant Southerners, that many of their leaders and considerable bodies of their men are seeking service or adventure in Mexico, that it is their interest to embroil the Union with France if embroilment be possible, that a savage civil war is going on just beyond the dividing river, and that the Government of Washington has to control Texas, to protect its frontier, to punish Southern raids, and to watch a foreign, and therefore presumably hostile, army all at one and the same time. That is a heavy complication of duties, and demands the employment of a considerable army altogether irrespective of any ideas either of conquest or invasion. Indeed, it may be doubted whether the force collected in Texas is more than adequate to its internal duties, the State being precisely equal in area to Great Britain and France together, and occupied by a population on which the severity of the war has not fallen, and which has never been subdued. And lastly, though the apparent outcry is for the invasion of Mexico, that is no proof that this is the real desire of the people. It may be, for Americans who consider themselves reversionary heirs of the whole continent, are naturally irritated at an attempt to keep part of their heritage from falling in, and are no doubt desirous of expelling the European bayonets which they deem intrusive, but nations, like individuals, have often one strong wish which in action is controlled by another. That other just now is for economy, and it is not yet evident which wish is the stronger among the governing class. Many of them, it is known, dislike the idea of burdening the Union with Mexico before the South is reconsolidated; many more dread a war with France as likely to lead to repudiation or excessive indebtedness, and probably all are disposed to wait and breathe, after the exertions of four years, before engaging in any enterprise, however tempting, or measuring swords with any enemy, however aggressive. Indeed the public urges visibly the reduction of the army to 150,000 men, which it would scarcely do if intent upon war, and approves the dismissal of the navy, which it could not do if it expected attack from a first-class power.

The facts, therefore, upon which so much stress is laid do not bear out the deductions which some reasoners attempt to extract from them, and all arguments of the *à priori* kind are against immediate interference in Mexico. The American nation, in the first place, has nothing to gain by such a conquest. It does not at this moment want more territory, nor does it wish for such an addition to its strength as a Mexican population of half castes and Indians might be able to give. On the contrary, it rather dreads the addition of that population which would raise the proportion of coloured persons within its borders from four millions out of thirty to eleven millions out of thirty-eight, from 12 per cent. to 29. Not wanting Mexico, the Union has also little fear of it, for although the Austrian Emperor might reorganise the country, he certainly could not in ten years so increase its strength that the Union could not overrun it at will. Every day of delay, indeed, makes the ultimate conquest easier, for whereas invaders would now have to meet the army of France, large, perfectly equipped, accustomed to victory, and supported by a great fleet, they would, when French occupation ceased, have to meet an army comparatively small, less trained, worse equipped, unused to victory, and not supported by any fleet at all. Doubtless, there is a strong wish to punish Napoleon individually for taking advantage of the American hour of weakness, but that punishment is inflicted while he is compelled by American pressure to waste troops and treasure in organising a country which, owing to that pressure, cannot be organised. Above all, the Government which, as events have shown, really governs the people, has still most serious work upon its hands. The President has allowed the States to reconstruct themselves on the basis of obedience and emancipation, and the elections have gone almost universally in favour of persons opposed to his

Digitized by Google

policy and to that of the North. It has been found necessary to cancel all municipal elections in Richmond, and to take special measures in North Carolina against the press, to remove the freedmen from the jurisdiction of the civil tribunals, and to establish a system of police for the prevention of plots. So fierce is the Southern spirit that were insurrection physically possible, insurrection might again break out, and were France at war with the Union, many of the physical difficulties, such as the want of powder and artillery, would vanish. In a country so vast, it would be difficult, or at all events intolerably expensive, to keep up a garrison in each Southern State while an army of invasion was entering Mexico, for be it remembered it is not Mexican but French troops that army would have to meet. It is scarcely possible, then, to believe that the Government, already so hardly pressed, should deliberately accept a new responsibility, while the chance of attack from the other side is merely nominal. The Emperor of the French, though resolved to carry out his Mexican policy, is quite aware that a war with America would be most distasteful to his people, and could not result in any advantage to himself, while the Emperor of Mexico has everything to gain by avoiding hostilities as long as possible. Both Governments, then, being desirous to avoid a war, and neither people being likely to force it upon them, it is reasonable to suppose that no war will for the present occur, and that the dangerous game playing on the Rio Grande of threatening raids on one side and reprisals on the other will not be carried further than words or individual duels.

We fear that there is in England, at least among one class of politicians, something of a wish to believe these reports, a half conscious desire that France and America should waste their strength upon each other. Nothing could be more short-sighted. Not to mention the fact that a maritime war between two such Powers would be world wide, and the consequent danger that we should be directly drawn in, every blow struck at either country directly injures Great Britain. Our interest is that they should be prosperous, so prosperous as to desire peace for the continuance of that prosperity, not impoverished by a senseless hostility. To take only one example—the first year of war would deprive us of the American supply of corn, probably of part of the supply of cotton, and of at least as much custom in France as we secured by the French treaty. Ten shillings a quarter on wheat, sixpence a pound on cotton, a loss of twenty millions of trade with France, those would be our first contributions to a war in which we should not be engaged, and with which we should have nothing to do. Is that a contribution, or beginning of contributions for which we, who complain of our own war taxes, can reasonably wish?

THE GREAT EASTERN RAILWAY AND ITS DEBENTURES.

The Directors of the Great Eastern Railway have issued a reply to Captain Jervis, which is not exactly a public document, but which is very remarkable. They admit that they have exceeded their borrowing powers, and defend it in the following extraordinary passage:—"In the case of all rail-"way companies which fully exercise large borrowing powers, "it is well known that from interval to interval, it may "almost be said from week to week, the outstanding amount "varies and fluctuates according to circumstances over which "directors have no control—mortgages, bonds, &c., are called "in, and payments are required to be made according to the "condition of the money market, and the finance committees "of the different companies have to foresee these eventualities "as far as it is possible for them to do so, and to make pro-"vision for them to the best of their ability. At certain "periods it is desirable for the company to take up all the "money they can collect, at other times, it is desirable to "have as few debentures as possible to place on the market."

As Mr Thomson Hankey remarked, in an excellent letter to the *Times*, this argument conclusively shows that debenture holders cannot be safe without a registration. The case is not now one of a casual mistake or a temporary error. The *system* is defended. We are told that it is "desirable" for a company to break the Act of Parliament which created it, and to destroy the security on which those who lend to it depend. If the Directors of such a company as the Great Eastern will *say* this, what will the Directors of the minor railways be found to *do*?

IRISH EDUCATION.

TO THE EDITOR OF THE ECONOMIST.

Sir,—The Liberal Press of London has been emphatic and all but unanimous in its approval of the recent change in the Irish education policy of the Government. It has been described as an admirable stroke of electioneering art, at once simple and effective, securing a large amount of Roman Catholic support, while conceding nothing that Liberals needed to contend for. "If the students of the Catholic College at "Dublin," says the *Saturday Review*, "think it worth while "to become Masters of Arts, they will have an opportunity "of applying to authorised examiners without the trouble and "expense of visiting London." That is all; and in return for this "cheap concession" the Catholics are expected to rally to the Government side. Will you allow me through your columns to suggest that possibly this triumph may be premature. Not that I would question the effectiveness of the movement as an electioneering manœuvre—in that respect events seem to be justifying the Government's expectations—what I venture to doubt is the "cheapness" of the gain. The advocates of sectarian teaching in Ireland, English Liberals may assure themselves, know what they want, and have not paid the price without looking to the genuineness of the article. The truth is, Sir, a step of most serious import has been taken in Irish education—a step which, carried to its logical results, will simply reverse the policy of the last thirty years, and substitute for the system which now exists, under which members of the Church of England, Presbyterians, and Roman Catholics, receive in common an education on a level with the best University culture of the present time, one in which these denominations shall be educated in separate institutions receiving such modicum of knowledge as may be deemed expedient by the ecclesiastical heads of their several communions. With your permission I will indicate what seems to me, and I believe to all who are acquainted with the actual state of educational affairs in Ireland, the real bearing of the proposed change.

But, first, let me say a word as to the ground on which this change has been justified—the alleged "failure of the "Queen's Colleges." This point has been just lately so fully and conclusively dealt with by a "Member of the Queen's "University" in the *Daily News*, that I need not do more here than state in general terms the leading facts of the case. These facts are:—that, after a career of sixteen years, the Queen's Colleges are now educating nearly as many students as Trinity College, Dublin, with its prestige of three centuries; that the increase in their students has been steadily progressive from their origin, the present year showing the highest total yet attained; that, according to every test by which the quality of education in different educational institutions can be compared, that given in the Queen's Colleges is not inferior to the education obtainable in any of the older Universities; and lastly, that "mixed education"—the bringing together in the same class rooms of students from all the various religious bodies in the country—one of the leading aims of their founders—has been attained by the Queen's Colleges in a very complete degree. Indeed, most of these facts were evident enough even from the O'Donoghue's speech; though, with the foregone conclusion adopted by the Government, the evidence which was sufficient for the defence of the Colleges was eagerly accepted as proof that they were only fit to be sacrificed.

I scarcely think, Sir, you will consider this language unwarrantable if you advert for a moment to the kind of reasoning which, on that occasion, was allowed to pass current, and ostensibly to determine the course of the Government. The O'Donoghue produced the following figures:—

Total number of students in Belfast	405	...	...
Catholics	...	...	22
Total number of students in Cork	263	...	...
Catholics	...	...	123
Total number of students in Galway	169	...	...
Catholics	...	...	79
Total number of students in Trinity College.....about	1,000	...	...
Catholics	...	...	45
Total students in the three Queen's Colleges & Trinity	1,837	...	...
Of whom Catholics formed	...	...	268

from which the conclusion deduced was that 268 to 1,837, or 14 per cent., represented the proportion of Catholics in the Irish population receiving University education. In the debate which followed no one made the obvious remark, which would at once have disposed of the whole case, that the 268

Digitized by Google

Catholics represented exclusively lay students, while of the 1,569 Protestants at least one-third were intended for holy orders. To render the comparison fair, one of two courses should obviously have been taken—either to exclude ecclesiastical students altogether from the comparison, or to add to the 268 Catholic students those now preparing for the Catholic priesthood at Maynooth. But in the eagerness to accept a case against the Colleges, the existence of Maynooth was wholly forgotten.

This—the main argument—was reinforced by another of exactly equal worth, which, I observe, seems to have made an impression on your able contemporary the *Daily News*. Of the total number of students attending intermediate schools, according to the returns quoted by the O'Donoghue, one-half are Roman Catholics; whereas, he says, the proportion at the Queen's Colleges and Trinity is represented by 14 per cent.—a discrepancy which the O'Donoghue argues can only be accounted for by supposing that Roman Catholics are deterred from entering the existing Universities by conscientious objections. I need scarcely point out that this argument admits of precisely the same answer with that just given. Of the 7,000 Catholic students attending intermediate schools a large number are intended for the priesthood, and go to Maynooth; whereas Protestant students intended for the ministry go, for the most part, to Trinity College and Belfast. The argument requires also this further observation. It by no means follows that, because the students of given religious denominations are equal in the intermediate schools, *therefore* they would under a free system be equal also in the Universities; no more than it follows that, because they are equal in the primary schools, *therefore* they would be equal in the intermediate. This would not follow even supposing "intermediate schools" represented the same amount of attainment on the Roman Catholic and the Protestant side, which is far from being the case; the so-called "classical schools" amongst the Roman Catholics being, I believe, wretchedly inefficient even when judged by the not exalted standard maintained in Protestant seminaries. But, waiving this point, there are in every population numerous classes who avail themselves of the primary and "intermediate" instruction, but who do not go on to the higher; and, as every one who has the least acquaintance with Ireland knows, these classes are proportionately far larger among the Roman Catholics in Ireland than among the Protestants. Keeping these notorious conditions in view, and not forgetting that Maynooth exists, and educates that large section of the Roman Catholic middle class which corresponds to the students in the other colleges intended for holy orders—that is to say, to one-third of the whole—the figures given by the O'Donoghue, far from sustaining the case against the Queen's Colleges, show, on the contrary, a number of Roman Catholics receiving University education in Ireland fairly, and even more than fairly, corresponding with that in which Roman Catholics, in a position of life which renders University education suitable, exist in the country. There is not, therefore, in the facts of the case a vestige of reason for supposing that the system of the Queen's Colleges is distasteful to any appreciable number of the Roman Catholic population. "The large gap in University education still to "be filled up," spoken of by Mr Gladstone, is a purely imaginary gulf, visible only to optic nerves rendered morbidly sensitive by the prospect of impending dissolution. Indeed, so little ground is there for the complaint that Roman Catholics are by conscientious scruples debarred from University education in Ireland, that one of the most common arguments against the Queen's Colleges (and I may add the most difficult to meet) is that they are over-educating the people; attracting towards University studies larger numbers than the demand for the higher education in the country will ultimately find employment for.

Well, then, it will perhaps be asked, if this be so, what is the meaning of the present agitation? I believe its meaning to be simply this: it is an attempt, not to extend, but to change the character of the higher education in Ireland—to convert the present liberal and "mixed" system, in which the secular spirit predominates, into a denominational system, controlled by ecclesiastical influences. My object now is to indicate the way in which this transformation is likely to be brought about.

The demand for change has been made upon the plea of "liberty"; and the Government have admitted the plea. "Disguise it as you will," said the Chancellor of the Exchequer, "the maintenance of the present state of things amounts to "the imposition of civil disabilities on account of religious "opinion." Now, in presence of the fact that the London University is open to students from all places of education in the Kingdom, including the Catholic College in Dublin, and that it may even establish an Examining Board in Dublin—a measure which it is understood to have in contemplation—it is not at once obvious what the civil disabilities are to which the Chancellor of the Exchequer refers. No doubt the endowment of any system of education by the State—if it be conducted according to fixed rules of any kind, even though they be merely rules enforcing toleration—may be represented as imposing "civil "disabilities on account of religious opinion;" since it places under a comparative disadvantage other plans of education which refuse to comply with the conditions required by the State system. It is in this sense that the Church Education Society complain that they suffer from civil disabilities, because the State refuses to assist them unless on general conditions of toleration enforced by the National Board. But one would not expect to find the Chancellor of the Exchequer contending for religious freedom in this sense of the word. Yet this and no other is the sense in which the cry of "liberty" has now been raised. We are not without experience upon this point. A parallel is at hand so apposite that it should not be overlooked in this discussion. The model and convent schools under the National Board occupy places in the primary education of Ireland very analogous to those which the Queen's and Catholic Colleges will occupy in the higher education under the contemplated educational extension. The convent schools, albeit subject to the liberal rules of the National System, are, for obvious reasons, in the majority of instances, practically denominational. The model schools, on the other hand, stand in regard to their principles and management identically on the same footing with the Queen's Colleges. Now, what has been our experience of the working of these two classes of schools? The following may be taken as a description of what ordinarily occurs. On the establishment of a model school, the children of all denominations in in the neighbourhood flock to it. Ere long, the growing prosperity of the school draws upon it the hostility of the Roman Catholic priesthood. It is denounced from the altars; a convent school is established by its side; and the people are told to transfer their children to the denominational seminary. A secession of Roman Catholic children from the model school takes place, but after a time, the denunciation ceasing, or ceasing to be regarded, and the superiority of the liberal school being universally understood, the seceders begin to creep back again, and soon the model school is as flourishing as before. Once again the thunders of the Church are launched, and now with redoubled fury, till finding warning and denunciation of no avail, the extreme measure is at length adopted of refusing to the disobedient the rites of the Church. This last expedient has, I regret to say, proved generally efficacious, though there are some who stand up even against this threat, preferring a good education for their children even at the cost of exclusion from heaven "officially so called." Now hitherto this policy has not been possible against the Queen's Colleges, because so long as the Catholic University was not recognised by the State, the priesthood had no institution to perform towards them in the higher education the part which the convent have played towards the model schools in the lower. This exclusion of the Catholic institution from the State system obstructed the play of the spiritual artillery, and it is this obstruction which the Government now propose to remove. This, Sir, is the meaning of the plea for "liberty." The "free education" desired by Dr Cullen is entirely analogous to the "free monarchy" which was the political ideal of James I.: in each case the freedom sought has been of the same order,—freedom to control in the one case the actions, in the other the thoughts and consciences of others; and this is the freedom which the new policy of the Government will favour.

This is one way in which the adoption of the Catholic College into the University system of Ireland may lead to a conversion of the present "mixed" system into a denominational one. But the advocates of sectarianism will not have to rely on spiritual weapons alone. The supervision and regulation of the University curriculum and the appointment of examiners lie with the Senate of the Queen's University. Already the denominational element is not without a place in

Digitized by Google

that body. It is only necessary that the contemplated affiliation should take place in order to render it predominant; because it is distinctly admitted by the Government—and, the steps of recognition once taken, it is not easy to see how this could be avoided—that the new Colleges shall be duly represented on the Senate. I do not think I need occupy your space in tracing further the working of this concession to "religious freedom." In the hands of its implacable enemies, the noble system of free and equal education, founded by Sir R. Peel, and carried in sixteen years to a pitch of success, such as I will venture to say that sober-minded statesmen never dreamed of, will be speedily transformed into a group of sectarian institutions thoroughly worthy of the confidence of the most timid distruster of human reason. Cork and Galway, where Roman Catholics and Protestants now meet on equal terms in honourable rivalry, and learn that mutual toleration which is the basis of good citizenship, will quickly become purely Catholic seminaries, while, as a set-off, Belfast will be given over to the Presbyterians, and with this change in the *personnel*, the courses of instruction will doubtless also in due time undergo suitable modification. In short, the important work which has been accomplished in mitigating religious animosities, and fusing together elements of the population heretofore in hereditary antagonism—the fruit of sixteen years of severe and, I will add (for to me belongs no part of the credit), ill-requited labour—will speedily be undone; and from being centres of toleration and peace the Colleges may be expected to become foci of bigotry and discord.

Such is the "cheap concession" by which it is proposed to secure to the Liberal party a certain amount of Catholic support. It is to be hoped the manœuvre will prove successful; but for the "cheapness"—I must own myself unable to rise to that sublime stand-point of cynicism from which the intellectual interests of a people appear as nothing in the scales of party.—I am, Sir, your obedient servant,

J. E. CAIRNES.

28 Notting hill square, W., July 31, 1865.

	1,468,501,226 11	.....	1,488,031,121 57

The Bank return, compared with that for the previous week, shows the following changes:—an increase of 1,703,000f in the stock of coin and bullion; a decrease of 13,835,000f in the discounts; a decrease of 19,510,000f in the circulation of notes; and an in increase of 1,942,000f in the deposits.

Notwithstanding the small attendance, the Bourse has this week shown great animation. The late rash speculations of sellers of Credit Mobilier and North of Spain are now producing their result. Discounts of large numbers of those shares have been announced daily, and sellers without titles in hand finding that their position is becoming every day more embarrassing, are now eager buyers. The greatest fluctuations were on Wednesday, when the Credit Mobilier rose 30f, and the North of Spain, which opened at 210, reached in a few minutes 265, and left off with a rise of 50f. To-day a slight reaction has taken place, but a considerable portion of the advance is maintained. Rente participates in the upward movement, but in a lesser degree; and the railway market, which had lately shown great firmness, has now joined in the general rise. The Government also comes to the aid of the Credit Mobilier by an article in the *Constitutionnel* of to-day, attributing a large share of the success of the new City loan to the guarantee of that "powerful company." The City bonds are at a premium of 13f 75c. Subjoined are the latest quotations:—

The famous project for depriving London of its supremacy as a silk market, which has long been under consideration in this country, is again exciting attention. The French say that, as they are the greatest consumers of silk in the world, it is absurd that they should have to go to London to get the supply of Asiatic silk they need, when it would be possible to bring it direct to France at a much cheaper rate. The Minister of Commerce has more than once pressed the matter on the Chambers of Commerce concerned in the trade; not long ago he sent them a circular stating that, if means could be found to buy the silk in Asia, direct from the native producers, the steamers of the Messageries Imperiales would be able to carry to Marseilles any quantity of it. Recent letters from French traders in China treat the question with great interest. But the upshot of the whole business appears to be this—that in order to change the existing state of affairs large capital must be sent to Asia, great latitude in the employment of it must be allowed to agents, and much time will be required. Now, the dealers of silk in France have not got large capital at their disposal; they are strongly disinclined to confide the control of what they do possess to men whom they cannot watch constantly, and they have not patience to wait for years for the success of a commercial operation. According to all appearances then, the English will retain possession of the silk trade in Asia, provided they do not act in such a way as to render this monopoly absolutely intolerable; in which case they would have to fear that the Government would make up for the lack of means and energy of merchants, by, as the phrase goes, "doing something" itself. At present the English supply France with about one-half of the foreign raw silk she receives. The quantity she took out of bond for consumption in the first six months of the present year was 1,472,100 kilogrammes (1,472 tons), of the estimated value of 76,181,175f, and of it 719,000 kilogs, value 37,254,825f, were from England; 285,500 kilogs, value 14,774,625f, from Turkey; 53,000 kilogs, value 2,742,750f, from Italy; 500 kilogs, value 25,875f, from Belgium; 8,100 kilogs, value 419,175f, from the Zollverein; and 405,100 kilogs, value 20,963,925f, from other countries. In the designation "other countries" direct imports from British India, China, and Japan are comprised, and some of them also were made by the English.

According to the journal of the beetroot sugar manufacturers, the crop of beetroot this year will be much superior to that of last. This is a fact to be noted by sugar refiners in England, as sugar refined from beetroot can now be exported from France free of duty, like refined colonial and foreign, and as consequently the French refiners will be able to make a more vigorous competition to al other refinets in foreign markets than they have hitherto done. The following account of the export of refined in the first six months of the present year, compared with that of last, will give some idea of what is to be expected from them under the new facilities they now enjoy:—The total quantity sent away was in said period of this year, 59,307 tons, and in the corresponding one of last year only 35,826. Of the former, Italy received 20,780 tons, whilst in the six months of 1864 she only took 10,567; Switzerland received 4,611 tons, instead of 2,477; Greece 2,656, instead of 1,344; Turkey 10,231, instead of 5,151; the Roman States 1,979, instead of 1,090; Egypt 2,463, instead of 2,239; Belgium 130, instead of 1-10th of a ton; Austria 1,532, instead of 674; Algeria 3,177, instead of 2,488; Spain 265, instead of 181; Chili 1,126, instead of 709; Algeria 3,117, instead of 2,489. As to England, she received less this year than last,—5,440 tons to 5,513; and the Zollverein also less,—91 to 349. But the other countries not mentioned received more. It is true that the figures here given comprise refined from foreign and colonial as well as beetroot; but the greater part of the increase is of the latter.

As the rag question is again the order of the day, it may be well to present the latest statistics of it. In the first six months of the present year France imported for consumption 587 tons of woollen rags, of which 15 were for England, the quantity received in the same period of last year being 571; of other sorts of rags she received this year 2,824 tons to 1,564 last year, 147 of the former being from England; and of old ropes, 587 tons to 373, the quantity of the 587 from England being 59. Her exports were, in woollen rags, 2,607 tons in the first six months of the year, to 2,422 in last; other sorts, 745 to 1,708; and old ropes, 1 to 24. Of the woollen rags, England took 1,081 this year, and 1,304 last; of other sorts, 724 to 1,562; and of old ropes, none in either period.

The last published Customs tables give a strong argument to the economists, who are of opinion that the total abolition of Customs duties might be effected in this country without causing any serious derangement in the finances. The amount of those duties received in the first six months of the present year was only 48,407,000f (1,936,280*l*). An addition has, it is true, to be made to them for the payment of duties on sugar, for which credit is allowed; but on the other hand, the expenses of collection have to be deducted. For such a sum as the Customs yield, in the enormous Budget of France, is it really worth while maintaining the impediments they cause to commerce? Let an examination of the details of the total answer the question. Coffee produced 10,756,000f; coal, 3,812,000f; woollen tissues, 1,947,000f; and table fruits, 1,016,000f. But all other articles—apart from sugar—brought in less than the lowest of these; and some of these yielded sums ridiculously low:—Bar iron, 9,000f; lead, 37,000f; steel, 66,000f; tea, 152,000f; articles in metal, 146,000f; machinery, 389,000f; rice, 114,000f; flax and hemp yarn, 281,000f; woollen yarn, 258,000f; spirits, 171,000f; cocoa, 847,000f; olive oil, 600,000f; cotton yarn, 239,000f; cheese, 345,000f; cast iron, 826,000f; flax and hemp tissues, 701,000f; cotton tissues, 415,000f; and so on.

A writer in one of the Bordeaux journals recommends the commercial public of that city to establish a joint stock bank similar to those formed at Lyons. The private bankers at Bordeaux are, he says, perfectly respectable, but they are not able to meet all the wants of commerce.

A Society of Political Economy, similar to that at Paris, has just been formed at Bordeaux. After the opposition made in that city to the bill for applying to shipping the liberal system adopted in all other branches of trade, the Bordelais require to be reminded of the true principles of commerce,—principles which Bastiat taught them, and of which at one time they had the honour to be the most ardent defenders in France.

The following is the market report:—

Flour.—At *Paris*, yesterday, six marks disposable were 51f 25c the sack of 157 kilogs. Type Paris, the 101 kilogs, disposable, 31f 25c.

Wheat.—The quotations yesterday were:—choice, 29f; first quality, 28f; second, 26f 50c.

Cotton.—The market at *Havre*, in the week ending Friday, was heavy. The sales were 3,668 bales, and the arrivals 2,226. The closing quotations were 2f to 5f lower for United States, 5f lower West Indies and Egypt; other sorts unchanged. Low New Orleans was consequently 240f the 50 kilogs; good ordinary Broach, 160f; good ordinary Tinnevelly, 155f; same quality in Madras, 170f; in China, 145f; Jumel, 220f. This week also little has been done. Yesterday Oomrawuttee was 165f and 160f; Tinnevelly, 150f and 145f; Bengal, 110f and 100f; China, 140f and 137f 50c; New Orleans, 235f.

Coffee.—The sales at *Havre*, in the week ending Friday, were 50 sacks Port-au-Prince, 83f 25c in bond; 1,000 Jacmel, 81f; 450 Cape, 83f 50c and 85f; 120 Gonaives, 87f; 1,850 Rio not washed, 77f to 81f; 200 washed, 93f; 4,010 Santos for delivery, 80f; 57 Cazengo, 85f. Some lots of damaged were also sold. The arrivals are only about 1,500 sacks. This week, Gonaives has been at 83f. At *Bordeaux*, last week, Guadaloupe 149f, and habitant 139f duty paid, a decline on preceding quotations; 871 sacks Mysore, 117f duty paid; 250 Rio not washed, 81f in bond; 145 La Guayra grages, 102f; 150 grages and non-grages, 95f to 104f 50c; 9 casks San Yago, 115f in bond. By auction, some damaged La Guayra and San Yago was sold. The arrivals were 15,000 sacks. At *Nantes*, no sales. At *Marseilles*, 600 sacks Rio 70f; also some damaged of the same sort by auction.

Sugar.—At *Havre*, in the week ending Friday, some French West India went at 49f the 50 kilogs, bonne quatrieme, duty paid; 2,200 sacks Mauritius, low, 26f, in bond; 1,600 Pernambuco, 25f 50c ditto; 59 Havana, 30f 50c, No. 12 in bond. Some damaged Havana was also sold. The arrivals were unimportant. This week, French West India on sample, 52f. At *Bordeaux*, last week, some French West India, 47f and 46f 75c, bonne quatrieme; and some usine, 54f 25c and 58f 50c At *Nantes*, last week, 330 bales Reunion, low quality, 42f; 1,739 sacks Mayotte, 48f 25c, duty paid; some French West India usine, 61f and 59f 50c; and some common, 43f. At *Marseilles*, last week, 540 casks French West India, 27f 50c, bonne quatrieme of Havre.

Indigo.—At *Havre*, in the week ending Friday, the sales were only 13 chests Bengal, at established prices, and there were no arrivals. No sales this week. At *Bordeaux*, last week, 33 chests Bengal: 13 a little below preceding quotations, 20 at prices kept secret; 7 Madras, 7 Kurpah, at established prices.

Hides.—The sales at *Havre*, in the week ending Friday, were 792 Buenos Ayres dry, 72f to 86f the 50 kilogs; 8,750 salted La Plata ox, 52f 50c to 56f; cow, 44f; 760 Rio Grande salted ox, 56f; cow, 43f 50c; 500 Pernambuco drysalted, 64f; 100 Valparaiso salted ox, 53f; 284 Tampico dry, 70f to 74f; 801 New York salted, 39f to 40f 50c. By auction, 593 Monte Video sound, 84f, and some Arica sound, 50f; also some damaged Buenos Ayres. The arrivals exceeded 17,000. This week, Buenos Ayres dry, 70f; Rio Grande salted cow, 44f; Pernambuco drysalted, 64f.

Wool.—The sales at *Havre*, in the week ending Friday, were 360 bales La Plata unwashed, 1f 32½c to 2f 25c the kilog; 10 Monte Video washed, 2f 20c; 14 Rio Grande unwashed, 1f 53c; 23 bales sheepskin Buenos Ayres unwashed, 1f 10c to 1f 35c. The arrivals were 3,850 bales.

Digitized by Google

This week, Buenos Ayres unwashed, the 100 kilogs, 162f 50c to 240f, duty paid. Monte Video unwashed, 137f 50c to 230f.

TALLOW.—At *Havre*, in the week ending Friday, 70 casks La Plata, disposable, 50f to 51f the 50 kilogs; 770, for delivery, 50f 75c to 51f 50c; 10 New York a la marque, 51f 50c. The arrivals were 1,537 casks. This week, La Plata in the port and for delivery, 51f 25c to 51f 75c. At *Paris* yesterday, the 100 kilogs were 104f, octroi duty not included.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., 51f and 50f the hectolitre.

Correspondence.

TO THE EDITOR OF THE ECONOMIST.

THE RUSSIAN (VYKSOUNSKY) IRON WORKS COMPANY (LIMITED).

Referring to the statement contained in the money article of your journal of the 12th instant, that the Committee of the Stock Exchange refused a settlement in the shares in the above Company in consequence of a "material variation" between the prospectus and the Articles of Association, we have to request that you will be so good as to give publicity to the following explanation.

The particular clause in the Articles of Association which, as we understand, was objected to by the Committee, and upon which they based their refusal to grant a settlement, is as follows:—

"26. The directors may from time to time, as they may think fit, increase the capital of the company to the extent of 500,000*l*, over and above the nominal capital of 500,000*l*, and such increased capital shall be raised from time to time in the number of shares, and of the amount and value, and on such conditions, and with or without any special privileges, as the directors shall think fit. Any increase of capital beyond the said further issue of 500,000*l* shall require the approval of an extraordinary general meeting."

We take upon ourselves, as solicitors of the company, the entire responsibility of having framed the above clause, and we contend not only that its existence in the articles does not create any material variation between the prospectus and the Articles of Association, in a legal point of view, but that the Committee of the Stock Exchange have now for the first time given effect to an objection which would never have been thought of if it had not been the interest of certain reckless speculators in the company's shares to prevent a settlement by any means in their power.

The Committee of the Stock Exchange are not governed by any such defined rules as to enable the public to judge with certainty what may or may not amount to an objection in their eyes; and the safest guide would therefore appear to be their previous decisions in similar cases. Having had before us the articles of association of many important companies in which settlements had been granted—amongst which we may mention the City Offices Company, the Thames Iron Works Company, Smith, Knight and Company, the Imperial Bank of China, the China Steam Ship Company—and finding that in all of them, as well as in many others, the clause which has now been for the first time objected to was inserted, and was not even made a matter of comment upon the applications for settlements, we submit that we were fully justified in assuming that the Clause was as unexceptionable in Stock Exchange law as we are advised it is according to the law of the land.

We do not hesitate to assert that there is nothing whatever in the Articles of Association of this Company which can properly be excepted to, or which (making allowance for the necessary variations according to the nature of the several undertakings) is not to be found in the articles of nearly all the companies constituted under the Act of 1862.

The true reason of the refusal to grant a settlement may doubtless be attributed to the unfortunately high premium at which the shares of the Company had for some time stood. This state of things the directors regretted, but had no power to prevent; and we are requested by them to state that they have not at any time either directly or indirectly been party to any speculative dealings whatever in the Company's shares.

The course adopted by the Committee has created alarm in the minds of some of the shareholders, and not unnaturally has led them to suppose that the directors have suppressed from the prospectus some facts materially affecting the interests of the Company. We think it right, therefore, to state that the directors know of no other grounds whatever for the refusal to grant a settlement than those to which we have referred.

We desire also to take this opportunity to state that the reports which have been received from the Honourable Captain Hobart, one of the directors who went out to Russia to take possession of the works, are of a most satisfactory character. In a letter from Captain Hobart to the directors, under date of the 27th July, he says:—"I can only say that I am perfectly astonished at the enormous value of this property, and with the condition I find the works in. I have visited every hole and corner of the works, and can see my way to one of the most lucrative businesses in Europe."

In confirmation of the views we have expressed as to the legal effect of what the Committee have been pleased to term a "material variation" between the prospectus and the Articles of Association, we beg to annex a copy of the opinion of Mr J. H. Lloyd, the eminent counsel, on the subject, and which we hope will set at rest any notion which the shareholders may entertain that the refusal of the settlement, or the alleged ground upon which that refusal rests, in any way affects the legal status of the Company, or the position of the shareholders therein.—We are, Sir, your obedient servants,

NEWBON, EVANS, AND CO.

28 Nicholas lane, August 12, 1865.

COPY OPINION REFERRED TO.

I am clearly of opinion that there is no variance between the prospectus and the Articles of Association which would enable a shareholder to recede from his position as such, and claim repayment or to resist payment of further calls. The capital of the Company is in fact what it is represented to be in the prospectus, and the power to increase the capital is one ordinarily given to all companies by their Articles of Association. I am, therefore, surprised that the Committee of the Stock Exchange has on such grounds refused a settlement. I am also of opinion that the shareholders are bound by their acceptance of the articles of association, and in thea bsence of fraud or misrepresentation could not set up any claim to be discharged from their obligations. (Signed) J. H. LLOYD.

1 King's Bench walk, August 10, 1865.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following report of the Calcutta money market is dated July 17:—The Bank of Bengal maintains its rates as quoted in our last, but considerable sums of money are offered for loan on good security at easier terms in the bazaar. Government Five per Cents. have advanced in value from 101¾ to 102½ and are much inquired for. Fours and five-and-half per cents. are quite neglected, and are saleable only in limited quantities at 88½ and 108⅞ respectively. Bank of Bengal, Agra Bank, and Assam Company's shares have been bought freely for investment, and these stocks are generally held for higher prices. A limited amount of bank paper was sold at 1s 11 1/16d, but business during the past fortnight has principally been transacted at 2s; first-class credit bills have been bought freely at 2s, and document bills at from 2s 0¼d to 2s 0⅜d. Owing to the improved tone of the intelligence received from China and the Straits on the 4th and 6th instant, buyers now require higher rates; and exchange is firmer in consequence and likely to improve. The out-going mail takes a considerable amount of bar gold for London. The following is dated Aug. 10:—Exchange on London, 2s 0⅛d.—Government Securities—Four per Cents., 91¼; Five per Cents., 104; Five-and-a-Half per Cents., 111.

Annexed are the returns of the Bank of Bengal for the weeks ending June 20 and June 27:—

Liabilities.	June 20.		June 27.
Proprietors' capital, paid up	£2,200,000	...	£2,200,000
Reserve fund	174,854	...	174,621

Subjoined is a telegraphic communication from Bombay to Aug. 11:—7-lb shirtings, 6r. 14a. Twist dull. Exchange on London, 2s 0⅛d. Government Securities—Four per Cents., 90½; Five per Cents., 104¼; Five-and-a-Half per Cents., 111¼.

In reference to the state of the Madras money market, Messrs Dymes and Co., in there circular dated July 13, state:—The money market continues easy, and their is little demand at the present rates of six per cent. for advances on Government securities, and 8 per cent. on private bills. Madras Bank shares—The declaration of a dividend at the rate of 12 per cent. per annum, free of income tax, for the half-year ending 30th June, has had the effect of improving the value. Our present quotations are 82 to 85 premium ex dividend, showing a rise of from 20 to 23 per cent. on the fortnight. Government paper is steadier, and the market is recovering from the depression occasioned by the rumoured necessity for a new loan in consequence of the modifications in Sir Charles Trevelyan's last budget. We quote Five-and-half per Cents. 9½ premium, Five per Cents. 3 premium, and Four per Cents. 10 discount. Exchange is steady at 2s 0¼d for first-class credits; documents, 2s 0⅛d. The banks' drawing rate on London continues at 1s 11⅞d 6 months' sight. Sovereigns, 10-6 rs to 10-7 rs each.

The state of the bullion market at Hong Kong, for the fortnight ending June 29, is thus alluded to by Messrs Sharp and Co.:—Gold—We have received during the last fortnight mainly from San Francisco $250,000. The total sent away, including the amounts per Behar on the 13th instant and excluding those to leave to-morrow, is $590,000. The price has been almost stationary. Silver—Receipts $170,000, exports $130,000. The balance will probably go forward to India per Ottawa to-morrow. Dollar Currency—There has come to hand since last report an aggregate of $830,000. The shipments, however, are much in excess, amounting to $3,450,000. A considerable total of clean Mexicans has been forwarded to Shanghai, and the Carolus Pillar dollar, which was brought here from thence a few months ago and which was

Digitized by Google

refused to be accepted as currency in large amounts, has been returned North at a premium of three per cent. Discounts and Mortgages—Money is in more demand, and as the shipments increase the value rises. Exchange—The advance calculated upon last mail has not been obtained, operators being discouraged by the quieter tone of the Foochow advices. A comparatively small business has been done at slightly lower rates. Shares—The Bombay news does not at all encourage speculation. In the face of this, however, our local Bank has rallied 2 to 3 per cent. Closing Quotations—On London, 6 months' sight, 4s 5½d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 217 rs; on Shanghai, 30 days' sight, 72¾ tls; on Singapore, 3 days' sight, 3 per cent. prem.; on Amoy, 15 days' sight, 1½ per cent. dis.; bar silver, 10½ per cent. prem.; Sycee, 9 per cent. prem.; Mexicans, 2½ per cent. prem.; Carolus, 3 per cent. prem.; gold leaf, $22.90 per tael; gold bar, Californian, $22.85 per tael, equivalent 100 touch.; American double eagles, $18.25 each; sovereigns, $4.55 each; discount, 7 per cent.; Hong Kong and Shanghai Banking Company shares, 8 per cent. prem.; Union Dock shares, 8 per cent. prem.

From Adelaide, South Australia, the advices by the present mail are to the 26th of June. The English mail of April 26 did not reach Adelaide till the 23rd of June, 14 days after it was due. Trade is represented as dull. The weather has been exceedingly dry, and great fears were expressed for the grain crops. A new joint stock local bank had been established in Adelaide with a capital of 250,000*l*. Flour was quoted at 18*l* 10s to 19*l* 10s per ton; copper at 88*l* per ton; Burra shares were worth 66*l*. The banks sold draughts on London at 60 days' sight at 1 to 1½ per cent. premium, and bought bills at ½ per cent. discount to ½ per cent. premium. The rates of exchange were in a very unsettled state.

The law for the abolition from the 1st of January, 1868, of the export duties on rags in Belgium has been passed by both Chambers. The export duty on rags on the Polish frontier of Russia has been reduced to 30 kopecks.

The following is a statement of the business at the United States Assay Office at New York, for the month ending July 31, 1865:—

Deposits of Gold.	dols	c	dols	c

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 16th day of August, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,892 850	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,242,850
		Silver Bullion	...
	27,892,850		27,892,850

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384 209
Rest	3,539 451	Other Securities	21 687 644
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,326 453	Notes	5,917,905
		Gold and Silver Coin	937,683
Other Deposits	14,962 787		
Seven Day and other Bills	545,150		
	38,926 841		38,926 841

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,520 095	Securities	32 168,253
Public Deposits	5,326 453	Coin and Bullion	14,180,533
Private Deposits	14,962 787		
	42,809,335		46,348,786

Dated the 17th August 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,539 451*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£55,562
AN INCREASE of Public Deposits of	61,714
AN INCREASE of Other Deposits of	274,606
No change in Government Securities.	
AN INCREASE of Other Securities of	345,187
A DECREASE of Bullion of	42,837
AN INCREASE of Rest of	21,572
AN INCREASE of Reserve of	4,328

The above return shows that the late demand for money has been chiefly precautionary, the greater part of the increase in the other securities being compensated by the addition to the other deposits. The decrease in the bullion chiefly arises from the demand for coin for the harvest.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	21,289,252	22,900,555	23,003,176	21,554,139	22,520 095

Other deposits	12 250,406	14,568 007	13,005,322	13,950,446	14,962,787
Government securities	12,810,164	11,036,097	11,088 426	10,897,095	10,384,209
Other securities	14,943 006	19,176 606	18,317,701	20,600,841	21,687,044
Reserve of notes & coin	9,839,838	10,256,934	8,409,822	6,348,264	6,855,588
Coin and bullion	16,116,978	17.674,604	15,081,152	12,725,759	14,180,533
Bank rate of discount	3½ p. c.	2 p. c.	4 p. c.	8 p. c.	4 p. c.
Price of Consols	91¼	93¼	93¼	89	89¾
Average price of wheat	75s 9d	57s 4d	45s 11d	43s 6d	42s 0d
Exchange on Paris (short	25 7½ 12⅝	25 20 27½	25 25 35	25 25 32½	25 20 25
— Amsterdam ditto	11 16½ 17	11 15 15½	11 17 17½	11 18½ 19	11 18½ 19
— Hamburg (3 months)	13 7½ 8½	13 8½ 8½	13 8½ 8¾	13 9½ 9¾	13 9¾ 10¼

In the corresponding week of 1855, news had arrived of an important victory gained by the French and Sardinians over the Russians at Tchernaya. Sweaborg had been bombarded by the allied fleets, and the magazines and arsenals destroyed. The Queen had prorogued Parliament. The money market was more stringent.

In 1862, an encounter between the troops of King Victor Emanuel and the volunteers of Garibaldi had occurred near Girgenti, in Sicily. The London money market had shown symptoms of an inclination towards slightly advanced rates, and the stock markets were dull.

In 1863, Earl Russell was engaged in an attempt to influence the conduct of the Russian Cabinet in respect of the measures it was then taking against the Poles. The money market was quiet, and there was a general expectation that the harvest operations would prove favourable.

In 1864, a Royal decree had been issued ordering a reduction in the Prussian army. The inauguration of the Northern

Digitized by Google

Spanish Railway had taken place. Executions on account of the late insurrection in Poland continued to occur at Warsaw. The King of Spain had arrived at Paris, on a visit to the Emperor. M. de Quaade had received instructions from Copenhagen for the opening of peace negotiations. In America, Grant had been repulsed in an attack on Petersburg, with a loss of 5,000 men. Hood had been defeated in an attack on Sherman's position. The demand for discount here was moderate.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 2,692,600*l*; in 1862, a deficiency of 4,608,599*l*; in 1863, a deficiency of 5,312,379*l*; and in 1864, a deficiency of 6,650,395*l*. In 1865, the deficiency is 6,724,257*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount has been moderate throughout the week, but, owing to the unsettled state of the weather and consequent fears for the harvest, a general feeling of caution has been shown. Hence, although an abundant supply of capital exists, the usual rate has been maintained as high as the Bank minimum of 4 per cent, and in only exceptional cases business has been done at a fraction less. To-day there has been a rather better demand, partly from the ordinary increase of applications on a Friday, and partly from the maturing of some rather large amounts of Indian and Australian paper.

Subjoined are the current terms for bills of various dates:—

30 to 60 days	4 per cent.
3 months	4 per cent.
4 months	4½ per cent.
6 months—Bank bills	4¾ per cent.
6 months—Trade ditto	5 ½ per cent.

On the Stock Exchange there has been an abundant supply of money, and the rate for short loans has receded to 1½ to 2 per cent.

The following are the rates of interest allowed on deposits:—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3½ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

At the Bank to-day 8,000 sovereigns were withdrawn for Egypt. There were no transactions yesterday.

The biddings for Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were:—To Calcutta, 169,300*l*; to Madras, nil; and to Bombay, 97,000*l*. The minimnm prices were 1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. Tenders on Calcutta at 1s 11⅞d will receive about 30 per cent., and on Bombay at 1s 11⅞d about 80 per cent. Above these prices in full.

The following are the changes in the Bank of France return this week:—

	£
INCREASE.	
Cash in hand	68,000
Current accounts	80,000
Advances	4,000
DECREASE.	
Notes	780,000
Commercial bills	552,000
Treasury balance	80,000

The Stock Exchange Committee have appointed this day (Friday) as a special settling day in the shares of the Belgrave Mansions Company (Limited), and in the scrip of the East London Railway. The former are to be marked in the twice a week list, and the latter in the daily list, as with 20*l* and 10*l* paid.

The Committee of the Stock Exchange have passed the following resolution:—That the memorandum and articles of association of the Hop and Malt Exchange and Warehouse Company (Limited) being materially at variance with the prospectus, a settlement be refused.

Special settling days have also been appointed for Overend. Gurney and Co., on the 22nd, London Bridge Land, 23rd, and Dublin Connecting Railway, 22nd instant.

Annexed are the rates of discount in the chief cities of the Continent. At Hamburg there has been a slight rise, while at Paris the tendency is downward:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾ 3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	3½
Madrid	9	...
Hamburg	...	3½
St Petersburg	6	6½

ENGLISH FUNDS.—Consols have been almost entirely influenced by the state of the weather, and its probable effect upon the harvest. The rain in the earlier part of the week caused continued heaviness and an almost daily decline, but later the favourable change has been followed by a full recovery, and the final prices to-day show an advance of fully a quarter per cent. over last Friday. The market has also been strengthened by some rather numerous repurchases to close previous speculative sales. Consols left off this evening at 89⅝ to 89¾ for money, and 89¾ to 89⅞ for the account; and Reduced and New 3 per Cents., 89½ to 89⅝.

India 5 per Cents. have improved to 105 to 105¼. Exchequer bills are rather lower, at 3s discount to 1s premium.

FOREIGN STOCKS.—The transactions in foreign stocks this week have been on a moderate scale, and in most cases prices were dull at the commencement, but subsequently improved. Mexican bonds have been flat, on the news that the troops of the Emperor Maximilian and of the United States, stationed on the opposite banks of the Rio Grande, are in danger of coming into collision. The new Turkish Conversion Loan Scrip, after falling to 6½ discount, has fractionally rallied, on the announcement that the Société Générale de l'Empire Ottoman will undertake the management of the details in Constantinople. Other Turkish stocks are steady. A rise has taken place in Spanish descriptions. Brazilian, Italian, and Russian securities are also higher, while Venezuelan have shown heaviness. This afternoon there has been a general advance in almost all descriptions, aud the market closed firm.

At Paris, to-day, French 3 per Cent. rentes were last quoted 68f 15c for the account, showing a rise of nearly ⅜ per cent. on the week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The principal movement in the railway market this week has been the rise in Great Western stock on favourable anticipations respecting the dividend. London and North-Western and Midland also show a marked improvement, and several of the other leading descriptions are quoted higher. The state of the weather has chiefly influenced prices, as in Consols, but exceptional strength is derived from the better demand for these securities by the public for investment. Hence the floating supply of stock in the market is restricted. Owing to the dissensions at the board, Great Eastern has again been depressed. To-day the general tendency has been especially good.

Colonial securities remain dull, and some of the Indian

Digitized by Google

guaranteed stocks are quoted lower. Grand Trunk of Canada also receded, but Great Western shares were steady.

There has been little doing in foreign descriptions, and the chief variation is a decline in South Austrian and Lombardo-Venetian.

The principal changes in miscellaneous shares have been in the preference issue of the Atlantic Telegraph Company. Yesterday morning they were quoted as low as 3½ to 3 discount, but on the arrival of the Great Eastern and the successive publication of the news by that vessel a recovery took place to 2⅝ to 2⅜ discount. To-day there has been a partial reaction to 2¾ to 2½ dis. Telegraph Construction shares are firmer at 1¼ to ¾ discount.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

FOREIGN EXCHANGES.—There has been no material variation in the rates this week. Bills on Paris, however, have been rather more in demand.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals during the past week comprise the following sums:—10,000*l* from Africa, by the McGregor Laird; 86,800*l* from the West Indies, by the Atrato; 127,000*l* from Melbourne, by the Suffolk; 5,500*l* from Boston, by the Africa; together with 10,000*l* withdrawn from the Bank. These amounts have all been sent away, and the demand for export still exists. The vessels now on their way from Melbourne are the Swiftsure, with 286,000*l*; the Transatlantic, with 127,000*l*; and the Sussex, with 102,000*l*. The first named is now due. The Essex also is bringing gold, but the amount is not yet known.

Silver.—The Atrato has brought 97,700*l* from the West Indies, which has realised the same prices as before, viz., 61d per oz standard for the Doré, and 60⅞d per oz standard for the fine bars. The demand for India has experienced some revival during the past few days, the Delta having taken 120,000*l* for Bombay; further shipments will be made by the corresponding vessel from Marseilles. The market here is now almost bare of supplies, and the price may in consequence be considered tolerably firm.

Mexican Dollars.—The dollars by the French steamer have not yet been sold; the price varies from 60½d to 60⅝d per oz; sellers at the latter rate; tolerably large amounts have been taken for China, both from here and from Marseilles.

Exchange remains without alteration. Bank bills on Calcutta and Madras are 1s 11½d to 1s 11⅝d, and on Bombay 1s 11½d to 1s 11⅞d. There was no alteration in the rates of the Council drafts on India, for which tenders were received yesterday; the allotments were, however, somewhat different, being on Calcutta and Madras at 1s 11⅝d, 30 per cent., and on Bombay at 1s 11⅞d, 80 per cent. On the 2nd instant tenders on Calcutta and Madras received 75 per cent., and on Bombay 70 per cent.

India Government loan notes show increased depression. The 5½ per Cents. are 108 to 109, the 5 per Cents. 100 to 101, and the 4 per Cents. 88 to 90.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d to 5s 0⅝d per oz std; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 5s 0½d per oz; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Mexican dollars by the French steamer have been sold for China at 5s 0¼d, showing no alteration.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Accounts from Sydney report the failure of Messrs Prost, Kohler, and Co., merchants, with liabilities estimated at about 50,000*l*, and assets valued at 31,000*l*. At Melbourne, Messrs J. Katrenstein and Co. have also stopped payment. Their liabilities are represented at about 31,315*l*, and assets 22,910*l*.

The creditors of the London Marine Insurance Association are required to prove their claims before Vice-Chancellor Sir W. P. Wood, on the 15th September.

Notice is given of an order of the Vice-Warden of the Stannaries for the winding up of the Tywarnhaile Mining Company.

Letters from Port Elizabeth, Cape of Good Hope, announce the failure of Messrs T. W. Gubb and Co., merchants, with liabilities estimated at about 50,000*l*, against assets amounting to 30,000*l*.

PUBLIC COMPANIES.—An extraordinary meeting of the Telegraph to India Company took place on Monday. The dividend declared for the half-year was at the rate of 5 per cent. per annum.

At the meeting of the London District Telegraph Company, held on Thursday, the directors' report was adopted. It stated that the workings for the past half-year showed an excess of receipts over expenditure of 242*l*.

The Anglo-Italian Bank have declared an interim half-yearly dividend at the rate of 5 per cent. per annum, free of income tax.

At the meeting of the Grosvenor and West-end Railway Terminus Hotel Company, held on Wednesday, the net profit for the half-year was stated at 3,406*l*, out of which a dividend at the rate of 5 per cent. per annum was declared, 483*l* added to the depreciation fund, 100*l* to the reserve fund, and the balance—446*l*—carried forward to the next account.

An extraordinary general meeting of the Merchant Shipping Company (Limited) was held on the 16th inst., when the resolutions passed at the general meeting on the 28th ult. were confirmed.

At the meeting of the English Joint Stock Bank, held on Monday last, a dividend at the rate of 6 per cent. per annum, free of income tax, was declared, and 5,500*l* carried to the reserve fund.

The Belfast and Bangor Railway and Land Company's share list closes on the 25th. The shares are now quoted 1½ to 1¾ premium.

The directors of the Oriental Commercial Bank will propose, at the general meeting on the 23rd inst., an *ad interim* dividend at the rate of 10 per cent. per annum, leaving 3,913*l* to be carried forward.

At a meeting of the Berlin Waterworks Company, to-day, a dividend was declared of 6s per share, free of income tax.

The proposed dividend of the Great Eastern Railway Company is at the rate of 1 per cent. per annum, against 1¼ in the corresponding period in 1864, "subject, however, to the question that the interest upon stock raised for new works being changed to capital."

The dividend on Caledonian Railway stock has been officially announced at the rate of 6¾ per cent. per annum, in addition to a bonus of 20s per 100*l* stock.

The directors of the Salisbury and Yeovil Railway Company have recommended a dividend on the ordinary shares for the past half-year at the rate of 4*l* 10s per cent. per annum, carrying forward a balance of 3,278*l*.

The report of the directors of the North London Railway Company has been issued. The directors recommend a dividend at the rate of 6 per cent. per annum, leaving a balance of 699*l* 3s 8d to be carried forward.

The proposed dividend on the Vale of Neath Railway stock is officially announced at the rate of 5½ per cent. per annum, against 4½ for the corresponding period of 1864.

The Anglo-Egyptian Cotton Company—capital 100,000*l* in 10,000 shares of 10*l* each—is announced. The Company has been formed for the purpose of ginning and packing cotton, and for crushing the seed and refining the oil thus obtained.

The prospectus has been issued of McQueen Brothers business. The purchase money is fixed at 45,000*l*, of which 12,000*l* are payable in debentures, which bear no interest until 10 per cent. has been paid to the shareholders, 10,000*l* in fully paid-up shares, and the remainder in deferred instalments.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 2-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is 108¼ to 108¾ per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

It has been found necessary to withdraw the permission to send patterns and samples of merchandise to Belgium in the mail, via France, and to restrict their transmission to the ordinary mail, via Ostend.

A reduction of postage has taken place on letters for Denmark and Norway forwarded via Prussia, and in future the following rates, British and foreign combined, will be chargeable on such letters, viz.:—To Denmark—Not exceeding half an ounce, 8d; above half an ounce and not exceeding one ounce, 1s 4d; above one ounce and not exceeding two ounces, 2s 8d; above two and not exceeding three ounces, 4s; every additional ounce, 1s 4d. To Norway—Not exceeding half an ounce, 1s; above half an ounce and not exceeding one ounce, 2s; above one ounce and not exceeding two ounces, 4s; above two and not exceeding three ounces, 6s; every additional ounce, 2s. The postage may be either paid in advance, or left to be paid on delivery of the letters, at the option of the sender; but unpaid or insufficiently paid letters will be charged, on delivery, with an additional rate of 2d, when not exceeding half an ounce in weight, and so on, according to the above scales.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

A limited supply of *old* English wheat was on sale at Mark lane to-day, and very little *new* produce was brought forward for sale. The accounts from the leading agricultural districts being, on the whole, favourable, notwithstanding the prevailing unsettled weather, there was less activity in the trade as compared with Monday. Factors were by no means disposed to accept less money, but to have concluded sales of any magnitude they would have been compelled to reduce their demands to the extent of about 1s per quarter. The business done was confined to retail parcels at Monday's prices. Foreign wheat was held at fully late rates, but all descriptions sold slowly: no change took place in prices. Barley and oats were very firm, with an upward tendency as regards good and fine qualities. The few beans and peas on offer sold at late rates. The flour trade was firm, at full currencies. This week's imports comprise 3,940 quarters of wheat; 1,550 barley; 36,410 oats; 720 sacks and 6,330 barrels of flour.

At Liverpool, this morning, so little business was done in wheat and flour that prices were considered nominal. Maize was in fair demand, at late rates. At Wakefield, the wheat trade was firm, prices being 2s to 3s per quarter higher than on Friday last.

The business transacted in the Liverpool cotton market during the week has been again on a very limited scale, the total sales amounting to 50,000 bales, of which spinners have taken 33,000 bales, speculators 3,000 bales, and exports 14,000 bales. The imports of the week are very heavy, amounting to 142,000 bales. To-day's stock is estimated at 470,500 bales. Under the influence of the large arrivals, the market has been extremely depressed, and many weak holders have been compelled to accept a decline of ½d, and, in some instances, even ¾d per lb upon the quotations of Friday last.

We have intelligence from New Orleans to July 26, at which date the actual stock of cotton was 53,845 bales. The market was rather quiet, at slightly reduced rates, the quotations being as follows:—Ordinary, 28c to 30c; good ordinary, 53c to 55c; low middling, 36c to 38c; and middling, 40c to 43c per lb. The receipts of cotton at Savannah from July 3 to July 28 were 5,416 bales, and the exports 4,724 bales. Middling, at latest date, was quoted at 42c; and Sea Island at 60c to 65c per lb. The stock of cotton at New York is about 65,000 bales; at New Orleans 54,000, bales; at Mobile, 25,000 bales; and at other receiving ports, 30,000 bales, making a total of 174,000 bales.

Via the Persian Gulf, we have news from Bombay to Aug, 11. The shipments of cotton during the week had been 10,000 bales. The demand for cotton ruled quiet, at 300 rupees for Dhollerah, and 285 rupees for Broach.

Postal advices from Calcutta are to July 8. During the fortnight prior to that date, the cotton trade was much firmer, and considerable business was transacted. The export in June was 4,595 bales to Great Britain; and 3,706 bales to China.

From Madras, we have letters to July 12. For cotton, there had been a fair demand since the departure of the previous mail, at 9 4-5d per lb, cost and freight, for Western produce. The arrivals of the *new* crop had somewhat increased, but the quality varied considerably. The stock of all kinds was estimated at 7,000 bales. Subjoined is Messrs Dymes, Cartwright, and Co.'s statement of exports:—

Exports of Cotton from Madras for Six Months.

From the leading Chinese ports, we learn that so little business was doing in cotton that prices were almost nominal.

The cotton trade at Alexandria on the 12th inst. was very firm, at 16½d per lb for fair open-ginned produce. The arrivals from July 15 to July 31 were 35,700 bales, whilst the shipments reached 108,380 bales.

Speaking generally, the markets for colonial and foreign grocery produce have ruled quiet this week. As regards prices, the principal changes are in raw sugar, which has fallen in some instances 6d, and in coffee, which, owing to considerable arrivals from Ceylon, has declined to the extent of about 1s per cwt. The tea trade has been in a tolerably healthy state; fair transactions have been effected, and prices have ruled firm. Cocoa has changed hands at fully late rates. Rice, arising from the advance in the price of wheat, is held at enhanced rates. In the spirit market, the leading alteration to notice is an advance in British spirit to 11s 10d per gallon.

We learn from China that the shipments of *new* teas to Great Britain, since June 1, had been 13,760,400 lbs, against 12,461,200 lbs; to the United States, 1,468,500 lbs, against only 186,700 lbs last year.

Advices from Colombo to July 17, state that although the business doing in coffee was by no means extensive, prices had somewhat improved. The quotations for plantation produce was 12s 9d to 13s per bushel; for native do., unpicked 45s; do. picked and dried, 51s to 52s per cwt. Subjoined is Messrs Fryer, Schultze, and Co's., statement of shipments:—

Exports of Coffee from Ceylon from Oct. 1 to July 17.

The public sales of colonial wool were commenced yesterday. The arrivals since last sales comprise 131,626 bales, consisting of 36,341 bales from Sydney, 15,926 Victoria, 10,955 Van Diemen's Land, 35,016 New Zealand, 8,924 Adelaide, 501 Swan River, and 23,963 bales from the Cape of Good Hope. The attendance of foreign, more especially French, buyers being less numerous, the biddings have ruled somewhat inactive. Good and fine wools, however, fully support previous rates, whilst inferior descriptions exhibit a slight decline in value as compared with last series. Privately, the trade for English wool is quiet, on former terms. Advices from Australia state that very little business was passing in any description of wool. The limited supply on offer, however, was mostly held at full prices. The following were the sales current:—At Sydney, 1st scoured, 1s 8d to 1s 10d; 2nd scoured, 1s 5d to 1s 7d; 3rd, seedy and low, 1s to 1s 4d; 1st fleece, 1s 6d to 1s 8d; 2nd fleeee, 1s 2d to 1s 4d; 3rd seedy and low, 11d to 1s; greasy, 9d to 11d; 2nd greasy, 6d to 8d; 3rd seedy and low, 4d to 6d per lb. At Melbourne, greasy inferior to ordinary, 7d to 9d; ordinary to average, 9d to 10d; good to superior, 11d to 13d; ditto ditto (cross bred), 1s 1d to 1s 2d. Fleece: inferior to ordinary, 1s 3d to 1s 5d; ordinary to average, 1s 5d to 1s 7d; good to superior, 1s 9d to 2s 1d. Scoured: ordinary, 1s 4d to 1s 7d; good, 1s 8d to 1s 10d; superior, 2s to 2s 2d per lb.

The arrivals of wool at Port Elizabeth in June were large. For good and fine wools there was a fair demand, at about previous rates. Greasy wools were in request, and the bulk of the arrivals had been shipped to Great Britain and America. Prices ruled as follows:—Fine fleece-washed, 1s to 1s 1½d; medium, 11d to 1s; seedy, 8½d to 10d; hand-washed, superior, 1s 3d to 1s 4d; medium, to good ditto, 1s to 1s 2d; inferior seedy, 9½d to 11d; fine unwashed, superior, 7d to 7¼d; medium, 6½d to 7d; inferior and seedy, 5½d to 6d; coarse unwashed, 4½d to 5d per lb. The shipments during the month were 11,069 bales.

During the fortnight ending June 21, the silk trade at Shanghai was very active, and an important advance took place in prices, No. 3, Tsatlees, having sold as high as 470; and No. 1, Kahing Taysaams, 425 taels per picul. Previous to the departure of the mail, however, the market was quieter, at a decline of about 15 taels. The settlements reached about 8,000 bales. The two last mail steamers took 4,350 bales for Europe. The following were the closing quotations:—Tsatlees, No. 1, 480 taels; No. 2, 460 to 470 taels; No. 3, 440 to 450 taels; No. 4, 420 to 425 taels; No. 5, 400 to 405 taels. Kahing Taysaams. No. 1, 410 to 415 taels; No. 2, 390 to 400 taels; No. 3, 370 to 375 taels. Yuenfas and Haiueens, 370 to 420 taels.

At Yokohama, during the month ending July 12, the silk trade was in a healthy state, and all descriptions commanded considerable attention. The accounts respecting the *new* crop were favourable. Mibashi was quoted at 26s 1d to 28s 6d, for inferior to medium; Edah, 25s 5d to 28s 1d; Sodai, inferior to fine, 22s 9d to

Digitized by Google

26s 6d; Oshio, 23s 2d to 27s 8d; Coshio, 24s 5d to 25s 3d, for medium quality; Itchizen, 23s 7d to 26s 1d; and fine Hatchozee, 22s 4d to 23s 2d per lb.

The silk trade at Calcutta, during the week ending July 8, was quiet; but good and fine qualities, owing to their scarcity, were firm, and in some instances rather dearer. The shipments for the six months ending June 30, were:—To Great Britain, 6,863 bales, against 4,869 bales; to France, 2,361 bales, against 588 bales last year.

A limited business has been done in metals, yet very few changes have taken place in prices. Scotch pig iron, 54s 6d cash, mixed numbers; Banca tin, 94*l*; Straits, 90*l*; and spelter, 22*l* to 22*l* 5s per ton. Rapeseed oil is very firm, at 47s 6d for foreign refined; but the market for other oils rules quiet. The tallow trade continues firm: old P.Y.C. is quoted at 43s 6d, and new at 44s per cwt on the spot.

In the dry goods trade at New York, during the week ending August 5, the leading activity was in woollen manufactures, which were in request, on higher terms. In cotton goods, a limited business was transacted, at about previous rates. Respecting the crops, the accounts received were more favourable, and breadstuffs, from this cause, as well as from the limited export demand, sold at lower prices. In other departments of trade very few changes took place. The fluctuations in the premium on gold were from 143⅛ to 145⅞ per cent. The stock of bullion in the banks on the 29th ult. was 4,154,630*l*, and the balance in the sub-treasury, 12,097,960*l*. The money market was firmer, at 7 per cent. for the best short-dated paper. On the 8th inst., the premium on gold was 144½ per cent., and there was decidedly more ease in the money market. Subjoined is a portion of the official statement showing the extent of the public debt at certain dates; the calculations are made at 4s the dollar:—

THE COTTON TRADE

LIVERPOOL—August 18.

The cotton market has been dull and heavy throughout the week. The unusually extensive import, especially of East India, and to some extent, probably, the unsettled state of the weather for the harvest, has had an unfavourable influence, and prices of all descriptions show a considerable decline from last week's quotations.

Transactions in Sea Island have been comparatively small, but without material change in price. American has been in fair request from the trade and exporters, but, from the freedom with which it has been offered, prices of the ordinary qualities are ¾d to 1d, and of middling and good middling about ½d per lb lower. For Brazils there has been only a moderate inquiry, and a decline of quite ½d per lb has been submitted to in Pernam and Maranham, and ½d to ¾d per lb in Maceio. Egyptians have been very freely offered, at irregular and declining prices for fair and good fair qualities, which are ½d per lb lower than last week; other grades without change. Smyrnas are comparatively scarce, and show little change in prices. East India.—The recent heavy arrivals have been very freely offered, and prices have declined generally ½d per lb, whilst in some instances, in the qualities above "fair," which had become extremely scarce, a decline of nearly 1d per lb has been submitted to. China and Japan have been in moderate request, but from their scarcity the decline does not exceed ¼d per lb.

The business, to arrive, has been confined to one or two transactions only, consisting of fair new merchants Dhollerah, June sailing, 13d, on the 12th instant, and fair open Egyptian, ship sailed, 16¾d per lb, on the 16th instant.

The sales of the week amount to 49,710 bales, including 3,440 on speculation, and 14,200 declared for export, leaving 32,070 bales to the trade. To-day the market is dull and quiet; holders continue free sellers. The sales will probably amount to about 7,000 bales.

LONDON—August 18.

Annexed is a portion of the statement issued this week by the London Cotton Brokers' Association. The sales of the week have been very small, and the market throughout has been exceedingly flat, closing at a decline of ½d to ¾d per lb on all kinds except China and Japan, the quotations of which remain unaltered. The imports into Liverpool have been very heavy, amounting to 142,400 bales, and great anxiety is shown by holders of cotton in that market to effect sales.

NEW YORK—Aug. 5.

The arrivals of cotton continue on a somewhat extensive scale, the import since our last having amounted to 19,449 bales, consisting of 7,874 bales from New Orleans; 1,274 North Carolina; 1,425 Mobile; 4,978 by railroad; the remainder being in small quantities from sundry Southern ports. In the early part of the week the trade was firm, with a good home and export demand; but during the last few days it has been decidedly quieter, at a reduction in the prices of 1 cent per lb. Midling Upland produce is now quoted at 47c per lb. The quotations are as follows:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	37	37	37	37
Good ordinary	41	41	41	41
Middling	47	47	47	47
Good middling	50	50	50	50
Middling fair	52	52	52	52

Freight to Liverpool—The week's engagements are 14,800 bales by sailing vessel, at $\frac{1}{8}$d to $\frac{3}{16}$d; and 3,000 bales by steamer at $\frac{1}{2}$d to $\frac{3}{8}$d per lb.

NEW YORK, Aug. 8.—The trade is dull, at 45c for middling Upland.

MARKETS IN THE MANUFACTURING DISTRICTS

On the whole, there has been a steady demand for goods in the leading markets, both for home use and export, and prices have been well supported. The coal trade continues active for the time of year, and the demand for iron is steady, at extreme rates.

MANCHESTER, Aug. 17.—The transactions of last week appear to have fully satisfied present demands, and the large imports of cotton have now rendered buyers more cautious and sellers more anxious. Prices have continued to droop, without inducing business, whilst the bad weather has aggravated the prevailing depression. A few moderate sales have been made at somewhat of a sacrifice from current rates, where buyers were in want of the goods, but otherwise no feature has occurred to diversify the dullness.

BRADFORD.—A fair quantity of wool has been sold in large and small transactions, and there are signs of revival amongst Down wools and sorts which have long been very flat. The home trade in yarns is still the best branch of the business, but indications are not wanting of an improved demand for export. The demand for piece goods is tolerably active. Large quantities of fancy goods and a few plain are taken up by the Americans, and for home and export anything ready, or which can be quickly delivered, is eagerly bought.

LEEDS.—The woollen cloth trade in this town and the surrounding districts keeps active. There is a steady demand for seasonable goods, and both the export and the home trades are in a prosperous state. Wools keep steady and firm. The flax and yarn trade are rather improving, and prices are stiff.

ROCHDALE.—The flannel trade keeps steady, but it is scarcely so active as it was a month ago. The export trade is rather slack at present, but the home demand is good, especially for fancy fabrics, and for such there was a good demand in the market. There is a little improvement in the demand for the best makes of low Yorkshire woollens; but, upon the whole, that trade is quiet. Wools keep firm in price, but the demand is not brisk.

NOTTINGHAM.—The lace trade continues quiet, there being less doing in most branches than for some weeks past. In hosiery there is fully an average amount of business doing in all departments usually in request at this time of the year. Yarns continue very high in price.

LEICESTER.—There has been a good demand for both regular and fancy articles. In the country districts business is in a healthy state, but many of the hands are now in the harvest fields. There are plenty of orders in the market, and manufacturers are engaged completing to order. The wool market is quiet, and there is no alteration in prices. Worsted yarns are firm, and spinners continue well employed. Cotton yarns are firm and dear.

CARDIFF.—The iron and coal trades continue satisfactory. The French demand for steam coal is pretty good, and from the continental markets generally there is a better inquiry. The requirements of home buyers remain about the same, and the quantity of Welsh steam coal sent to Birkenhead for shipment is, if anything, increasing. Quotations are fairly maintained. Rails are more inquired for from foreign houses. Prices are firm, rails being quoted 7*l* to 7*l* 7s 6d at the works, and bars 7*l* to 7*l* 5s. Tin plates are selling freely, and for Terne plates there is a large demand. The shipbuilding yards and foundries are, as usual, well employed.

BIRMINGHAM.—The trade of this town has rallied, there is a better supply of orders on account of the home trade, and manufacturers in most of the principal branches are now tolerably well engaged.

WOLVERHAMPTON.—The improved demand for iron continues. The reduction of the make by the strike and the lock-out, and even more by the hot weather limiting the production, has reduced stocks to a low point, and buyers finding that orders are not executed so promptly as before, are ordering more freely. There is a considerable contract in the market for rails for Australia, and continental orders are tolerably good.

SHEFFIELD.—The table knife cutlers are busy in nearly all departments. A good business is being done in spring knives for the American and some other markets, but that branch is not so generally active as the table knife branch. The railway orders are large, especially for Bessemer rails. There is also a good demand for large castings, for shafts, rods, &c., for machinery. The silver plating and Britannia metal branches continue dull. The stove grate manufacturers are well employed.

GLASGOW.—Pig iron has dropped about 6d per ton. Warrants have ranged between 51s 9d to 54s 3d cash—the latter the closing rate yesterday. G.M.B., No. 1, 55s; No. 3, 54s; No. 1 Coltness, 52s; Gartsherrie, 51s; Calder, 66s 5d; Glengarnock, 55s 9d.

DUNDEE.—Our flax market continues firm, and there has been increased inquiry for the article. There has been considerable inquiry from Ireland, as well as from the continent, for Baltic flax. Jute remains quiet, the recent improvement in the demand having in some degree subsided. Prices of good quality are, however, well maintained. The yarn market is very firm. There is an active and general demand for linens.

Digitized by Google

BELFAST.—Linen market very steady, with in some instances slightly advanced rates. Good demand for hollands and all high-finished brown goods. There are now considerable quantities of new flax appearing. The quality is said to be good, and prices have opened high.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 5.—There has been much less activity in the demand for bresdstuffs this week. The accounts from the wheat-growing districts are more favourable, and it being asserted that the stocks of last year's produce in the hands of growers are large, prices have had a drooping tendency, and last week's improvement in the currency has been almost entirely lost. The falling off in the export demand to Great Britain has also materially affected the market. The trade, however, closes with rather more steadiness. The receipts, this week, have amounted to 61,720 barrels of flour, 273,363 bushels of wheat, and 447,627 bushels of corn. The following are the prices current:—Flour—State, superfine brands, $5.85 to $6.30; State, extra brands, $6.45 to $6.65; State, choice brands, $6.70 to $6.75; Ohio, common brands, $8 to $8.35; Ohio, fancy brands, $8.40 to $8.45; Ohio, good and choice extra brands, $8.50 to $9.65; Michigan, Indiana, Wisconsin, &c., $5.85 to $6.90; Genesee, extra brands, $6.90 to $9.25; Missouri, $10 to $13; Canada, common, $6.55 to $6.80; Canada, good to choice extra, $6.85 to $9 per barrel. Wheat—Chicago spring, $1.40 to $1.43; Milwaukee Club, $1.41; choice amber Michigan, $1.90; choice new Western, $2.25. Corn—Unsound Western, 86c to 87c; sound mixed ditto, 88c to 89c; high mixed, 89c to 90c per bushel.

NEW YORK, Aug. 8.—The flour trade is steady, at full prices. For wheat, the market is quiet, but corn commands rather more money.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, both old and new, up to our market this week, have been very moderate, but in fair average condition. Owing to the changeable state of the weather, the demand for all kinds has ruled steady, at an advance in the quotations of from 1s to 2s per quarter. There has been an improved feeling in the sale for foreign wheat, and good samples have produced 1s to 2s per quarter more money. There has been a steady but by no means active inquiry for barley, and in some instances the rates have had an upward tendency. The malt trade has continued in a healthy state at very full prices. The imports of foreign oats have been large; nevertheless, the oat trade has ruled steady, with an upward movement in price. Beans and peas have realised extreme currencies. The demand, however, has been by no means active. The flour trade has improved. English flour has advanced 3s per 280 lbs, the top figure being 43s; and foreign, 1s to 2s per barrel.

The country markets have been very firm for wheat, at enhanced quotations. Most other kinds of produce have sold on higher terms.

On the continent wheat is rising in price, with an improved demand on English account. In America, the value of produce continues to be well supported. Although the weather has continued changeable, rather a large quantity of wheat, barley, and oats has been carried in the Southern and Eastern counties in fair condition. Still, immense quantities of grain are exposed in the fields.

The potato, carrot, and beet crops are looking splendid in every county, and the quantity of grass in the pastures is very large.

In Scotland, the corn trade has shown signs of improvement, and prices, almost generally, have been on the advance.

The corn trade in Ireland has been tolerably firm, and the quotations have had an upward tendency.

The supply of English wheat on sale at Mark lane to-day was small. The trade, however, was decidedly quieter than on Monday, yet that day's advance in prices was supported. Foreign wheat—the supply of which on sale was moderate—was held at fully late rates. Barley ruled firm, at quite previous quotations. Oats were in steady request, and prices were rather on the advance. Beans and peas changed hands at fully late rates. The flour trade was firm, at full currencies.

Mr George Dornbusch reports the arrival off coast of 92 cargoes of grain. The trade for wheat has ruled steady, at full prices, to a slight advance. Barley, maize, and rye have improved 6d to 1s per quarter. Other produce has ruled about stationary.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues rather unsettled, prices being slightly lower in many instances during the past week, and the transactions have been very moderate in extent. 2,010 casks West India sold in three days, including Barbadoes, by auction, at 29s to 34s 6d per cwt. The public sales have gone off flatly, and low brown qualities are unsaleable, unless at reduced rates. The total deliveries have exceeded last year's by 30,000 tons, but the landings continue heavy, and the stock has increased to 105,600 tons.

Mauritius.—There has not been any business of importance transacted this week.

Bengal.—667 bags sold at about former rates: date Dolowah, 26s 6d to 28s; fair Gurpatta, 31s per cwt.

Penang.—196 bags realised 32s to 33s for middling yellow grocery.

Madras.—A few lots native brown and yellow sold at 26s to 28s. 2,772 bags low grainy Jaggery were bought in at 26s 6d per cwt.

Foreign.—Four floating cargoes of Havana have sold for the United Kingdom: No. 12½ at 24s 9d to 25s; No. 11, 24s 3d; No. 10, 23s 9d. One of Cuba at 22s per cwt.

Refined.—The market remains quiet, with quotations nominally unaltered.

MOLASSES.—90 puncheons St Kitts have sold at 14s 6d per cwt.

RUM.—The market is rather quiet. Leeward proof has sold at 1s 7½d to 1s 8d; Demerara, at 1s 9d to 1s 10d per proof gallon.

COCOA.—822 bags Trinidad, offered by auction, partly sold, but there was less desire to buy at the extreme high prices of last week: ordinary to fine sold at 65s to 95s 6d; a few lots choice, 102s to 113s. 315 bags Grenada partly sold at 51s 6d to 55s 6d; fine, 61s to 61s 6d. 136 bags Surinam partly sold at 66s to 80s. 75 bags Guaynquil were taken in at 78s per cwt.

COFFEE.—The market has been freely supplied this week. Quotations have further declined 1s to 2s upon plantation Ceylon and 1,221 casks 409 barrels and bags by auction all sold at 78s to 84s for small berry to good colory up to 87s for superior. 103 casks 1,097 bags native sold at 65s to 69s, according to quality. 26 casks 240 barrels and bags Jamaica part sold at 69s to 72s. 20 cases 1,297 packages East India, at 72s 6d to 83s; pale Cochin, 74s to 74s 6d. Singapore bought in at 63s. 58 bales good yellow Alexandria Mocha sold at 90s to 93s. 5,459 bags Costa Rica sold steadily, at 67s 6d to 83s per cwt.

TEA.—During the last two or three days there has been a partial revival of the demand, without leading to any extension of business. Of 6,610 packages by auction, 5,700 sold, nearly all printed "without reserve" at previous rates, for congous generally. Fine Kaisow and Moning realised 2s 4½d to 2s 4½d per lb. The lower grades of congou and fine greens have been in better demand by private contract.

RICE.—Four floating cargoes of Necrancie Arracan have sold for near continental ports at 10s 3d to 10s 7½d. One of Rangoon landed, at 11s 6d, for London or Liverpool. A fair amount of business is reported in soft grain descriptions on the spot, at 9s 1½d to 10s 3d, and a parcel of fine Rangoon, at 11s 6d. Some good white Bengal at 15s 3d per cwt.

IMPORTS and DELIVERIES of RICE to August 12, with STOCKS on hand.

SAGO FLOUR.—327 bags offered by auction were taken in at 13s 6d to 14s per cwt.

SPICES.—Partial inquiry has prevailed for Penang pepper, and 2,988 bags offered by auction partly sold at 2⅞d to 3d. 117 bags Singapore realised 3d to 3⅛d. 176 bags Singapore white brought 5¼d to 5⅜d. 160 bags Zanzibar cloves were bought in at 3¼d to 3⅜d. 386 bags pimento were chiefly bought in—a few lots selling at 2¼d to 2¾d. 30 cases brown nutmegs went off rather dearer: small to middling, 1s to 1s 6d; fine bold, 3s 5d to 3s 8d. 12 cases Penang cloves were taken in at 1s 1d. 17 cases mace chiefly sold: old and slight wormy at 1s; one case bright at 2s 4d per lb. 129 bags rough Bengal ginger were taken in at 27s 6d; 87 cases Cochin sold steadily at 70s to 90s; 469 barrels Jamaica at 63s to 75s per cwt.

SALTPETRE.—There has not been any business done in Bengal.

IMPORTS and DELIVERIES of SALTPETRE to August 12, with STOCKS on hand.

DRYSALTERY GOODS.—Gambier has declined to 20s, at which business is reported. 298 bags cochineal about two-thirds sold at previous rates, including Honduras silver of the new crop at 2s 11d to 3s 4d per lb.

METALS.—The iron trade is steady, with a fair demand for British manufactured, including railway bars. Scotch pig iron last sold at 54s 9d per ton for mixed numbers. A few sales of spelter are reported at 22*l* to 22*l* 5s. Straits tin remains unsettled, lower prices being accepted, viz., 87*l* 10s to 88*l* per ton cash. Copper remains inactive.

JUTE.—The sales on Wednesday again passed off quietly, 4,665 bales being partly disposed of at 11*l* to 21*l* 5s per ton for ordinary to good quality.

IMPORTS and DELIVERIES of JUTE to August 12, with STOCKS on hand.

	1865	1864	1863	1862
Imports .....tons	32450	34300	22650	20800
Deliveries.....	33250	18600	21050	15800
Stocks	20110	24720	10570	13415

MANILLA HEMP is in inactive demand, and prices may be quoted 2*l* higher: roping has sold at 34*l* to 35*l*; Sorsogon, at 36*l* per ton.

OIL.—Olive is steady. Two cargoes of Malaga have sold for Cronstadt at 52*l*. Sperm active and the stock much reduced: 95*l* per tun has been paid. Palm firm, at 37*l* for fine Lagos: 380 casks by auction to-day realised 37*l* 10s to 37*l* 15s. Cocoa-nut firmer. Rape is in good demand. Brown for delivery to the end of the year: English 43*l* 10s; foreign, 44*l*. Refined on the spot quoted 45s 6d to 47s. Linseed oil rather quiet, at 31s 9d to 32s on the spot, but 32s has been paid for forward delivery.

LINSEED is in fair demand on the spot. A good business done in Calcutta to arrive.

TALLOW.—The market for foreign has further advanced, owing to the reduced supply and higher rates paid for town melted. 1st sort Petersburg Y.C., at 44s; October to December, 44s 6d to 44s 9d; January to March, 45s 3d to 45s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, August 7, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is steady. About 3,800 casks West India have sold for the week. 1,071 bags good quality native Madras sold by auction at 26s to 28s 6d.

COFFEE.—153 casks 192 barrels and bags plantation Ceylon and 248 bags native sold at previous rates.

SALTPETRE.—2,182 bags Bengal by auction were taken in: refraction, 6½ to 3, at 23s 6d to 24s, since part sold at 23s to 23s 6d per cwt.

SHELLAC.—450 chests partly sold without material alteration in value.

GAMBIER was likewise at 19s 6d to 20s per cwt.

TALLOW.—277 casks South American sold at 43s to 43s 3d, being an advance of 3d to 6d. Town melted rose to 47s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has declined to 41s for low grocery. Titlers and Dutch crushed very quiet.

GREEN FRUIT.—Market dull. The high price of lemons obtained of late has brought arrivals, which have depressed the market. Some parcels Sicily, sold by Keeling and Hunt at public sale, went at a reduction of 5s per package. Barcelona and Para nuts in moderate demand; price for both well sustained.

SEEDS.—The quotations of all seed keep firm. The new descriptions come deficient in quantity, and of not satisfactory quality.

DRY FRUIT.—The market for all fruit is dull, but prices are steady. Good reports from all places of growth.

FLAX.—Market very firm.

HEMP.—Market very firm and a good business doing.

SILK.—The market for the new silk has opened, and a large business has been done at advancing rates. No. 3 Tsatlee, commencing at 28s, having now reached 29s.

TOBACCO.—The demand for American descriptions has slightly improved, especially for good and fine spinning qualities, and the sales effected have been at outside quotations. Other growths than American taken to a full average extent, at firmer prices, and in some instances at a slight advance.

LEATHER AND HIDES.—The transactions in leather during the past week show very little change, either in extent or in value. At Leadenhall, on Tuesday, the supply was moderate, and not much business was done. The articles most in request were good crop hides, 45 lbs and 50 lbs, common light English and light Australian butts, English bellies, and calfskins of light weights.

METALS.—The smallest amount of business only is reported this week. Copper neglected, so far as applies to export business. Tin is lower, and prices still drooping. Spelter is steady, and firm in quotations. Lead a shade less strong. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	47	3
Fat by ditto	2	3½
Yellow Russia	45	9
Melted stuff	44	6
Rough ditto	19	0
Greaves	39	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 14.—The total imports of foreign stock into London, last week, amounted to 23,500 head. In the corresponding week in 1864 we received 15,602; in 1863, 14,015; in 1862, 12,183; in 1861, 11,271; in 1860, 14,783; and in 1859, 10,824 head.

To-day's market was again extensively supplied with foreign stock. Some of the beasts and sheep came to hand in improved condition, but the supply as a whole was inferior. Sales, however, progressed steadily at full quotations. From our own grazing districts the arrivals of beasts fresh up this morning were only moderate. Very few really prime breeds were amongst the supply. Prime Scots, Shorthorns, Devons, and Herefords sold freely at prices equal to Monday last. Inferior stock was a dull inquiry, and 2d per 8 lbs beneath the rates current on this day se'nnight. The general top price was 5s 4d, the extreme 5s 6d per 8 lbs. The show of sheep was moderately good as to number, but the quality of most breeds was inferior. Downs, half-breds, &c., were in good request at full prices, but inferior sheep were rather lower than on Monday last. The general top figure was 6s 4d, but a few very superior Downs sold at 6s 6d to fully 6s 8d per 8 lbs. Lambs, the supply of which was limited, were in fair demand at from 6s to 7s per 8 lbs. We had a slow sale for calves at last week's currency, viz., from 4s 2d to 5s 2d per 8 lbs. There was a fair demand for pigs at full quotations. The supply was a fair average one.

SUPPLIES.

	Aug. 15, 1864.	Aug. 14, 1865.
Beasts.....	6210	6329
Sheep and lambs.....	29040	25210
Calves	334	248
Pigs	420	270

THURSDAY, July 17.—Our market to-day was rather scantily supplied with beasts, both as to number and quality. Prime breeds moved off freely at full prices; otherwise, the beef trade was heavy at late rates. A few very superior beasts realised 5s 6d per 8 lbs. Several head, suffering from disease, were seized by the authorities. The supply of sheep was only moderate. The mutton trade was slow; nevertheless, prices were supported. The best Downs and half-breds sold at fully 6s 4d per 8 lbs. Lambs came rather more freely to hand, and the demand for them was inactive at from 6s to 7s per 8 lbs. Calves moved off slowly on former terms, viz., from 4s 2d to 5s 2d per 8 lbs. Pigs and milch cows were tolerably firm in price.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Aug. 18.—The accounts from the plantations are very favourable; consequently very little business is passing in any description of hops. Prices must be considered nominal.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Aug. 18.—Moderate supplies of potatoes are on sale at these markets. The trade, generally speaking, rules quiet, as follows:—Regents, 70s to 100s; Shaws, 50s to 70s per ton.

HAY MARKETS.

THURSDAY, Aug. 17.—Only moderate supplies of hay and straw have been on sale. The trade, however, has ruled quiet, on rather easier terms.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Old hay	100 to 120	105 to 126	100 to 120
New hay	95 to 110	100 to 115	95 to 110
Old clover.....	95 to 140	120 to 147	120 to 140
New ditto.....	100 to 126	105 to 130	100 to 126
Straw	28 to 33	30 to 36	28 to 33

COAL MARKET.

FRIDAY, Aug. 18.—There were no cargoes for sale to-day, all the arrivals being steamers on contract. The market was quoted steady, and prices nominally as on Wednesday. Wylam Moor, 16s. Ships at market, 15; sold, 0; gas contracts, &c., 15; ships at sea, 100.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 18.—Since the close of our public sales last week, the business done by private contract has been to a moderate extent only, a circumstance of usual occurrence so immediately after our periodical sales by auction; but prices are pretty well maintained.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 18.—Wheat slow at about Tuesday's rates. French flour slightly lower, and more disposition to sell. Indian corn steady. Galatz, 32s 9d; mixed, 32s. Beans, oats, and oatmeal unchanged.

The Gazette.

TUESDAY, Aug. 15.

BANKRUPTCY ANNULLED.

W. Walkley, late of Arundel.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 5th of August, on 12,154 miles, to 766,285*l*, and for the corresponding week of last year, on 11,801 miles, to 742,205*l*, showing an increase of 353 miles and of 24,082*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,671 miles, to 634,476*l*, and for the corresponding week of 1864, on 8,420 miles, to 618,146*l*, showing an increase of 251 miles and an increase of 16,330*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 14.—In the share market to-day there was no recovery of animation, and the general tendency of the variations from Saturday's closing prices was slightly towards depression. In English railways, Great Western improved ¼; and Midland (Birmingham and Derby) and Metropolitan declined 1 each, ditto (new) ⅛, and South-Eastern ¼. In colonial, Great Southern of India advanced ½; and Madras (4½ per cent.) declined 1, Eastern Bengal and Scinde ½ each, and Delhi (shares) ⅛. In foreign, Paris and Orleans improved ½, and Great Luxembourg receded ⅛. In American, United States (5-20) and Illinois Central shares recovered ¼ each; and Virginia (6 per cent.) declined 1, and Erie shares a further ½.

TUESDAY, Aug. 15.—In the share market this was the preparation day for the settlement in the middle of the month, and about half the transactions were for the account, the close of business showing a tendency to improvement only in American securities, and in foreign mines, banks, and miscellaneous shares, an inclination in the opposite direction. In English railways, Great Northern and ditto (A stock) improved ½ each, and Caledonian and Metropolitan District (paid up) 1 each; and ditto (10*l*) declined 1½, South Devon 1, Lancashire and Yorkshire ¼, Metropolitan (Extension) ⅛, and ditto (new) a further ⅛. In colonial, no movement occurred in the final quotations. In foreign, Great Luxembourg recovered ¼, and Antwerp and Rotterdam receded ⅛. In American, Erie shares (paid up) recovered ½, and Illinois Central shares and American (5-20) further improved ⅜ and ⅛ respectively. In British mines, East Grenville advanced ¼, and East Wheal Russell further declined ¼. In foreign mines, Don Pedro North del Rey improved ⅛; and Cobre Copper declined 2, Yorke Peninsula ⅛, Washoe Gold (paid up) ½, and ditto (3*l*) a further ½.

WEDNESDAY, Aug. 16.—In the share market to-day dulness was the prevailing feature, and with the exception of a slight tendency to improvement in some of the Indian and foreign railways, and to depreciation in mines, there was no material change of tone in the several descriptions, most of the instances of lower closing prices being due to the quotations being ex dividend. In English railways, North-Western and Midland improved ¼ each, and Great Northern (A stock) a further ½; Great Eastern declined 1; Metropolitan (extension) recovered ⅛; and ditto (stock), ditto (new), Great Southern and Western (Ireland), Lancashire and Yorkshire, Blackwall, Brighton, and North Staffordshire are all quoted ex dividend. In colonial, East Indian, Great Indian Peninsula, and Scinde advanced ½ each, and Melbourne and Hobson's Bay are now quoted ex dividend. In foreign, Eastern of France and Northern of France improved ½ each, Namur and Liege (preference) ¼, Dutch-Rhenish ⅜, and Great Luxembourg a further ⅛; and Turin and Savona are now quoted ex dividend. In American, United States (5-20) further advanced ½, and Illinois Central (shares) ¼; and Erie shares (paid up) are quoted ex coupons. In British mines, South Caradon declined 10, Clifford Amalgamated 1, and East Carn Brea ¼. In foreign mines, Vallanzasca Gold declined ¼, Montes Aureos ⅛, and Yorke Peninsula a further ⅛.

THURSDAY, Aug. 17.—In the share market to-day the amount of business was small, but the closing prices showed a considerable degree of firmness in English railways, and the same tendency in a less degree in all the other descriptions, except banks, in which there was no average alteration. Of the English lines, Great Eastern recovered ½; Great Western advanced 1½, ditto (Oxford) and Midland (Birmingham and Derby) 1 each, North-Eastern (Berwick) and ditto (York) ½ each, Lancashire and Yorkshire ¼, Great Northern (A stock) and North-Western a further 1 each, and Midland (original) a further ¼; and South-Western receded ½. In colonial, Melbourne and Hobson's Bay improved 1½, Punjaub ½, and Great Western of Canada (shares of both descriptions) ⅛ each. In foreign, Belgian Eastern Junction and Lombardo-Venetian improved ⅜ and ¼ respectively. In American, Erie shares (paid up) advanced ¼, United States (5-20) a further ¼, and Illinois Central shares a further ½. In British mines, Vigra improved 1. In foreign mines, Cobre Copper improved 1, and Frontino Gold ¼; and Linares declined ½, and Worthing ⅛.

FRIDAY, Aug. 18.—The railway market was firmer to-day, in sympathy with most other departments of the Stock Exchange, and several of the principal lines advanced. Indian and Canadian lines were quiet.

CONVERSION AND UNIFICATION

of the INTERNAL DEBTS of the OTTOMAN EMPIRE.—Notice is hereby given, that the CONVERSION of the INTERNAL DEBTS of the OTTOMAN EMPIRE, in accordance with the laws of the 17th (29th), 18th (30th), and 19th (31st) March, 1865, will be OPENED on Tuesday, the 3rd (15th) August, 1865, in the cities and by the establishments hereinafter mentioned:—

Constantinople—By the Societe Generale de l'Empire Ottoman, at the Building of the late Exhibition, Place de l'Hippodrome.
London—By the General Credit and Finance Company of London, 27 Austinfriars.
Paris—By the Société General pour favoriser la Développement du Commerce et de l'Industrie en France, 68 rue de Provence.
Amsterdam—By the Banque de Crédit et de Depots des Pays-Bas.
Frankfort-on-Maine—By Messrs Von Erlanger and Sons.
Alexandria—By the Anglo-Egyptian Bank.
Vienna—By the Credit Anstalt of Austria.
Turin—By the Credit Mobilier Italien.
Geneva—By the Banque de Credit Genevois.
Brussels—My Messrs J. Matthieu and Sons.

The law of the 17th (29th) of March, 1865, creates the Grand Livre de la Dette Generale de l'Empire Ottoman, and that of the 18th (30th) March ordains the inscription of a sum of 40,000,000 medjidies d'or, composed of 29,000,000 intended for the unification of the internal debts of the Empire; of 4,000,000 issued by public subscription; and of 7,000,000 intended for public works, and only to be issued as follows:—2,000,000 at the soonest one year after the subscription of the 4,000,000; 3,000,000 at the expiration of two years, and 2,000,000 at the expiration of three years.

According to the law of 17th (29th) March, no further inscription can be made in the Grand Livre except in virtue of a special law legally published, and after sufficient provision has been made for the interest and sinking fund new inscription.

The general debt inscribed in the Grand Livre is guaranteed by the reserve fund, by the general revenues of the Empire actually unencumbered, and by the revenues already charged as they become available by the amortisation of the existing foreign debts, of which they constitute the special guarantee.

The debt inscribed on the Grand Livre is to be amortised in 37 years by means of redemption (rachat), and the numbers of the bonds redeemed will be published by the special council charged with the superintendence and control of all the operations of the sinking and reserve funds.

The bonds bear an annual interest of 5 per cent. payable in gold on the 1st (13th) January and the 1st (13th) of July of each year, at Constantinople, London, Paris, Amsterdam, and Frankfort-on-the-Maine, at the fixed rate of 110 gold Medjidies, =£100 sterling=2,500 francs.

By the provisions of the law of the 19th (31st) March, 1865, the conversion of the principal classes of internal debts, viz., of the Eshami-Djédidés of the four issues of the Tahvilati-Mumtazes, and of the 10-year Serghis will be effected on the following conditions:—

Against 100 gold Medjidies of Eshami-Djedidé (consolides) of the 1st, 2nd, 3rd, and 4th issues, there will be delivered 121 gold Medjidies of the general debt, equal to £110 sterling, or to 2,750 francs.

Against 100 gold Medjidies of Tahvilati-Mumtaze, there will be delivered 143 gold Medjidies, equal to £130 sterling, or to 3,250 francs.

Against 11,000 piastres of 10-years Serghis (on seneliks), there will be delivered 110 gold Medjidies, equal to £100 sterling, or to 2,500 francs.

The Bonds of the General Debt form three classes, viz.:—

		£		francs
Bonds of	110 Gold Medjidies	100 sterling		2,500
—	55 —	50	—	1,250
—	11 —	10	—	250

Each bond will be separately inscribed in the Grand Livre, and will be signed by the Minister of Finance, by the Governor of the General Debt, and by a Controller delegated by the Grand Council.

The first Coupon of Interest on the Bonds of the General Debt being due the 1st (13th) July, 1865, the bearers of the old Bonds will receive from the Commissioner-delegate at the time of verification of their bonds, special coupons representing the interest due to them in virtue of the law of 19th (31st) March, 1865.

These Coupons will be payable at the Imperial Ottoman Bank at Constantinople, London, and Paris, on presentation, except the special Coupons relating to the arrears of interest on the Ten-years' Serghis, and due the 1st (13th) January and 1st (13th) July, 1866, which will be paid on their respective dates due in accordance with Art. 7.

In virtue of Articles 11 and 12 of the law of the 19th (31st) March, 1865, all securities of the internal debts, to whatever class they may belong, not presented for conversion within the period of three months from the opening of the conversion; that is to say, between the 3rd (15th) August and the 2nd (14th) November following, will not be convertible, except with a reduction of 10 per cent., and only during the period of one month and a half from the 2nd (14th) November, 1865. On the expiration of this second period the operations of the conversion will be declared closed.

In order to facilitate the operation of the conversion and to avoid the necessity of issuing Provisional Certificates, and sending the original bonds for verification to Constantinople, the Imperial Ottoman Government has appointed, besides the Commissioners-delegate, verificateurs to attend at London and Paris during the whole period appointed for the conversion, to verify the bonds presented for conversion.

Securities presented elsewhere than at Constantinople, London, and Paris, will be transmitted for verification to London, except those presented at Alexandria, which will be sent to Constantinople.

Definitive bonds of the General Debt of the Ottoman Empire, with coupons for 37 years, now in course of manufacture, will be delivered as soon as ready in exchange for the securities presented for conversion.

In the meantime, the securities presented will receive, at the time of verification, an official stamp and the signature of the Commissioner-delegate, attesting their verification, to be exchanged by the bearers for the definitive bonds of the general debt.

Forms of application for conversion may be obtained at all the offices where the conversion will take place.

Copies of the laws may be obtained at the same places, and also at the offices of the solicitors, Messrs Baxter, Rose, Norton, and Co., No. 6 Victoria street, Westminster.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,
JAMES MACDONALD, General Manager.

CONVERSION AND UNIFICATION

of the INTERNAL DEBTS of the OTTOMAN EMPIRE.—Attention is called to the ALTERATION in the PROSPECTUS by which the Conversion at Constantinople will be undertaken by the Societe Generale de l'Empire Ottoman.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors.
JAMES MACDONALD, General Manager.
August 14, 1865.

McQUEEN BROTHERS

(Limited).

Registered under "The Companies Act of 1862," whereby the Liability of each Shareholder is strictly limited to the amount of his shares.

Capital £150,000, in 15,000 shares of £10 each.
First issue 7,500 shares, of which 1,000 fully paid up will be allotted to the vendors.

Deposit upon application, £1 per share, and £1 on allotment.

No call will exceed £1 per share, nor be made at less than three months' intervals.

Subscribers may exercise the option of paying up a further sum either of £3 or £8 per share after allotment. Interest at the rate of 6 per cent. per annum will be paid upon all such sums advanced in anticipation of calls.

A guaranteed minimum dividend of 10 per cent. per annum, commencing the 1st of July, 1865, and payable half-yearly, is secured to the shareholders upon the called-up capital for the first five years of the Company's operations.

SECRETARY—T. R. Eames, Esq.

OFFICES—St Michael's House, Cornhill, E.C.

PLACE OF BUSINESS—184 Tottenham court road, W.

This Company is established to purchase, carry on, and extend the well-known Fine Art, Copper, and Steel Plate Printing Business of Messrs McQueen Brothers, Tottenham Court road.

The present undertaking specially recommends itself to the investor by the following features:—

1. The business to be acquired by the Company has long been, and is at the present time, in thorough, active, and highly profitable working.

2. It is not only unencumbered by liabilities, but shows genuine and realisable assets exceeding £21,000.

4. It is susceptible of immediate and most remunerative extension.

4. It has been carried on uninterruptedly from father to son for upwards of 70 years, enjoying the highest credit with the trade and the public, both in a commercial and artistic sense.

5. Its dealings are restricted to publishing firms of the first class, and are consequently certain and non-speculative.

6. Its present economic and most efficient management remains unstarbed.

The partners in the firm, "McQueen Brothers," have become disposed to the conversion of their business into a joint stock Company by noting the rapid extension of the business of Moore, McQueen, and Company since its incorporation, under the "Limited Liability Act;" one of the Directors of this latter Company being a partner in the business it is now proposed to take over.

The purchase money is fixed at £45,000, of which £12,000 is payable in debentures of the Company, bearing no interest until 10 per cent has been paid to the shareholders; £10,000 in fully paid-up shares, and the remainder in deferred instalments. The amount has been based upon the certified report of Mr Sandell, the account nt, and includes guaranteed assets in cash and good bills of £8,230, to meet current trade accounts not exceeding £1,900; and the plant of machinery, paper, steel and copper plates, &c., of the estimated value of £15,000. The amount (£22,000) to be paid for the valuable leasehold premises and goodwill is wholly taken in debentures and shares of the Company, with £10 credited thereon as above mentioned.

The business will be taken over by the Company as from the 1st July, 1865, from which date the guaranteed dividend of 10 per cent. per annum accrues to the shareholders. The estimates, however, from the profits of many years past afford considerably larger dividends than the one actually guaranteed. Messrs McQueen have engaged to continue in the service of the Company during the five years at least over which this minimum dividend extends.

No promotion money has been or will be paid. In the event of no allotment being made to an applicant, his deposit upon application will be forthwith returned in full. Should a less number of shares be allotted than are applied for, the deposits will be made available towards the payment due on allotment, and the balance, if any, returned to the applicant.

The Articles of Association, the Agreement with the Vendors, and the certified Balance sheet, can be inspected at the Solicitors.

A form of application for Shares is attached to each prospectus, which can be obtained at the Company's Offices, or place of business, and of the Bankers, Brokers, Solicitors, or Auditor to the Company.

FORM OF APPLICATION FOR SHARES.
(To be retained by the Bankers.).

No. ——.

To the Directors of McQueen Brothers (Limited).

Gentlemen.—Having paid to the bankers of the Company the sum of £ , being a deposit of £1 per share upon shares, I request you will allot me that number, and I agree to accept the same, or any less number that may be allotted to me, and to pay the deposit on allotment, and the calls as they may be made; and I hereby authorise and empower you to insert my name in the Register of Shareholders of the Company for the number of shares which you allot to me, and I agree to sign the Articles of Association of the Company when required.

SOLICITORS.

Messrs Sale, Worthington, Shipman, Seddon, and Sale, Manchester.

AUDITORS.

Messrs Fitzgerald and Co., Manchester.
Offices—No. 63 King street, Manchester.

This Company was formed, during the latter part of last year, for the purpose of ginning and packing cotton, for crushing the seed and refining the oil therefrom, and for transacting other business incident thereto.

The Company purchased a newly-erected cotton ginning factory, with machinery in thorough working order, the vendors taking payment of the whole amount of purchase money in shares of the Company. The factory is one of the best and most substantially-built factories in Egypt, and has already earned a reputation for turning out the clean cotton in excellent condition.

The great increase in the growth of cotton in Egypt has made this a very lucrative business. There is also a very profitable trade to be done in buying cotton from the growers or native merchants in the interior, and a safe business may be conducted in advancing money, either on the growing crop or upon cotton deposited for sale, for which interest at the rate of two per cent. and upwards per month may be obtained.

The precarious state of the cotton trade last season discouraged the Directors from entering into extensive operations, and they limited their business to ginning and packing. Under these circumstances the Directors refrained from bringing the Company forward publicly, the capital subscribed among themselves being deemed sufficient for immediate objects. The factory was only worked during the latter and least remunerative part of the season, but the result has been highly encouraging, having enabled the Directors to declare a dividend after the rate of 20 per cent. per annum, besides interest upon the amount paid in advance of calls.

The Company have made arrangements for extending the factory, and have purchased machinery for crushing the seed and refining the oil therefrom. They have also erected an irrigating pump, and are adding portable steam flour mills. The estimated revenue from these additions is unusually large.

It is proposed to establish an agency in Alexandria for buying and selling cotton and other produce on commission.

Applications for the unallotted shares may be made to the bankers, or to the auditors, at whose offices the articles of association may be inspected.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Anglo-Egyptian Cotton and Oil Company, Limited.

Gentlemen—Having paid to your bankers the sum of £ , being the deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number; and I further request that my name may be placed on the register of shareholders for the shares so allotted; and I further agree to sign the articles of association when called upon to do so.—I am, gentlemen, your obedient servant,

REPORT OF THE DIRECTORS OF THE

EASTERN EXCHANGE BANK

(Limited), to the Proprietors, at their ordinary meeting, held at the Bank, 14 Cook street, Liverpool, on Monday, the 14th of August, 1865, at 12 o'clock noon precisely.

1. The Directors have the pleasure to lay before the proprietors an audited statement of accounts to the 30th June, 1865, showing a balance of net profit of £6,600 11s 4d, which they propose to carry forward to next account.

2. It will be seen that the gross profit for the half-year, £13,876 1s, is at the rate of 14 per cent. per annum. In framing the accounts, it has been necessary on this occasion (owing to the temporary absence of constituents from Egypt, in consequence of the epidemic lately raging there), to include commissions to the extent of £4,000, earned in Alexandria, based on the Manager's estimate, who represents that the actual sum is over rather than under the amount stated.

3. Although the time during which the bank has been in full operation in Alexandria does not exceed four months, in consequence of the cessation of business during the crisis in the early part of the year, the Directors are satisfied that its foundation has been successfully laid. This has been done at moderate cost, and without any payment for goodwill. The business transacted has been free from bad debts, if they except one dependency, now in course of liquidation, on which it is possible they may sustain a loss of from £1,000 to £1,500. There are, however, circumstances which induce them to hope for a more favourable out-turn.—By order of the Board,

JOHN HENRY ETHERIDGE, General Manager.

GENERAL BALANCE SHEET of the EASTERN EXCHANGE BANK (Limited), for the Half-year ended 30th June, 1865.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

ABRIDGED PROSPECTUS.

The experience of the last few years proves that for railway companies suburban and metropolitan traffic is the most remunerative. What might have been the profits made had the taking of building land by railway companies been allowed, needs but the simple fact stated, that land at the various suburban termini of the London railways has, in many cases, more than trebled in value

This association is formed to carry through a scheme which embraces the possession of a line of railway starting from the large manufacturing town of Belfast to Bangor, via Holywood, having not only a large and increasing suburban, but seaside traffic, both for permanent residences and excursions; also the advantage of land with sea frontage for building purposes. Its success can therefore hardly admit of a doubt. That portion of the railway, 4½ miles of which (from Belfast to Holywood) has been open since 1848, yields an enormous return on its cost of construction, and since the 18th May last, by the opening of an additional 7½ miles to Bangor, nearly 70 per cent. on previous traffic has been gained, and without a very large increase of rolling stock the numbers seeking conveyance cannot be carried. This line, which is at present single, will therefore at once be doubled, and ample rolling stock provided.

The Belfast, Holywood, and Bangor Railway Company have, by a bill passed this session, become possessed of the 4½ miles from Belfast to Holywood, and thus secured 12 miles of rail, giving direct communication from the great manufacturing town of Belfast to Bangor, which town may fairly be considered the Brighton of Belfast. It can be reached in twenty minutes. Its beauty of scenery is unsurpassed. Bathing can be had at all states of the tide, and it is very popular with all classes for residences and excursions.

When this Association has carried out its plans of having first-rate hotel accommodation, bathing places at Holywood and Bangor, winter gardens, concert room, and esplanade, the result cannot fail of being highly remunerative to the shareholders. The traffic, when all the arrangements have been carried out has been estimated by competent judges at a minimum of £1,500 per week, which will pay as high a rate of dividend as the shareholders in the Dublin and Kingstown Railway receive.

Eminent contractors have gone over the works, and are prepared to enter into a contract to double the line, supply all the necessary additional rolling stock, and to construct the esplanade, roads, hotel, baths, and other public buildings, and pay to the shareholders 6 per cent. on the paid-up capital for three years from Sept. 1, 1865.

An influential committee in Belfast will be formed.

The plans, reports and other particulars, may be seen at the offices of the Company.

Full prospectuses and forms of application may be obtained at the London Financial Association (Limited), South Sea House, Threadneedle street, the Bankers, Brokers, and Solicitors of the Company.

1 Threadneedle street, August 10, 1865.

THE BELFAST AND BANGOR

THE HEAD AND HEART LEGACY.

"Po ssessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

London: Tweedie, 337 Strand.

PRICE 6d EACH VOLUME.

THE YOUNG MAN'S LIBRARY
OF
USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE:
SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS,
AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published. second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

EDUCATION IN GERMANY.—
ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

HAMBLY HOUSE SCHOOL,
STREATHAM COMMON.
This School, established in 1775, boasts of one of the most delightful and healthy situations near London, and is conducted on principles calculated to meet the requirements of the great mercantile community of the metropolis. The Principal guarantees, a superior style of Writing, combined with a thorough knowledge of French and Accounts, at terms ranging from 30 guineas upwards, the table kept being most excellent. The favourite recreation of his pupils is cricket, at which they have won the last thirteen matches they have played with other schools. Prospectus, with numerous references, and view of house, on application.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station. Their Teeth are cheaper, more durable, natural, and comfortable, than any yet produced. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience. Consultation free. Teeth from 5s. Sets, 5 to 25 Guineas, warranted. For the efficacy, utility, and success of their system, vide LANCET.

Daily attendance at 15 Whitefriargate, Hull; 10 Norfolk street, Sheffield, 4 East parade, Leeds; and 14 St Nicholas street, Scarbro'.

*** Established 1830. No connection with any one of the same name.

DEANE'S TWO-HOLE BLACK PENS
which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a various coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

CARSONS' ORIGINAL ANTI-CORROSION PAINT.—Walter Carson and Son s beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.
March 1. 1865, 9 Great Winchester street, E.C.

CARSONS' ANTI-CORROSION PAINT, specially manufactured for out-door work, s the best and cheapest. All colours. So simple in application that any person can use it. Full instructions are given. No agents. All orders to be sent direct.

CARSONS' ANTI-CORROSION PAINT is twice as durable as genuine white lead. SEE TESTIMONIALS.

CARSONS' ANTI-CORROSION PAINT. 3 cwt carriage free to any station in England and Wales, and most seaports in the United Kingdom. (See list.

CARSONS' ANTI-CORROSION PAINT. Patterns, prices, and testimonials sent post free.

CARSONS' ANTI-CORROSION PAINT for all OUT-DOOR WORK.

CARSONS' ANTI-CORROSION PAINT for WOOD WORK.

CARSONS' ANTI-CORROSION PAINT for PARK FENCING.

CARSONS' ANTI-CORROSION PAINT for FARM BUILDINGS and IMPLEMENTS.

CARSONS' ANTI-CORROSION PAINT for IRON WORK.

CARSONS' ANTI-CORROSION PAINT for POROUS BRICKS effectually resists weather and excludes damp. 3 cwt carriage free to most parts of the United Kingdom.

CARSONS' ANTI-CORROSION PAINT for FRONTS of HOUSES.

CARSONS' ANTI-CORROSION PAINT for BRICK, STONE, and COMPO.

CARSONS' ANTI-CORROSION PAINT for CONSERVATORIES.

CARSONS' ANTI-CORROSION PAINT for HOTHOUSES.

CARSONS' ANTI-CORROSION PAINT lasts twice as long as any other; established 70 years; is only half the expense in application; is the most effectual in resisting weather; and will keep for years in a dry place. All orders to be sent direct to WALTER CARSON and SONS.

LA BELLE SAUVAGE YARD,
Ludgate hill, E.C.,
Three doors East of Railway Viaduct.

PRIZE MEDAL AWARDED.
ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.
LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.
DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues by post free.
Also, Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands Canteens, &c., by post free.
J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT, AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK RETURNS.

THE state of Lombard street, indicated by the last Bank return, corresponds with that which we have led our readers to expect. There is no tendency to change. There are no great forces acting on the market for the moment one way or the other. The present calm curiously contrasts with the remembrance of this period last year when every careful observer perceived the preliminary oscillation—the warning symptom—which suggested to every one under large liabilities the expediency of making preparation while there was yet time, and before the real crisis had set in.

Both the reserve of notes and the bullion have augmented, but the item most worth observing in quiet times like these, is the decrease of the private securities. This shows that the direct demand at the Bank has on the whole diminished. For the moment there is some ease and likely to be more. But we do not see any reason to vary the opinion of which we have explained the grounds, that the money market is likely to continue much as it is, with but slight changes either way for some weeks to come.

THE STATE OF THE COUNTRY.

THERE is no ground for alarm or serious apprehension as to the state of the country, but at the same time it is impossible not to observe that neither our trade nor comfort are likely to be so happily circumstanced as they have lately been. For some years free trade has produced its natural effect. There has been *very* cheap corn all over the commercial world. Consequently we have everywhere had a good market for the clothes and other goods we have to sell: the profit mainly fell to Great Britain, for she has far more than any other nation predominant excellence in the coarse sort of things and fabrics which come nearest to necessaries, and rank after food in the common desires of mankind. To some extent dear meat has impaired the effect of cheap bread, but from the nature of the ordinary food of the great multitude of men, it could not at all counterbalance it. Now, unfortunately, we are to suffer from still dearer meat and be aided by less cheap corn.

The prospects of the harvest are still uncertain. The weather has been changeable, and often hurtful; yet still it is too soon to give a very desponding estimate. We may still hope for an average or something under an average harvest. But it is important to observe that even with an average harvest the preponderating probabilities are in favour of dearer corn. Proof of course is impossible, for the absolute stock within the country is unknown, but the best argument and presumption point to the conclusion which we have stated.

The import of corn has been on the decline for a very considerable period to an extent which many persons even in the trade are not aware of. First, look at the following official table published by the Board of Trade, showing the import of wheat and wheat flour imported in 1861 and 1862:—

Countries.	1861.		1862.
Russia, Northern Ports ...cwts.	704,444	.....	674,441
— Southern Ports	3,836,039	.....	5,081,348
Denmark and the Duchies.....	1,014,126	.....	646,752
Prussia.....	4,462,573	.....	6,288,535
Hanse Towns	1,277,477	.....	1,000,253
Germany (other parts)	578,611	.....	414,457
France	1,359,882	.....	1,961,835
Spain	1,297,257	.....	316,882
Wallachia and Moldavia.....	591,491	.....	474,976
Turkish dominions, not otherwise specified	411,277	.....	1,284,590
Egypt	1,474,480	.....	3,304,579
British North America	3,387,949	.....	5,118,698
United States	15,610,472	.....	21,765,087
Other countries	1,640,627	.....	1,709,961
Total.....	37,646,705	.....	50,042,394

and now compare it with the same table for 1863 and 1864:—

Countries.	1863.		1864.
Russia, Northern Ports ...cwts.	675,312	.....	1,317.454
— Southern Ports	3,863,622	.....	3,811,956
Denmark and the Duchies.....	592,924	.....	1,048,767
Prussia.....	4,423,902	.....	4,977,274
Hanse Towns	699,161	.....	907,869
Germany (other parts)	397,533	.....	684,986
France	1,857,403	.....	2,854,424
Spain	11,393	.....	1,980
Wallachia and Moldavia.....	132,526	.....	127,908
Turkish dominions, not otherwise specified	282,998	.....	355,086
Egypt	2,322,636	.....	367,462
British North America	3,198,187	.....	1,831,897
United States	11,869,179	.....	10,077,431
Other countries	561,116	.....	472,709
Total.....	30,887,892	.....	28,837,203

Digitized by Google

showing that the import has declined from 87,600,000 cwts, at which it stood in the first two years, compared to 59,600,000*l*, a diminution of nearly 30 per cent.

And the imports of the present year is on a very reduced scale, even in comparison with the contracted imports of 1863 and 1864. The figures are :—

WHEAT ENTERED for HOME CONSUMPTION—Six Months ended June 30.

From—	1863. cwts	1864. cwts	1865. cwts
Russia	1,543,841	1,195,411	2,693,820
Prussia	2,448,598	2,306,932	2,260,322
Denmark	176,855	434,338	233,665
Schleswig, Holstein, and Lauenburg	109,304	159,753	134,640
Mecklenburg	201,374	324,047	260,768
Hanse Towns	172,168	340,539	245,822
France	54,240	437,394	460 662
Turkey and Wallachia and Moldavia	265,854	227,357	352,393
Egypt	1,596,777	366,843	...
United States	3,757,347	3,879,304	212.901
British North America	248,153	140,422	21,187
Other countries	223,288	234,763	586,088
Total	10,788,059	10,047,101	7,462,268

showing a diminution of 25 per cent. in 1865 as compared with 1864—the lowest previous year.

The cause of this difference of import is the difference of price. By referring to the quotations which we give weekly at the beginning of our City article, it will be found that the price in the first week of January was in the respective years :—

	Wheat. s d
1861	57 1
1862	61 11
1863	46 10
1864	40 2
1865	38 2

fully accounting for the decline in importation.

We have in fact been subsisting on the produce of our recent bountiful domestic harvests. The crop of 1863 was indisputably one of the best, and in the opinion of some the very best, ever known in this country. Accordingly, coming after the good harvest of 1862, it left a large accumulation. But the crop of 1864 was not of similar magnitude ; though good, it was not at all equal to 1863 ; and our position therefore is, that our home store has considerably diminished, and our foreign import vastly declined. Taking the two facts together, the conclusion that we shall have corn somewhat dearer seems inevitable and certain.

But the dearness of meat is a matter much more serious. It is an additional aggravation of an evil which we have been suffering from during several years. The following figures show the increase of prices in what is the "live market," the real wholesale market of Leadenhall, &c :—

AVERAGE PRICES OF BEEF AND MUTTON.
Per 8 lbs, to sink the offal.

BEEF.

	1861. s d	1862. s d	1863. s d	1864. s d	1865. s d
Inferior	3 0	3 2	3 4	3 6	3 10
Middling	4 0	4 0	4 2	4 6	4 10
Prime	5 0	4 10	5 0	5 6	5 6

MUTTON.

	1861. s d	1862. s d	1863. s d	1864. s d	1865. s d
Inferior	3 2	3 8	4 0	4 2	4 8
Middling	4 6	4 8	5 0	5 2	5 8
Prime	5 8	5 6	5 10	5 10	6 4

And the retail price—the important price to consumers—has increased even more than this.

The consequence of the simultaneous action of these two causes upon our industry must be hurtful and may be important. In a commercial system highly organised upon the the basis of a varied division of labour, any injury to any great number of persons must always diffuse itself far and wide. Just now the consuming power of very many people is about to be diminished, and those who supply those consumers must feel the effect. The manufactures of various sorts, which have been lately stimulated by cheap corn, will not be so stimulated if corn should become dearer, and will be counteracted even more than before by the dearness of food if, as is certain, it should rise in price. This diminution in the productive employment of those who supply the great mass of mankind will again re-act upon the employment of those who supply them. Cheap food acts as a wholesome stimulant to the whole commercial system ; dear food as a pervading and narcotic poison.

On the money market it is not probable that this cause will be sudden enough to exercise a visible influence. It is not at all likely that corn will be so much dearer or our own harvest so scanty as to require large sudden importations of foreign corn, and therefore make large and sudden demands on our bullion supply. The momentary effect of very dear corn which is to produce dear money will not now be felt, for corn is not dear enough and will not be. But the *permanent* tendency of an augmented dearness of food is to produce cheap money. It diminishes the demand for *capital*. All the manufacturers who used to supply the demand created by cheap food now stand idle. They do not want to discount so many bills as formerly ; a slight narcotic, as we have expressed it, is applied to our industrial organisations, and, as far it goes, this must tell upon Lombard street.

Of the cholera and its prospect we need not speak. All that need to be said has been said in many places upon a calamity of which the nature is familiar to us, and which it is possible we may even yet escape.

THE GREAT EASTERN RAILWAY MEETING.

THE meeting of the shareholders of the Great Eastern Railway gives rise to some very serious reflections. As we have before observed, we have no care—and almost no opinion—upon the general controversy between Captain Jervis and his co-directors. Even if most of his charges are true, they have only an interest for a single class of persons—the shareholders in the Great Eastern Railway. But one of his charges appeals to a far larger public.

Captain Jervis says that the Company has exceeded its borrowing powers, and issued bad debentures, saying that they were good debentures. What is the answer of the Company, as given by their Chairman at the late meeting ? According to the best report we can find,—that in the *Daily News*,—Mr Goodson, the Chairman, "did not propose to go into the " matter of the charges brought against the Board by one of " their own colleagues, as they had been fully, and he trusted " satisfactorily, replied to in the printed answer which had " been distributed among the shareholders ; but there was " one question which he could not allow to pass unnoticed,— " that was, the charge that the borrowing power of the " Company had been exceeded. He was not going to raise any " question as to whether that had been done justifiably or not ; " but he would tell them at once frankly, on behalf of the " Board, that the Company was in excess of its borrowing powers. " He did not think much blame was due to the Directors on " that ground, for if they criticised narrowly the accounts of " other railway companies, they would find that the Great " Eastern was not in this respect poaching upon a manor " that was untrodden by others. Let it not, however, be supposed that he encouraged or approved of such a system. It " was an accident arising from a natural desire to take advantage of the low rate of interest in making provision for debentures falling due that had occasioned the excess. It " might be a shame, but if the gentleman who cried "shame" " were in the position of Directors having to meet debentures " falling due, and desirous of providing the money on terms " most advantageous to the shareholders, he probably would " have done the same." Now, this speech appeals to all the debenture-holders in England. It says that many Railway Companies evade the law and issue bad securities as the Great Eastern has done ; and further, that human nature is such that any one would do it ; that the very audience to whom he speaks would in his place have acted just as illegally as himself. It was an "accident" ; though how a man can say it is defensible to break the law by accident is puzzling ; but it is likely to be a recurring accident. It is incident to certain states of the money market. At such times, Mr Goodson tells us, all Boards of Directors will commit this offence. When money is cheap, they *will* (their defender says) issue bad securities to catch it ere it gets dear.

If a man were making evidence to secure a registration of debentures, what evidence could he devise so good as this ? Here we have the Chairman of a great railway saying, " I have " issued bad bonds ; it is a practice to issue bad bonds ; in " times of cheap money it is agreeable to human nature to do " so." Surely, a debenture-holder would like a law to say that human nature should not at his cost do what is agreeable to it ; that the practice of illegality which defrauds him should be prevented ; that even Mr Goodson should be restrained from issuing the deceptive documents which it is clear he regards as pleasant and permissible frailties.

THE INSUFFICIENT PROTECTION OF THE PUBLIC MONEYS.

THE standing Committee on Public Accounts were led by the Edmunds case to investigate the insufficient machinery which at present exists for transmitting the minor branches of public revenue to the Exchequer. Both before the Edmunds case and since, we have drawn attention to this, and we seize the opportunity of recurring to the subject, because it is exactly one of the abuses which everybody admits when it is put before him, and which every one ceases to think of when it is not before him.

What is the present system? It appears that in addition to the great offices which receive the great bulk of the public revenue, there are no less than ninety *species* of persons who receive or account for public moneys due to the Exchequer. Some of these species include many individuals and many subclasses. The superior courts of law are classed as one recipient, consuls abroad as another, chief clerks as another. If any one will look down the following list,—which, on account of the importance and the unknown nature of the subject, we give at length,—he will have before him a picture of an almost indefinite number of persons with public money in their hands from various reasons and in various amounts, all of whom ought to be made to pay it to the central Treasury regularly, and some of whom, by the doctrine of chances and the principles of human nature, will tend to *delay* to send it to that Treasury :—

Public Officers (other than those of the Great Revenue Departments) who Receive or Account for Moneys, wholly or in part Payable, to the Exchequer.
Receiver of Hereditary Revenues :—Fines and Penalties, and Fines under the Merchant Shipping Act.
Treasury Solicitor :—Intestate and Forfeited Estates.
Queen's and Lord Treasurer's Remembrancer in Scotland, by whom are received (either directly, or from the hands of other officers).
Fines and Forfeitures in Justiciary and Sheriff Courts.
Intestate Estates, &c., in Scotland (Ultima Heres and Bastardy Fund).
Interest on Balances in Banks.
Fees received in his own office, and rent of Inn at Beatlock.
Fees received in sundry other departments, viz. :—
The Director and Principal Clerk of Chancery.
The Lord Clerk Register and Keeper of the Signet.
The Keeper of the Register of Seisins.
The Keeper of the Register of Hornings.
The Clerk for Admission of Notaries.
The Presenter of Signatures.
The Collector of the Fee Fund of the Court of Session.
The Commissary Clerk of Edinburgh.
The Sheriff Clerks.
The Clerk of the Bill Chamber.
The Registrar General.
The Clerk of Justiciary.
The Fishery Board.
Committee for Regulating the Offices of the House of Commons :—
Chief Clerk of the Home Office ..... } Fees
Ditto Privy Council Office ..... }
Secretary Public Record Office ..... }
Registrar of Joint Stock Companies ..... }
Registrar of Designs..... }
Registrar General (England) ..... }
Registrar of Acknowledgments of Deeds by Married Women..... }
Superintendent of Weights and Measures—Exchequer ..... }
Secretary to Lunacy Commissioners ..... }
Secretary of Presentations to Lord Chancellor..... }
Secretary of Commissions to ditto ..... }
Clerk of the Crown ..... }
Registrar of Judgments ..... }
Accountant, Science and Art Departments :—Fees and other Receipts.
Chief Clerks at Police Courts :—Fees (paid through Receiver of Metropolitan Police).
Consuls Abroad.
Registrar, Landed Estates Court, Ireland.
Landed Estates Record Office, Ireland (Senior Clerk).
Deputy Keeper of the Privy Seal, Chief Secretary's Office, Ireland.
Ditto, as Clerk of the Council, Ireland.
Registrar of Deeds, Ireland.
Deputy Keeper of the Rolls, Ireland.
Judge of the Court of Admiralty, Ireland.
Clerk of Appearances, &c., Court of Chancery, Ireland.
Master of the Court of Queen's Bench, Ireland.
Ditto Court of Common Pleas, Ireland.
Ditto Court of Exchequer, Ireland.
Clerk of the Crown, Court of Queen's Bench, Ireland.
Registrar of Fines and Penalties (Chief Secretary's Office), Ireland.
Master in Chancery (Mr Fitzgibbon) as Auditor of County Treasurers' Accounts.
Commission of Valuation, Ireland.
Commissioner of Public Works, &c. (England and Ireland).
Master of the Mint.
Comptroller of the Stationery Office.
London, Edinburgh, and Dublin *Gazette* Offices.
Keeper and Secretary, National Gallery.
Directors of Prisons.
Colonial Convict Authorities.
Accountant, Copyhold Commission.
Inclosure Commissioners.
Local Boards of Health :—Payments of Expenses of Preliminary Inquiries by the late Board of Health.
India Office.
Board of Trade :—Unclaimed Wages of Seamen, &c.
Private Secretary to the Chancellor of the Exchequer :—Conscience Money.
Public Works Loan Commissioners :—Repayments.
County Treasurers in Ireland (through Paymaster-General, Dublin) :—Repayments.
Procurator-General for Alderney :—Rent of Land.
Secretary of the Lagan Navigation Company, Ireland.
Chamberlain of the City of London :—Repayments.
Ditto, Coal and Wine Duties (but these are not payable to the Exchequer.)
Italian Government :—Repayments.
Colonial Governments, West Indies :—Repayments of Loan.
Receiver of Jewel House Fees, Tower of London.
Lessees of the Malta and Alexandra Telegraph.
Emigration Commissioners.
Superior Courts of Common Law.

What, then, are the precautions to make these numerous, in some cases, of course, reluctant recipients, duly pass on the public money? The late Mr Arbuthnot, the Auditor of the Civil List, who passed his life in the Treasury and in close connection with this very matter, is asked by Sir Stafford Northcote :—

"What steps are taken to see that moneys which ought to go into the Exchequer do actually go there?—That is difficult to say; I think there is some defect in the arrangements upon that point.

"Has your attention been called to the circumstance, that in the case of Mr Edmunds, certain payments which ought to have been made regularly to the Exchequer at certain periods, were not made by him for several years together?—Yes, my attention was called to that circumstance since his defalcation came out.

"Is there no machinery by which it would be ascertained that moneys which ought to be regularly paid once a year, or at other periods, have not been paid?—No, there is no such machinery. In that case I apprehend that it was thought to be the duty of some one in the Court of Chancery to look after these accounts, but it was not so; in fact I rather think that Mr Edmunds' cessation of payments, as the Clerk of the Patents, coincided with the date of his new appointment, as Clerk to the Commissioners of Patents, and I dare say that the two offices were confounded together, and the first was consequently overlooked, He had been previously very irregular in his payments, but still there were payments sufficient to blind an ordinary observer.

"Supposing Mr Edmunds' successor to be irregular in his payments, will there be any means of checking his irregularities?—I am not prepared to answer that question. The Treasury, on first learning of the defalcations, as I just observed, invited the Lord Chancellor to institute an inquiry into the subject, and offered their co-operation.

"And if I understand you rightly, there has been no answer received to that communication?—No answer has been received. The Lord Chancellor appeared to be under the impression that the Exchequer and the Treasury were one, and that it was the duty of the Treasury to look after these matters, which the Act gave them no power to do."

That is to say there is no check, *as yet*, that Mr Edmunds No. 2 may not purloin as much money as Mr Edmunds No. 1.

The number of persons shown by the above list to be in Mr Edmunds' position makes the question of their honesty or dishonesty very critical. Some of them, it is true, are checked and audited in various ways, but it would take a lifetime to explain the different modes in which this is effected, and several lifetimes to know whether those modes are effectual or not. A vast number of recipients are never looked after at all. Thus, the Charity Commissioners are not even included in the above list, as by law they have not to account to the Exchequer; though if they misappropriate any money, the nation must make it good, and taxes for the purpose would have to be imposed; yet there is no check on these Commissioners

Digitized by Google

on the part of the Treasury, or the Queen, or the nation. Mr Arbuthnot is asked:—

"Are there not some cases in which sums of money belonging to the public are deposited with the public officers, or with public departments; in the case, for instance, of the Charity Commission, are there not considerable sums belonging to the public deposited with the Charity Commissioners?—I do not know anything of the proceedings of the Charity Commissioners.

"You are not aware of any security being taken in such a case?—No."

So that we are liable for the receipts of these and other bodies, though we do not look after them, and do not know what they are.

The case of Edmunds was too much regarded as an individual monstrosity. It was too readily said, "Here is one "man who was trusted with untold gold, and, wonderful to "say, he took some of that untold gold," But the fact is, he is only one of a class of whom the world hears little. We should have heard very little about Mr Edmunds if the world had not been so eager to hear about Lord Westbury. It was the misconduct of the Chancellor which made the uproar, and not the misconduct of the accountant. As soon as we begin to investigate the subject, we come upon other cases in which the honesty of unchecked persons has been, just when it was necessary, found wanting. Mr Greenwood, the Treasury Solicitor, relates an incident which led to the introduction of stamps as a check upon dishonesty in the Court of Admiralty:—

"Sir Stafford Northcote.—Ten years ago?—Yes; he was a defaulter to about the amount of 60,000*l*. I had to investigate that. I forget who was joined with me; it was under the direction of the Lords of the Treasury that I investigated it, and I think that it was with Mr Hoffay and Mr Hankins.

"Chairman.—With Mr Hoffay, the Deputy Paymaster General?—Yes; the Deputy Paymaster General, as he was afterwards; he has now retired. We went through the whole of that affair, and recommended that a system of payment of fees by stamps should be introduced. Mr Rothery, who succeeded Mr Swabey, was very doubtful whether it was applicable to their business. However, we pressed hard that he should try it, and I have since learned from him that it works admirably.

"Chairman.—He is quite satisfied with it?—Yes, he is quite satisfied; the last time I spoke to him he said it worked admirably.

"How did Mr Swabey manage to accumulate this sum of money?—The great bulk of it was received from Lord Arden, his predecessor; large sums are paid into the Registry of the Court of Admiralty.

"For Droits of the Admiralty?—No; they have nothing to do with the Crown revenues at all; it is for the Court of Admiralty. For example, there might have been a collision, and one vessel might have been libelled for having caused the collision. Before such a vessel could be released to go upon its voyage, they make a large deposit, and sometimes it happens that things have remained there without the case being prosecuted, and the moneys have remained in the hands of the Registrar year after year. In that way there was a vast sum accumulated, amounting to 50,000*l* in Lord Arden's time; but it was 60,000*l* in Mr Swabey's time. I can't be certain of figures. I speak from memory, without having referred to papers. Then, according to my recollection, there was an occasion upon which some Americans had got a decree from the Court of Admiralty, that they were to receive 6,000*l* upon the following Monday. Then it appeared that there was no money in Court, and that Mr Swabey had disappeared. They came to the Admiralty; the Admiralty of course had nothing to do with it. There was a sort of notion that, because the default was in the Court of Admiralty, the Department of the Admiralty was responsible. Ultimately they came to the Treasury, and the Treasury, I think, paid about 17,000*l* at that time. It became necessary to see what was the actual default, and, according to my remembrance, it was 60,000*l*, which, in truth, belonged to private persons, if, by lapse of time, it had not become quite clear that no representatives would appear.

"Sir Stafford Northcote.—It was unclaimed property?—It was unclaimed property either belonging to the nation or to the Court."

And such events will continue to happen till the end of time, so long as you have a whole class of men who, by nature like money, in unchecked and unrestricted dominion over that money. Short accounts create a habit of honesty even though they do not find a wish to be honest, but *no* accounts generate dishonesty even when at the beginning there was a wish to be virtuous.

Those who wish to continue the present state of things, and there are such people, say that the matter is difficult, that it is complicated, that there is this and that problem of detail, but we will not now be entrapped into a controversy of detail. We say, *first*, this is a safe thing to alter, for what now exists is so bad that it can hardly be made worse. There are very many public servants now with no check upon them at all, and even if the first check imposed was not perfect, it would still be an improvement, and the gain of something better; and, *secondly*, that though the detail of the subject is, like all matters of figures, in appearance complicated; yet the ruling principles are in reality simple. They are—

1st. That as few people as possible ought to touch actual money, and that as many as possible ought to be made to account by stamps and similar expedients which are not equally tempting.

2ndly. That those who do touch the public money should be made to pay it over to the central Treasury as soon as possible, and that the Treasury should have legal means of requiring it to be done.

3rdly. That at the head of the Treasury there should be some person or persons who would be bound to see that all such moneys are duly paid over, and who could be at once called to severe account if those moneys should, as in Mr Edmunds and Mr Swabey's case, be shown to be in arrear.

THE ATTITUDE OF THE SOUTHERN STATES.

The true attitude and purpose of the South will not be revealed until the meeting of Congress in December, but meanwhile the apparent contradictions in all received accounts arise apparently from this. Two conditions of peace were offered to the South, if not in words, at least in fact,—obedience and emancipation,—and the South, though abandoning the war, has accepted only one. It obeys the Federal Government, but resists, where it can, interference with the negroes, and, to make resistance effectual, pushes to the utmost the American theory of municipal right. Throughout the revolted States we see no sign and hear no report of anything approaching to insurrection, or plots for insurrection, against the Federal authority. Returned soldiers of the Confederate army sometimes use their bayonets, but it is against private enemies of the victorious garrison, not against the Central Government; villages sometimes defy the law, but it is for the sake of persecuting the negro, not of resisting a definite military order. Indeed, by all accounts, which upon this point are unanimous, the possibility of overt resistance has disappeared. The South is as exhausted as Poland,—her railways destroyed, her accumulations expended, and her population fit to bear arms reduced to one-half. She has not even the means of producing a crop, for the negroes have been set free, and the whites are entirely unaccustomed to manual, or, indeed, any other kind of labour. Even if they will work under the pressure of necessity, they will have to be trained before their work can be effective. Insurrection under such circumstances is out of the question, and is admitted to be so by the most violent partisans, but resistance short of insurrrection is not, and this the people have already commenced. Mr Johnson, a Southerner by training, has decided finally that reconstruction shall be accomplished through State action, and the States are, therefore, at liberty to choose for their conventions, and for municipal officers, all persons who have been pardoned and who have taken the oath of allegiance. These pardons are given liberally, 3,200 having been issued in Virginia, and the population generally takes the oath with more or less of readiness. The consequence is that strong "Southern" men are chosen for delegates and for municipal officers, men who will if they can refuse emancipation, and if they cannot will offer all resistance to the policy of the North possible without war, who for example will try to levy special taxes on incomes

Digitized by Google

derived from the Federal bonds, authorise the formation of national guards, who may one day be used for another revolt, steadily oppose the immigration of Yankee settlers, and place the negro under all kinds of legal disabilities. So far has this resistance been carried that the generals are now the only trustworthy agents of the national Government, and take upon themselves every now and then to annul the elections as at Richmond, seize presses as in North Carolina, and condemn "loafing" whites to sweep the streets as in one of the towns of Texas. Indeed it is not improbable that in Alabama public feeling will go the length of refusing to insert a clause abolishing slavery in the Constitution, and if it does the real test of the possibility of reconstruction under this policy will be at hand.

It is by no means certain that were the negro absent the President might not succeed in the policy he has adopted. The State system of the Union, with all its disadvantages, has this one recommendation that it enables the inhabitants of any one State to organise a society not necessarily identical with that of the whole body. Under present circumstances, the State power shields the subjugated community from feeling its subjugation. They will still manage their own affairs, make their own laws, organise their own army without orders from Washington, and without indeed seeing any officials from Washington, except the collectors of the national taxes. Irritation, under such circumstances, would be sure to die away, as it dies away in a man who has had a fierce quarrel, but who never comes across the man with whom he has quarrelled. An opportunity would be afforded for a revival of imperial feeling, and a foreign war once more render both sections conscious of their common interests and mutual dependence on each other. But there is the negro, everywhere present, everywhere free, and everywhere reminding each individual Southerner that he is a conquered man. Upon this point Mr Johnson, and indeed the North generally, will hear of no compromise; and the Government has taken the extreme step—extreme, we mean, in view of the American idea of State rights—of placing all negroes under the sole authority of the freedmen's bureaus, and authorising the military to interfere for their protection. The military, however, cannot be everywhere; the slaves by themselves do not defend themselves; and the irritability of men who see in freedom a loss of property as well as an injury to their pride vents itself upon the unhappy race. The incessant outrages upon blacks lead to incessant conflicts with the garrisons, and thus keep up a state of affairs which looks almost like civil war, but is really only anarchy kept down by military power. Under the Constitution, the President alone has the right of moving Union troops, and the Southerners cannot legally object to the presence of these garrisons; but they must in the end be withdrawn, and then the South, left to itself, will endeavour to devise State laws which shall re-establish slavery under some more complicated but we fear not less oppressive system, and will strengthen those laws by the action of vigilance committees. This is what Mr Johnson desires to prevent, and this is the point at which his policy of reconstruction by States clashes with his other policy of final emancipation. He may be able to induce Congress to pass laws making the freedmen's bureaus permanent institutions; but they will be valueless without soldiers to enforce their orders, for the South, with its great weight in Congress, will speedily be able to secure the nomination of their own friends to the office of protectors. If he is not able to pass such laws the negroes must either fly Northward, a movement which will be checked by inter-state passport laws, or resist, thus at last fulfilling the remarkable prophecy of De Tocqueville:—"I am obliged to confess that "I do not regard the abolition of slavery as a means of warding off the struggle of the two races in the United States. "The negroes may long remain slaves without complaining; "but if they are once raised to the level of freemen, they will "soon revolt at being deprived of all their civil rights; and "as they cannot become the equals of the whites, they will "speedily declare themselves as enemies." The extraordinary aptitude of the American people for stumbling through difficulties apparently insuperable into some practicable road, may enable them to devise some alternative course, but until the negro question is settled there can be neither peace in the South nor cordiality towards the Union; and, so far as outside observers can perceive, the negro question is under the State system still insoluble.

PRICES OF GOLD AT NEW YORK.

(From the New York CHRONICLE *of August 5.)*

THE tables which follow, and which have been compiled with great care, exhibit a concise review of the gold market at New York, from the suspension of specie payments, at the close of 1861, to the end of June, 1865, embracing a period of three and a half years. From January 1, 1862, to and including June 20, 1864, the prices are based on the daily sales at the New York Stock Exchange,—from June 21, 1864, to June 30, 1865, on the sales at the Gold Room. This change of the sources of information was rendered necessary by the total cessation of sales at the Stock Board immediately after the passage of the Gold Bill in Congress, and the infrequency of sales thereat up to the present day.

These tables of daily prices show the following monthly changes:—

STATEMENT EXHIBITING THE RANGE OF PRICE MONTHLY AND YEARLY.

Months,	1862.		1863.		1864.		1865.	
January	101¾	103⅜	133⅜	160¾	151⅛	159⅝	147½	124⅜

THE EFFECT OF THE AMERICAN CIVIL WAR ON THE CALIFORNIAN GOLD TRADE.

THE American civil war has had a most curious effect on the Californian gold trade. Formerly New York was the principal port to which it was exported, and from thence, if necessary, it was transmitted to Europe. But an official report from our Consul at San Francisco shows that for the last two years the bulk of the gold exports have been consigned direct to England. The comparative figures are these :—

Destination.	1864.	1863.	1862.	1861.	1860.
	£	£	£	£	£
New York	2,463,225	2,077,865	5,238,805	6,525,600	7,132,300
England	6,887,300	5,693,450	2,590,030	812,350	534,600
China	1,577,775	841,275	532,150	708,200	674,900
Panama	75,750	500,660	86,900	70,000	60,100
Other countries..	137,400	115,535	64,460	19,200	57,600
Total.....	11,141,450	9,228,785	8,512,345	8,135,350	8,459,500

The effect of this direct importation has been to bring back our aggregate receipt from the United States to a greater sum than it was before, as the following table shows :—

AGGREGATE RECEIPT OF BULLION FROM UNITED STATES.

	£
1858	4,811,772
1859	9,672,981
1860	4,792,582
1861	66,683
1862	10,064,162
1863	8,147,524
1864	7,634,940

The figures in the two tables do not accurately correspond, for one is of the exports to and the other of the imports into England, so that the quantity in *transitu* is included in the first—the export table—but not included in the second—the import table.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post-Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reductions the National Debt, during the four weeks ending Aug. 12, 1865 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS :—	£ s d	£ s d
In money and interest credited	52,656 1 4	67,274 12 4
To transfer certificates from Post Office Savings' Banks to Savings' Banks	190 8 10	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	33,187 16 4
Total.....	52,846 10 2	100,462 8 8
POST OFFICE SAVINGS' BANKS :—		
In money and interest credited.....	147,188 0 0	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks.....	33,187 16 4	...

The Post Office Savings' Banks fund.....	6,060,538 1 5
Total	44,458,571 2 2
Ditto—by last monthly account	44,326,001 13 2

Agriculture.

THE CATTLE PLAGUE AND CATTLE PANIC.

NOTHING can be more commendable than the alertness shown by the agriculturists in all directions to take active means for self-help against the apprehended spread of the disease which has broken out in the metropolitan dairies, but at the same time it will be well to guard against exaggerated fears, and the adoption of measures which may become permanently obstructive. It was not long ago that wild statements were made with reference to the condition of the Edinburgh dairies and the cases of disease which had occurred there, but which, when subject to strict inquiry, were by no means verified. Doubtless there was there and then some foundation for the outcry which arose, but as certainly advantage was taken of it to create mischievous alarm and to interfere needlessly with the important trading interests which are concerned with cattle. Are not some of the same agencies at work in England now? It is remarkable, that the conclusion instantly jumped at, when disease of the typhoid character was disclosed to exist amongst the London dairy cows, was, that the disease had been imported with foreign cattle, and that stringent regulation of the foreign cattle trade, if not its absolute prohibition, was the necessary and immediate step to be taken. At the same time we see a strong tendency to invest inspectors and officials with exorbitant powers, which, if now necessary, should be carefully limited to the existing emergency. Now, is it at all clear that the disease is imported?

Some veterinary practitioners seem to hold that view, but the inspectors of imported stock and the traders who are practically versed in the actual importations declare that no diseased animals have come in from abroad. Then it is said the disease may be latent, that the animal may be infected, and yet that for eight or ten days the outward symptoms of disease are not disclosed. This may be so, and every purchaser of stock will do well to keep his new purchases isolated from his own herd for such a period as will render it clear that he has not purchased a diseased animal. In fact this is what most careful farmers do whenever they purchase stock in fairs or markets, and assuredly the existence of a serious disease in any part of this country should render all farmers careful in this respect. Again, when any farmer has the misfortune to find disease amongst his cattle, he should carefully separate the sick from the healthy, and use all possible means of purifying and disinfecting the places in which the diseased cattle have been kept or may have died.

In the meantime, the aid of a qualified veterinary practitioner should be sought as soon as any signs of the disease are seen amongst cattle, and in that way not only will the disease be more likely to be arrested by being taken in time, but the public will profit by the greater number of cases treated by qualified men, who by treating the disease from its commencement will have better means of ascertaining how it is to be controlled. That the conditions to which dairy cows are subjected in towns, and to which also cattle transported across the sea, especially during hot weather, are calculated to generate disease, cannot be questioned, and every practicable means of affording ventilation and supply of water ought to be adopted. Every cattle market ought to be provided with water, for cattle which have travelled some distance, or which remain for some hours in the hot sun, are always liable to inflammatory disease, and require large supplies of water. We have noticed that in the Birmingham (Smithfield) cattle market, there are large tanks constantly full of water, distributed over the cattle market, and the avidity with which the animals go to them on first entering the market, and their comparative quietness afterwards.

Let us avoid panic on the subject of the existing disease, but let each farmer take every possible precaution to avoid it, and should it visit his stock, let him seek the best available advice and adopt every plan which may be suggestad to prevent it spreading. Then each man will have done his utmost in his individual capacity. When acting in concert with his neighbours let him take care that all public action be strictly temporary in its character, and not such as will hereafter prove obstructive to trade in stock, or which will burthen that trade with official interference.

Literature.

OUR TROPICAL POSSESSIONS IN MALAYAN INDIA. By JOHN CAMERON, Esq., F.R.G.S. Smith, Elder, and Co. 1865.

"THE following pages," says Mr Cameron in his introduction, "have been written under the belief that the possessions of which they treat are about to come under the direct control of the Imperial Government, and with a view to afford the people of England some glimpse of the great beauty, some conception of the valuable commerce, and some grounds to estimate the importance, in a political point of view, of the tropical country to which they are about to be drawn in the ties of a closer relationship." We think Mr Cameron is entitled to the praise of having very fairly achieved this object, though the book is on the whole more creditable to his industry and research than to his general mental power. The effect of his descriptions is marred by a minuteness of detail nearly always tedious and sometimes positively ludicrous. *Can* it be necessary to tell us that Englishmen at Singapore drink bitter ale and pale sherry with their dinner, and generally wind up with a cigar?

Cœlum non animum mutant qui trans mare currunt.

He might as well have added that, strange as it may seem, the primary instincts of the race remain unaltered. Still it is, perhaps, hardly fair to find fault with the author for the want of artistic and philosophic qualities with which nature has not endowed him, and we are most willing to admit that he has produced a book very useful for certain purposes. We may add, what in our eyes is no small merit, that he writes in a straightforward style, and does not strive to be "funny."

The tropical colony which it seems is about to cease from being "the dependency of a dependency," comprises the island of Penang (or Prince of Wales' Island, including Province Wellesley), the town and territory of Malacca, and the island of Singapore. The East India Company came into possession of Penang in 1786 by treaty with the Rajah of Quedah, a native State on the West coast of the peninsula; and fourteen years later the slip of land opposite Penang, now known as Province Wellesley, was added to the Company by the same Prince. Malacca, after having first been conquered by the Portuguese under Albuquerque, some 350 years ago, passed from them to the Dutch,

Digitized by Google

and finally into our possession by the treaty of 1824. Singapore has never changed European owners. In 1819, Sir Stamford Raffles, the Governor of Fort Marlborough, or Bencoolen in Sumatra, came over and took formal possession of the island, then nearly uninhabited.

The three settlements lie along the Northern boundary of the Straits of Malacca. Penang is situated at its North-Western entrance, or in about lat. 5 deg. 24 min. North, and long. 100 deg. 21 min. East, and is about 13½ miles long, having an extreme breadth of 10 miles, containing an area of very nearly 70,000 acres. Province Wellesley is in the mainland of the Peninsula immediately opposite Penang, the water dividing them, being about 3 miles broad at the narrowest point; it runs North and South 25 miles, varying in breadth from 4 to 11 miles, containing an area of 15,000 acres. Malacca is a much larger tract of territory, distant from Province Wellesley some 260 miles along the coast of the Malayan Peninsula in a South-Easterly direction, the intervening territory belonging to the native States of Perak and Salangore, both under the English protection; it has a frontage to the Straits of 43 miles, its extent inland varying from 10 to 28 miles. The town stands in lat. 2 deg. 16 min. North. About 100 miles South-East from Malacca, at the Eastern entrance of the Straits, the island of Singapore juts out from the native State of Johore and forms the heel of the Peninsula. It is 25 miles long by 14 broad, and contains an area of 206 square miles. The position of the town is in lat. 1 deg. 17 min. North, long. 103 deg. 51 min. East. (Pp. 5, 6).

The population of the united British possessions in the Straits Mr Cameron estimates at 290,000. That of Singapore alone may be roughly stated at 90,000; the last census, in such a country necessarily a very imperfect test, made it 84,000. The total number of Europeans and their unmixed descendants in the whole colony does not exceed 800, exclusive of the military and the seafaring population, which is constantly coming and going, and nearly two-thirds of this number are stationed at Singapore. The rest of the population of Singapore is composed of the following elements:—Malays, 13,500; Chinese, 58,000; natives of India, 12,700; other Asiatics, 6,500. The aborigines of Singapore, who were originally dispossessed by the Malays, have, we are told, long since ceased to exist in the island as a distinct race, but the tribes to which they unquestionably belonged are still to be found on the adjacent mainland to the number of some 7,000 or 8,000. They are entirely nomadic in character, and seem incapable of establishing any settled form of government. Mr Cameron describes them as prepossessing in appearance, though evidently of a low type, simple and amiable in disposition, sensible of and grateful for the slightest good turn or kind word, contented and happy amongst themselves, but indifferent even to laziness, only being forced to exertion by the hunger of themselves or their families. The Malays, on the contrary, have always shown themselves friends to good order and an established government. Of this race, both morally and physically, Mr Cameron is inclined to form a high estimate. The men are short, being on an average not more than 5 feet 3 inches in stature, but well proportioned, round, and full limbed; the women, at least when young, are generally good-looking, and often more than that. But with many virtues they are not at the present day industrious. "They have no acquisitiveness, and if they can satisfy the wants of the moment they are happy. Long usage gives the Malay almost the right to partake of the hospitality of his neighbour whom it might be his turn to relieve next day, and should the worst befall, he knows that with the jungle before him he need never starve." In confirmation of this it is mentioned that though there are numerous Malay traders arriving throughout the year from all parts of the Archipelago, yet in none of the settlements is there a single Malay merchant: he never rises beyond the rank of a hawker. The Chinese, as was stated above, form more than half the whole population of Singapore, and this large proportion is kept up entirely by immigration. The arrivals during the first four months of last year were, Mr Cameron says, 8,560 males, and 109 females, and this was by no means above the average. If this immigration were in no way counterbalanced the Chinese population of the Straits would of course soon become excessive, but the number who yearly return to China are said to be equal to fully two-thirds of the arrivals. The great object of most Chinamen is to get rich as fast as they can, and go home again. It is to be regretted that this immigration is not in a more satisfactory state. The vessels employed in it are chiefly Chinese, and the emigrants are transported without the payment of passage money, but are made to pledge their labour for so many years to come. Such is the demand for labour that large premiums are gladly offered by the gambier and pepper planters of the island for the transfer of these contracts, and as soon as the bargain is struck the coolies are hurried off to some remote plantation before they can communicate with the authorities or with their countrymen. As, however, in a year or two at most they become acquainted with their privileges as British subjects, they have not so much to apprehend; but the worst part of the system is the temptation it holds out of overcrowding the vessels engaged in the traffic. As the skipper has not sunk any capital in obtaining the coolies, it pays him to take double the number his ship will properly hold, since if a third of the number die on the passage he *loses* nothing, though his profits will be less. The Chinese, at any rate, cannot be charged with any want of ambition to become rich. "They are," says Mr Cameron, "the most industrious, and consequently the most valuable, people we have in these possessions; the development of the internal resources of which is almost entirely due to them." They grow the gambier and pepper of Singapore, and produce the tin, sago, and tapioca of Malacca. On the other hand, they gamble and smoke opium to an excess, and they have a habit of forming themselves into secret societies which tend to defeat the ends of justice.

Mr Cameron speaks in high terms of the climate of Singapore. Though it is within seventy-seven miles of the equator, neither the high temperature, nor the extreme humidity of the atmosphere is, he says, found to interfere with the health or comfort of Europeans. Everything is so green and beautiful that the heat is hardly appreciated. The most marked feature in the climate is its equableness. In the three years from 1861 to 1863 the thermometer was never lower than 70 deg. or higher than 92½ deg. This equableness is said to have an injurious effect in relaxing the constitution, but the best medical authorities affirm that no harm can come from 6 or 7 years residence, and that then a year spent in a colder climate will effectually brace up the system. The soil is not particularly rich, consisting chiefly of decomposed granite, overlaid in the lowlands with a thin alluvial deposit; the real causes of the luxuriant vegetation are the humidity of the atmosphere and the almost daily recurrence of refreshing showers. Mr Cameron says that every intertropical plant known will grow, and most will flourish in the Straits. In an appendix he gives a list of the chief fruits to be obtained at the market places of the three stations. The leading products are gutta percha, gambier or terra japonica, pepper, and cocoa-nuts. At one time the nutmeg was one of the most important exports, but a strange and incurable disease has of late shown itself among the trees, and caused whole plantations to be abandoned in despair, so that the quantity now exported is small. The most valuable chapter in the book is that devoted by Mr Cameron to the trade and commerce of Singapore and the other Straits' settlements. He insists on the fact that, comparatively speaking, Singapore neither produces nor manufactures. The trade of the East has been drawn to it, first, from its central situation, and secondly, by the entire exemption it has all along enjoyed from commercial imposts and taxes on trade, at a time when the Dutch in the neighbourhood drew their chief revenue from import and export duties, and when even the East India Company had no other free port. The imports of Singapore have increased in the 40 years, from 1823 to 1863, from 1,200,000*l* to 6,500,000*l*, the exports during the same period from 950,000*l* to 5,500,000*l*. For the same year 1863 the imports of Penang and Province Wellesley were 1,684,000*l*, the exports 2,392,000*l*, whilst for Malacca we have imports 453,000*l*, exports 360,000*l*. Of the trade of Singapore Mr Cameron writes:—

It may be roundly stated that 90 per cent. of the European manufactures and Indian produce which are landed there, are again reshipped further Eastward, and not 5 per cent. of the products exported to Great Britain, America, the Continent of Europe, and India, are of local growth or manufacture. To no other port in the world therefore can the designation of entrepôt be more justly applied.

As long, he says, as the port of Singapore remains free of tonnage dues or of harbour dues, as long as bonded warehouses are unnecessary because of its freedom from import or export duties,—in point of fact, as long as ships can enter and leave its harbour at will, and goods can be landed and shipped at no cost beyond the cooly and boat hire,—so long need we fear no diminution of what might be termed its inter-colonial trade. But the moment any attempt is made to tax its imports or exports or to impose any tonnage or harbour dues, that moment the ebb of its commercial greatness begins. Such charges, he admits, are in themselves fair enough, but the native traders who play so large a part in the commerce of Singapore would not understand them and would fly from them as oppression. The trade of Penang differs in one respect from that of Singapore, in that while at the latter place the local consumption and production are quite insignificant as compared with the imports and exports, in Penang the imports are, with some trifling exceptions, consumed on the island, in Province Wellesley, or in the adjacent native States, and the exports are entirely the production of the same territories. The trade of Malacca, as has been seen, is now comparatively unimportant, and falls very far short of what it was when Malacca was the great centre of commerce between East and West. Still it is satisfactory to know that this decline has not been under British rule; on the contrary, since we finally came into possession there has been a steady rise. But, considering the great natural resources of Malacca, a trade in which the exports are only three-fourths of the imports cannot be regarded as in a wholesome state. But in spite of the very flourishing business which the Straits' settlements is now doing, amounting to a total of 17,000,000*l* for the last year, Mr Cameron says that it would be a mistake to suppose that they present any field for the industry or enterprise of the working classes at home. Chinese and Malay labour is too cheap for English to have any chance of competing with it successfully. And not only for unskilled labourers, but for adventurers of all sorts, without some distinct appointment, or with the means and ready-formed connections

Digitized by Google

necessary to start an independent business, he thinks Singapore a most unlikely field. He defends the system that prevails of farming out the excise to the highest bidder—usually Chinese with a large capital,—as he says, that if the Government were to attempt to collect its own excise, the frauds to which it would be subjected would be so serious as to reduce the product by one-half. "Set a thief to catch a thief," and set a native to detect fraud on the part of his countrymen.

There is one severe scourge to which the island is subjected, and that is the tiger. They are not indigenous, and are supposed not to have existed in the island prior to the year 1835, and even now Mr Cameron thinks there cannot be more than 20 couples, if so many. Nevertheless, he thinks that the calculation that no less than 365 men every year have their lives dashed out by the crushing stroke of these monsters' paws is no exaggeration. During the year previous to the date at which he writes, 41 mangled corpses were recovered, and 85 additional cases were reported to the police in which the bodies could not be found. Now, as the victims are almost invariably Chinamen, not independent labourers, but either the hired or half-hired and half-purchased servants of the planter, who are working in outlying plantations close to the jungle, and their owners would have a strong interest in concealing the fact of the neighbourhood of tigers, he thinks it only reasonable to infer that for every death that is heard of there are at least two that never come under notice at all. As yet no energetic measures have been taken to remedy this state of things, and the mortality is decidedly on the increase.

Our space forbids us from following Mr Cameron in the account he gives of Penang and Malacca, and for this, as well as for much other information concerning the settlements, we must refer those interested in such matters to the book itself.

HEADS AND HANDS IN THE WORLD OF LABOUR. By W. C. BLAIKIE, D.D., F.R.S.E. Alexander Strahan. 1865.

THIS book is a sequel to "Better Days for Working People." As in that Dr Blaikie addressed himself chiefly to the employed, in this he addresses employers. His object is to enforce on masters the duty, and point out to them the means of promoting the moral and material well-being of the workpeople in their employ. Such an aim is, of course, highly commendable, but the book is one which, to be judged favourably, must be considered with reference to its *matter* rather than its *form*. It is exceedingly tedious, replete with the mildest platitudes, and written in that peculiar phraesology affected by those persons whose views are "strictly evangelical."

Dr Blaikie thinks it more than ever incumbent on masters to take thought for those under them, as one of the most important social changes effected by recent mechanical inventions is the bringing together large masses of men, or of men, women, and children to work in concert under a single directing head. That this is the tendency with manufactures of all kinds at the present day there can be no doubt. In the Report of the Select Committee of the House of Commons in 1856, on Masters and Operatives, there is an elaborate enumeration of the manufactures, &c., carried on in this country in which large bodies of men are employed, and those also in which the number is comparatively small. Of the former, the total number is 126; of the latter, 66. The larger number embraces 29 different species of manufactures of metals, 29 of stuffs and textile fabrics, 28 chemical or similar processes, 17 various, 7 trades, 5 species of mining, and 11 classes of labourers. The number of persons to whom Sir M. Peto gives employment directly or indirectly in his various undertakings is no less than 30,000. Dr Blaikie was told by one of the great shipowners of Liverpool that the number of sailors whose names are entered in his books in the course of a twelvemonth may be 25,000, though perhaps not more than a tenth of them would be drawing his pay at one time. The Crossleys, of Halifax, stated lately that there were 4,500 men in their employment, and Mr Ackroyd, of the same town, gives 6,000 as his number. Such men's power for good or evil must necessarily be very great, and Dr Blaikie owns it to be but justice to say that to a large extent they seem fully conscious of their responsibilities. In fact, he says, it is usually found that the greatest employers of labour are the most considerate of their workpeople. At the same time, attempts on the part of employers to raise the condition of those under them are not without their difficulties. Working men are singularly jealous of anything that looks like an encroachment on their freedom. "They go into the market," writes Dr Blaikie, "with their one commodity—labour—to dispose of; and in disposing of it, they no more dispose of their opinions, or their habits, or their ways of life in general than the baker who sells you a loaf, or the clothier who supplies you with a coat." A striking illustration of this is afforded by the fate of a very liberal and well-meant effort for the benefit of his workpeople of M. Alexandre, of Ivry, the celebrated harmonium maker. Not content with building a model factory, he built a model village of fifty-two houses, that his men might be comfortably accommodated. The cottages are pretty and substantial, and the spot chosen singularly picturesque. Nowhere else could the men gain the accommodation they have here at the price M. Alexandre charges. But the attempt is said to be a failure. Not one-half of the houses would be occupied if the men were not in a manner compelled. They do not choose to have residences selected for them, and put up with worse accommodation, for the sake of feeling that they are living where they like.

Dr Blaikie speaks in high terms of the measures in the interests of their workpeople taken by Price's Candle Company; by Mr North, of the North Shore Mill, Liverpool; Mr Ackroyd, of Halifax; Mr Salt, of Saltaire; and many others. The last named gentleman does really work on a colossal scale. The town of Saltaire was built wholly by him, and consists already of 500 houses, to be increased to 700, and contains a population of 3,000.

The mill was built in 1853—a fine Italian structure, with a façade 550 feet in length, with the remarkable peculiarity that no more than on an Italian palace can a trace of a chimney stalk be seen on it. In place of chimneys a lofty column rises from a handsome pedestal at a little distance from the mill, through which you are bound to believe that all unconsumed smoke of the factory passes, for the visible smoke is so trifling that this must be matter of belief.

Some curious information is given concerning the factory system of America, which Dr Blaikie thinks contrasts in many respects favourably with our own.

The factory towns of New England have this great natural advantage over those of Britain, that the mills are driven, not by steam, but by water, and consequently the smoke and filth and noise, which we associate with a manufacturing community, are almost wholly unknown. The mills, too, are placed in situations where no previous population has been gathered, so that suitable sites are readily found both for factory buildings and for dwelling houses and other erections. The owners of the factories have provided ample accommodation for their workers. As the great body of these are young females, large boarding establishments have been provided, under admirable superintendance, where for a moderate sum the girls may find all that is necessary for their comfort. Should they prefer to live in private lodgings, they are free to do so

It must be borne in mind, he goes on to say, that in New England factory workers are drawn from a class of the population quite different from that which furnishes them at home. They are very commonly daughters of farmers in the country, for whom it has been customary to spend four or five years in factory labour, partly to see a little of the world, partly to save a little money, partly to improve their education, and partly because suitable employment may be difficult to be had at home. They are the class that in this country furnish the better class of servants and nursery governesses. There is not the slightest degree of degradation associated in their minds with factory labour. The impossibility of transplanting the system in its completeness to this country is no reason, Dr Blaikie urges, why we should not take the lessons it so forcibly conveys. In particular, our employers at home would surely do well to imitate the remarkable attention to the welfare of their workers, which has enabled the manufacturers of New England to secure the services of so high a class.

In a concluding chapter, Dr Blaikie has some remarks on the question, whether the system now ruling in the world of labour is sound or not. He quotes from Mr J. S. Mill's "Political Economy," that "to work at the bidding, and for the profit of another, without any interest in the work—the price of their labour being adjusted by hostile competition, one side demanding as much and the other paying as little as possible,—is not, even when wages are high, a satisfactory state to human beings of educated intelligence, who have ceased to think themselves naturally inferior to those whom they serve." Mr Mill's remedy is that the workman should have a share of the profits along with the employers. Dr Blaikie says, that after giving the subject much consideration, he has come to the conclusion that the difficulties in the way of such a scheme are insuperable.

For (1) the plan would involve the necessity to begin with of lowering the rate of fixed wages, as no one could undertake to pay the same rate of fixed weekly wages, and a considerable annual profit into the bargain; (2) in years of loss, the workman instead of receiving a profit would incur a debt to his employer; and (3) when the hands were very numerous and constantly changing, the difficulties of *working* the scheme would be insuperable. It is admitted that it is easy to give to some of the principal workmen employed in factories (the foreman, for example) a certain per centage of the yearly profits in addition to their salary, and that this is often done and might be done in other cases with much advantage. But in these cases, though the men are select, no attempt is made to make them sharers in losses as well as in gains. The share they receive is simply an additional salary, or bonus, given when the business is profitable; is, in fact, neither more nor less than an advance in wages, withdrawn when the capitalist can no longer afford to give it.

But though he thinks little good can come from any scheme which would confer on the workman the emoluments without the substantial position of a capitalist, why, he asks, should not the workman become a *bona fide* holder of part of the capital of the concern? Under the present system of limited liability this question becomes more pertinent than ever. Thoroughly to discuss what is to be said for and against Mr Mill's plan would, of course, be impossible in this place; so we simply give Dr Blaikie's objections *quantum valeant* as the results arrived at by a man who, if he errs, certainly does not err from want of interest in the subject.

	1,467,302,029	52	.....	1,468,501,226	11

The Bank return is not favourable to commerce. It shows an increase of 12,379,000f in the coin and bullion, and a diminution of 14,170,000f in the discounts. In the circulation of notes there is an increase of 1,979,000f, and in the deposits a decline of 12,565,000f.

The Bourse has been very inactive during the past week, and there has been an improvement in the quotations of *rente*, and of several other securities :—

Great interest has been excited on the Bourse by the news that a speculator intends to dispute before the law courts, the legality of the "discounts" which have recently been made in Credit Mobilier and North of Spain Railway shares. He contends that when a speculation has been continued in the ordinary form of *deport*, that is payment for securities lent, the speculator cannot be "discounted"—that is be called on, in an operation for a fall, to produce in return for money down, on an earlier day than he had contemplated, the shares, bonds, or stock, to which his operation referred. The point raised is of great importance to all Bourse people; and the discussion of it before the Courts will, it is expected, bring into strong relief the hostility of the two great sections of the financial world of Paris,—the great old banking houses and the Credit Mobilier with their respective followings,—the former being *dit on* behind the said speculator, and the latter defending, and even it is suspected having made the recent "discounts."

Although the French Government has not the courage to make a sweeping reform of the Customs tariff, and still less to do what would be infinitely more useful—abolish it altogether—it is constantly making petty modifications in it. Within the last few days an imperial decree slightly changes the duties on horns, goat skins, cloves, cinnamon, molasses, cotton, lead, pepper, China and Japan porcelain, nankeen, and some other articles; and in doing so it very needlessly repeats stipulations contained in the existing tariff. The following shows the modifications made in cotton, an article of much interest to English shipowners and merchants :—

NEW DECREE.	OLD TARIFF.
By sea, in French ships: From countries out of Europe—exempt. The production of countries out of Europe — exempt.	By sea, in French ships: From producing countries—exempt.
From elsewhere (that is, from bonding warehouses in Europe), 3f the 100 kilogs.	From elsewhere, 3f the 100 kilogs.
In foreign ships, 3f the 100 kilogs.	In foreign ships, 3f.
By land: From producing countries—exempt.	By land: From producing countries—exempt.
From elsewhere, 3f the 100 kilogs.	From elsewhere, 3f the 100 kilogs.
COTTON NOT PICKED.	COTTON NOT PICKED.
By sea, in French ships: From countries out of Europe — exempt. The production of European countries—exempt.	In French ships: From producing countries—exempt.
From elsewhere, 75c the 100 kilogs.	From elsewhere, 75c the 100 kilogs.
In foreign ships, 75c.	In foreign ships, 75c.
By land: From producing countries —exempt.	From producing countries — exempt.
From elsewhere, 75c the 100 kilogs.	From elsewhere, 75c the 100 kilogs.

The utility of these modifications will perhaps not be very apparent. In lead, however, and some of the other articles mentioned, a reduction of duty is effected in such a way as to place imports from all countries on the same level as those under the commercial treaties from Great Britain, Italy, and Belgium.

The Bank of France has issued another batch of extracts, translated into French, from the Parliamentary investigations in England on banking questions. The new publication, like those that preceded, is made under the direction of M. Coullet and M. Juglar. In ordering the translating and printing of all the important parts of our Bank inquiries, the Bank of France has rendered a real service to the commercial public in this country; for here questions about capital, currency, and banking have not been so fully discussed as in England, and there is nothing which throws so much light on them, in a practical point of view, as the investigations of the committees of our two Houses.

The new judges of the Tribunal of Commerce of Paris were installed a few days back, and, according to custom, the President gave an account of the business done in the year from 1st July, 1864, to the 30th June, 1865. It appears that not fewer than 66,282 new commercial causes were submitted to the Court, and that, adding those standing over from the preceding year, the total to be disposed of was 66,840. Of this vast number, 55,894 were decided by the Court, 5,763 were conciliated, 4,661 were withdrawn, and 552 remain to be heard. The appeals from the decisions of the Tribunal to the Imperial Court were only 1,560, and in 562 of them the judgments were confirmed, and in only 197 were they quashed; the rest were struck out or have not yet been argued. These figures testify to the immense utility of commercial tribunals. In addition to judicial business, the Tribunal received 97 appeals from the Conseil des Prud'nommes in disputes between employers and working men; it had to deal with 2,729 bankruptcies, of which 1,647 were declared in the course of the year, and it wound up 1,539; it registered 1,534 new companies in shares, and it performed other operations.

One of the Bourdeaux journals has reproduced the observations in my last as to the possibility of totally abolishing the Customs duties in this country, and it promises to return to the matter. Discussion on the subject is desirable, in order to draw the Emperor's attention to it. His proposal to abolish such duties in Algeria shows that he is fully aware that they are a grievous impediment to commerce, and by no means a desirable mode of raising revenue. All, then, that is necessary to prove to His Majesty is, that the Customs is not of such importance in the vast income of France that it cannot be done without; and this is demonstrated by the quotations of the import duties given in the letter of last week. No one but the Emperor is capable of deciding on such a great act as the sweeping away of the Customs. His Ministers would see insuperable objections in it. No act could possibly gain him more renown, or, it may be positively asserted, be more useful to the country, and especially to the working classes. If, however, His Majesty be ambitious of being the first to make this vast economic reform, he must bestir himself promptly; for in Belgium an agitation has for some time been carried on against Customs, and the Chamber of Commerce of Antwerp has, in a report on the commerce of the town recently printed, formally called on the Government to abolish them.

The report having been spread that the Suez Canal Company had exhausted all its funds, and would have to raise a large sum

Digitized by Google

by an issue of debentures; the directors have sent a note to the newspapers affirming that the balance sheet on the 30th of June last showed that "they had at their disposition a clear capital of 170,000,000f—nearly 7,000,000*l*. This allegation has occasioned astonishment, and proof of its exactness is considered highly desirable. The calls on shares paid up only amount to 160,000,000f, and, after deducting what has been spent on works in Egypt, and the (no doubt) still more considerable sums absorbed in salaries and travelling expenses by M. de Lesseps and the other dignitaries of the company, and in general management, there cannot remain much in hand. True, the Viceroy of Egypt owes an indemnity to the Company for the lands he has taken from it, but that any payment he may have made, if he has made any at all, can amount to anything approaching the "clear capital" mentioned, is hard to believe.

The soap manufacturers of Marseilles complain that the trade has for some time past been greatly depressed, owing to the heavy customs and still heavier octroi duties they have to pay on their raw materials. The makers in other parts of France are also dissatisfied, though they have not given public utterance to their grievances. It appears from official returns that the export of French soap is much less than it used to be, and the import of foreign considerably greater.

The dividend of the Montataire Iron Works for 1864-5 has been fixed at 40f.

The central agency of the French Colonial Banks in this city is now paying 25f 90c as dividend for the first half of the present year of the Martinique Bank, and 18f 33c as that of La Reunion Bank.

The Orleans Railway Company announces that from the 1st October next it will pay 20f on account of the dividend and interest of the present year. Shareholders may even obtain payment from the 1st of September for a discount of 3 per cent.

In a meeting of the shareholders of the Libourne to Bergerac Railway lately held, a report of the directors stated that the contractor for works had seized all the funds in their hands, also their furniture, that the shareholders had not responded to a call of 50f per share, and that a loan of 266,000f had to be raised on the deposit of debentures. Nevertheless they stated that if they could borrow a further sum of 150,000f, they could complete and open one section of their line. The meeting appointed a committee to examine into the situation.

The market report is as follows:—

FLOUR.—At *Paris*, offers are more numerous, and yesterday the quotations ranged from 47f to 52f 50c the sack of 157 kilogs, but six marks were firmer and were at 50f 75c and 51f current month and September. Type Paris, the 101 kilogs, 31f current month.

WHEAT.—At *Paris*, yesterday, millers generally speaking would not buy except at a reduction of 50c to 1f the sack on preceding quotations. Wheat of the new crop was 28f the sack of 120 kilogs, first quality; 28f 50c for white; good sorts, red, 26f 50c to 27f; other sorts, 24f 50c to 25f 50c.

COTTON.—The market was heavy at *Havre*, in the week ending Friday, only 2,883 bales having been sold. The stock was estimated at 39,215. The closing quotations were 1f to 3f lower for United States sorts; 5f lower for Brazil, Egypt, Porto Rico, and Tinnevelly; 3f Coconada. Low New Orleans was 237f the 50 kilogs; good ordinary qualities in Broach, 160f; in Tinnevelly, 150f; Madras, 170f; China, 145f; Jumel, 215f. This week, a fair amount of business has been done, and yesterday, Madras was 167f 50c, and for delivery in August, 155f.; in October, 145f and 142f 50c; Tinnevelly, 152f 50c and 147f 50c; China, 140f

SUGAR.—Business at *Havre*, in the week ending Friday, was inactive. Some French West India, 48f 50c the 50 kilogs, duty paid, bonne quatrieme; 52f, on sample; usine, 63f 50c; 545 casks Havana, 25f to 25f 50c in bond. Some damaged Havana was sold by auction. The arrivals were about 4,000 casks and 13,460 sacks. This week, French West India, bonne quatrieme, 47f 50c; Havana, No. 12, 30f 50c, and choice, 32f. At *Nantes*, last week, 1,527 sacks Reunion, 51f, bonne quatrieme; 1,600, superior, 52f; some French West India, 47f, bonne quatrieme, and usine, 54f and 63f; 1,321 sacks Havana, 29f 75c, floating conditions; some Demerara at prices kept secret. This week, French West India, 47f, bonne quatrieme; usine, 51f to 58f. At *Bordeaux*, last week, some French West India, 42f 50c and 43f, bonne quatrieme; usine, 52f 50c, and at prices not stated; Reunion, nominal, 51f 50c; and Mauritius, 52f 50c. This week, French West India, 47f, bonne quatrieme; usine, 57f 50c. At *Marseilles*, last week, 415 casks French West India, 27f 70c, bonne quatrieme of Havre; 650 casks Havana, by Spanish ship, 28f 50c, No. 12; also, by auction, some damaged Havana. No sales this week.

COFFEE.—The market at *Havre* was calm in the week ending Friday: 200 casks Port-au-Prince, 83f for the 50 kilogs in bond; 300 Gonaives, 88f; 100 Cape, 84f 50c to 85f; 373 Rio not washed, 77f 50c to 78f. By auction, some damaged Port-au-Prince, Cape, and Rio were sold. The arrivals exceeded 15,000 sacks. This week, Cape, 85f in bond; Rio washed, 105f; Hayti, 83f 50c; Balna for delivery, 89f 50c; Jacmel, 77f; Malabar, 92f 50c; Porto Cabello, 91f 50c and 92f 50c. At *Nantes*, last week, there were no sales, and there have been none this week. At *Bordeaux*, last week, 3,000 sacks Mangalore at prices not stated; 1,200 Winard, 143f; 1,200 Coorg, 121f; 1,108 Mysore, 117f 50c; 1,100 ditto, at prices not stated; 100 at 100f; 220 La Guayra non-grage, 95f; 70 ditto, 96f; 210 ditto, 106f; Caracola, 117f 50c. This week, Mysore, 118f; Winard, 123f; Rio washed and unwashed, 95f to 105f; washed, 100f, and unwashed 90f. At *Marseilles*, last week, by auction 197 sacks Singapore sound, 45f to 45f 50c. No sales this week.

INDIGO.—No sales have been made at *Havre* this week. At *Bordeaux*, last week, 1 chest Java, 2 Caracca, 38 Bengal, 2 Madras at the estimates This week, some Bengal and Madras at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 2,840 Buenos Ayres and Monte Video dry, 70f to 96f the 50 kilogs; 11,200 salted ox, part at 52f 50c, part at prices kept secret; cow (indifferent quality), 41f to 41f 50c; 500 Rio Grande salted cow, 44f; 634 Pernambuco drysalted, 64f; 2,000 ditto salted for delivery, 44f; 680 Chili drysalted cow, 65f; 199 La Plata horse, 7f 50c each. This week, Monte Video dry, 80f and 95f; cow, salted, 42f 50c to 45f 50c; ox, 57f; Rio Grande, 44f to 45f 50c; Buenos Ayres dry, 75f; Valparaiso dry ox, 76f; cow, 66f; salted, 51f 75c; Pernambuco salted, 45f; Rio Janeiro salted ox, 51f; cow, 40f.

WOOL.—At *Havre*, in the week ending Friday, 367 bales La Plata, 1f 30c to 2f 40c the kilog; 10 bales Buenos Ayres sheepskin, unwashed, 1f 17½c. This week, Monte Video unwashed, 1f 70c to 2f, and 200f for the 100 kilogs; Buenos Ayres unwashed, 1f 65c to 2f 47½c, and 220f and 175f the 100 kilogs.

TALLOW.—At *Havre*, in the week ending Friday, 245 casks La Plata, disposable, 51f 25c to 52f the 50 kilogs, and 475 for delivery, 51f 50c to 52f; 30 casks New York, à la marque, 51f 50c. This week, Buenos Ayres, 52f to 52f 50c; La Plata, for delivery, 52f 50c, 52f 25c, and 52f 75c; New York, 53f. At *Paris*, yesterday, the 100 kilogs, without octroi duty, were 104f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 50f and 51f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 68f, the hectolitre; beetroot, first quality, 90 deg., 60f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The treaty of commerce between France and Holland will come into operation on the 1st September next.

Messrs Stoehr, Prieger, and Co., writing from Bombay on the 22nd ult., thus allude to the state of monetary affairs:—Notwithstanding some further failures, amongst which that of one European firm, confidence is decidedly reviving, and, through the rise of cotton in Liverpool and of shares here, the position of those houses which have been in difficulties, but have weathered the storm, is becoming every day stronger. The monsoon is so far very favourable, and the fall of rain satisfactory. The position of the Bank of Bombay is steadily improving, the cash balance at the head office on the 15th inst. was 125 lacs, and the renewed confidence of the public in the bank is proved by an advance of her shares to 33 per cent. premium, having at one time reached even 40 per cent. Money is easy, and the banks show more disposition to grant facilities to legitimate trade. Government paper has been in good demand, and 5 per cent. advanced to 104½ to 105. Exchange—Transactions continue on a small scale, notwithstanding a rise of bank paper from 1s 11 15-16d, at which business opened, to 2s 0⅛d, which is the closing rate. Credits can be placed at 2s 0⅜d, and documents, of which, owing to the small shipments, few are offering, at 2s 0⅛d to 2s 0⅜d. On the 19th inst., the following were the prices of the leading Goverment securities:—Four per Cent., 90½; Five per Cent., 104¼; Five-and-a-Half per Cent., 110¾.

During the week ending Aug. 23, the imports of the precious metals were:—Gold, 177,605*l*; silver, 23,667*l*. The exports were:—Gold, 258,273*l*; silver, 51,715*l*.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32. for the week ending on Wednesday, the 23rd day of August, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,920,775	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	13 270,775
		Silver Bullion	...
	27,920,775		27,920,775

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384 209
Rest	3 508,833	Other Securities	21 413 929
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,582 243	Notes	6 144,650
Other Deposits	14,714 585	Gold and Silver Coin	950.354
Seven Day and other Bills	534,481		
	38,893,142		38,893 142

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,310 606	Securities	31 895,138
Public Deposits	5,582,243	Coin and Bullion	14,221 129
Private Deposits	14,714,585		
	42,607,434		46,116,267

Dated the 24th August 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,508,833*l*, as stated in the above account under the head REST.

Digitized by Google

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£209,489
AN INCREASE of Public Deposits of	255,790
A DECREASE of Other Deposits of	248,202
No change in Government Securities.	
A DECREASE of Other Securities of	273,115
AN INCREASE of Bullion of	40,596
A DECREASE of Rest of	30,618
AN INCREASE of Reserve of	239,416

The changes in the above return are not very important. The diminished demand for money has caused a decline in the other securities, but a nearly corresponding decrease has taken place in the other deposits. Owing to the influx of Government money, however, there is an increase in the reserve. The addition to the bullion is very nearly equal to the amount of foreign gold sent in during the week.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,039,380	£ 22,079,890	£ 21,699,696	£ 21,047,048	£ 22,310,606
Public deposits	6 971,825	7 508,882	6,713,801	5,288,725	5,582,243
Other deposits	11 674,829	14,865 006	12,806,568	13,714,161	14,714,585
Government securities	13,025.164	11.016,097	11,091,284	10,797,095	10,384,209
Other securities	14,995 232	18,973 198	18,114,473	19,967,615	21,413,929
Reserve of notes & coin	9.503,772	11,072,873	8,968,724	6,971,101	7,095,004
Coin and bullion	15,545,987	17.678,698	15,309 384	12,831,751	14,221,129
Bank rate of discount	3½ p. c.	2 p. c.	4 p. c.	8 p. c.	4 p. c.
Price of Consols	91½	93¼	93¼	88⅞	89⅝
Average price of wheat	73s 7d	57s 9d	46s 5d	42s 7d	43s 1d
Exchange on Paris(shrt.	25 7½ 15	25 17½ 25	25 25 35	25 25 32½	25 20 27½
— Amsterdam ditto	11 16 16½	11 15½ 16	11 17½ 18	11 18 19	11 18½ 19
— Hamburg(3months)	13 7½ 8½	13 8 8½	13 8½ 8¾	13 9 9½	13 10 10½

In the corresponding week of 1855, the Queen had paid a visit to the Emperor of the French at Paris. The Limited Liability Act had been published. A revival in trade had taken place in Australia. There was an active demand for money here, and great dulness prevailed in the English stock market.

In 1862, the movements of the Garibaldians were being closely followed by the King's troops in Italy. There were some fresh symptoms of discontent in Syria. The first cause in the great Roupell case had been brought to a close.

In 1863, choice had been made by the Emperor Louis Napoleon of the Archduke Maximilian to occupy the throne of Mexico. The discount market in London continued inactive.

In 1864, the King of Prussia had arrived at Vienna, and had been received by the Emperor of Austria. Advices from Russia had announced that the Czar had ordered a reduction in the army. Political disturbances had taken place at Geneva. A conflict had ensued in which four persons had been killed, and fifteen wounded. The differences between the American Consul and the Egyptian Government had been settled, and the former had resumed his relations with the Government. A conspiracy had been discovered in the South Tyrol, and several arrests had taken place. In America, the Confederates had retired from a fresh invasion of Maryland. The demand for discount was moderate. The Confederate loan had advanced to 79-80.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,320.403*l*; in 1862, a deficiency of 4,108,192*l*; in 1863, a deficiency of 5,327,905*l*; and in 1864, a deficiency of 6,253,454*l*. In 1865, the deficiency is 6,699,344*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount has been quiet throughout the week, and the rates charged show a downward tendency. In exceptional cases, transactions in short paper have taken place in the open market at 3¾ per cent., but the usual quotation has been 3⅞ to 4. The Bank have done but comparatively little business. Subjoined are the current terms for bills of various dates :—

30 to 60 days	3⅞ per cent.
3 months	4 per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ ¾ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange there is an abundant supply of money, and short loans on Government securities were yesterday offered at 1½ to 2½ per cent. To-day the demand has slightly increased, but the quotation did not exceed 2½ per cent.

Annexed are the rates of interest allowed on deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3½ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

About 85,000*l* in refined gold was taken to the Bank to-day, and 52,000*l* yesterday. These amounts are derived from the late arrivals from America, the supply by the Swiftsure from Australia having yet to be dealt with.

The Bank of France return for the present week gives the following results :—

	£
INCREASE.	
Cash in hand	496,000
Treasury balance	380,000
Notes	80,000
DECREASE.	
Commercial bills	568,000
Advances	8,000
Current accounts	500,000

The amount of Government bills on India for which tenders will be received at the Bank of England on Wednesday next is 250,000*l*, of which not more than 100,000*l* will be drawn on the Government of Bombay.

The Stock Exchange Committee have ordered the shares of the Delhi Bank Corporation to be marked in the daily list, and those of the London and Southwark Insurance in the twice-a-week list.

The Committee have also appointed Monday, 28th August, a special settling day in the B shares of the Northern Assam Tea Company (Limited), and Friday, the 1st September, in the shares of Barned's Banking Company (Limited), the General Estates, Hunasgeria Coffee, and Rhôs Hall Iron Companies. The two first are to be marked in the daily list, the two next in the twice-a-week list; the Rhôs Hall Iron not to be marked. The Committee have also ordered the shares of the Merchant Shipping Company to be marked in the daily instead of the twice-a-week list, and the fully paid-up shares of the Telegraph Construction and Maintenance Company to be officially quoted.

The following are the rates of discount in the chief cities of the Continent, showing no alteration :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾ 3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	3½
Madrid	9	...
Hamburg	...	3½ ½
St Petersburg	6	6½

ENGLISH FUNDS.—The fluctuations in Consols this week have been unimportant, and almost entirely caused by the alternately favourable and unfavourable state of the weather. Compared with last week, the quotations at the close yesterday show no change, but to-day there has been a tendency to decline. The final price this afternoon was 89¾ to 13-16 for the account, and 89⅞ to ¾ for money. Reduced and New 3 per Cents. left off at 89⅞ to 89¾.

India Five per Cents. are firm, at 105 to 105½, and Exchequer bills are unchanged at 3s discount to 1s prem.

FOREIGN STOCKS.—The transactions in the foreign department have been unusually limited this week, and only fractional changes have taken place. Prices, however, have been generally well supported, and in some descriptions, particularly Egyptian Seven per Cents. of 1864, Greek bonds and coupons, and the last Venezuelan loan, an improvement has taken place. Danubian, Italian, and Turkish 1863 bonds are also slightly higher. Spanish deferred has been exceptionally flat.

The final quotation of the French Three per Cent. rentes, on the Paris Bourse this evening, was 68f 40c, showing a rise on the week of ¼ per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The principal movement in the railway market has been a heavy fall in Great Western, on the expectation of an unfavourable dividend, but the price has slightly rallied to-day. Metropolitan advanced in the earlier part of the week, and, although some fluctuations have since taken place, closes higher than last Friday. Midland was also at one period in demand, but subsequently declined; and South-Eastern has fallen, on the recommended distribution for the past six months at the rate of 2½ per cent. per annum, against 4¼ in 1864, the diminution being attributable to the recent accident. In other stocks there has been a general advance, especially in London and North-Western, Midland, and North British. Great Eastern remains dull, on the result of the general meeting.

There have been no changes of importance in British colonial securities. Foreign shares are steady, and occasionally higher, particularly French descriptions.

In the miscellaneous market, Atlantic Telegraph Preference shares are dull at 2¾ to 2⅝ discount. Overend, Gurney, and Co. (Limited) have also been slightly flatter, at 3⅜ to 3⅝ premium on the settlement. The principal feature in banking and financial descriptions has been a rise in London and County.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—The rates this week have been firm, and on Paris, Amsterdam, and Hamburg were slightly higher.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The following vessels have arrived during the past few days:—Ripon, from India, with 153,690*l*; Tarifa, from New York, with 39,500*l*; Swiftsure, from Melbourne, with 286,000*l*. The demand for export not having been quite so active during the week, about 96,800*l* has been sent into the Bank, and further amounts are likely to follow. The Ceylon has taken 13,000*l* to Alexandria.

Silver.—The Ceylon has taken 21,800*l* to China; with this exception, scarcely any transaction has taken place, and our market is excessively quiet, the price remaining without alteration at 60¾d per oz. standard.

Mexican Dollars.—The dollars brought by the French steamer were sold at 60¼d per oz, and the "Ceylon" has taken 70,100*l* to China and the Straits. Our market is now dull, the price remaining the same.

Exchange on India for drafts by the Banks at 60 days' sight may be quoted 1s 11½d to 1s 11¾d for Calcutta and Madras, and 1s 11¾d to 2s for Bombay. India Government loan notes are rather better in price, and may be quoted as follows:—5½ per Cents. 108½ to 109½, 5 per Cents. 100 to 102, and 4 per Cents. 88 to 90.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9¾d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s 9d to 75s 3d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d to 5s 0⅞d per oz std; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 5s 0¼d per oz; 5-franc pieces, 4s 11¼d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

PUBLIC COMPANIES.—The directors of the Credit Foncier of Mauritius (Limited) have issued a circular, stating that the accounts for the prior half of the current year have been received from the Mauritius board, and that a net profit is shown of over 3½ per cent. for the six months. An interim distribution at the rate of 5 per cent. per annum, the limit allowed by the articles of association, free of income tax, is announced.

At a meeting of the London and Colonial Bank, held on Wednesday, it was announced that the shareholders can receive, at the expiration of about one month from this date, 7*l* 10s for the old, and 3*l* 10s for the new shares, on taking them to Messrs Price and Devot, of the Stock Exchange, who are authorised by the International Bank to act in the matter.

The meeting of the Oriental Commercial Bank took place on the 23rd instant, when an *ad interim* dividend was declared at the rate of 10 per cent. per annum. This will absorb 5,738*l*, and leave 3,913*l* to be carried forward.

The report of the English and Swedish Bank for the half-year, ended 30th June, has been issued. The net profits, including a balance of 2,224*l* brought forward from last account, are stated at 14,156*l*, out of which the directors recommend an *ad interim* dividend of 8s per share, free of income tax, leaving 6,239*l* to be carried forward.

At the meeting of the Submarine Telegraph Company, held on Tuesday, the accounts for the half-year showed a net balance of 8,009*l*, and a dividend was declared at the rate of 6 per cent. per annum.

An extraordinary meeting of the proprietors of the Estates Bank (Limited) was held on Tuesday, when a motion for an amalgamation with the General Exchange Bank (Limited) was carried unanimously.

At a special meeting of the proprietors of the National Bank, on the 22nd instant, resolutions were unanimously adopted creating 10,000 new bonus shares of 50*l* each, 30*l* paid. The shares are to be presented, free of all charge or payment, to the proprietors on the register on the 31st inst., in the proportion of one bonus share to every four held by them.

At a meeting of the Continental Bank Corporation, held on Wednesday, the resolution previously passed, in favour of the undertaking being wound up voluntarily, was confirmed. The business is merged into that of the London and Mediterranean Bank.

By the Brazil mail, *via* Bordeaux, the directors of the Rio de Janeiro City Improvements Company (Limited) have received a second remittance, amounting to 6,856*l*, from the Imperial Government, in respect of the payment for houses drained in the first district for the half-year ended 30th June last.

The West Worthing Mansions and Hotel Company, with a capital of 100,000*l*, in 20*l* shares, is announced. The object of the Company is to combine the business of keepers of lodging and boarding-houses upon an extensive scale. Provisional arrangements have been made for the purchase of two large mansions well adapted for the purposes of the Company.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1¼ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 2-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is 108¾ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Aug. 19, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	45,752 3	43 1
Barley	922 1	27 11
Oats	2,307 6	23 10

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of old and new English wheat on sale at Mark lane, to-day, was moderate. The bulk of the latter having come to hand in very middling condition, holders of good and fine old samples were very firm in their demands, and as regards these qualities, prices were the turn higher than on Monday. For *new* home-grown wheat, the trade was slow, as follows:—Red, 40s to 46s; white, 43s to 50s per quarter. In foreign wheat, a fair business was transacted, at full prices. Barley was in short supply, and previous quotations were well supported. Oats—owing to the large importation—were somewhat easier in price; but beans and peas changed hands at fully late rates. The flour trade was steady, on former terms. This week's imports amount to 16,780 quarters of wheat; 3,050 barley; 96,490 oats; and 30 sacks of flour.

At Liverpool this morning, wheat was 1d to 2d per cental dearer than on Tuesday. Maize was 6d per quarter cheaper; but flour ruled firm in price. At Wakefield, fine old wheats changed hands at an advance in price of 6d per quarter.

The Liverpool cotton market opened with a moderate demand on Saturday last, which was well maintained till the middle of the present week, when the inquiry again slackened under the pressure of the late heavy arrivals, which have been placed very freely on the market, and consequently a decline of about ¼d per lb upon the prices of Friday last has been submitted to, the small giving way in prices proving how healthy the present position of the article is regarded by most holders. The total sales of the week have amounted to 87,000 bales, of which spinners have taken

Digitized by Google

65,000 bales, speculators 12,000, and exporters 10,000 bales. The week's imports are 18,600 bales, and to-day's stock 430,000 bales. To-day the market closes with a good demand; sales 10,000 bales, prices firm.

We learn from New Orleans that during the week ending Aug. 1, a limited business was transacted in cotton on rather easier terms. Ordinary was quoted at 30c to 34c; good ordinary, 36c to 38c; low middling, 40c to 42c; and middling, 44c to 45, per lb. The receipts since Sept. 1 had amounted to 183,919 bales and the exports to 124,414 bales. The stock on the 1st inst. was 59,505 bales. During the week ending the 8th inst., the receipts of produce were large, viz., 19,500 bales, and the stock was thereby increased to 66,500 bales, whilst middling quality was quoted at 43c to 44c per lb.

Postal advices from Bombay are to July 22. During the fortnight prior to that date, a decline of 30 to 35 rupees per candy took place in prices; but at this reduction considerable business was transacted. Oomrawuttee, Akote, and Hingenghaut produce were chiefly in request. The fresh supplies of cotton were received principally by railway. The annexed tables of prices and exports are from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, July 22.

Freight to Liverpool, 12s 6d to 25s per ton.

Via the Persian Gulf, we learn from Bombay that the shipments of cotton, for the week ending Aug. 19, were only 9,500 bales. The market had been very quiet.

The cotton trade at Alexandria during the week ending Aug. 12 was tolerably firm. Fair open-ginned produce was quoted at 16½d; good fair ditto, 17½d per lb. Freight to Liverpool, 11-16d per lb. The following table of shipments is from the Egyptian Commercial and Trading Company's circular:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 3 to July 31.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1860—1861	99,880	37,674	8,410	145,964
1861—1862	120,180	23,602	7,067	150,849
1862—1863	169,903	38,639	9,360	217,902
1863—1864	238,817	61,920	14,220	314,957
1864—1865	310,767	69,980	9,532	390,279

On the whole, the markets for colonial and foreign grocery produce have ruled steady. In some instances a slight reduction has taken place in prices; but the total amount of business transacted is tolerably large, and produce possessing quality has realised quite last week's quotations. As regards rice, owing to continued firmness in the wheat trade, the late improvement in the currency is well supported. A few cargoes of *new* fruit are now on passage to this country, and may be expected to arrive shortly. Last week, duty was paid on 1,208,068 lbs of tea; whilst the export for the week ending August 17 was large, viz., 1,179,575 lbs, making a total of 2,387,643 lbs, against 1,227,758 lbs last year.

From Havana to Aug 2, we learn that owing to an active demand for sugar for shipment to the United States, prices had considerably improved. The arrivals of produce had been of very moderate extent. The subjoined statement of prices and table of exports is from Messrs Scharfenberg, Tolme, and Co.'s circular:—No. 7 to 9, 21s 10d to 23s; No 10 to 11, 23s 7d to 24s 2d; No. 12 to 14, 24s 8d to 25s 11d; No. 15 to 16, 26s 5d to 27s; No. 17 to 18, 27s 6d to 28s 9d; No. 19 to 20, 28s 9d to 29s 3d; inferior whites, 26s 5d to 27s 6d; good, 29s 11d to 31s 2d; florete, 32s 1d per cwt, free on board, without freight.

EXPORTS of SUGAR from HAVANA and MATANZAS, from Jan. 1 to July 31.

Total	1,339,154	70,922	991,490	58,247

From Cardenas, 48,953 hhds 24,366 boxes, against 47,843 hhds 20,166 boxes in 1864. Stocks in Havana and Matanzas, 268,000 boxes, against 316,000 boxes in 1864, and 256,000 boxes in 1863.

The demand for wool at the public sales of colonial produce now in progress is steady, as far as the home trade is concerned; but the inquiry for the purpose of export is decidedly limited. Price remain as at the opening of the series—firm for all good and fine wools, but with a downward tendency for faulty descriptio ns Privately, the English wool trade is quiet, at late rates.

In the silk trade there has been considerable activity. China produce has been extensively dealt in, at 27s to 30s for Tsatlees, and 23s to 27s for Taysaams. A large business has been done in silk to arrive.

Tin is lower in price; but in the value of other metals, very little change has taken place. The total business passing in the market is limited. Scotch pig iron, 54s 9d cash, mixed numbers; Banca tin, 87*l* to 88*l*; spelter, 22*l* 5s per ton.

Most oils have ruled firm. Linseed commands 32s 3d; foreign refined rape, 47s 6d per cwt; and sperm, 95*l* per tun. New P.Y.C. tallow is quoted at 44s 3d to 44s 6d per cwt on the spot.

Business in cotton goods at New York, during the week ending August 12, was somewhat restricted. Buyers appear to have limited their purchases to the supply of their immediate wants, anticipating shortly a reduction in prices, owing to the continued and somewhat extensive influx of raw produce from the Southern States, coupled with a steady decline in prices. The trade for woollen goods was firm, at full quotations; and silk goods changed hands at fully previous rates. In other departments of trade, about an average business was transacted, at full prices. The stock of bullion in the banks of New York city on the 5th instant was 3,480,100*l*, and the balance in the sub-treasury, 12,188,180*l*. For money there had been a good demand, at 7 to 9 per cent. for short-dated paper. The shipments of specie from Jan. to Aug. 5, were 3,729,500*l*, against 6,237,910*l* last year; 5,168,690*l* in 1863; and 7,283,900*l* in 1862. The foreign imports from Jan. 1 to Aug. 5, were valued at 20,390,470*l*, against 30,101,800*l* last year; and 21,522,360*l* in 1863.

The exports of treasure from California for the six months ending June 30 in each of the last four years were as follows:—

Destination.	1862. £	1863. £	1864. £	1865. £
New York	2,258,170	1,130,195	1,121,590	1,399,360
England	843,380	3,001,690	3,967,050	1,953,910

Cotton was in improved demand in the early part of the week, and on Saturday and Monday a large business was done, with a considerable advance upon the lowest sales of the previous week; but since Tuesday the market has been dull, and closed yesterday with little change from last week's quotations. Sea Island has been in good demand at previous rates. American continues in good request, but in some instances a decline has been submitted to of ¼d per lb. In Brazil rather a large business has been done, but the demand has fallen off since Tuesday, and no change can be made from last week's rates. Egyptian has been in good request, and early in the week was slightly dearer, but has since been freely offered, and closed at last week's quotations. Though the stock of Symrna is small it is freely offered, and prices are ¼d to ½d lower than last week. In East India the operations have been to a considerable extent, and full rates were current at the commencement of the week; the late arrivals have since given buyers greater choice, and they have been ably to supply themselves at a decline of about ¼d per lb, especially in the better qualities. The business in China and Japan has been limited in consequence of the small supply offering, and the comparatively high prices demanded.

To arrive only a few transactions have been reported; the last quotation for Egyptian was on Wednesday, for fair open, at sea, 16¾d per lb, and Dhollerah on Saturday, fair new merchants, June sailing, 12½d per lb.

The sales of the week amount to 87,190 bales, including 12,460 on speculation, and 25,620 declared for export, leaving 49,110 bales to the trade. The sales to-day amount to about 8,000 bales, the market without change.

IMPORTS, EXPORTS, CONSUMPTION, &c.—1865.

LONDON—August 25.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened quietly; but on Saturday and the early part of the week there was an improved demand, and a fair extent of business was transacted. During the last two days there has been less animation, and the market closes dull, but as holders are not pressing their stocks, no actual decline in prices can be noticed. With few exceptions, our quotations of Friday last are maintained.

NEW YORK—Aug. 12.

Prices during the week have fallen 2 cents per lb. At one period they exhibited a fall of 3 cents from Saturday last, but during the last few days the tendency has been in a favourable direction. Middling upland produce is quoted at 45 cents per lb. The receipts have amounted to 14,400 bales, of which the chief import is from New Orleans to the extent of 5,500 bales. The total import since Sept. 1 is now 340,850 bales. The prices current are as follows:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.

MARKETS IN THE MANUFACTURING DISTRICTS

The amount of business doing in goods this week, both for home use and export, has been very moderate. Prices, however, have continued firm. The demand for iron has ruled steady at full quotations. The transactions in coals have been very large at steady currencies.

MANCHESTER, Aug. 24.—During the past few days a considerable business has been done in this market. For India shirtings there has been a fair demand, and manufacturers have been able to obtain rather better prices than during last week, when a number of forced sales were made. For domestics, printing cloths and yarns of various classes, there has been a fair demand, but producers have been willing sellers, and lower quotations are generally current. The market to-day has been very tame, and there is some slight giving way in prices.

BRADFORD.—Some not inconsiderable transactions have taken place in wool, and the tone of the market is stronger, with prices the turn harder. Yarns—The demand has been chiefly for super 30's, and in a less degree for 28's. Twofold 36's have also been in request. Business in piece goods upon the whole continue good, and prices steady.

LEEDS.—Most of the wholesale London and other large houses having lately purchased freely of goods for the fall trade, there is a lull in the demand from the merchants at the present moment. The same may be said, too, as to the foreign trade.

HUDDERSFIELD.—Selections from better class goods in fancy trouserings and coatings have been freely made. Lower priced woollens and unions have again been slow sale, there being only a small shipping demand. More heavy goods of different kinds are beginning to be required for the home trade, witneys again appearing to take the lead for winter overcoatings, so far as first parcels are concerned.

ROCHDALE.—The operations of merchants are limited in every department, and the reason assigned is in the persistence in high prices, which buyers contend might reasonably be lowered.

LEICESTER.—There is a seasonable amount of business doing in hosiery. In the country districts business remains healthy.

Digitized by Google

Worsted yarns are firm and high in price, and spinners are well employed. Cotton yarns are also dear. There is a shade more nquiry for wools, and high prices are quoted.

NOTTINGHAM.—The lace trade remains, on the whole, quiet, and there has not been much doing in any branch, except perhaps in black silk laces, for which there is yet a fair demand. There is a full average amount of business doing in most branches, and the workpeople continue well and fully employed. Manufacturers have orders on hand, and no stocks whatever are created.

CARDIFF.—The prevalence of unfavourable weather has slightly checked trade at the docks, but matters are beginning to right themselves again. Rails are in good demand, and American specifications are gradually increasing in number and quantity. Quotations average from 7*l* to 7*l* 10*s* per ton at the works. Bars and other descriptions also command a full average inquiry. Continental buyers of steam coal are purchasing considerably, and merchants report that there is a pretty good demand.

SHEFFIELD.—Several houses have considerable orders on hand for America and India, and there is a fair business for Germany and other continental States. The home markets are rather more languid in several branches, owing to the unsettled weather.

WOLVERHAMPTON.—The demand for manufactured iron shows a steady continuance of the improvement previously noticed. The merchants are giving out their orders most freely, and some of the makers have sufficient orders for some weeks for hoops and sheets.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 12.—Rather more business has been transacted in breadstuffs this week. Owing the continuance of unfavourable accounts respecting the weather in certain States, speculators have transacted considerable business both in flour and wheat, and prices, in consequence, have had an upward tendency. The market, however, closes with less firmness. The receipts of the week amount to 71,500 barrels of flour, 313,790 bushels of wheat, and 490,240 bushels of corn. The prices current are as follows:—Flour—State, superfine brands, $5.90 to $6.15; State, extra brands, $6.50 to $6.55; State, choice brands, $6.60 to $6.75; Ohio, common brands, $7.95 to $8.30; Ohio, fancy brands, $8.35 to $8.45; Ohio, good and choice extra brands, $8.50 to $9.65; Michigan, Indiana, Wisconsin, &c., $5.90 to $6 90; Genesee, extra brands, $6.80 to $9.25; Missouri, $10 to $12.75; Canada, common, $6 to $6.80; Canada, good to choice extra, $6.90 to $9.25 per barrel. Wheat—Milwaukee Club, $1.43 to $1.45; choice amber Milwaukee, $1.46 to $1.48; winter red State, $2.02½. Corn—Unsound 89c to 90c; sound mixed Western, 90½c to 91c; high mixed, 92c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The present week's arrival of both old and new English wheat, coastwise and by land-carriage, has been only moderate. The new samples having come to hand in but middling condition, really fine qualities have changed hands freely, at fully previous rates; but inferior kinds have moved off slowly, at irregular quotations.

The show of foreign wheat has been tolerably good. The transactions have been only moderate; nevertheless, prices have been fully supported in every instance. New English barley has been disposed of at 32s to 34s per quarter; but some of the samples were sprouted. Foreign qualities have moved off freely, and, in some instances, the quotations have had an upward tendency. There has been a steady inquiry for malt, at extreme rates. The supply continues seasonably extensive. Although the imports of foreign oats have been very large, the oat trade has continued steady, and prices have had an upward tendency. Both beans and peas have moved off steadily, at full quotations. American flour has further advanced 1s per barrel, and English qualities have realised extreme rates.

Most of the country markets have been scantily supplied with produce, for which the demand has ruled steady at very full prices.

On the Continent, wheat and flour have produced rather more money, and other articles have realised very full rates. The export trade in America has continued moderate.

Owing to the changeable state of the weather, the progress of harvest-work has been much interrupted, and some of the wheats have been carried in a damp state. In the forward counties, however, most of the crops have been secured.

The Scotch markets have been very scantily supplied with all kinds of produce, for which the demand has ruled steady at full quotations.

In Ireland, the corn trade, generally, has been firm on former terms. The supplies of most articles have fallen off.

Fresh up to Mark lane, to-day, the arrivals of English wheat were moderate. *New* produce was received in very middling condition, consequently the trade for old produce was decidedly firm, and good and fine old parcels changed hands at the extreme rates of Monday. No change took place in the value of barley. Oats, owing to the large importation, were the turn in favour of buyers. Beans and peas were in short supply, and changed hands at full prices. The flour trade was heavy, at full currencies.

Mr George Dornbusch reports the arrival off coast of 24 vessels laden with grain. The demand for wheat has improved, and prices have advanced 1s to 2s per quarter. Arrived Taganrog Ghirka has sold at 42s 6d per quarter. Barley has risen 6d, and all other produce has continued firm.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened quietly, but has since been more active. Up to yesterday (Thursday) afternoon, 3,520 casks West India had sold at full prices, including the various parcels by auction. Barbadoes, 29s to 35s; Jamaica, 29s to 33s per cwt. Other descriptions remain unchanged, and the transactions since Friday have been upon a moderate scale. Some few parcels of low sugar at auction and by private contract sold on former terms. The home deliveries exceed last year's by 19,950 tons, those for export by 11,290 tons. Present stock, 106,800 tons, against 97,200 tons at the same date last year.

Mauritius.—4,852 bags of the lower qualities sold by auction on Tuesday, at about previous rates: brown, 26s 6d to 30s 6d. Some

Digitized by Google

business has been done privately in grainy and crystallised sorts, at 34s 6d to 38s 6d per cwt.

Bengal.—600 bags Khaur have been sold at 27s 6d.

Madras.—2,700 bags dark grainy Jaggery are reported at 26s 6d per cwt.

Manilla.—2,000 bags muscovado have sold at 28s per cwt.

Natal.—492 bags obtained 27s 6d to 31s 6d per cwt.

Foreign.—179 casks Porto Rico, offered by auction, were chiefly taken in at 31s to 35s; also the greater part of 2,400 boxes of Havana at 32s 6d to 37s. A few lots at 11s 8d duty brought 38s. A floating cargo of Cuba is reported at 22s 3d for the United Kingdom. One of Havana, No. 10½ to 11, at 24s 6d. Two of Havana for the Baltic: No. 14, at 27s; No. 13, at 26s 6d per cwt.

Refined.—The market continues steady.

RUM.—A better demand prevails, with rather large sales. Demerara, 1s 8½d to 1s 10d; Leewards, 1s 7d to 1s 8d.

MOLASSES.—350 puncheons West India have sold this week at 14s 6d per cwt.

COCOA.—148 bags Trinidad, by auction, sold at previous rates: ordinary to middling, 65s to 80s; good to fine, 83s to 110s per cwt. The consumption of West India has been in excess of last year's, and the present stock of 12,200 bags is moderate.

TEA.—The market is not very active, but the common kinds of congou and fine green teas meet with some inquiry. 2,861 packages Indian growth sold readily at full prices, low broken kinds being rather cheaper.

COFFEE.—A steady demand has prevailed, at the reduced prices of last week to a further slight decline upon plantation kinds. The supplies have been large, and numerous public sales are declared for the ensuing week. 1,300 casks 755 barrels and bags, by auction, chiefly sold: low and pale, 75s to 77s; low middling to fine, 78s to 87s 6d. 1,441 bags native went off steadily, at 66s to 67s 6d; superior, 69s 6d. 122 half-bales Mocha were chiefly taken in at 95s for short-berry, badly garbled. 82 cases small yellowish Cochin realised 78s to 78s 6d. 100 bags pale Manilla were taken in at 70s. A floating cargo of Rio has sold for the Mediterranean, but the particulars do not transpire.

RICE.—All kinds continue firm, in consequence of the bad weather for the harvest, but there was not much speculative demand up to yesterday. Several parcels soft grain have sold at 9s 9d to 10s 3d on the spot; some white Bengal at 12s 1½d to 16s 3d. A floating cargo of Necrancie Arrican sold for a near continental port at 10s per cwt.

IMPORTS and DELIVERIES of RICE to August 19, with STOCKS on hand.

Stock	20000 ...	28440 ...	40520 ...	61500

SPICES.—A few cases nutmegs and mace sold by auction at full prices. Black remains steady, with a few parcels of Penang and Singapore, selling by private contract at previous rates. 2,626 bags by auction were mostly taken in, viz., 1,967 bags Trang at 3⅛d to 3¼d. 445 bags old Batavia at 3d. 214 bags Malabar were sold at 4¼d for heavy black of old import. 5,116 bags Zanzibar cloves sold steadily at 3d to 3⅜d per lb. 71 cases cassia lignea: pile 1 at 86s; pile 2 at 83s. A good deal of business done privately. 205 bags African ginger were taken in at 37s. 136 barrels Jamaica sold steadily at 68s to 89s per cwt.

SALTPETRE.—A parcel of fine Bengal, at 23s 6d per cwt, s the onlyi transaction reported.

IMPORTS and DELIVERIES of SALTPETRE to August 19, with STOCKS on hand.

DYESTUFFS.—Gambier has further declined to 19s 6d to 19s 9d per cwt.

SHELLAC is firmer; and some kinds rather dearer.

METALS.—A quiet tone still pervades the market. Some few contracts have been made in spelter, at 21*l* 17s 6d to 22*l* 5s, according to conditions and time of delivery. A few sales have been made in Straits tin, at 87*l* 10s to 88*l* 10s per ton, according to conditions. The demand is now more active. Copper remains dull.

MANILLA HEMP.—3,500 bales offered by auction sold at 32*l* 5s to 35*l* for fair to good roping, being rather under the highest price attained last week.

JUTE.—The sales on Wednesday comprised 4,425 bales, which sold at easier rates in some cases: low to good, 11*l* to 21*l* 5s per ton.

OIL.—Rape continues active. Linseed oil has advanced, 32s to 33s 6d being paid, according to date and delivery. Cocoa-nut firmer: Ceylon, 43s to 43s 6d; Cochin, 45s 6d. Palm firm, and fine is worth 32s 6d to 37s 9d per cwt. Olive dull. Two cargoes of Seville have sold: one at 50*l* 10s, for Russia; one at 48*l* 10s per tun, for the United Kingdom.

TALLOW.—Advices of higher prices from Russia, with the reduced supply and high value of English, gave a further impetus to speculation since last Friday, first sort new Petersburg Y.C., on the spot, touching 45s. The market has since been less animated, with some reduction: first sort Petersburg Y.C., 44s 6d; October to December, 44s 9d; January to March, 45s 6d to 45s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, August 21, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firmer. 1,813 casks West India sold, making 5,332 casks for the week. 350 tons grainy Madras Jaggery are reported at 27s, being rather dearer. A floating cargo of Havana, No. 14½, sold at 26s 6d; one of Cuba at 22s 3d for the United Kingdom. 1,442 bags Mauritius, and 2,576 bags Penang, by auction, went at previous rates.

COFFEE.—500 casks plantation Ceylon, and 130 cases East India sold at about previous rates.

RICE.—A cargo of Bassein sold at 10s 10½d or 11s 6d, according to destination. 4,900 bags new Rangoon, by auction, part sold at 12s. 40,000 bags soft grain, privately, at 9s 6d to 10s 6d per cwt.

OIL.—By auction, 110 tuns sperm were chiefly withdrawn at 100*l* per tun.

TALLOW.—450 casks, by auction, chiefly sold: Australian, 42s to 42s 9d; Taganrog, 41s to 45s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been better supported this week, lowest price 41s 6d for low grocery titlers. Dutch crushed unaltered.

GREEN FRUIT.—The market this week is dull for lemons, in consequence of demand being checked by former high prices and large arrivals per last steamer, which caused sales by Keeling and Hunt to be five to seven shillings lower. Nuts in good demand; there being a failure in the Spanish crop, it is anticipated all nuts will much improve.

DRY FRUIT.—The market continues without animation. The first cargo of new Valencia raisins is expected at this port early in the ensuing week.

ENGLISH WOOL.—Very quiet.

COLONIAL WOOL.—The sales progress firmly without change from opening.

HEMP.—Russian is steady, although but little business passing this week in the article.

FLAX is firm, and holders demand full rates.

SILK.—The silk market has been more quiet this week without much change in price; in Chinese and Bengal rates are easier.

TOBACCO.—The American descriptions purchased have been confined to immediate requirements at steady prices. Other growths have continued in good demand, and sales effected to some extent at outside quotations.

LEATHER AND HIDES.—At Leadenhall, on Tuesday, the supply of fresh leather was small, but it was generally adequate to the wants of buyers. An average amount of business has been done throughout the week, and prices are unaltered. The articles in the smallest supply were good crop hides, 45 lbs and 50 lbs, light common dressing hides, light shaved hides, strong English bellies, light calfskins, good heavy Spanish horse hides, and prime kips.

METALS.—There is very little to be said about metals, as they are nearly all dull of sale. Copper is unchanged, although the accounts from India show some slight improvement. Iron is steady for the most part, but some kinds are a shade weaker. Tin keeps at last week's rates. Spelter steady, but little doing. Lead barely so firm. Tin plates in good demand at full rates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	47	3
Fat by ditto	2	3½
Yellow Russia	46	0
Melted stuff	34	6
Rough ditto	19	0
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Aug. 24.—Our market to-day was very moderately supplied with beasts, chiefly in middling condition. Prime breeds moved off freely at prices quite equal to Monday last. Otherwise, the beef trade was heavy at barely late rate rates. The top figure was 5s 4d, the extreme, 5s 6d per 8 lbs. The show of sheep was rather limited, nevertheless the mutton trade was quiet on former terms. A few Downs and half-breeds sold at 6s 8d per 8 lbs. The few lambs on off were disposed of at from 6s to 7s per 8 lbs. Calves moved off slowly at late rates, viz., from 4s 2d to 5s 2d per 8 lbs. Pigs were quite as dear as last week; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

Lambs, 5s 0d to 6s 0d.

HOP MARKET.

BOROUGH, Friday, Aug. 25.—The plantation accounts being favourable, picking having been fixed to be pretty generally commenced early next week, with the prospect of an abundant crop, very little business is passing in any description of hops. Prices are without material change. New hops are quoted at 6*l* to 9*l* per cwt.

POTATO MARKETS.

BOROUGH, Friday, Aug. 25.—Moderate supplies of potatoes are on sale. The trade is slow, at about previous rates. Regents, 60s to 100s; Shaws, 50s to 70s per ton.

Digitized by Google

COAL MARKET.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 25.—There has been rather more business done this week than during the preceding one, but prices show in some cases a slight tendency in favour of buyers, whilst some descriptions cannot be moved at all for want of demand.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 25.—The market moderately attended. Wheat must be quoted 1d and 2d dearer than on Tuesday, but business is small. Flour is offered at Tuesday's rates. Indian corn 6d lower for mixed American. No change in other sorts. Beans firm. Oats and oatmeal in moderate request at former rates.

The Gazette.

TUESDAY, Aug. 22.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 12th of August, on 12,154 miles, to 767,227*l*, and for the corresponding week of last year, on 11,801 miles, to 731,080*l*, showing an increase of 353 miles and of 36,147*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,671 miles, to 633,506*l*, and for the corresponding week of 1864, on 8,420 miles, to 606,646*l*, showing an increase of 251 miles and an increase of 26,860*l*.

Annexed are the traffic returns of some of the American railways for July:—

	Miles Open.	1864. do's.	1863. dols.	Increase dols.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 21.—In the share market to-pay a merely nominal amount was transacted, and the few movements in the closing prices were general about equal in both directions, the exceptions being that British mines were rather firmer and American securities weaker. In English railways, North British improved 1. North-Western ½; Great Northern (A stock) and Metropolitan relapsed ¼ each, and Caledonian declined ½, and Great Western a further ¼. In colonial, Melbourne and Hobson's Bay improved 1. In foreign, Central Argentine receded ¾, and Lombardo-Venetian a further ¼. In American, United States (5-20's) and Erie shares (paid-up) declined ¼ each, and Illinois Central shares ½. In British mines, Chiverton improved ¼, East Caradon ½, and West Caradon a further 1. In foreign mines, Linares receded ½.

TUESDAY, Aug. 22.—In the share market to-day the transactions were chiefly in a few of the English railways, banks, and American securities, which severally closed with average firmness, the other descriptions being unaltered in tone. Of the English railways, Metropolitan recovered ½, South Devon advanced 1, Manchester, Sheffield, &c., Metropolitan District (paid up), and North Eastern (Leeds) improved ½ each, and Lancashire and Yorkshire ¼; North-Western relapsed ¼, and Midland receded ¼. In colonial, no movements occurred in the closing prices. In foreign, Bahia improved ¼, and Antwerp and Rotterdam ⅛; and Great Luxembourg and Sambre and Meuse declined ¼ each, and Lombardo-Venetian a further ⅛. In American, United States (5-20) recovered 1¼, Erie shares (paid up) ¾, and Illinois Central shares ½. In British mines, Providence advanced 1, East Lovell ½, and East Carn Brea, ¼; and Wheal Seton declined 5, and Clifford Amalgamated and East Bassett 1 each. In foreign mines, Port Phillip advanced ½, and Washoe Gold (of both descriptions) receded ½ each.

WEDNESDAY, Aug. 23.—In the share market to-day dulness was general, and English railways closed with a downward tendency; but the banks were rather firmer, and the other descriptions were not materially altered in tone. Of the English lines, North British advanced ½, Metropolitan relapsed ½, and South-Eastern declined 1, Blackwall and South-Western ½ each, and Midland a further ½. In colonial, Grand Trunk of Canada improved ½, and Great Western of Canada shares (of both descriptions) declined ⅛ each. In foreign, Northern of France and Paris and Mediterranean improved ½ each, and Northern of Buenos Ayres (paid up) declined 1, and Great Luxembourg a further ½. In American, Marietta bonds advanced 1. In British mines, Hingston Downs improved 1, and East Wheal Russell and Nangiles receded ¼ and 2 respectively. In foreign mines no change is recorded.

THURSDAY, Aug. 24.—In the share market to-day dulness was again the prevailing feature, and English railways, banks, and miscellaneous shares were the only descriptions which closed with a firm tendency; colonial and American were a shade weaker, and remaining descriptions showed scarcely any alteration. Of the English lines, Great Northern (A stock) improved 1, Manchester, Sheffield, &c., and Metropolitan ½ each, and North-Western ¼; Great Western declined 1. In colonial, Grand Trunk of Canada relapsed ½, and Buffalo and Lake Huron receded ¼. In foreign, Lombardo-Venetian improved ⅛. In American, Erie shares (paid up) and Illinois Central shares declined ¼ and ½ respectively. In British mines, East Bassett advanced 1, and Hingston Downs ¼; and South Caradon went down 20. In foreign mines, Frontino Gold improved ⅛, and St John del Rey declined 1.

FRIDAY, Aug 25.—There was a good demand to-day for British railway securities, and the variations in prices was in an upward direction. Great Northern A stock was in prominent request, and advanced 1½ per cent. Midland has also improved ⅝; Great Northern (Original) and Great Western, ½; South Eastern, ⅝; and London and North-Western and Metropolitan, ¼. Indian, Canadian, and foreign railway shares were unaltered.

THE HEAD AND HEART LEGACY.

"Po sessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take theo by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity wil be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

London: Tweedie. 337 Strand.

PRICE 6d EACH VOLUME.

Preparing for Publication,

THE YOUNG MAN'S LIBRARY OF USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been turned to gentleness and affection by the natural painting of a Shakespeare or a Scott; a Goldsmith or a Burns."—STRAGGLET THOUGHTS.

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

JOHN BENNET LAWES, F.R.S.,

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

NEW THEATRE ROYAL ADELPHI,

Sole Proprietor and Manager, Mr B. Webster.

This popular Theatre will re-open on Monday, Sept. 4th next, entirely re-painted and re-embellished and the seats throughout re-stuffed and re-covered in costly material in order to increase the comfort and accommodation of the numerous patrons of this establishment. The Season will open with the engagement of Mr Joseph Jefferson, who will make his first appearance in this country in a new and original drama, written expressly for him by Dion Boucicault, Esq. Further particulars will be published in a few days.

ROYAL POLYTECHNIC.

N.B.—Lists of Heirs at Law, Next of Kin.

SALOM'S NEW OPERA AND FIELD

GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Gurvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of these present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

Henry Tottie, Esq.	MANAGER IN GOTHENBURG.
Pehr Wikstrom, Esq.	William Walker, Esq.
MANAGER IN STOCKHOLM.	
Arthur Crump, Esq.	

REPORT.

The Directors have the pleasure to submit to the shareholders the annexed statement of accounts for the half-year ending the 30th June last, duly examined and certified by the Auditors. It will be seen that the gross profits for this period, including a sum of £2,224 8s 1d brought forward from the last account, amount to £26,421 17s 6d, which, after paying current expenses and deducting rebate of interest, &c., leaves a balance of £14,156 7s 3d. Out of this the Directors, in accordance with the powers conferred on them by the articles of association, have the satisfaction of declaring an interim dividend of 8s per share, free of income tax, carrying forward a balance of £6,238 19s 5d to the next account.

The Directors have reluctantly accepted the resignation of Mr J. A. Hankey as Chairman, in consequence of his proposed lengthened absence from England, but he will still retain his seat at the Board. Mr William Tottie has been elected his successor in the chairmanship of the bank.

The Directors much regret that death has deprived them of the valuable services of Mr Wm. Gibson, member of the Gothenburg local board, while at Stockholm they lose the able co-operation of Mr C. D. Arfwedson, whose other business engagements have necessitated a resignation of his seat at the local board. Mr B. Almquist, who had previously held the office of auditor at this branch, has been elected to fill the vacancy.

The Directors are happy to say that the reports from the branches show that the business of the Bank continues steadily to progress, both at Stockholm and Gothenburg.

The enclosed dividend warrant is now payable at the Consolidated Bank, 7 Fenchurch street.

GENERAL BALANCE SHEET, for the Half-year, ending June 30, 1865.

Bombay,	Rangoon,	Hong Kong,
Kurrachee,	Singapore,	Shanghai, and
Calcutta,	Batavia,	Hankow.

The Corporation buy and sell, and receive for collection, Bills of Exchange payable at the above-named places; issue Letters of Credit; undertake the Purchase and sale of Indian Government and other Securities; and conduct all general banking business.

Deposits of money, subject to ten days' notice of withdrawal, are received, bearing interest at one per cent. below the Bank of England minimum rate, rising and falling therewith, but not exceeding five per cent. per annum, at which last rate Deposits for not less than twelve months are received, the Interest being payable half-yearly. For longer periods a higher rate is allowed.

THE NATIONAL BANK.

—At a SPECIAL GENERAL MEETING of the proprietors, held on the 22nd inst., the following Resolutions were unanimously adopted:—Resolved,—

First. That the capital of the Society, which was originally £1,000,000, and which was by resolutions passed at two successive General Meetings of proprietors, held on the 23rd day of March and the 24th day of March, 1864, increased by the creation of 20,000 new shares of £50 each, shall be further increased by the immediate creation and issue of 10,000 new shares of £50 each, so as to increase the entire capital of the Society to £1,500,000.

Secondly. That such last-mentioned new shares shall on or under date of the 31st August instant be distributed by the Directors among the proprietors on the register at the time of such distribution in the proportion of one new share for every four of the existing shares, and each such new share shall be credited by way of bonus with £30 paid up by transfer to capital account of that amount from the rest, or undivided profits of the Society, to the intent that such new shares may then be upon the same footing in every respect as the existing shares. And with respect to proprietors of three shares only or less, or of more than four shares not being a multiple of four, each odd share shall entitle the proprietor of it to one-fourth part of such bonus of £30 in respect of one new share. And the Directors may give to each holder of any such odd share or shares such certificate or certificates under the hands of any two or more of them of his or her interest in respect to a new share, and of his or her right to dispose of such interest, but so that such disposition, if not to an existing proprietor, shall be subject to the approval of the Directors, and shall in any case be verified by lodgment of the certificate at the Company's office, in Old Broad street, on or before the 31st day of December next.

Thirdly. That after the 31st day of December next the shares created in respect of such odd shares, and not previously disposed of under the last resolution, may be sold by the Directors, who in that case shall place to the credit of the parties entitled thereto respectively in the books of the Bank, without interest, the amount realised from the sale of such shares.

Fourthly. That the proprietors of the new shares now created shall hold the same and subject to the same terms and regulations, and with the same rights and privileges, upon and subject to which the original shares in the Society are held.

Fifthly. That every proprietor or other person to whom any of the new shares now created shall be allotted or sold under the foregoing resolution shall, at such time and at such place as the Directors may specify, execute such deed or instrument as the Court of Directors shall require for the purpose of making him, her or herself liable to the rules and regulations of the Society in respect of the new shares or shares so allotted or sold to him or her.

Sixthly. That the provisions embodied in the foregoing resolutions shall be new regulations and provisions of the Society, and such resolutions shall accordingly be considered as amending, altering, or repealing the existing regulations and provisions, so far as they may be inconsistent with such new regulations and provisions.

JOS. N. McKENNA, M.P., Chairman.

M. J. POWER, Secretary.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advances (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 77 Change alley, Cornhill, E.C.

WARRANT FINANCE COMPANY (Limited).

Capital subscribed, £1,000,000; paid-up, £200,000.

DIRECTORS.

SIX PER CENT. DEBENTURES, for Five, Seven, or Ten Years.

NATAL LAND and COLONISATION COMPANY (Limited).

Capital, £365,000, in 36,500 shares of £10 each; half called-up.

BOARD OF DIRECTORS.

Sir James D. H. Elphinstone, Bart., Chairman.

J.P. Brown-Westhead, Esq.	J. T. Mackenzie, Esq.
The Hon. F. C. Drummond.	William Miller, Esq., M.P.
Fred. Bolleau Elliot, Esq.	The Hon. William Napier.
John Gillespie, Esq.	

BANKERS.
Messrs Smith, Payne, and Smiths.
The London and County Banking Company.
Offices—41 Threadneedle street.

The Natal Land and Colonisation Company ISSUE DEBENTURE BONDS, bearing interest at the rate of 6 per cent per annum, payable half-yearly at Messrs Smith, Payne, and Smiths, on the 1st of Jan. and the 1st of July, for periods of five, seven, and ten years, and in amounts of £100, £200, and £500, payable to order or bearer.

The money so raised is for investment in the British colony of Natal, in loans on first mortgages of real property valued as for forced sale, at from two to three times the amount of the sums advanced.

The assets of the Company as against the total authorised amount of £250,000 of debentures may be thus estimated:—

	£
Property in Natal mortgaged to the Company (yearly increasing in value), valued as for forced sale at, say, not less than.....	625,000
Uncalled capital of the Company.....	182,500
Land in the possession of the Company taken at cost price.....	95,000
Balance of share capital, cash, effects, and securities	87,500
Total.....	990,000

Forms of application may be obtained at the offices of the Company.—By order,
London, Aug., 1865. G. E. BREFFIT, Secretary.

THE OTTOMAN COMPANY (Limited).

COMMISSION MERCHANTS and FINANCIAL AGENTS.

Capital, £500,000, in 25,000 shares of £20 each.
With power to increase.
First issue, 12,500 shares.

This Company receives consignments of goods for sale in English and foreign markets from merchants and others in the Ottoman Empire, as well as from merchants, manufacturers, and others, in this country and abroad, for sale in Turkish markets.

Executes orders, through their agencies in Turkey, for the purchase of produce, such as cotton, wool, grain, seeds, opium, valonia, madder root, &c.

Effects the purchase of British and foreign manufactured goods, &c., on account of their correspondents in Turkey.

Assists in the introduction of industrial, commercial, and financial undertakings connected with Turkey, and acts generally as financial agents in, and in connection with, the Ottoman Empire.

All communications to be addressed to J. Lewis Farley, Esq., the Managing Director.
20 Threadneedle street, London, E.C.

MERSEY DOCK ESTATE.
LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Ten Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock Office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.
Dock office, Liverpool, July 20, 1865.

165th SALE.

CUSTOM HOUSE, London. August, 1865.—For SALE, by order of the Honourable the Commissioners of Her Majesty's Customs, at the Commercial Sale Rooms, Mincing lane, on TUESDAY, 29th of August, 1865, at TWELVE o'clock at noon precisely, the following goods for home consumption:—BRANDY, RUM, and WINE. The above goods may be viewed at the Queen's Warehouse, Custom House, Thames street, and at the London and West India Docks on Monday, the 28th August, from ten o'clock in the morning until three o'clock in the afternoon, and on the day of sale, from ten o'clock in the morning until twelve o'clock at noon; the tasting of Spirits and Wine being restricted to the day of sale as regards the Queen's Warehouse. Take Notice, that goods sold at this sale will not be delivered until after two clear days of the day on which they are sold, and that no lots can be paid for at the office of the Receiver-General after two o'clock in the afternoon.

Catalogues may be had at the Queen's Warehouse, Custom House, Thames street, Threepence each.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

MORTGAGE DEBENTURE COMPANIES.

PARLIAMENT last session passed an Act enabling limited companies, on certain conditions, to issue Mortgage Debentures based on real security and transferable by a simple process, and it is of importance to observe what is the nature of the facilities given by the Government, and what is likely to be their effect.

The Act is a very cautious one, framed after much inquiry and discussion, and studiously guards against every sort of evil which might possibly be imagined to follow from such legislation. First, it limits the nature of the company which can take advantage of it; it must be a company lending *only* on real security; and next it defines the nature of that security: it enacts:—"5. The securities upon and in respect of which such mortgage debentures may be founded and issued shall be securities affecting property in *England* or *Wales* of the following descriptions:—

(a.) Lands, messuages, hereditaments, or real property, or some estate or interests therein.

(b.) Rates, dues, assessments, or impositions upon the owners or occupiers of lands, messuages, hereditaments, or real property, imposed by or under the authority of any Act of Parliament, public or private, Royal Charter, Commission of Sewers or Drainage, or other sufficient legal authority.

(c.) Charges upon or affecting lands, messuages, hereditaments, or real property executed, made, given, or issued under the authority of any Act of Parliament, public or private.

But, from the securities described in paragraph *(a.)* shall be excepted securities upon mines or mineral property, quarries, brickfields, and factories, mills, and other buildings or works for manufacturing purposes, and also securities upon leasehold estates, determinable upon a life or lives, and not renewable or held for a term of which, at the date of the security, less than fifty years shall be unexpired, or which are subject to any rent beyond a nominal rent or a ground rent."

Next, these securities are to be deposited with the office of land registry, established under Lord Westbury's Act, not that there is of necessity to be any such investigation and warranty of title as that Act prescribes and affords to lands legitimately subject to it, but only that it may be certain that the mortgages have really been executed which are made the basis of the issue debentures. The Registrar is not to certify the goodness of the securities deposited with him, but only their existence. Next, such securities are to be valued by a competent person, so that their value and their existence, though not their legal validity, are to be ascertained by compulsory investigation.

"Upon these securities," the Act proceeds, "so from time to time registered, the company may found and issue its mortgage debentures, but so that the aggregate principal sum secured by all the mortgage debentures shall never exceed at any one time the then total amount (to be ascertained in the manner hereinafter provided) of the registered securities of the company, and also shall never exceed ten times the amount for the time being uncalled of its subscribed share capital." All such registered securities are to be charged with the payment of these mortgages, and so long as they remain in the hands of the Registrar cannot be used for any other purpose, or be made the basis of any conflicting securities.

"28. The mortgage debentures shall be for the payment of principal sums at a fixed time, to be named therein, not less than six months nor exceeding ten years from the date, with interest thereon in the meantime, at such rate as may be agreed, payable half-yearly or otherwise; and no mortgage debenture shall be issued for a less principal sum than fifty pounds.

"29. The mortgage debentures shall be numbered consecutively, begining with number one, and every mortgage debenture shall be distinguished by its appropriate number; and notwithstanding the cancellation, loss, or destruction of a mortgage debenture, no other mortgage debenture shall bear the number of that so cancelled, lost, or destroyed.

"30. There shall be endorsed upon every mortgage debenture issued under the provisions of this Act,—

(a.) The amount of the nominal capital of the company issuing the same.

(b.) The number and amount of the shares into which such capital is divided.

(c.) The number of shares issued and the amount paid up in money upon each share so issued.

(d.) The amount of the registered securities of the company as declared by the last quarterly return.

(e.) The registered office of the company.

Provided that any inaccuracies or omissions in such indorsements shall not affect or invalidate the debenture."

Digitized by Google

These debentures are transferable by endorsement in the following form:—

"FORM (E.)

FORM OF TRANSFER OF MORTGAGE DEBENTURE.

"I *A.B.* of in consideration of *l* *(state true consideration)* hereby transfer to *C.D.* of his Executors, Administrators, and Assigns, the within Mortgage Debenture. (Signed) *A.B.*"

And the company is before it begins business to deposit full returns of its nature in the Registry Office, and while it continues in business, to furnish quarterly accounts of all it does.

We own that we have great doubts as the expediency of all these provisions and especially of the deposit of the securities with the Registrar under Lord Westbury's Act. We fear that this registry will give an impression that the title of the lands registered is as good and indefeasible as that of the titles with which Lord Westbury's Act is properly concerned. Holders of debentures will fancy that the securities deposited have a peculiar Parliamentary title, whereas they have no such title at all, and may be waste paper if the legal advisers of the company have made an error. We see no necessity for this apparatus of formalities. After all these formalities, the security for the goodness of such debentures is the competence and good faith of the managers of the company, and if they must be trusted in the end they might as well be trusted in the beginning, and not have been burdened with expensive rules which do not detect incompetence and would not prevent ill faith.

What, then, are the advantages which such a company offers, first to borrowers, and then to lenders? It will help the borrower by finding him a secure lender, who will not ask for his money. A common mortgagee may descend upon the mortgagor with a brief notice, and require his money to be paid when such notice has expired. But a debenture company will certainly not of itself disturb or move securities once deposited at the office; it pays a *fee* for every such removal, and it is guarded with formal expedients to protect the debenture holders, and therefore it is the plain interest of the company to let mortgagors alone as long as they wish to be let alone and pay their interest regularly. On the other hand, there is an unnecessary publicity in dealing with a public company and the registry of securities, which is open to all the world, which will certainly deter a large class of mortgagors from having anything to do with a lender who, so to speak, cannot *help* telling what money he has lent them and where their deeds are.

Next as to lenders. These companies offer to a capitalist a very simple, and if the company be well managed, a very good form of security without the least trouble. No lawyer is wanted. The lender has only to go to the office of the company and take the debenture. He need not wait through the tedious interval, now occupied by the lawyers in finding a security to invest his principal, and he will get his interest to the day by a coupon, instead of receiving it at somewhat irregular intervals almost always, and sometimes by legal process, from the mortgagor. *But*, in the nature of things, it will be long before the public look at the ordinary mortgage on specific lands and the mortgage debenture on deposited securities as investments of the same stability. First, their lawyers will say that they are not so good, and most people believe their lawyers, and at any rate have a wholesome dread of investing their money in absolute contradiction to their advice. Secondly. Most people will prefer lending their money on visible acres known to them, and upon a title investigated by a lawyer who lives close to them and whom they know well, to lending it upon unknown acres, changing from day to day, and a title investigated by a "company," a varying compound of heterogeneous individuals whom the lender does not know, and whose competence and good faith he has at least to take on hearsay. When the company is good the notion is indeed erroneous. The company *guarantees* the title it investigates, and the lawyer does not. The company lose money by error, and the lawyer at most only loses repute, and very likely not that. When the position and good name of a company is really established, its endorsement will make a mortgage debenture a better security than a mortgage, but till it is established a very large part of the public will imagine, rightly or wrongly, the actual mortgage to be by far the better of the two.

How, then, is the company to make its money? We own we should not like to undertake to make it. The managers of such an undertaking will, if they succeed, be useful both to borrowers and to lenders; they will be a public benefit, for they will lessen the expense of distributing capital; they will transmit it more neatly than now from the hands of the lender who does not want to keep it to those of the borrower who much wishes to receive it. But will these managers make money? Can they gain a high dividend for their shareholders and for themselves? It is evident that they can only have the difference between the interest at which they lend and the interest at which they borrow, *plus* a brokerage kept down by competition. It is not likely that now, at least, borrowers will pay more to a company than they pay to individuals, or that lenders will ask less. On its mortgages the company will only get the common rate of mortgages, and on its debentures it cannot look to pay much less than that rate. Where, then, are its profits to come from?

THE PRESENT CRISIS IN AMERICA.

THE CONTRAST BETWEEN PARLIAMENTARY AND PRESIDENTIAL GOVERNMENTS.

THE American Revolution has given, on very many subjects, a striking lesson to mankind; but on no subject has it thrown greater light than on the comparative structure of what may be called the competing administrative systems of the world. By the American system the Executive is appointed by the people themselves, and, as national elections cannot take place daily, necessarily appointed for a fixed time: by the English system the substantial Executive—the Cabinet and the Prime Minister—are appointed by the Parliament, and, subject to an appeal to the people, are removable at their pleasure. Between these two the world has to judge, and, till lately, there was a strong opinion in very many minds that the American system was in many respects to be preferred. It was particularly regarded as the most popular system; it was thought to give to the nation a degree of influence in the national affairs, which no other constitution ever gave, and no people but the American had been able to bear. It is interesting to examine how far this antecedent judgment is corroborated or refuted by the events of the present crisis, which so immeasurably exceeds in magnitude all which went before it, and is one of the marking eras by which the characteristics of many years to come are determined.

Suppose that we had a rebellion in Ireland.—suppose that we conquered Ireland,—suppose that after the conquest we had to introduce into Ireland some important improvements,—that we had to pass a new Municipal Reform Act,—What would be the constitutional action? What influence would the people have on it? What care would be taken that such influence should be good? We should have a series of debates in Parliament. The Anti-Irish party—the Pro-Irish party—the party for democratic municipalities—the party for anti-democratic municipalities, would all be heard, each of them would have their special advocate in the discussion; each would state its case as well as it could state it. The head of the Executive would have the initiative in the discussion. He would have on his responsibility, and at the peril of ejectment, to propose a satisfactory measure; but he would have no coercive power, no power of anticipating and thereby superseding Parliamentary action,—no power of fixing in one way when Parliament was not sitting, that which Parliament would fix in another way when Parliament began to sit. The Minister would have the best motive to prove his measure to be good, for his place would be lost if it were not good; the Opposition would have the best motive to prove the measure to be bad, for it might gain office if it could prove that it was bad. The nation would assist at the discussion. A public opinion, a real judgment of the educated public, would be generated by the impact of argument, and the play of mind upon mind,—and that public opinion would be nearly and effectually absolute. Parliament would almost indisputably share it; and if it did not share it, it would almost indisputably obey it.

But in America the Executive has not only the initiative of discussion, but the monopoly of action. Congress is not sitting, and no one asks that it shall sit. People ask what Mr Johnson will do? He is a man whom no one expected would ever have any power; whom no one nominated to supreme power; who was appointed by accident, if we may ever use that word in this world. Yet he does what he likes. He has no Parliament to control him,—no one to contend against him. And what he does at a great crisis like this cannot be undone. The first action of the Federal Government in such

Digitized by Google

a work as the reconstruction of the South must have indefinite and enduring effects. A single false step in a matter so delicate may require years to neutralise its effects. But Mr Johnson can begin, and begin without control.

There are, indeed, certain wide limits beyond which public opinion would not permit Mr Johnson to go. He has been described in Europe as equally absolute with the Czar. But this is an error. There is a sort of magic in all *real* popular institutions (and the American Constitution is indisputably real) which gives a permeating efficacy to public opinion, which no direct institution affects and no exact law warrants. *We* cannot assign the limits to Mr Johnson's authority, yet *he* well knows that there is a marked line—a people-made boundary—beyond which he could not go. But then the public opinion which so acts, and is thus imperative, has not been effectually instructed. It has heard no debate; it has heard no discussion. Our ancestors had a saying that the House of Commons was the "Grand Inquest of the nation," —the great board of inquiry by which facts might be elicited, and by which judgment could be guided. But the Americans have at this crisis no such "inquest,"—no such argument-making and fact-eliciting assembly. They are a very busy and a very scattered people, and they have to form a decision, a notion, a fancy, as the case may be, without the help of skilled debate, and without any apparatus of sure data. Such an opinion must suffer from three defects. It cannot be exact. On a large subject, involving many details, and requiring much study, the unassisted impression of a sparse nation cannot be a real image of minute truth. It cannot, even when correct, be more than a spasmodic and vague guess, suggested by rude analogies, and supported by loose reasonings, if by any. Secondly, such an opinion cannot be ready. Over a great continent, such as the Americans possess, intellectual processes can be propagated but slowly. In a Parliamentary nation just close to the focus of debate there is a sensitive apparatus of trained minds. A political capital is a set of persons taking part more or less in political argument themselves, conversant in a greater degree than the rest of the people with political facts, more susceptible than the rest to the precise effect of political proof. They are the nearest bystanders on whom the steady light of full discussion sheds its first and great influence. But the Americans are assisted by no such guiding capital. No one there looks up to Washington, as England looks to London. In a Parliamentary nation a well-discussed opinion regularly radiates in all directions from the centre to the circumference; in a Presidential nation that opinion springs up tardily in all quarters, and is feebly transmitted to the centre of Government, in various tones, from the very circumference and from all points within the circle. Lastly, such an opinion cannot be, and is not, firm. On a hundred cases, on all complicated cases, when not strengthened by violent diffused prejudice, it feels its own weakness. It knows that it was not generated by effectual argument; that it rests upon no solid foundation of duly attested fact; that it has not been tried in the face of the people by the strife of eager advocates,—some anxious to prove that it is wrong, —others anxious to prove that it is right. Accordingly, it yields to Executive action in a manner of which in England we have little idea. It is guided,—almost necessarily guided,— by the Executive, for the Executive has considered at least such great questions as are now pending in all their detail,— whereas no one else has considered them at all.

Although, therefore, it is not at all true that Mr Johnson is emancipated from the restraints of popular opinion, it is true that the opinion to which he is subject is weak, slow, inexact, when compared with the opinion to which the magistrate of an intelligent and great people ought to be subject, and to which a Parliamentary Premier is subject. So far, therefore, from the American form of government being in any true sense more popular than the English, it is in every true sense less popular, for it gives to the people less means of forming a good judgment upon their national affairs, and less means also of obtruding that judgment on their rulers after it has been formed.

THE FRENCH FLEET AND THE FRENCH ALLIANCE.

The reciprocal courtesies interchanged between the ironclad fleets of the two greatest nations in Europe, the visits of the Achilles to Cherbourg and of the Solferino to Portsmouth in all amity and confidence, and the display of mutual respect and cordiality between former foes and rivals thus offered to the world, do not appear to have been viewed in *all* quarters with perfectly unalloyed satisfaction. There have been some doubters and some grumblers, even among ourselves, at this great picture of peace and promise. We hear from time to time a sort of *sotto-voce* growl, that there is too much ostentation in all this; that, not England, but England's magnificent ally, has a motive for the manifestation; that he is using us for his own purposes, and that his purposes are not ours; that, in short, he stands in a somewhat perplexing and critical position at the present moment, and needs us and therefore allures us; that, in the subtle and far-sighted game he is for ever playing, the friendship of Great Britain is his trump card, and he is anxious to show both to Europe and America that he holds that card in his hand.

Well! supposing this were so; supposing there were some truth in these whispered insinuations, or supposing they were all true,—still we can see no reason why we should hold back or feel one degree less gratification at the spectacle we have before us. We have not the slightest objection to be useful, nor the faintest fear of being made tools of. We do not fancy curselves to be so weak or our rulers to be so pliable and dull of apprehension, as to be in danger of being led where we do not wish to go, or committed to projects which we disapprove, or used for purposes alien to our own principles and policy. There is no reason upon earth why we should not avow to the world the full value we set upon the French alliance, the gratification we feel at every fresh increase to the cordiality of that alliance, or the earnest desire we entertain for such a continuance and augmentation of intimate intercourse between all classes as shall in time ripen what is now a friendly understanding between the two Governments into a settled union between the two nations. We have of late learned to respect the French Emperor, and he has long esteemed and valued us. We know that in many respects he is far in advance, as to political wisdom, both of his subjects in general, and of what it is the habit to call the Liberal Party among them. He may be as selfish in his aims as he is undoubtedly sagacious in his mode of working towards them and carrying them out: of course he is, for all monarchs are selfish, either for themselves or their country, or for both; nor can it be imputed to them as any great unrighteousness that they are so. But what does all this signify, unless we are blind dupes or feeble instruments?—and neither Lord Palmerston nor Lord Russell are exactly the men to be as potter's clay in Imperial hands.

The plain truth is that a cordial alliance with France is an unmixed blessing, not only to her but to England and to the world, so long as we do not purchase or retain it by any base or unworthy compliances, or suffer it to lead us into any unwise or pernicious enterprises, or to entangle us in any embarrassing or fettering engagements,—and of none of these things do we apprehend that there is much risk. Of late, indeed, if we have erred at all, we have erred on the side of being too much on our guard, too unaccommodating, too recalcitrant. We made no secret at the time of our opinion that in the original Mexican enterprise the Emperor was more consistent, logical, and judicious than ourselves. In the case of the proposed Congress we were probably wise in our decision, but we might have been more considerate and cordial in our mode of announcing that decision. In the case of Poland we were unquestionably right in what we did, but very wrong in what we said. In all these instances we gave proof enough that we were ready, if not actually to risk the French alliance, at least to incur a great diminution of its cordiality, rather than be dragged one inch out of our way or induced to move faster or further than we liked. These fears, therefore, may safely be dismissed from our minds, and these dismissed it is not easy to overestimate the value of the Alliance with France. It has (so to speak) a *reverberating* as well as a direct value. It acts on France herself by inclining her to consider the wishes and opinions of Great Britain; by accustoming her to look at our political and economical creed with greater coolness and with greater favour; by enabling our views on many subjects to percolate the French mind; by habituating her to pursue good objects in common with us, as in curbing the ambition of Russia and establishing the nationality of Italy; and slowly though surely in instilling into the minds of her politicians the belief that England does and can occasionally entertain disinterested purposes, and employ open and honourable means for their accomplishment. It has another inestimable gain: it controls, half unconsciously

Digitized by Google

but very effectually, the inadmissible ambitions and desires of France herself; she knows that England will neither join her nor approve her in unjust or oppressive enterprises; that any act of spoliation or aggression will risk the friendship of this country, and either lead to open enmity or sow rooted and perilous mistrust; and except for greatly coveted objects, and under very great temptations, she would not be willing to encounter either danger. Lastly, the alliance between the two countries, when cordial and active, is the greatest security which the smaller States of Europe can have against the iniquities of more powerful neighbours; no great national crime or oppression can be perpetrated if England and France join in saying "No;" the scandalous sin of last year—the partition of the Danish territory—would have been nipped in the bud, nay, would not even have been dreamed of, had not a coolness at that time existed between the two great nations of the West,—a coolness for which this country was far the least to blame. Unhappily, we had wounded the susceptibilities of the Emperor, though most unwillingly, by feeling ourselves obliged to thwart or disappoint him in the matter of Mexico, of Poland, of the European Congress, and of interference in the American conflict; and he resented the opposition in a manner and to a degree that so wise and powerful a Sovereign should not have done.

There is yet another reason why we should set great store upon the French alliance at this particular conjuncture, and should be willing to show openly that we do so. Upon the cordiality of that alliance, upon the confidence felt by the Emperor of the French that he may rely upon our friendship so long as he pursues beneficent and noble aims and respects the rights of nations, depends in a considerable measure the future fate of both Italy and Mexico. The Emperor has done much for both countries—far more than we have done; and both are now in very critical positions; their rising and struggling destinies are surrounded with difficulties and beset by foes; and any breach between the only two nations in the world that really wish them well—or, it would be more correct to say, the only two Governments (for it is notorious that it is Napoleon and not France that alone has at heart the welfare of either Italy or Mexico)—would be about the greatest calamity and peril that could arise to cloud their clearing horizon and to menace their still infant strength.

We should cling to the French alliance, and show that we do so, for another reason still. It never was so safe, nor we believe so sincere, as under the present Emperor. He understands us better, he values us more, he likes and respects us more truly, than any Ruler France has had for the last hundred years. He comprehends the importance of our friendship more thoroughly, he has more objects and sentiments in common with us, than either the Legitimists, the Orleanists, or the Republicans. Louis Philippe, indeed, was always anxious to be on good terms with England, because he was above all things a lover of peace; but we all know how willingly his principal ministers would have quarrelled with us if he had suffered them; and we have had many indications of late years that it is chiefly, if not solely, to the personal feelings and convictions of Louis Napoleon himself, and to those commercial and material interests which he has done incomparably more than any other French monarch to create and foster, that we owe the amity which has now reigned so long between the two countries, and which we would fain hope may never again be interrupted.

THE AUSTRO-PRUSSIAN CONVENTION.

THE great lesson which the Austro-Prussian convention concerning Schleswig-Holstein, concluded at Gastein on the 14th of August, should teach us, is the enormous folly of hoping by the force of popular enthusiasm to overrule and control the action of a great military executive. When all Germany was ablaze with the fire of a crusade against Denmark in the early part of 1864, the German idealists were too glad to get hold of any practical means of wresting the Duchies from the Danes to find much fault with Prussia and Austria for offering themselves as the hands by which that feat could be accomplished. In the absence of all other efficient instruments at least, the Prussian and Austrian armies were not so much amiss, and were accepted with every sign of popular applause. It is true that both Prussia and Austria, at different times, had intimated unequivocally that what they found fault with in Denmark was not so much her hostility to German interests in Schleswig, as her hostility to despotic interests at Copenhagen. Just before the war Count Bismark said plainly that for his part he thought Denmark and Prussia would never understand each other so long as Denmark remained democratic and set so bad an example to the neighbouring States of Germany. Austria had intimated much the same view at the time of the treaty concerning the Danish succession in 1852. There can be no doubt at all that when the intoxicated patriotic party in 1864 cheered on Prussia and Austria to the unequal contest with their little foe, they were wielding powerful instruments which were exclusively adapted to be turned against themselves,—a Prussian sword which was doomed to enter their own breasts, and an Austrian bow which at the critical moment would be sure to break in their hands. Even those who have most resolutely ignored this up to the present time, admit it now. After a year of common administration, Prussia and Austria have at length agreed to divide the spoil, and we begin to see how far the popular idea which demanded three things for Schleswig-Holstein,—unity, freedom, and the dynasty of the Duke of Augustenburg,—is to be gratified. Under Denmark, Schleswig and Holstein were at least under one sceptre; if not as free as they wished to be, they were at least freer than almost any other German State; though they had not their favourite Sovereign—the Duke of Augustenburg—to rule over them, they had another German Prince quite as German in his ideas and quite as anxious to secure for the German part of his dominions the justice which it was said the Danes denied.

But how are they now to be disposed of? They are not even to be under the same sceptre, still less under the same Parliament. Schleswig is to be under the North German power,—Holstein, for the present, under the South German power. They are to be definitively separated by a maritime canal under the protection of Prussia. Even Holstein is to be rent in two, for its great harbour Kiel is to be garrisoned by Prussia and not by Austria. The border fortress of Rendsburg is to be garrisoned by Prussian and Austrian troops in alternate years. Lauenburg, at the southern extremity of Holstein, is to be wholly Prussian. Finally, the duty of defending both Duchies from attack is to be Prussia's, and for that purpose, whenever occasion arises, their resources are to be put at the disposal of that power. In other words the Duchies are not to have their "immemorial unity" for any purpose of peace or freedom at all; they are to have no common administration, no common parliament, no common dynasty; but they are to have the privilege of being mulcted by one and the same power in case of attack, in order that there may be no divided plans. The constitutional arguments of the German professors, the popular aspirations of the German people, are alike to be set at naught. Schleswig will be utterly estranged from Holstein; neither Schleswig nor Holstein will have even a pretence of freedom; the dangerous "democratic" principles encouraged at Copenhagen will be carefully eradicated; Schleswig will be thoroughly Prussianised, or rather we should say Bismarkised, and every principle for which the war was so enthusiastically preached in Germany will be trampled under foot. But the end of the wily Prussian minister will be gained. He will have made use of a great popular enthusiasm to increase his own power and ruin the hopes of the people;—using it to terrify Europe against interference by showing her that the military organisations of Prussia and Austria was certain to be backed by hundreds of thousands of volunteers, he also rightly estimated the people's helplessness directly they should be opposed to the Executive instead of supporting it. The moment for interference past, he turns round and laughs at the power on which he relied;—in answer to the cry for German unity, holds out the prospect of a single military despotism in the North of Germany, and in answer to the constitutional arguments reminds the German logicians that constitutional arguments are only good to drown the opposition of constitutional States, and are thrown away upon a Bismark administration.

The lesson is a remarkable one, if the Germans have ears to hear it. It shows that Germany must take to pieces and remake her political instruments before she again presumes to attempt a great national end. The Liberals of Prussia have been strenuous, but not nearly strenuous enough, to beat Count Bismark, and liberalise the administration of the army, before they attempted to use it for any great national purpose. Until you have informed a powerful military organisation with popular

Digitized by Google

feeling, it will always be much more dangerous to the people who use it than to their enemies. Count Bismark has strengthened his position against the German people by pretending to prosecute the German idea. He has extended the territory, strengthened the army, enhanced the military *prestige* of Prussia, and clipped the wings of the only democratic neighbour whose freedom shamed his administration. And it is certain that organised powers essentially reactionary at heart will always continue to prove far too strong for any popular movement they pretend to head, for while popular enthusiasms are fluent and variable, operating only spasmodically, and even then needing some fixed channel in which to run, the organisations of reactionary States are always ready, have all the resources of unlimited patience at their command, can wait, as Prussia has waited, till the ebb of popular feeling begins, and then can do anything, however cynical, in firm reliance on the helplessness of a mere disorganised sentiment. Indeedt, at such moments as the present in Germany, the power which sets popular feeling most completely at defiance has greatly the advantage over the one which is attempting to compromise with the popular cause. Prussia is now so much stronger than Austria, not only because she is strong in finance, and almost unembarrassed by the jealousies of rival races, but still more because Prussia for the time sets the people at defiance, and Austria is feebly attempting to win their support. If Austria could afford to adopt heartily the cause of freedom in Schleswig-Holstein, she might no doubt be even stronger than Prussia. But what would it involve? It would involve adopting the same course in Venetia, in Hungary, in all the various elements of the Austrian Empire, and this would mean, as her present rulers think, disintegration. Consequently she can only go in for freedom and self-government so far as may not commit her own policy in interior affairs, which is a very little way indeed. Hence Austria has neither the strength of an undivided purpose nor of a popular support. She aims at the latter just enough to enfeeble the former, and to throw the ascendancy into the hands of her rival. The Prussian policy is strong: the Austrian hesitating and ambiguous, neither catching the wind of popular favour, nor showing the unity and tenacity of a well-defined diplomatic plot. No wonder that the former prevails, and that we see Austria unable to take up either the *rôle* of despotism or the *rôle* of freedom, drawing out of the dispute as well as she can, and admitting that it is almost better worth her while to abandon her share of the prey, than either to devour it herself, or to protect it against her great German rival!

If any one had predicted when the war-fever first broke out in Germany that this would be the end; that, after much fighting and much eloquence, every point claimed by the German enthusiasts would be utterly lost,—union, freedom, dynasty,—and *so* lost that both the Duchies may well be vainly sighing after the very condition of things which was formerly the subject of their vehement reprobation, how angrily should we have had it asserted that the result was impossible! The popular party, eager to conquer the Duchies, forgot that the only powers they could use were powers that could easily conquer them indeed, but would not keep them for the benefit of the popular party. And so it has earned for itself the mortification of having given the impulse to a movement which has redounded to the credit of despotism, and rendered its own prospects worse than ever. Denmark has been robbed at the suggestion of the German people. But the plunder has gone to the credit of absolutism, and the German people are in a worse condition than before.

THE RECENT RAILWAY DIVIDENDS.

ALTHOUGH the business of our Railway Companies, as indicated by the traffic returns, seems for some time past to have been large and rapidly increasing, the dividends recently declared exhibit no corresponding improvement. The accounts of the ten great Railway Companies referred to hereafter, show that in each case, the Bristol and Exeter alone excepted, the gross income derived from the traffic of the first half of the present year very largely exceeded that of the corresponding six months of 1864, while the dividends, in every instance but one, are either the same or lower than twelve months back. The London and North-Western, with an addition of two hundred and twenty thousand pounds to the income of the half-year, pays a 6 per cent. dividend instead of 5¾; but the dividends of the Brighton, the South-Western, the Bristol and Exeter, the Great Northern, and the North-Eastern (Berwick) are all the same as twelve months back; and the Midland, Lancashire and Yorkshire, Great Eastern, and Manchester, Sheffield, and Lincolnshire dividends are all lower.

The figures hereafter supplied will explain with tolerable accuracy the causes of this check to the even course of comparative prosperity which for some years past has belonged to railway finance; and it will be seen from them that the large addition to the income has been swallowed up as a rule by increased expenses, and additional priority payments to mortgagees and other preferred proprietors. Moreover, the dividends even now paid are, in some instances, somewhat overstrained, or earned with less ease than before, thus tending to the apprehension that existing rates may possibly be lower, or be still further reduced. The engagements, too, of many of these Companies for the construction of new works under recent Acts of Parliament involves in prospect an expenditure of capital on a more extensive scale than of late years, and here also may be another element of temporary depreciation. We will, however, deal only with facts as they exist, and not anticipate evil which may never come to pass.

	Capital Employed. June 30, 1864. £	Capital Employed. June 30, 1865. £	Half-year's gross Income. June 30, 1864. £	Half-year's gross Income. June 30, 1865. £
London, Brighton, &c.	12,094,099	13,462,092	466,301	496,458
London and South-Western	13,584,815	14,583,765	672,908	698,666
London and North-Western	38,700,421	41,003,224	2,710,697	2,930,945
Midland	23,725,807	25,234,283	1,188,885	1,229,988
Lancashire and Yorkshire	20,092,800	20,744,552	989,313	1,016,522
Great Eastern	22,076,094	23,420,034	778,791	805,242
Manchester, Sheffield, &c.	10,450,842	10,936,027	379,518	474,888
North-Eastern	31,373,978	32,141,721	1,435,652	1,557,674
Bristol and Exeter	4,168,722	4,158,530	175,874	175,329
Great Northern	13,144,236	14,362,607	842,214	923,985
	189,411,814	200,066,831	9,690,133	10,309,797

During the year these ten great Railway Companies have thus increased their capital upwards of ten millions and a half, according to the accounts rendered; but, in fact, the increase in the capital employed to earn the past half-year's revenue has been considerably more than ten millions and a half. By way of explanation, we will cite one case in point. The Manchester, Sheffield, and Lincolnshire Company seems, according to the accounts officially rendered, to have increased its capital during the year from something under 10½ millions to nearly 11 millions, while the gross revenue has risen from 379,518*l* to 474,888*l*; but the capital employed in earning this large addition to the gross income is not represented by the official figures. In the interval, the Manchester, Sheffield, and Lincolnshire, under powers of an Act of Parliament passed in the session of 1864, has leased for 999 years the South Yorkshire Railway, with a capital of about a million and a half. The revenue of the South Yorkshire is the chief cause of apparent increase in the gross income of the Manchester, Sheffield, and Lincolnshire during the last half-year; but the million and a half of capital which the South Yorkshire cost is not included in the Manchester, Sheffield and Lincolnshire accounts. This is, perhaps, an extreme case, but it is not singular, and suffices for proof that there is nothing absolutely conclusive as to progress in a contrast at different periods of the capital and revenue of railways as officially stated.

Taking, therefore, these figures for as much as they are worth, the capital employed by the ten Railway Companies has risen during the past financial year from 189,411,814*l* to 200,066,831*l*, or 10,655,017*l*, which is equal to rather over 5 per cent., or one-twentieth part.

In the same interval of time the half-year's gross revenue, ended June 30, 1865, exceeds that of the corresponding six months of 1864 by the sum of 619,664*l*, or nearly 6½ per cent.

With the view of arriving at a more conclusive result, it will be necessary to go a little deeper into the accounts of these Companies, and we accordingly select the following figures:—

	Half-year's Working Expenses, or Cost of Conducting the Railway. June 30, 1864. £	Half-year's Working Expenses, or Cost of Conducting the Railway. June 30, 1865. £	Half-year's Charges against Revenue, after Working Expenses, paid to Mortgagees and others in Priority of Dividend. June 30, 1864. £	Half-year's Charges against Revenue, after Working Expenses, paid to Mortgagees and others in Priority of Dividend. June 30, 1865. £
London, Brighton, &c.	220,273	244,179	134,221	127,200
London and South-Western	243,701	357,907	154,004	168,983
London and North-Western	1,225,315	1,305,160	740,420	784,000
Midland	520,239	562,484	287,774	307,984
Lancashire and Yorkshire	429,373	457,731	212,054	225,958
Great Eastern	392,970	413,080	330,186	348,813
Manchester, Sheffield, &c.	171,168	220,097	158,682	234,791
North-Eastern	673,017	709,694	406,163	414,718
Bristol and Exeter	80,236	85,740	49,101	46,506
Great Northern	441,543	479,404	266,254	293,769
	4,497,836	4,835,476	2,738,859	2,953,122

Digitized by Google

The cost of working these ten railways has thus increased from 4,497,836*l* to 4,835,476*l*, or 7½ per cent., while, as we have before shown, the gross income rose 6½ per cent. These figures, no doubt, convey a fair comparative result, but it is quite a question whether in the former or latter half-year the revenue was relieved to a greater degree by charges to capital. Take for instance the figures of the Brighton Company. The working expenditure of the half-year rises from 220,273*l* in 1864, to 244,179*l* in 1865, which appears a natural rate of increase; but at the same time the preference charges decline from 134,221*l* to 127,200*l*, which seems almost incomprehensible, were it not that for the half-year, ended 30th June, 1864, the charge to capital for interest on works in progress was 21,792*l*, and on 30th June, 1865, 50,221*l*. There is no means whatever of checking the accuracy of these figures, but it is clear that if this interest charge to capital had been much less than 50,000*l* at the 30th June last, the 5 per cent. dividend could not have been supported, and under these circumstances the accuracy of the revenue expenditure, as officially stated, is more or less open to question. This, too, is perhaps an extreme case, but the doubt attaches to other Companies as well as to the Brighton.

The preference charges of the half-year have risen from 2,738,859*l* at 30th June, 1864, to 2,953,122*l* at 30th June, 1865, or nearly 8 per cent. As a test of increasing liability, this addition to the preference charges is more accurate than the increase of capital employed, because, as we have before shown, much of the new capital is not included in the official accounts, while the whole of the preference charges are generally to be found in the revenue accounts. Still it is only a question of comparative accuracy when charges are made to the capital account for interest on unproductive works to the amount of 50,000*l* in one half-year, as in the case of the Brighton Company, and this addition of 8 per cent. to the preference charges is probably less than the truth.

	Half-year's Residue for Dividend after Priority Charges on Revenue.		Half-year's Dividends paid Rates per Cent. per Annum.	
	June 30, 1864.	June 30, 1865.	June 30, 1864.	June 30, 1865.
	£	£		
London, Brighton, &c.	111,807	125,079	5	5
London and South-Western	175,803	171,776	4½	4½
London and North-Western	744,962	841,785	5¾	6
Midland	380,872	359,520	7	6½
Lancashire and Yorkshire	347,886	332,833	5¾	5¾
Great Eastern	55,635	43,449	1¼	1
Manchester, Sheffield, &c.	49,667	20,000	2¾	1
		Berwick	5½	5½
		York	4¾	5
North-Eastern	406,532	433,262	Leeds 3½	3¾
		Carlisle	7	7½
		Darlington	8	8½
Bristol and Exeter	46,537	42,683	4½	4½
Great Northern	134,417	150,812	5⅓	5⅓
	2,453,518	2,521,199		

Supposing these ten Railway Companies to be merged into one, the following would be the result :—

	Half-year ended June 30, 1864.	Half-year ended June 30, 1865.
	£	£
Capital Employed	189,411,814	200,966 831
Half-years' gross income	9,690,133	10,309,797
Half-years' expenses	4,497,836	4,835,476
Net profit	5,192,297	5,474,321
Other charges against revenue in priority of dividend	2,738,859	2,953,122
Profit for dividend	2,453,438	2,521,199

To summarise the result, the figures stand as follows :—

	£			
Increase in capital employed	10,655,017	or	5	per cent.
Increase in gross income	619,664	—	6½	—
Increase in expenses	337,640	—	7½	—
Increase in net profit	282,024	—	5½	—
Increase in preference charges	214,263	—	8	—
Increase in profit for dividend	67,681	—	2¾	—

Of the final facts there is no doubt whatever that out of an increase in the gross revenue of 619,664*l*, the original shareholders receive in the shape of dividend only 67,681*l*, the difference between the two having been absorbed in increased working expenses and preference charges; and that to these facts directly the stationary or declining dividends are attributable, whatever the indirect causes which may have induced them.

BOARD OF TRADE RETURNS.

THE Board of Trade returns for July, and the seven months ending July 30, have been published this week. As regards our export trade in British and Irish produce for the last month, the figures are favourable, and show an increase as compared with each of the preceding months of the year. For the seven months ending July 30 in each of the last three years the figures are as under :—

	£
1863	75,633,037
1864	92,441,950
1865	88,242,048

showing a decrease of about 4,200,000*l* in the present year's trade as compared with 1864, but an increase of nearly 13,000,000*l* as compared with 1863.

Our imports for the first six months of the present year exhibit a falling off to the value of 23,000,000*l* from the corresponding months last year, and of about 6,000,000*l* from the same period in 1863. The following are the figures :—

	£
1863	81,208,938
1864	98,610,176
1865	75,508,842

but they have increased from 6,398,922*l*, the total for the month of January, current year, to 15,453,909*l*, the total for June.

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first six months of 1865, compared with the same period of 1864 :—

UNCLAIMED DIVIDENDS.—NIL.

An Account explanatory of the Sums paid for Management of the Public Funded Debt in Great Britain, in the Year ended 31st March, 1865.

		£ s d
Unredeemed Capital in Great Britain, as it stood on the 5th April, 1863:—		
New Annuities, at £2½ per Cent.		2,949,667 11 4
Consolidated Annuities, £3 per Cent.		400,233,539 17 2
Reduced Annuities, —		114,197,354 19 5
New Annuities, —		213,101,880 2 6
New £3½ per Cent. Annuities		240,746 6 4
New £5 per Cent. Annuities		430,603 15 11
Annuities for terms of years ... Annuities expiring in 1885 ... Red Sea Telegraph Annuities... } computed at 10 years' purchase		748,144 15 0 2,531,850 0 0 260,000 0 0
		734,793,787 7 8
Charge for Management on the above Capital for the year to 5th April, 1864:—		
On £500,000,000 at the rate of £300 per million	£180,000 0 0	
On £134,793,787 7s 8d at the rate of £150 per million	20,219 1 4	
		200,219 1 4
Management of Exchequer Bills by the Bank of England, for one Year to 30th November, 1864, per Act 25 V. c. 3:—		
On £11,800,000, at the rate of £100 per million		1,180 1 7
Amount paid to the Bank of England		201,399 2 11
Expenses of the National Debt Office (per Account No. 46)		15,440 0 0
		216,839 2 11

NOTE.—The charge for management of the Debt by the Bank of England is now paid to the Bank in gross, as directed by the Act 24 Vict. c. 3, and at the reduced rates therein authorised; and the deductions formerly made from the gross charge are paid to the account of the Exchequer under the Heads of Stamps and Miscellaneous Revenue, in accordance with the 4th section of the said Act.

Agriculture.

TWO SIDES OF THE SHIELD.

A LANDLORD ON RURAL COTTAGES.

WHEN a subject of importance, with which people believe themselves to be thoroughly acquainted, is presented to them in a new aspect, from a point of view to which they are strangers or have hitherto ignored, they are very apt to feel surprised, and, perchance, angry. They ask have we not known all about this matter during our whole lives? Are we not greatly interested in it? We have never taken any such view; indeed, we have taken a contrary view of the subject. Surely, any one who can assert such views must have "a very imperfect knowledge of his subject," and is making an "accusation as foolish as it is untrue." Now, the English landowner is, perhaps, as much as any one in the position of the people we have referred to. He is deeply, very deeply, interested in landed property. He believes that he knows more about its management than any one else, and he resents with ready and passionate vituperation all who dare to impugn his actual system of management, or to suggest the existence of evils as incidental to that system. We are not surprised at this. We feel no offence when an irritable landowner, such as our correspondent "M.P.," whose letter appeared in the number of the 5th of August, objects to our comments on "Landlords and Labourers," which appeared in these columns on the 22nd of July. It is the old story of the two knights looking each at his own side of the shield. "M.P." regards the topics of which we then treated—the way in which labourers' cottages are dealt with by English landowners—exclusively from an English landowner's point of view; we having regard to the matter in hand—the Union Chargeability Act—endeavoured to present that view of the subject, which other Englishmen, not being landowners, are very generally compelled by the facts of the case to take. The article to which our correspondent objected consisted, in great part, of passages from addresses made (chiefly by landowners) at various agricultural meetings to illustrate the injurious effects produced by the law of parochial settlement in restricting the freedom and interfering with the comfort and decency of the agricultural working population. And these passages were selected in aid and corroboration of the more recent evidence of like purport, which had been adduced by Mr Villiers in the House of Commons when support-

Digitized by Google

ing his Union Chargeability Act, confessedly one of the most valuable measures of the past session.

Now, the questions involved in this discussion are far too important to be set aside by any such platitudes as those propounded by our correspondent. It is mere twaddle to say that "the possibility of the labourer falling into pauperism, and so becoming chargeable, is precisely that which it is the object of every landowner, as of every other employer, so far as he can, to prevent; and as a matter of fact, large numbers of aged and even infirm persons are found working upon nearly every estate in the country, whose places might be profitably supplied by the able-bodied," for such statements are wholly beside the question. Indeed those statements evince considerable inaccuracy as regards the facts of the case, for the landowner is not an "employer" of labourers in a commercial or economical sense. It is the tenant-farmer who is the "employer" of the agricultural labourer, and it is the tenant who suffers in his commercial interests when, by the system of management on the estate, of which his farm forms part, labourers are driven out of the parish for a dwelling place, or crowded into insufficient hovels within it. The landowner, it is true, may employ labourers on his demesnes, his pleasure grounds, and his game preserves, but they are merely unproductive labourers, for whom, too, he will continue to find sufficient cottage accommodation.

But what we allege, what the supporters of the Union Chargeability Act asserted and supported by evidence, and what the public at large with all the data before them believe to be the facts, are, that landowners generally are anxious to prevent the existence of any cottages on their estates, or even in their parishes, which are not completely under their own control; that, as the rule, they seek to lessen the number of cottages on their properties, and thereby necessarily to drive away the working people required by their tenants for the cultivation of their farms to a distance; and that the motives frequently avowed, and still more frequently gathered from the observation of acts, for such a course of conduct are, the desire to prevent burthens on the poor rates, and the fear of having too large a population in and about a game-preserved estate. It is hoped, by those who proposed and who approve of the Union Chargeability Act, that the operation of the new law will be to diminish the first of those motives. For removal of the second, we can only trust to the attainment by landowners of a truer sense of their own interests and a higher view of the moral obligations imposed upon them by their position in this country. It is to press upon them sounder views of their interests and their duties, that we often tell them truths they are not perhaps much accustomed to hear, not from any want of sympathy with them or their pursuits. We shall ever denounce the effeminate *battue*, and all the evils it brings on the farmers and farm-labourers; but we regard with interest and approval all such true and manly field sports as are consistent with the economical interests and self-respect of landlords, tenants, and labourers.

One word on the cost of cottage building. Our correspondent, "M.P.," says "cottage building is not in fact remunerative, but when labourers are able or willing to pay for their cottages, good cottages will be built." That may be true enough as a general proposition, and where land is to be had in small quantities. Indeed, under such conditions, where the ordinary law of supply and demand can operate, there is really no difficulty about the supply of cottages. There the labourer gets such accommodation as his means can purchase; but it is in parishes or districts more or less close, where that bugbear of the landowner,—the speculative cottage builder,—can get no footing, that the evil is most rife. From the state of the landed property and the incidental circumstances, the law of supply and demand is inoperative as regards cottages in such districts, and some other influence must be evoked to afford to the agricultural working people the accommodation required for their physical and moral well-being.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monsteur* has published the following return of the Bank of France, made up to the 31st inst. The return for the previous week is added:—

The Bank return is more satisfactory this week in a commercial point of view—that in which it is chiefly regarded here. The discounts compared with those of last week show an increase of 45,926,000f, the deposits one of 2,744,000f, the circulation of notes of 36,673,000f; whilst the coin and bullion have declined 1,471,000f.

A strange event occurred on the Bourse on Monday, and it has created considerable sensation. Ten or twelve brokers received telegraphic dispatches purporting to come from stock brokers at Lyons, directing them to sell that day quantities, more or less considerable, of Credit Mobilier shares and of *rente*. The reception of so many orders all alike, and at the same time, created suspicion, and inquiries having been instituted it was ascertained that the dispatches were forgeries. The number of Mobilier shares ordered to be sold was about 5,000, and the amount of *rente* about 500,000f (revenue, not capital). The object of the sender of the telegrams was evidently to create a heavy fall not only in Mobilier and *rente*, but in other securities. The affair seems to show that some special precautions must be taken with respect to the transmission of orders by telegraph in Bourse operations.

The Bourse has been animated, and prices, after undergoing fluctuations, stand to-day on the whole higher than they were last week; in certain securities the advance has even been considerable. Today there has been much demand for the first Mexican loan, and it has been done for cash at 1¼ above the quotation of yesterday, and for time at ⅜ths more. The cause of this demand has not been explained. The following are the week's quotations:—

The Council General of departments have held, or are holding, their annual sessions, but the only one that has presented any interest in an economic point of view is that of the Herault, over which, as in preceding years, M. Michael Chevalier presided. The hon. senator, in a speech which, like all his discourses and writings was brilliant, announced the approaching abolition of tonnage dues, and congratulated his hearers on it, not only as a new customs reform of general importance, but as likely to be particularly advantageous to them by attracting a greater number of ships to their ports of Cette and Agde to seek for their productions. He did not, however, predict with equal confidence the adoption of other reforms relative to shipping (one of which is the suppression of differential duties an foreign flags in imports from bonding warehouses) proposed by the Government to the Corps Legislatif in the same bill as that concerning the tonnage dues. But he made the important declaration that "the application of the principle of commercial liberty to maritime industry cannot fail to be closely followed, by the very force of things, by a liberal revision of the Customs tariffs, which constitute only a provisional *regime*." He added that it is probable that before long "cast iron, iron, and machines will be completely freed from Customs duties." The Bill referred to stipulates that such things for building or repairing of ships may be imported free; but M. Michael Cheva-

Digitized by Google

lier's declaration indicates, it will be seen, a much more general measure. The hon. senator afterwards treated of cheap local railways and other matters. On the former, he gave some very sound advice, and took care to remind his hearers that such railways must be paid for out of their own pockets. The Council afterwards, under the guidance of M. Michael Chevalier, passed resolutions calling for the extension of Customs reforms, and particularly for the repeal of tonnage and differential duties on ships; also for a reduction of the duties on wines, and the levying of them *ad valorem*

An imperial decree settles various matters of detail for the execution of a treaty concluded some time ago between France and Switzerland for the transmission of money by Post-office orders. It is astonishing that a similar treaty was not entered into between England and France long since, considering how vast is the number of Englishmen residing in France, and of Frenchmen in England, and how numerous are the daily remittances from one country to the other. A large portion, perhaps the majority, of these people are of the poorer class, who send and receive small sums, and to whom consequently Post-office orders would be a great convenience. In Paris, such people as a rule do not like going to bankers, and indeed many bankers would not take the trouble of remitting for them; and so they apply to money-changers, who charge them extortionately. I have known as much as 5 francs (4 shillings) exacted for a remittance to London of 3*l*. There would, of course, be no practical difficulty in establishing a system of Post-office orders between England and France, and one would certainly add to the postal revenue of both countries.

A convention between France and Wurtemburg for the protection of literary and artistic property, concluded the 24th April, has been promulgated to-day.

The Treaty of Commerce and Navigation between France and Holland has been promulgated, and, as is known, is to come into force on the 1st September. It establishes for Dutch merchandise imported into France the tariffs and facilities contained in the treaties with Great Britain, Belgium, the Zollverein, Switzerland, Italy, and Sweden and Norway; and it subjects French goods taken into Holland to the general tariff now in force in that country. As regards chemical productions, salt, alcohols, and some other articles, however, excise and octroi duties are to be added in each country to the import duties; but on French wines in Holland the charges of all kinds are to be fixed at 28 florins the hectolitre for the first year, beginning the 1st January next, 26 florins for the second, 24 the third, 20 afterwards. (Twelve florins make 1*l* sterling, and the French hectolitre is rather more than 22 gallons). The engagement is taken by both countries not to prohibit or tax the export of coal, to protect the trade marks of their respective subjects, to allow commercial travellers and the admission of patterns and samples of goods equivalent advantages, to give the usual aid and assistance to consuls, and to extend to shipping in the direct trade the treatment of the most favoured nation. But the chief importance of the convention was in the fact that Holland, for the first time, has consented to relax the rigorous commercial system established in her East Indian possessions. She undertakes that numerous French productions, among them silk and woollen tissues, ready-made clothes and articles of dress, all sorts of paper, hardware, soap, wines, alcohols, pottery, porcelain, and chemical productions, shall from the 1st January next be admitted into those possessions under the tariff dated 3rd July last, which reduces differential duties on foreign imports; and that French ships arriving there or leaving, whether with or without cargoes, shall not pay any duties on their hulls, or be subject to any other formalities than Dutch ships. In return, France consents that Dutch vessels coming from the Dutch East Indies, whether with or without cargoes, shall be treated in France like French; that in French colonies they shall enjoy the same advantages as those of the most favoured nation; and in Algeria, when they go direct from Holland, a reduction of 50 per cent. in the tonnage dues shall be accorded to them. The treaty is to be in force for twelve years. The expectation is that it will considerably increase the trade between France and Holland, and that it will open to France in the Dutch East Indies vast markets in which she has hitherto done little. There is certainly great room for improvement in the commerce of the two countries,—the value of the importations from Holland into France for consumption having been in 1863 (the latest date for which there are returns) only 31,365,897f; and the exports to Holland from France of French productions only 31,375,763f; whilst, as regards the Dutch East Indies, the imports into France for consumption were not more than 9,510,587f; and the exports of French productions, 933,947f.

A return relative to the railways of France for the first six months of the present year, compared with the corresponding period of last, has been issued by the Ministry of Public Works. It shows that the total length worked on the 30th June last was 13,257 kilometres (8,454 miles), and that it was 907 more than on the same date of 1864. The 13,257 kilometres were divided into 7,782 of the old network—that is the original main lines and their annexes, and certain petty concessions; and 5,475 of the new network—that is the prolongations and embranchments on which the Government guarantees interest. The total receipts for the six months of this year were 258,601,928f; of last year, 244,126,675f—increase, 14,475,253f, of which 8,462,735f were for railways of the former category, and 6,012,518f for those of the latter. Taking into account that the length opened on the 30th June in each year was not in operation during the *whole* of the six months ending on that day, it appears that the average receipts per kilometre on the old lines, in the first six months of 1865, were 26,626f, which were 338f more than in the same period of 1864; but that on the new network they were only 9,582f, which were 397f less. The following is a detail of the kilometric receipts of the different times, in the two half-years, with a calculation of the increase or decrease per cent.:—

Names of Railways.	Receipts per kilometre. First six months of 1865. francs.	First six months of 1864. francs.	Receipts per cent. per kilometre. Increase. francs.	Decrease. francs.

On the whole, the receipts, per kilometre, in the first half of this year, compared with that of last year, are 2.43 per cent. less.

In consequence of attempts having recently been made to damage the Saragossa to Alicant Railway in public estimation, by representing its financial situation and prospects in an extremely unfavourable light, the directors have adopted the, for France, somewhat unusual course in such matters of publishing a reply in the form of a pamphlet. The reply has the merit of being very brief, very clear, and very moderate; and it leaves the impression on the reader, that it speaks the truth and nothing but the truth. It shows that the capital disbursed by the company for the construction of the 1,430 kilometres of railway conceded to it is, in round figures, 328,000,000f, and that there is nothing more to spend on that score. This sum is represented by shares amounting to 120,000,000f, and by bonds of 208,000,000f. To pay both 6 per cent. interest, and to provide each with a sinking fund, an annual revenue of 20,554,000f is necessary. That revenue will be acquired, with gross receipts of 25,250f per kilometre, and working expenses of 43 per cent. Is it unreasonable to expect such receipts? asks the pamphlet. And the answer is—In nowise; for in 1864 the lines produced 21,000f, though they were not completed. The pamphlet observes that complete lines were always more productive than those which are only partially at work; and it states that the railways of the Company go through the richest provinces of Spain, and place Seville, Cordova, Granada, Xeres, and the five great ports—Valencia, Alicant, Malaga, Carthagena, and Cadiz—in communication with the capital and with the North; and that besides the Company's lines will communicate with those of Portugal. It says, moreover, that when the railways shall be fully in operation, nothing will be easier than to reduce the working expenses below the 43 per cent. above-mentioned; and that besides, the Company will soon be able to get coal from the basin of Belmetz on terms which will enable it to affect an economy of nearly 2,000,000f per annum. It is admitted that in the first six months of the present year the receipts were less than those of 1864; but that was owing, it is said, to an inundation which for twenty-one weeks interrupted traffic on the line of Valencia. The pamphlet answers in a manner equally satisfactory some petty objections to certain details in the financial management of the company, and especially the setting aside of the profits of the lines worked as a reserve—a measure by the way which will secure 6 per cent. to the shares this year, and will leave a balance over.

Letters from Honfleur announce that Messrs Dubourg, Goulley, and Co., of that town, sugar refiners, are about to cease business in consequence of their profits having fallen so low as to make it not worth their while to continue. Their establishment was of great importance, the amount of customs duties it paid annually being about 1,000,000f (40,000*l*).

Subjoined is the market report:—

FLOUR.—At *Paris*, certain qualities of flour for consumption are lower, and yesterday the quotation was 47f to 51f 50c the sack of 157 kilogs. The tendency of six marks is downwards. Yesterday, disposable, and September, were offered at 50f 75c, but were taken at 50f 50c, and afterwards there were only buyers at 50f 25c. Type Paris the 101 kilogs was 30f 75c.

WHEAT.—In the provincial markets there is great indecision, many of them having fallen on Saturday and Monday, but having risen on Tuesday and yesterday. The indecision is owing to the uncertainty which exists with regard to the harvest, not only in France, but in other countries. At *Paris*, however, yesterday, sales could only be effected at

Digitized by Google

quotations below those of last week. New white was 28f to 28f 50c the sack of 120 kilogs; new red, 27f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 4,764 bales, and the arrivals 2,514. The stock was estimated at 36,600 bales. The closing quotations 2f lower for United States, 5f lower for Brazil and Madras. Low New Orleans was consequently 235f the 50 kilogs; good ordinary qualities in Broach, 160f; Tinnevelly, 150f; Madras, 165f; China, 145f; Jumel, 215f. On the first two days of this week calm prevailed, but yesterday the demand was active. Tinnevelly was 150f to 155f; Madras, for delivery from England, 155f; and for delivery in September, 152f 50c; China, 140f and 145f; Japan, 155f.

COFFEE.—At *Havre*, in the week ending Friday, 800 sacks Port-au-Prince, 83f to 83f 50c the 50 kilogs; 340 Jacmel, 80f 30c; 160 Cape, 85f; 680 Rio, 75f to 83f; 951 ditto, for delivery, 78f 50c to 82f 50c; 86 Rio washed, disposable, 105f; 95 for delivery, 93f; 80 Bahia washed, for delivery, 89f 50c; 1,095 Porto Cabello, non-grages, 91f 50c to 92f 50c; 305 Malabar, for delivery, 92f 50c. The arrivals exceeded 2,000 sacks. This week, Hayti, 79f 50c to 83f; Jeremie, for delivery, 80f; Jamaica, 82f; Rio, 73f and 77f 50c: Hayti Cape, 84f. At *Bordeaux*, last week, 800 sacks Mangalore, at prices kept secret; 990, at 115f 25c; 8,340 Costa Rica, at prices not stated; 300 Mysore, 118f; 1,495 Winard, 123f; 89 ditto plantation, 131f 75c; 781 Mysore, for delivery, 118f; 65 La Guayra, non-grage, 95f; 175 ditto, 91f 50c; 650 Rio washed and not washed, 90f and 105f; and by auction 2,389 Maracaibo, 70f to 82f 50c. This week, Rio not washed, 80f and 94f. At *Marseilles* and *Nantes*, this week, no sales.

SUGAR.—Business was not active at *Havre* in the week ending Friday, though holders made concessions. 660 casks French West India, disposable or in the port, 47f 50c the 50 kilogs, bonne quatrieme, duty paid; 20 Havana, 30f 50c, No. 12; 100 of the numbers 15, 16, 17 on the basis of 32f for No. 12. The arrivals exceeded 4,800 casks and 500 sacks. This week, Havana, 39f in bond; French West India, bonne quatrieme, 47f. At *Nantes*, last week, a small quantity of Guadaloupe usine was sold at 47f, bonne quatrieme; and some on sample, 58f. Nothing done in other sorts. Nominal quotations: Reunion, 51f, bonne quatrieme; Mauritius, 51f 75c; Havana, No. 12, 32f. This week, Reunion, bonne quatrieme, 50f 25c; French West India, 46f 50c, bonne quatrieme, and 46f. At *Bordeaux*, last week, 297 casks French West India, 47f; 160 at 46f 50f bonne quatrieme; and some usine, 57f and 57f 50c. This week, French West India, 46f 50c; usine, 53f to 56f 25c, and at different prices. At *Marseilles*, last week, 270 casks French West India, 27f 50c, bonne quatrieme of Havre; 376 casks and 570 sacks Bahia, by English ship in the port, 24f 50c, No. 10; 10,450 casks Porto Rico, by English ship, at prices not stated. By auction, 9,358 bales Mauritius, damaged, by Italian ship, 27f to 27f 75c; and 2,901 casks Havana, by Spanish ship, Nos. 9 to 18, at 24f to 35f. This week, French West India, 27f 50c, bonne quatrieme of Havre; and by auction Mauritius, by English ship, 24f 25c to 27f 75c, Nos. 9½ to 14½.

INDIGO.—The only sales at *Havre*, in the week ending Friday, were 10 chests Bengal new at 55c above the estimates. The arrivals were only 6 serons. No sales this week. At *Bordeaux*, this week, some Bengal and Kurpah at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 1,450 La Plata dry, 72f to 95f the 50 kilogs; 9,400 ditto salted ox, 51f 75c to 56f; cow, 40f to 45f 50c; 4,450 Rio Grande salted ox, 55f 50c; cow, 40f to 45f 50c; 700 Rio Janeiro salted ox, 50f to 51f; cow, 40f; 750 Pernambuco salted, 47f; 300 Valparaiso drysalted ox, 76f; cow, 66f; 544 salted ox, 51f 75c. By auction, a quantity of Monte Video sound, salted, at 37f 25c to 55f 25c; some dry ox, 72f; and cow, 63f to 66f 50c; some Buenos Ayres salted, 53f and 47f; Rio Janeiro salted, 38f cow to 49f 25c ox. The arrivals were about 5,500. This week, New Orleans salted, 39f; Monte Video dry ox, 85f and 90f; cow, 71f 25c; salted ox, 55f 50c and 59f; salted horse, for delivery, 43f 50c; Rio Grande salted ox, 55f 50c; Buenos Ayres salted cow, 43f 50c; Valparaiso dry, 72f; Nassau salted, 39f.

WOOL.—At *Havre*, in the week ending Friday, 220 bales La Plata unwashed, 1f 65c to 2f 47½c the kilog; 4 bales Monte Video washed, 2f 20c; 83 bales Chili unwashed, 2f 20c; 5 bales Buenos Ayres lambskin unwashed, 1f 20c. The arrivals were 79 bales. This week, Buenos Ayres unwashed 2f 10c and 1f 60c, 200f to 235f the 100 kilogs, and at prices kept secret. Monte Video unwashed, 2f and 2f 30c.

TALLOW.—The demand for La Plata was active at *Havre*, in the week ending Friday, and prices rose: 599 casks disposable, 52f to 53f the 50 kilogs; 2,275 for delivery, 52f to 52f 50c. In other sorts 8 casks New York, 53f. No arrivals. This week, La Plata for delivery, 52f 50c to 53f 50c; New Orleans, 51f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 115f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 51f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 66f; beetroot, first quality, 90 deg., 60f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The subjoined report of the Calcutta money market is dated the 21st of July:—With less anxiety of late as to the course of affairs in Bombay, and considerable improvement in trade, there has been more employment for money, but it is still abundant, and the Bank of Bengal reduced its rates 1 per cent. yesterday. Supplies of specie from abroad continue very large, while exports are almost nil. Government securities have met with active demand during the past week, and transactions have been on a larger scale than for a considerable time previously; an advance of 1½ to 2 per cent. has been established on our last quotations, and there are buyers of 5½ per Cents. at 10¼ prem. Share Market—Bank of Bengal and Bengal Credit Mobilier shares have been freely dealt in at the quotations given. Assam Tea Company's shares have also been in good demand; other descriptions of stock exceedingly dull. Exchange has advanced, and a fair business has been done at from 2-0½d to 2-0¾d for first class 6 months' sight paper, but buyers are now so scarce that a further rise is not improbable. A telegraph dated the 25th ult., states:—Shirtings and twist quiet. Indigo unchanged. Exchange on London, 2s 0¼d. Government Securities—Four per Cents., 92; 5 per Cents., 104. Freight, 45s.

Annexed are the traffic returns of some of the American railways for July:—

	Miles Open.	1865. dols.	1864. dols.	Increase. dols.
Chicago and Alton	220	315,944	224,257	91,687

	6,836,823	6,959,463

Via the Persian Gulf, we have intelligence from Bombay to Aug. 26. At that date, the rate of exchange on London, and the price of Government securities were as follows:—Exchange on London, 2s 0¼d. Government Securities—Four per Cents., 91¼; 5 per Cents., 104¼; 5½ per Cents., 110½.

Messrs Dymes and Co., writing from Madras on the 27th of July, thus allude to the state of the money market:—The market continues easy and bank rates remain unchanged at 6 per cent. for advances on Government securities, and 8 per cent. on private bills having three months to run. Madras Bank Shares—The speculation caused by the declaration of the dividend was followed by a reaction, and sales were effected as low as 68 premium, but latterly a portion of this decline has been recovered, and present quotations are 74 to 75 premium. Government paper is firm at about previous rates. We quote 5½ per Cents. 9¾ premium, 5 per Cents. 4 premium, and 4 per Cents. 10 to 10¼ discount. Exchange is a trifle higher, being at 2s 5-16d for first class credits, and 2s ½d to 2s 9-16d for document bills. The banks' drawing rate on London remains unchanged at 1s 11¾d 6 months' sight. Sovereigns—English 10-7 rs each; Australian, 10-1-6 rs each.

In reference to bullion movements at Hong Kong, during the fortnight ending July 12, Messrs Sharpe and Co. write as follows:—Gold.—The amounts received since last issue are about equal from the North of China and from San Francisco, and altogether reach a total of $460,000. The exports, including those per Ottawa last mail and excluding those to leave to-morrow, are $260,000. The imports include 17,000*l* received in Sydney sovereigns. Silver—In bar silver and Sycee about $150,000 value has come to hand, of which $100,000 worth has been shipped away. Dollar Currency—The movements have been less this fortnight than for two or three mails past, and amount inwards to $470,000 and outwards to $1,090,000; clean Mexicans having receded in Shanghai, the value has also gone back here. Discounts and mortgages—Money is in pretty good demand, and round sums have been done at a trifling advance. Say discounts at 8 per cent., and mortgages at 9 per cent. The rate of exchange is but little altered. Closing Quotations—On London, 6 months' sight, 4s 5¾d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 218 rs; on Shanghai, 10 days' sight, 72¼ tls; do. 30 days' sight, 73 tls; on Ningpo, 30 days' sight, 73½ tls.; Foochow, 15 days' sight, ½ per cent dis.; Amoy, 15 days' sight, 1 per cent. dis.; Singapore, 30 days' sight, par; bar silver, San Francisco (997,998), 10½ per cent. pm.; Sycee, 8½ per cent. prem.; Mexicans, Shanghai currency, 2 per cent. prem.; ditto unchopped, 1½ per cent. prem.; gold leaf, $22.85 per tael; sovereigns, Sydney, $4.50 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 5 per cent. prem.; Union Dock shares, 7 per cent. prem.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending July 22, 1865, compared with the previous month:—

	June 24, 1865.	July 22, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	20877112	21993548	1116436	...
Private Banks	2896772	2882093	...	14679
Joint Stock Banks	2747058	2759162	12074	...
Total in England	26520972	27634803	1128510	14679
Scotland	4557706	4371737	...	185969
Ireland	5762208	5718427	...	43781
United Kingdom	36840886	37724967	1128510	244429

And, as compared with the month ending the 23rd of July, 1864, the above returns show an increase of 294,119*l* in the circulation of notes in England, and an increase of 788,366*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,306,998*l*, the English joint stock banks are below their fixed issue 497,195*l*,—total below fixed issue in England, 1,774,193*l*: the Scotch banks are above their fixed issue 1,622,466*l*; the Irish banks are below their fixed issue 636,067*l*. The average stock of bullion held by the Bank of England in both departments during the month ending July 19 was 15,774,690*l*, being a decrease of 235,231

Digitized by Google

as compared with the previous month, and an increase of 2,024,357*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,408,292*l*; gold and silver held by the Irish banks, 2,078,443*l*; total 4,486,735*l*; being a decrease of 80,415*l* as compared with the previous return, and an increase of 258,984*l* when compared with the corresponding period last year.

During the week ending Aug. 30, the imports of the precious metals were:—Gold, 379,790*l*; silver, 203,267*l*. The exports were:—Gold, 37,807*l*; silver, 106,348*l*.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 30th day of August, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,215,865	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,565,865
		Silver Bullion	...
	28,215,865		28,215,865

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,334,209
Rest	3,598,037	Other Securities	21,256,716
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,094,785	Notes	6,617,805
		Gold and Silver Coin	923,747
Other Deposits	14,492,034		
Seven Day and other Bills	584,621		
	39,182,477		39,182,477

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,132,681	Securities	31,737,925
Public Deposits	6,094,785	Coin and Bullion	14,489,612
Private Deposits	14,492,034		
	42,719,500		46,227,537

Dated the 31st August 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,508,037*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£177,925
AN INCREASE of Public Deposits of	512,542
A DECREASE of Other Deposits of	222,551
No change in Government Securities.	
A DECREASE of Other Securities of	157,212
AN INCREASE of Bullion of	268,483
A DECREASE of Rest of	796
AN INCREASE of Reserve of	446,548

The above return shows a considerable accession to the resources of the Bank. A large increase has taken place both in the bullion and reserve, while the other securities have again declined. Although a rather heavy withdrawal has taken place of the other deposits, the public deposits present an augmentation of over half a million.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,084,481	£ 22,343,918	£ 21,920,722	£ 21,289,324	£ 22,132 681
Public deposits	7,267,969	7,871,934	6,818,182	5,815,742	6,094 785
Other deposits	11,098,018	14,973,470	13,261,512	13,073,751	14,492,034
Government securities	13,031,088	11,069,942	11,091,284	10,797,095	10,384,209
Other securities	15,661,985	19,641 806	18,992,100	20,164,246	21,256,716
Reserve of notes & coin	8,834,488	10,965,925	8,953,604	6,891,933	7,541,552
Coin and bullion	14,939,118	17,825,220	15,494,219	12,980,033	14,489,612
Bank rate of discount	3½ p c.	2 p. c.	4 p. c.	8 p. c.	4 p. c.
Price of Consols	90⅞	93⅝	93⅝	88⅛	89⅛
Average price of wheat	72s 7d	58s 4d	45s 9d	42s 5d	45s 4d
Exchange on Paris (short)	25 12½ 17½	25 15 22½	25 25 35	25 25 30	25 20 25
— Amsterdam ditto	11 16 16½	11 15 15½	11 17 17½	11 18 19	11 18½ 19
— Hamburg (3months)	13 8½ 8½	13 7⅝ 8½	13 8½ 9	13 9½ 9½	13 10 10½

In the corresponding week of 1855, the siege works around Sebastopol were progressing satisfactorily. Great activity prevailed in the manufacturing districts of France. The banks at Bombay had reduced their rates of interest.

In 1862, Garibaldi and his forces had landed at Calabria, where they had been defeated by the Royal troops, Garibaldi himself being wounded and taken prisoner. Severe fighting had taken place in America between Generals Pope and Jackson, the advantage remaining with the Confederates. Money was plentiful in the London market.

In 1863, the matter most attracting attention was the negotiation going on between the Emperor Louis Napoleon and the Archduke Maximilian respecting Mexico, the territories of the Republic having been partly taken possession of by the French armies.

In 1864, the Duke of Augustenburg had depatched a memorial to Frankfort, establishing his claim to the Schleswig-Holstein throne, as demanded by the Federal Diet. At Athens an insulting letter, addressed to the King by a member of the Opposition, had given rise to an exciting sitting of the assembly. Disturbances continued in some parts of Algeria. In America, Colonel Anderson had surrendered Fort Gaines to the Federals. The whole Confederate fleet had been sunk, captured, or destroyed. Admiral Farragut had commenced shelling Fort Morgan. General Grant's 5th corps had been surprised and defeated by the Confederates, with a loss of 3,000 men. The London discount market was easier, and the supply of money abundant.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,563,967*l*; in 1862, a deficiency of 4,668,336*l*; in 1863, a deficiency of 5,730,588*l*; and in 1864, a deficiency of 7,090,495*l*. In 1865, the deficiency is 6,764,682*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has been exceedingly moderate, both at the Bank and in the open market, and the general rate for the best short paper has declined to 3¾ per cent., with exceptional transactions at 3⅝. Six months bills are more readily taken. To-day there has been a rather better inquiry as customary on a Friday. The present quiet state of the discount market is in a great degree the result of a belief that the influx of gold into the Bank, and the accumulation of the reserve, point to a speedy reduction in the minimum. Annexed are the current charges for paper of various dates:—

30 to 60 days	3¾ per cent.
3 months	3¾ per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange there has been an increased demand for loans, large sums having been withdrawn by the bankers and discount houses to provide for the railway dividends falling due to-day, and the rate advanced to 3 to 4 per cent.

Subjoined are the rates of interest allowed on deposits:—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

About 10,000*l* in gold was taken to the Bank yesterday, and 26,000*l* to-day.

The Stock Exchange Committee have appointed Friday, the 1st September, a special settling day in the ordinary stock, deferred dividend, of the Great Northern Railway Company, which is to be marked in the official list; and Tuesday, 5th September, in the new shares of the Illinois Central Railroad Company. All claims for new shares are to be settled on the same day.

The Bank of France return for the week exhibits an increase of about 59,000*l* in the bullion.

The following are the rates of discount in the chief cities of the Continent, showing no alteration:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3	2⅞ 3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	3½
Madrid	9	...
Hamburg	...	3¼ ½
St Petersburg	6	6½

ENGLISH FUNDS.—Consols this week have advanced ⅛ to ¼ per cent., but remain without much inherent buoyancy, the public continuing to purchase only to a moderate extent. As

Digitized by Google

for some time past investments yielding a higher rate of interest have been chiefly in favour, and hence while good railway stocks improve 2 or 3 per cent., the funds are only a fraction higher. The closing price this evening for money and the present account was 89⅞ to 90, and for October 90⅛ to 90¼. Reduced and New Three per Cents. left off at 89¾ to 89⅞.

The Government broker continues his purchases for the sinking fund, the amount taken to-day having been 10,000*l* New Three per Cents.

Indian Five per Cents. have improved to 105⅜ to 105⅝, while Exchequer bills remain without alteration at 3s discount to 1s premium.

FOREIGN STOCKS.—The chief movement in the foreign market has been a rise in Spanish Passive and Certificates, especially the latter. Egyptian Seven per Cents. of 1864 have also advanced. Brazilian stocks remain without material recovery, owing to the continuance of the war in South America. Turkish Consolides at one period fell to 48⅛ to 48⅜, but afterwards rallied to 48½ to 48¾, or a fraction lower than last Friday. The Anglo-Turkish loans, on the other hand, have generally improved, particularly that of 1862. There has been a better demand for Mexican, Russian, and other bonds, the former having especially risen. United States Five-twenties are rather less steady, at 68⅝ to 68⅞.

The final price of French 3 per Cent. Rentes on the Paris Bourse, this evening, was 69f 20c, showing a rise of about three-eighths compared with yesterday, and of nearly seven-eighths over last Friday. The present price, however, is for the new account at the end of the month.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

RAILWAYS AND OTHER SHARES.—A large business has been transacted in the market for British railway securities during the week, and in nearly every description an advance has taken place. London and North-Western and Metropolitan stocks have been chiefly in demand. The public continue to purchase the best railway securities for investment, while the sales, on the other hand, have been chiefly speculative. Hence, at the settlement this week the supply of stock was extremely scanty, and prices took an immediate rise. The abundance of money, the increasing traffic returns, and the favourable weather have also contributed to strengthen this market.

British colonial descriptions have not greatly varied, but show a general upward tendency. Foreign shares have also been firm, and occasionally higher.

In the miscellaneous market, the principal feature has been an active demand for joint stock banks, especially East Indian descriptions, which have latterly been unduly depressed by the late crisis in Bombay and Calcutta. Some of the oldest established home establishments have also improved, particularly London and County and London Joint Stock.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The orders for export having nearly all been executed, gold has been sent into the Bank, that establishment having purchased 293,600*l* since our last circular of the 24th instant; further amounts will follow, as we have to announce the under-mentioned arrivals:—Golden City, from Sydney, with 50,000*l*; the Asia, from Boston, with 5,000*l*; the City of Boston, from New York, with 26,000*l*; the Seine, from the West Indies, with 130,000*l*. About 9,000*l* in sovereigns has been sent to Alexandria.

Silver.—The Poonah has taken 6,100*l* for Bombay, and a further sum of 50,000*l* will be sent to Marseilles for shipment; our market is, however, very quiet, and the arrival of 130,000*l* by the Seine from the West Indies, will rather tend to weaken prices, there being at present but little demand for the East.

Mexican Dollars.—The Seine has brought about 80,000*l* of this coin. The market is, however, exceedingly dull at our last quotation, and there is but little business doing.

Exchange on India for drafts by the banks at 60 days' sight remains about the same as last week, viz., 1s 11½d to 1s 11⅝d Calcutta and Madras, and 1s 11¾d to 2s Bombay.

India Government Loan Notes are unchanged, and may be quoted 108½ to 109½ for 5½ per Cents., 100½ to 101½ for 5 per Cents., and 88 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 74s 9d to 75s 3d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅝d to 5s 0¾d per oz std; ditto, containing 5 grs gold, 5s 1d per oz std. last price; Mexican dollars, 5s 0¼d per oz, last price, flat; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FOREIGN EXCHANGES.—There has been no material change this week, but the rates were generally steady.

RAILWAY DIVIDENDS.—At the approaching meeting of the Great Western Railway, the half-yearly dividend on the original stock will be officially proposed, at the rate of 2 per cent. per annum, against 3 for the corresponding period of 1864; West Midland and Oxford, 1⅛ against 2¼; West Midland and Newport, ⅞ against 1¼; West Midland and Hereford, 5 against 5; and South Wales, 3¼ against 3½.

The proposed dividend of the North British Railway Company is at the rate of 3 per cent. per annum on the ordinary stock against 2 per cent. in 1864, on the Border Union stock 4½ against 3, and on the Edinburgh and Perth 1 per cent. against 2¾.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The banking firm of Messrs Ketchum, Sons, and Co., of New York, have suspended payment, owing to the discovery of a large issue of forged gold certificates, and an abstraction of funds, by Mr Edward Ketchum, one of the partners.

A meeting of the creditors of Messrs Scott, Bell, and Co., East Indian merchants, who suspended payment on the 6th

Digitized by Google

July, was held on Thursday last, when it was unanimously resolved to wind up the estate under inspection.

PUBLIC COMPANIES.—At the meeting of the Southampton Dock Company on Wednesday, the net profit was stated at 6,760*l*, and a distribution was ordered of 2 per cent. for the half-year.

The British and Californian Banking Company (Limited) have announced an ad interim dividend of 4*l* per share, for the half-year ended the 30th of June.

At the meeting of the British and Foreign Railway Plant Company held on the 30th inst., a dividend was declared at the rate of 10 per cent. for the past six months, being, with an ad interim payment already made, and a bonus on the shares of the new issue, equal to 20 per cent. per annum.

The report of the directors of Messrs Pile, Spence, and Co. (Limited) exhibits a profit of 20,082*l* for the half-year ending June 30. The directors recommend that the sum of 10,980*l* should be carried to reserve fund, leaving a balance available for dividend of 9,100*l*, being at the rate of 15 per cent. per annum, free of income tax, on the paid-up capital of the company.

The half-yearly meeting of the General Steam Navigation Company was held on Tuesday, when the directors' report was unanimously adopted, and a dividend of 14s per share, being at the rate of 10 per cent. per annum, was declared.

The meeting of the West London Wharves and Warehouses Company took place on Tuesday. The directors' report was agreed to, and it was announced that the 7 per cent. guaranteed interest on the capital called up will be paid on the 30th September.

A prospectus has been just issued of the Birkenhead Amalgamated Brewery Company (Limited). This company has been formed for the purchase of the Argyle and Anchor Breweries, two of the largest and most prosperous private breweries in Cheshire. The capital is 300,000*l*. in 15,000 of 20*l* each. Mr Henry K. Aspinall and Mr W. H. Cook, who have been for many years the managing proprietors of the Anchor and Argyle Breweries, will still retain an oversight of the affairs of the company, Mr Aspinall being the managing director, and Mr Cook the secretary.

The directors of the Delhi and London Bank (Limited) have declared an interim dividend of 10 per cent. per annum, free of income tax, for the three months ended the 30th June last, payable on and after the 1st September.

At the half-yearly meeting of the Bank of Australasia, held on Monday, the directors' report, announcing the proposed payment in October, of a dividend and bonus at the rate of 14 per cent. per annum, free of income tax, was adopted. This allows 2*l* 16s on each old, and 2*l* 2s on each new share. In future the old and new shares will stand on the same footing.

At the meeting of Halcombe and Co., Sack Contractors (Limited), a dividend was declared at the rate of 6 per cent. for the half-year, making a total of 12 per cent. for the twelve months.

The directors of Moore, McQueen, and Company (Limited), have announced an ad interim dividend, at the rate of 10 per cent. per annum, free of income tax, for the three months ended the 30th June last, payable on and after the 1st September.

It is announced that Mr M. G. Alberti, of the firm of Oppenheim, Alberti, and Co., has joined the council of direction of the Imperial Ottoman Bank at Constantinople.

The Alliance Bank have made a call of 5*l* per share on the new shares issued in 1864.

The directors of the City of Milan Improvements Company have received a report from their architect as to the progress of the works at present being carried on, of which the following is an abridgement:—On the 30th September next, the works will extend over an area of about 10,000 metres more than those already acquired. The buildings already commenced (on an area of 4,000 square metres), will be finished ready for letting, by the 30th September, 1866—the ordinary period for letting in Milan. The construction of the buildings to be commenced on the 30th September, 1865, will also be pushed on with the greatest rapidity, so that the shops, warehouses, and a portion of the apartments may be let by the 30th of September, 1866, and the remaining portion at Easter, 1867. When the new buildings are all completed, the probable revenue will be 2,640,000f, equal to 105,600*l*, arising as follows:—

	francs.
From the Ground Floors	1,310,000
— Entre-sols	210,000
— 1st Floors	755,000
— 2nd —	150,000
— 3rd —	113,000
— 4th —	76,000
— Vaults	26,000
	2,640,000

Or £105,600 a year.

MISCELLANEOUS.—The following notice relative to the debt of New Granada has been forwarded to the Stock Exchange by Messrs Baring Brothers and Co.:—Messrs Baring Brothers and Co. having received by this mail an account of the New Granada dividends, from the custom-house of Santa Marta, 5,420*l*; from the custom-house of Cartagena, 800*l* 0s 1d; from the custom-house of San José de Cucuta, 633*l* 12s 7d; total, 6,853*l* 12s 8d.—August 31st, 1865.

With regard to the Venezuela 6 per Cent. loan of 1864, the annexed statement has also been published:—

The General Credit and Finance Company of London (Limited) are in receipt of advices from their agents, Messrs H. N. Boulton and Co., dated La Guayra, Aug. 9, 1865, of duties collected as follows, on account of the above loan:—

For statement, No. 53, from Puerto Cabello	$10,150 56
— No. 54, —	2,184 35
— No. 41, from La Guayra	4,930 51
— No. 42, —	20,254 64
Total	$37,520 06

The mail from Guayaquil has brought a remittance of 600*l* on account of the dividends on the debt of Ecuador.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109¼ per cent. At these rates there is no profit on the importation of gold from the United States.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Aug. 26, 1865:—

	Quantities Sold.		Average Price.	
	qrs	bush	s	d
Wheat	48,026	5	45	4
Barley	1,052	4	30	0
Oats	2,340	7	24	0

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold.			Average Prices.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was moderate. The trade for all qualities, both old and new, was very quiet. Old samples changed hands at the rates of Monday, but new sold at irregular prices, and as low as 36s per quarter. The foreign wheat trade was very inactive, and had sales been pressed, holders would have been compelled to accept less money. Barley moved off slowly, but at full prices. Oats were in good supply, and most qualities were in steady request, on rather higher terms. Beans and peas were firm, and unaltered in value from Monday. The flour trade was steady at full quotations. This week's imports amount to 10,890 quarters of wheat; 3,620 barley; 23,950 oats; 80 sacks and 6,100 barrels of flour.

Both at Liverpool and Wakefield, this morning, the wheat trade was dull, and prices were rather drooping. Spring corn, however, ruled firm.

A large business has been transacted in the Liverpool cotton market during the present week, and the total sales amount to 109,000 bales (or about 29,000 bales more than the daily reports led to expect), of which the trade have taken 67,500 bales, speculators 15,000 bales, and exporters 26,500 bales. Quotations are about ¼d higher than on Friday last. To-day the market closes very firm. Sales, 10,000 bales at advancing rates. The imports of the week amount to 61,640 bales, and to-day's stock is estimated at 411,770 bales.

From New Orleans we have intelligence to Aug. 17. The receipts of cotton during the week preceding that date amounted to 23,000 bales, whilst the sales reached 72,000 bales. The stock of produce, however, was estimated at 88,000 bales. The quotation for middling quality was 41c to 42c per lb.

The arrivals of cotton at Savannah, from Aug. 1 to Aug. 12, were 5,714 bales Upland, 86 bales Sea Island, and 717 bales other kinds, whilst the total exports had amounted to 3,672 bales. Ordinary was quoted at 28c to 30c; middling, 34c to 37c; and good middling, 40c to 41c per lb.

There is no news of importance at hand from Mobile this week. The limited supplies of cotton received were mostly forwarded to New Orleans for shipment to New York or elsewhere.

Via the Persian Gulf, we have intelligence from Bombay to Aug. 26. The cotton trade was dull at 9 5-16d per lb for middling fair Oomrawuttee; and 10d for Dhollera, with freight. The week's shipments had been only 4,000 bales.

The cotton trade at Calcutta, during the week ending July 22, was very quiet. Holders, however, were firm, and previous quotations were supported. The export from July 1 to July 20 was 9,184 bales to Great Britain, and 1,149 bales to China.

Advices from Madras are to July 26. The arrivals of *new* cotton had been large, and the stock of all kinds was estimated at 15,000 bales. The trade was dull, and prices were somewhat easier. Western produce was quoted at 9d, and Tinnivelly at 10d per lb.

At Shanghai and other Chinese ports, the business passing in cotton at latest dates was very limited, and was almost entirely confined to purchases on native account. Prices ruled, in a great measure, nominal. At Shanghai, the best Kong-Peh was quoted at 13.5 to 14.5 taels per picul.

We have advices from Alexandria to August 23. At that date fair open-ginned cotton was quoted at 16d per lb, free on board, and the market was reported firm. The arrivals, from August 7 to August 13, were about 10,000, and the sales, 15,000 bales. Freight by steamer to Liverpool, ¾d per lb.

An increased amount of business has been transacted in the markets for colonial and foreign grocery produce this week. With the exception of plantation Ceylon coffee, which, owing to the abundant supply on offer, has been largely dealt in, at a decline in prices of 6d per cwt, the quotations have had an upward tendency. Raw sugar has advanced 6d per cwt; cocoa has realised rather higher terms; and rice, arising from the limited stock and the firmness of the wheat trade, has changed hands at enhanced rates. In the tea trade, however, rather a quiet feeling

Digitized by Google

has been apparent, but without leading to any quotable change in prices from Friday last. Last week, duty was paid in London on 1,111,908 lbs of tea, whilst the export for the week ending Aug. 24 amounted to 798,885 lbs, making a total of 1,910,793 lbs, against 1,777,160 lbs last year.

The tea trade at the leading Chinese ports at latest dates was decidedly quiet, and, in some instances, a slight fall had taken place in prices. The export to Great Britain since the opening of the season had amounted to 20,352,600 lbs against 20,813,100 lbs; to the United States, 1,468,500 lbs against 186,700 lbs, showing in the first case a *decrease* of 460,500 lbs; but in the second an *increase* of 1,281,800 lbs this year as compared with last.

From Havana, we have intelligence to Aug. 5. The demand for sugar for the United States had fallen off, and prices were rather lower. According to Messrs Luling and Co.'s circular, the total shipments from Jan. 1 to date had amounted to 1,443,108 boxes, against 1,258,843 boxes last year. Of these quantities, 410,744 and 574,756 boxes in 1865 and 1864 respectively, were shipped to Great Britain; and 491,356 and 226,602 boxes to the United States.

We learn from Colombo, to July 29, that, owing to the small supply on offer, native coffee had changed hands at higher prices, —viz., at 55s per cwt for picked and dried produce. Plantation coffee was in short supply, and was quoted at 12s 9d to 13s per bushel. The annexed table of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

At the public sales of colonial wool, home buyers continue to operate steadily; but the export demand is still limited. Faulty wools are about ½d per lb lower than at last series, good and fine qualities being firm in price. In English wool, by private contract, an increased amount of business has been transacted on rather higher terms.

There has been an active demand for silk; the transactions in produce on the spot and to arrive, have been large, and *new* China qualities have realised an advance in price of 6d to 1s per lb.

An extensive business was transacted in silk at Shanghai during the fortnight ending July 3, and the settlements were estimated at nearly 6,000 bales. At one period, however, prices declined to the extent of 10 taels per picul; but this fall was subsequently recovered. The receipts from the interior had been very moderate, and the unsold stock was reduced to about 3,000 bales. The following table shows the receipts, &c., since the opening of the season:—

	1865. bales.	1864. bales.	1863. bales.
Receipts	19,500	6,900	14,000
Settlements	16,200	1,900	4,000
Exports	11,768	999	2,341
Unsold stock	3,000	5,000	10,000

The silk season having been brought to a close at Yokohama at the date of our last advices, and scarcely any *new* produce being on offer, business in all qualities had been very limited, and prices ruled almost nominal. A parcel of *new* silk, mixed with old, had sold as high as $700 to $720 per picul. The export, from June 1 to June 26, was 708 bales, against 505 bales last year.

The silk trade at Calcutta, during the week ending July 26, was very firm as regards good and fine qualities, at fully late rates. The export for the six months ending June 30 was 6,863 bales, against 4,869 bales to Great Britain; and 4,361 bales, against 558 bales last year to France.

Scotch pig iron has sold as high as 56s, but is now quoted at 55s 6d cash, mixed numbers. For other metals, the market has ruled quiet. Linseed oil is worth 33s; and foreign refined rapeseed oil 47s 6d to 48s per cwt. Sperm commands 98*l* to 100*l* per tun. *New* P. Y. C. tallow is selling at 45s 6d per cwt, on the spot.

The leading feature in the commercial news from New York this week, is the continued downward movement in the value of cotton goods, consequent upon increased receipts of new produce, and of augmented imports of British manufactured goods. As regards the crops, the accounts are much more favourable; indeed, in some States, an unusually abundant crop is anticipated, arising, however, not so much from a large yield per acre as from the increased extent of land at present under cultivation, as compared with the last two or three years. Gold, during the week ending Aug. 19, fluctuated in price between 140½ and 143 per cent. The stock of bullion in the banks of New York city on the 12th ult. was 4,032,660*l*, and the balance in the Sub-Treasury, 11,725,460*l*.

THE COTTON TRADE.

LIVERPOOL—Sept. 1.

The demand for cotton has been good throughout the week, and on Tuesday and Wednesday became animated, particularly from the trade, and, although holders continue to offer their stocks freely, the market closed yesterday firmly, with some advance in prices on most descriptions.

Sea Island continues in fair request, but is freely offered at previous rates. American has been in general demand, and has advanced partially ¼d per lb during the week. Brazil has been in good request, establishing a rise of ¼d to ½d per lb, particularly in the clean descriptions, which have become very scarce. In Egyptian, a large business has been done, but the supply offering is abundant, and the only advance quoted is of ¼d per lb in fair open. In Smyrna, the sales have been only to a moderate extent, but at full prices. East India has been in good general request, and, though still offered very freely, the improved demand has raised the value during the last few days ¼d to ½d per lb. The improvement is chiefly observable in good stapled cotton, the superior quality of which this season has induced a more general consumption. China, with a fair demand, may be quoted ¼d per lb dearer.

To arrive, the transactions have been numerous, and the last quotations were yesterday for New Orleans, sample guaranteed ship named, 16⅞d per lb; Pernam, first quality, ship named, 17¼d Egyptian, fair open, at sea, 17½d; shipments, August, 17¼d; October, 17d; Western Madras, fair, sailing, July 12d and August 12d; ship named, 11¾d per lb.

The sales of the week amount to 109,380 bales, including 15,520 on speculation, and 26,320 declared for export, leaving 67,490 bales to the trade. The market opens this morning with a fair inquiry, and the sales will probably amount to about 10,000 bales, without change in prices.

NEW YORK—Aug. 19.

The market was quiet and rather drooping until Wednesday, when the decline was checked by a brisk demand, mainly speculative. The sales for the week have been about 14,000 bales. Exports, 6,304 bales: receipts for the week, 19,520 bales. Estimates of stock on hand range from 70,000 to 85,000 bales. At to-day's market, sales were 3,000 bales; market steady. The following are the closing quotations :—

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a tolerably active demand for cotton goods this week, and prices of several descriptions have improved. In new, a fair business has been transacted, and pig iron has changed hands at higher rates. The coal trade has ruled firm, with a somewhat increased export inquiry.

MANCHESTER, Aug. 31.—An active business has been done this week in yarns at a slight advance, and in goods at the full rates of last week. Of both yarns and goods, only the inferior descriptions can, generally speaking, be had in stock, the better qualities being mostly pre-engaged. Fine doubled yarns for Russia have been bought freely at an advance. For Germany and other parts of the Continent, all the usual numbers have been taken on a fair scale. For the home trade, manufacturers have paid ¼d to ½d per lb higher than last week. For India, a few purchases have been made of mulls, jacconets, and other articles at low rates, but of shirtings and T'cloths purchases have not been of great note. A quieter tone has been observed to-day, owing to quotations having risen.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—A good deal of wool has been moved off. The improved demand has chiefly run upon Lincoln, Yorkshire, and Irish wools, but other classes, including down wools, have also been more inquired for. The prices of last week are fully established, and in many cases a further advance has been obtained. The demand for yarns which has recently come from abroad does not appear to be yielding its full benefit to this market. Our shippers find considerable inquiry for 30's weft and also for twofold 36's and 40's. The home trade continues steadily good, and generally the trade is healthy. The Americans continue to be the principal buyers of our piece goods. The demand for plain goods has improved, but merchants are extremely cautious in their purchases. Prices generally the turn higher.

BLACKBURN.—There has been a fair amount of business done in yarns. The demand has been general in its character, and an advance of about ¼d per lb has been realised.

LEICESTER.—There is still an active tone in the hosiery trade. In the stock and fancy departments there is a good business doing, and future prospects are encouraging. The trade for wool continues firm. Yarns meet a moderate inquiry. Some classes of gloves are in tolerable request.

NOTTINGHAM.—The demand for cotton goods is inactive, although some small orders are being executed for Mechlin quillings. For silk goods the demand is slow, and there is no change for the better to report in the inquiry for silk quillings or Mechlins. There is a fair trade doing in black laces, but in narrow edgings there is not much passing. The demand for hosiery goods continues very brisk in all departments. Yarns are very firm.

LEEDS.—In heavy goods plain and fancy witneys have a steady sale, and their is also a fair demand for strong meltons and good tweeds. A few inquiries are made for black unions of medium and low quality, but, upon the whole, such goods are not in much request.

ROCHDALE.—A little dulness exists in the flannel trade. Fancy goods are in fair request, and the manufacturers of such are well employed. Indeed, the manufacturers of flannels generally keep in good work, and stocks in their hands are not large. Prices are firm. Yorkshire goods are rather slow of sale at late rates.

HUDDERSFIELD.—Selections from stocks on hand of better class fancy trouserings and coatings have been made somewhat more freely than of late, and piece-dyed black doeskins and other descriptions of plain goods at medium prices have also been selling in considerable quantities. The shipping demand for low goods has been quiet, and stocks on hand of these goods are still considerable.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 19.—The speculative feeling has ruled very strong, and a considerable portion of the arrivals continue to go into the store on speculative account. The export business has been of a very trifling character. The following are the closing quotations :—Flour—Superfine State and Western, $6.15 to $6.65; extra State, $7 to $7.25; shipping roundhoop Ohio, $8.40 to $8.65; extra Western, common to good, $7.20 to $9.85; double extra Western and St Louis, $10 to $13.50; Southern, supers, $8.50 to $9.65; Southern, fancy and extra, $9.75 to $13.25; Canada, common to choice extra, $7.10 to $10; rye flour, fine and superfine, $5.50 to $6; corn meal, Jersey and Brandywine, $5 to $5.50 per barrel. Wheat—Chicago spring, $1.14 to $1.50; Milwaukee Club, $1.45 to $1.49; red winter, $1.90 to $2.5; amber Michigan, &c., $2.10 to $2.12 per bushel. Corn—Western mixed, 88c to

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Coastwise and by land carriage, the arrivals of English wheat up to our market this week have been very moderate. Those of the new crop, however, have appeared in improved condition. On the whole, the demand for selected qualities has ruled steady at, in some instances, an advance in the quotations of 1s per quarter. Inferior kinds have moved off slowly at late rates. All foreign wheats have been held firmly, but the business doing in them has been much restricted. The supply of new English barley has been mostly cleared off at from 32s to 36s per quarter. Foreign parcels have ruled firm in price. The malt trade has continued steady at full quotations. The import of oats from abroad having been large, the oat trade has been less active, and prices have given way 6d per quarter. The few samples of beans and peas on offer have been disposed of at extreme rates. New white boiling peas have sold at 40s to 42s, and grey 37s to 38s per quarter. We have no change to notice in the value of any kind of flour. The trade has become very inactive.

In the local markets, the transactions in all kinds of produce have been very moderate. Prices, however, have ruled firm.

The return of fine weather has enabled our farmers to secure an immense quantity of wheat in fair condition. In the forward counties, very little grain is now exposed in the fields. Wheat and barley are certainly average crops.

The continental markets have been steady for wheat, at very full prices. In spring corn, a good business has been doing at steady currencies. The exports of produce from America have not increased.

The following report has reached us in reference to the crops in America:—"The crop of the north-west is uninjured, and with a week or ten days more of good harvest weather, this country will turn out the largest crop of choice wheat that it has ever produced, Not so heavy, perhaps, to the acre, take it all through, as in 1860, but vastly more breadth of soil has been sown. In Minnesota, the yield per acre will quite equal 1860. Nothing was ever seen like it in that section. The crop of Wisconsin and Iowa is more than half harvested. In Minnesota, the farmers will be through harvest by the 20th, with good weather. The weather is now splendid, and harvesting going on finely, so that with a week or ten days more of good weather we shall have a great crop of choice quality of spring wheat, and up to this time the crop is not damaged by rain or water. The rye crop is large and of fine quality. Barley fair, some stained. Oats, great crop. Corn doing finely, could not be better."

In Scotland, harvest work is progressing steadily. The various markets have been rather scantily supplied with grain, in which very little business has been transacted. Prices, however, have continued firm.

The Irish markets have been steady for most articles, at about previous rates. A fair quantity of wheat and other grain has been carried.

Very few complaints have reached us respecting the potato disease. As a whole, the crop of potatoes is the largest and best ever grown.

A moderate supply of English wheat was on sale at Mark lane to-day. The trade ruled quiet, but good and fine old wheats changed hands at full prices. New wheats were difficult of sale, and sold as low as 36s per quarter. The foreign wheat trade was very quiet, with a slight downward tendency as regards the value of secondary descriptions of produce. Barley supported previous rates, but with only a moderate demand. Oats, which were in good supply, moved off freely, on rather higher terms. Beans were firm in price. For flour there was a fair sale, at late rates.

In reference to the trade in floating cargoes, Mr George Dornbusch reports as follows:—Arrivals at ports of call since last Friday, 23 cargoes, viz., 9 wheat, 4 maize, 2 barley, 2 rye, 1 beans, 2 milletseed, 1 linseed, and 2 oilcake. Wheat—23 cargoes sold, at prices varying according to position of vessel, arrived, on passage, or to be shipped. Arrived—Berdianski, at 43s 3d to 42s 7½d; Odessa Ghirka, 42s 3d to 42s 6d; Taganrog Ghirka, 41s to 41s 9d. On passage—Odessa Ghirka, at 42s to 43s; Taganrog Ghirka, 41s to 41s 3d. Shipped or to be shipped—Taganrog Ghirka, at 41s 9d to 42s 6d; Sandomirka, 44s; Polish, 42s. Maize—24 cargoes sold: arrived, at 29s 3d to 29s 9d; on passage, shipped or to be shipped from Odessa, Ibrail, and Galatz, at 28s to 31s. Barley—3 cargoes sold, on passage, and to be shipped, at 21s 6d to 22s per 480 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A more active demand prevails, the market showing an upward tendency, and prices frequently rule 6d higher than on Friday last. The stock now amounts to 106,000 tons, against 99,200 tons in 1864 at the corresponding period. There has been an increase in the home deliveries of 20,700 tons, and for export of 11,240 tons, on those of last year. The refiners have bought West India freely, the sales to yesterday reaching 4,800 casks. Barbadoes by auction went at 29s to 36s; Jamaica, 30s to 34s 6d per cwt. Low sugars continue in demand.

Mauritius.—The large quantity brought forward by auction on Tuesday partly sold at full prices: crystallised, 34s to 37s 6d; grainy, 33s 6d to 37s; low to good brown, 27s 6d to 30s 6d. Considerable business has also been done privately.

Bengal.—900 bags low brown date sort have sold at 28s per cwt.

Penang.—2,700 bags sold at 29s 6d to 33s 6d.

Siam.—2,181 bags offered by auction chiefly sold: yellow to strong white, 11s 8d duty, 36s to 38s 6d; 10s 6d duty, brown and yellow, 31s 6d to 35s 6d. Very low brown withdrawn at 27s per cwt.

Manilla.—9,000 bags unclayed have sold at 27s 6d to 28s 3d, and 100 tons clayed, of old import, at 30s per cwt.

Other Foreign.—A floating cargo of Cuba has sold for the United Kingdom at 23s. One of Havana, No. 13, at 26s 6d.

Refined.—The market is very firm, at 6d to 1s per cwt recovery.

RUM.—The Government recently took 59,000 gallons at 1s 8d proof. A good demand now prevails, and the market is firm. The week's sales include 148 puncheons Mauritius at 1s 7d, and 550 casks ditto at 1s 7½d per proof gallon.

COCOA.—694 bags Grenada offered by auction chiefly sold at 52s to 61s 6d, with fine at 62s 6d up to 71s. 256 Trinidad realised former prices: middling to fine, 75s to 111s per per cwt.

TEA.—There have not been any public sales this week, and the market is steady by private contract.

RICE.—A large business has been done in soft grain descriptions at rather higher prices, ranging from 9s 10½d to 10s 7½d for Necrancie Arracan. Some fine new Rangoon sold at 12s to 12s 3d. A parcel of middling old white hard grain Bengal at 14s 3d. 2,465 bags white Bengal offered by auction were taken in above the market value. Two floating cargoes of Necrancie Arracan have sold for exportation at 10s 6d and 11s; one of Bassein at 11s. One of Rangoon at 12s per cwt for the United Kingdom.

IMPORTS and DELIVERIES of RICE to August 26, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports tons	24230	34400	30800	71650
Deliveries	46400	51200	53750	39750
Stock	19050	29100	41150	61800

COFFEE.—The large quantity brought upon the market has had very little influence upon prices, which are occasionally 6d to 1s per cwt lower than on Friday last. 3,077 casks 493 barrels and bags plantation Ceylon nearly all sold: pale, 75s to 78s; middling rather mixed to good coloury, 78s 6d to 86s, up to 90s for fine. 2,819 bags native only partly sold: good ordinary mixed, 65s 6d; fine ordinary, 67s 6d to 68s. 105 cases withdrawn. 1,608 cases 1,357 bags East India sold at the relative value, from 79s 6d to 85s; pale, 70s to 76s 6d. A small quantity of good ordinary Singapore at 68s. Part of a floating cargo of Bahia has sold for a near port at 51s 6d. The stock has increased to 12,800

Digitized by Google

tons, but the export deliveries exceed those of last year by 25 per cent.

SPICES.—At auction, 13 cases brown nutmegs sold steadily: bold, 3s 7d; good, 2s 6d to 2s 7d; middling, 1s 8d; low small, 11d. A few lots of pimento went rather dearer: from 2⅝d to 2⅞d. A good deal of business is reported privately at 2⅜d. 250 bales Zanzibar cloves sold at 3⅛d to 3⅜d; 50 cases Penang cloves, 1s 0½d to 1s 1¼d; fine, 1s 2⅜d. 1,118 bags black pepper met with buyers: Singapore, 3d to 3⅛d; West Coast Penang, 2⅞d to 3d. A few sales have been effected in white pepper privately, at 5¼d per lb. Cassia lignea has been in good demand by private contract, at higher rates. 700 bags African ginger were taken in at 36s. 368 barrels Jamaica sold at steady prices: ordinary to fine, 3*l* 4s to 8*l* 15s. 1,651 bags Bengal were taken in at 27s 6d to 28s. 898 cases Cochin sold steadily at 64s to 94s per cwt.

SAGO FLOUR.—630 bags were taken in, at 13s 9d per cwt.

SALTPETRE.—East India continues dull. A parcel of Bengal, refraction 8½ to 8, has sold privately at 23s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to August 26, with STOCKS on hand.

	1865	1864	1863	1862
Imports .....tons	5150 ...	10130 ...	11600 ...	12400
Deliveries.....	7270 ...	8750 ...	9550 ...	11050
Stock.....	5290 ...	8540 ...	5675 ...	4480

Delivered last week, 250 tons.

COCHINEAL.—573 bags Honduras offered by auction sold at steady rates to 1d advance, including silvers at 3s 1d to 3s 2d per lb.

OTHER DRYSALTERY GOODS.—A sale of Gambier has been made at 19s 3d. Bengal safflower steady: 60 bales by auction went at 3*l* 15s to 6*l* 5s per cwt for ordinary to good quality.

METALS.—There has been some tendency to improvement in the market. Straits tin has sold freely at 88*l* to 89*l*, and 89*l* 10s paid to arrive. Spelter quotations have been irregular. Several contracts made during the week at 21*l* 12s 6d to 22*l* 2s 6d on the spot, and 21*l* 12s 6d September delivery. The last sale of Scotch pig iron was at 55s 9d per ton cash, mixed numbers. Copper is nominally unaltered for British manufactured, but some business has been done in foreign.

JUTE.—The market is not active although firm. On Wednesday there were only 4,008 bales offered, which chiefly sold at previous quotations, ranging from 11*l* 10s to 22*l* 15s per ton.

MANILLA HEMP continues firm. A parcel of fair roping has sold privately at 34*l* 10s per ton.

OIL.—Linseed has advanced to 33s. Rape, still active, with large sales for forward delivery. Foreign: brown, 45s 6d. Palm has advanced: fine, 38s to 38s 6d. Cocoa-nut, firm. Cochin, 45s 6d. Ceylon, quiet, at 43s per cwt; for the best sperm cannot be obtained under 100*l*. Pale seal, has sold freely at 40*l*, now 41*l* demanded; cod, 48*l*: pale Southern, 44*l* per ton.

LINSEED.—The market is steady, but the business doing is small, owing to the inactive demand for both cake and oil; Calcutta is quoted at 56s 6d to 57s; Mirzapore, 58s to 58s 6d; Bombay, 58s 6d per cwt; Calcutta, for arrival, is quoted at 57s 6d to 58s; and Azov cargoes at 58s 6d per qr.

TALLOW.—The market for foreign is firm, with prices 9d to 1s per cwt higher. 1st sort new Petersburg Y.C., 46s; January to March, 47s per cwt.

PARTICULARS OF TALLOW.—Monday, August 28, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market has been firm. 746 casks West India, 2,010 bags Mauritius, and 243 bags Natal offered by auction went at full prices, and quotations are fully 6d dearer for the week. A floating cargo of Cuba has sold at 23s per cwt for the United Kingdom. Week's sale of West India, 6,054 casks.

COFFEE.—705 casks Ceylon, 55 casks 773 cases 196 bags East India, in the sales went off at steady prices.

SPICES.—60 cases Tellicherry white pepper sold at 8¾d to 1s 0¼d; 388 bags Singapore white at 5⅛d to 5¼d; 3,350 bags Singapore black two-thirds sold at 3d to 3⅛d; a few lots low at 2⅞d to 3d. 1,332 bags Trang at 3d to 3⅛d. 23 cases Penang cloves at 1s 1d per lb. 100 cases Cochin ginger at 65s to 100s per cwt.

RICE.—A parcel of fine new Rangoon sold at 12s 6d per cwt.

SHELLAC.—Button sorts advanced 3s to 5s per cwt.

OIL.—307 casks palm sold at 24s to 38s per cwt.

TALLOW.—Y. C. advanced to 48s 9d. 444 casks Australian beef by auction sold at 42s to 44s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been more animated this week, at an advance of 6d on dry and 1s on unstoved goods—lowest price of titlers, 42s. A large business has been done in Holland for forward delivery at higher prices.

DRY FRUIT.—The first cargoes of Valentia new raisins have arrived, and prices, after opening at 42s, receded to 39s to 40s, at which prices but little business is doing. The quality is unsatisfactory, and hasty packing is very evident. Currants are stagnant in face of the arrival of new next week.

ENGLISH WOOL.—Rather more demand for English wool: prices remain the same.

COLONIAL WOOL.—Superior and good wool rather firmer; faulty without change

FLAX.—Market firm, and a good business doing.

HEMP.—Market very quiet and but little business doing.

SILK.—A moderate business doing and no change in prices.

TOBACCO.—The market has assumed a more active appearance, and a fair average extent of business transacted in most descriptions. Some of the recent arrivals of Virginia from New York have been sampled, and turned out of fine quality.

LEATHER AND HIDES.—The leather trade has not experienced any change this week; a steady inquiry continues for most articles, but the supplies are generally fully equal to the demand. At Leadenhall, on Tuesday, there was a limited attendance of buyers; the articles most wanted were very thin butts, good crop hides, 45 lbs and 50 lbs, light shaved hides, horse hides, and prime kips. No alteration can be quoted in prices.

METALS.—There is an improved tone observable in our market, although the state of actual business is little changed. Copper has found buyers of all cheap parcels offered. Iron is in steady request, without change in quotations. Tin has rallied 10s to 20s per ton in Straits and Banca, with a moderate extent of business doing. Spelter and lead remain stationary. Tin plates in good demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	9
Fat by ditto	2	4
Yellow Russia	47	6
Melted stuff	34	6
Rough ditto	19	0
Greaves	19	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 28.—The total imports of foreign stock into London, last week, amounted to 24,636 head. In the corresponding week in 1864 we received 15,361; in 1863, 16,797; in 1862, 11,579; in 1861, 10,988; in 1860, 13,707; and in 1859, 12,659 head.

To-day's market was heavily supplied with foreign stock. With the exception of a few of the sheep, there was no improvement in quality, compared with Monday last. Sales progressed slowly, on rather easier terms. The supply of English beasts was again limited, and in very middling condition. Nevertheless, all breeds moved off slowly, and, in some instances, the quotations had a drooping tendency. The best Scots, crosses, &c., sold at 5s 4d per 8 lbs. More than half the supply was composed of foreigners. The show of sheep was on the increase; but nearly all breeds were in middling condition. Good and prime Downs, half-breds, Lincolns, Leicesters, &c., changed hands steadily, at full quotations. Otherwise, the mutton trade was heavy, and the currencies ruled in favour of buyers. The top figure was 6s 8d per 8 lbs. The lamb season is now nearly over; but the few lambs in the pens realised 6s to 7s per 8 lbs. We have to report a good demand for calves at 2d per 8 lbs more money. Prices ranged from 4s 4d to 5s 4d per 8 lbs. There was a fair demand for pigs, and prices had an upward tendency.

SUPPLIES.

	Aug. 29, 1864.	Aug. 28, 1865.
Beasts.....	6890	4791
Sheep and lambs.....	29270	27470
Calves	124	279
Pigs	460	530

THURSDAY, Aug. 31.—The supply of beasts on sale at our market to-day was only moderate, whilst the quality of the stock was very middling. Good and fine breeds consequently changed hands at the extreme rates of Monday, viz., from 5s to 5s 6d per 8 lbs; otherwise, the beef trade ruled quiet at Monday's currency. The market was moderately supplied with sheep, the trade for which was firm at full prices. The general top figure was 6s 8d per 8 lbs. The few lambs on offer sold at about late rates. The trade for veal was steady at full quotations. Pork ruled firm, and prime small porkers were rather dearer than on Monday.

Per 8 lbs to sink the offal.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 1.—The supplies of potatoes have increased, and the trade rules heavy, on rather easier terms. Regents, 60s to 80s; Shaws, 50s to 70s per ton.

HOP MARKET.

BOROUGH, Friday, Sept. 1.—Picking continues to make satisfactory progress, and in most plantations there is a full average yield. The quality of the produce is excellent. Our market, consequently, is dull, with a downward tendency in prices.

COAL MARKET.

FRIDAY, Sept. 1.—Wallsend: East Hartlepool 19s 9d—Byron 18s 9d—Cassop 19s 3d—Harton 18s 6d—South Hartlepool 19s—Bate's West Hartley 16s 9d—Holywell Main 16s. Ships at market, 28; sold, 8; gas contracts, 19—27; unsold, 1; ships at sea, 40.

Digitized by Google

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 1.—The demand continues fair, and there is no change in prices of all the more current descriptions in foreign. As there still exists a great deal of uncertainty about the harvest, buyers restrict their purchases more or less to present wants, otherwise transactions would be of larger extent.

The Gazette.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 19th of August, on 12,177 miles, to 745,891*l*, and for the corresponding week of last year, on 11,831 miles, to 712,397*l*, showing an increase of 336 miles and of 33,494*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,759 miles, to 616,339*l*, and for the corresponding week of 1864, on 8,448 miles, to 590,237*l*, showing an increase of 311 miles and an increase of 26,102*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 28.—In the share market to-day, although the transactions were not numerous, English railways closed with a rather general tendency to firmness. Miscellaneous shares were also slightly steadier, and the other descriptions were unaltered in tone. Of the English lines, Great Northern, ditto (A stock), Great Western (Oxford), Midland (Birmingham and Derby), and North Staffordshire were all better, North-Western and South-Eastern ¾ better, Caledonian, Lancashire and Yorkshire, Manchester, Sheffield, &c., and North-Eastern (Berwick) all ½ better, and Great Western (original) and Midland (original) ¼ better; and South Devon further declined 2. In colonial railways and foreign mines no change occurred. In foreign railways, Bahia improved ¼; and Antwerp and Rotterdam declined ⅛, Lombardo-Venetian a further ¼, and Northern of Buenos Ayres (paid up) further 1½. In American, Pennsylvania Railroad (2nd mortgage) advanced 1; and Erie shares (paid up) relapsed 1, Illinois Central shares ¾, and United States (5-20) ½.

TUESDAY, Aug 29.—In the share market to-day there was a genera appearance of firmness at the close, especially in the English railways and banks, the mines, however, being an exception; the amount of business was, however, very limited. Of the English lines, South Devon recovered 1; Scottish Central advanced 2, Metropolitan 1½, ditto (new) ⅝, Great Eastern, North British, North-Eastern (Leeds), and ditto (York)l ½ each, ditto (Berwick), and Caledonian a further ¼ each, Midland and South-Eastern further ¾ each, Great Western, Lancashire and Yorkshire, and North-Western a further ¼ each, and Great Northern (A stock) further 2; and Blackwall declined 2. In colonial, Great Western of Canada (shares of both descriptions) improved ¼ each. In foreign, Northern of Buenos Ayres (paid up) recovered ½, and Lombardo-Venetian ⅛, and Great Luxembourg improved ⅛. In American, Erie shares (paid up) recovered 1, Atlantic and Great Western (Pennsylvania, 1st mortgage) advanced 1, and United States (5-20) declined ⅛.

WEDNESDAY, Aug. 30.—In the share market to-day, being the preparation for the settlement at the end of the month, the transactions were chiefly for the account, and the final quotations were generally higher in English railways, as well as, in many instances, in banks. In the other descriptions there was also a general tendency to firmness. Of the English lines, South-Western and Metropolitan District improved ½ each, ditto (10*l*) and Great Northern 1 each, and Metropolitan (extension) ⅛; and ditto (original) further improved 1¼, ditto (new) ⅝, Great Northern (A stock), Great Eastern, North British, North-Eastern (York), and South-Eastern ¼ each, Lancashire and Yorkshire, North-Western, and Midland ¾ each, and Great Western ½. In colonial, Scinde improved ½, Melbourne and Hobson's Bay and Great Western of Canada (bonds of both descriptions) 1 each, and ditto (shares of both descriptions) a further ⅛ each. In foreign, Dutch-Rhenish improved ⅛, Great Luxembourg a further ⅛, and Northern of Buenos Ayres a further 1; Lombardo-Venetian relapsed ⅛, and Paris and Mediterranean declined ½. In American, United States (5-20) recovered ¼, Illinois Central (shares) advanced ½, and Erie shares (paid up) further improved ¼.

THURSDAY, Aug. 31.—The share market to-day closed with a generally firm appearance, especially in the home securities, the lower quotations in several instances of the English railways being in consequence of being ex dividend. Of this description, Glasgow and South-Western and North British (Edinburgh, Perth, &c.) advanced 1 each, and ditto (original) and Great Western a further ½ each. In colonial, Great Indian Peninsula and Punjaub improved ½ each, and Great Western of Canada (of both descriptions) a further ⅛ each. In foreign, Lombardo-Venetian recovered ⅛. In American, Illinois Central shares further improved ¼. In British mines, which were an exception to the general firmness, Great Laxey alone further advanced ½, and East Bassett declined 2, Clifford Amalgamated 1, and Chiverton ½. In foreign mines, Pontgibaud Silver improved 1½, and Linares declined ½.

FRIDAY, Sept. 1.—The transactions in the railway market to-day were not numerous, yet the tone, on the whole, was rather favourable. Great Western, London and North-Western, and Lancashire and Yorkshire stocks were in good demand, and severally advanced ¼ per cent. Great Western of Canada and Bahia railway shares were firm, while Great Luxembourg exhibited a downward tendency. Indian lines ruled inactive

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real sea pink lable, and cork branded "Kinahan's LL Whiskey

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West. N.W

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

BROWN AND GREEN'S KITCHEN RANGES.
The Prize Medal, 1862.
THE NEW PATENTS (granted April, 1865).
"A close Range with an open Chimney" combines the perfect cure of Smoky Chimneys, and the unequalled advantage for which Brown and Green's Ranges have long been celebrated, with free ventilation of the kitchen and increased economy and convenience. No Close Heat or Smell. Prospectuses free by post.
Frederick Thomas, 72 Bishopsgate within.

HAMBLY HOUSE SCHOOL, STREATHAM COMMON.
This School, established in 1775, boasts of one of the most delightful and healthy situations near London, and is conducted on principles calculated to meet the requirements of the great mercantile community of the metropolis. The Principal guarantees, a superior style of Writing, combined with a thorough knowledge of French and Accounts, at terms ranging from 30 guineas upwards, the table kept being most excellent. The favourite recreation of his pupils is cricket, at which they have won the last thirteen matches they have played with other schools. Prospectus, with numerous references, and view of house, on applicatien.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the ox, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station. Their Teeth are cheaper, more durable, natural, and comfortable, than any yet produced. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience. Consultation free. Teeth from 5s. Sets, 5 to 25 Guineas, warranted. For the efficacy, utility, and success of their system, vide LANCET.
Daily attendance at 15 Whitefriargate, Hull; 10 Norfolk street, Sheffield; 4 East parade, Leeds; and 14 St Nicholas street, Scarbro'.
*** Established 1830. No connection with any one of the same name.

Just published, 1s. Illustrated, Second Edition,
THE HEAD AND HEART LEGACY.
"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.
OPINIONS OF THE PRESS.
"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."
"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."
The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."
"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,
THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.
"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire; and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,
PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS
"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.
"'By INDUSTRY and PATIENT thought,' says Sir Issac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'
"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.
LIGHTS AND SHADES OF EVERY DAY LIFE.
"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

MANAGER AND SECRETARY—W. H. Cook, Esq.

OFFICES.

Argyle Brewery and Anchor Brewery, Birkenhead.
Walmer buildings, 2 Rumford street, Liverpool.

PROSPECTUS.

The Breweries at Birkenhead, known as the Argyle Brewery (Messrs Cook Brothers) and the Anchor Brewery (Mr H. K. Aspinall), have been established for upwards of twenty years, and carried on with great and constantly increasing success; and in connection with the Anchor Brewery there has been established, in addition to an extensive private family business, a large and lucrative export bottling trade at Liverpool.

It is now proposed that these Breweries shall be amalgamated, and carried on in future by this Company. Provisional agreements have been made for the purchase of both concerns from the present proprietors; and it has been arranged that Mr H. K. Aspinall shall undertake the active management of the entire business for a period of three years, whilst the Messrs Cook will give the undertaking the benefit of their advice and assistance as Directors of the Company.

The purchase-money to be paid by the Company for the Anchor and Argyle Breweries (freehold), fixed and moveable plants and utensils in trade, casks, horses, and drays, freehold and leasehold hotels, public houses, and other property required for the purposes of the business, and goodwill (taken at two years' net profits of the breweries) is.....£169,815

(This amount has been fixed by Messrs Mason and Sons, of King William street, London, brewery valuers of the highest standing, whose report is hereto appended.

The book debts, mortgage and trade loans, stock-on-hand of of malt, hops, ale and porter, &c., are estimated at 55,185

This amount will vary to a small extent between the present time and the 1st October next, when it is proposed that the business shall be taken over by the Company, and the exact amount will be ascertained by Messrs Mason and Sons.

The book debts and loans receivable, as certified by Mr Chalmers, are taken over upon terms approved by Messrs Mason and Sons, and which the Directors can recommend; and the stock of malt, hops, and beer, is purchased at cost prices.

Total purchase money £225,000

The whole of the liabilities of each brewery will be discharged by the present proprietors.

The books of both concerns have been carefully investigated by Mr A. W. Chalmers, public accountant, Liverpool, upon whose certificate the amount of profits has been determined.

The vendors agree to transfer to the Company the whole of their freehold and leasehold property, with their respective plants (fixed and moveable), and to take payment in debentures bearing interest at 5 per cent. per annum, redeemable the one half in 3 years and the other in 5 years.

The vendors will also take in part payment of the remainder of the purchase money, 3,000 shares in the Company as £10 paid, and receive dividend pro rata to the amount paid up by the other shareholders, and interest at 6 per cent. per annum on the proportion in excess of deposits and calls, agreeable to the next clause.

Shareholders who prefer paying up £10 per share on their shares may do so with the consent of the Directors, and will be allowed interest at 6 per cent. per annum on the excess for the time being so paid beyond the sums due for deposits and calls.

It is unnecessary to enlarge upon the advantages which this undertaking offers for the profitable investment of capital. It is sufficient to point out that the Company will at once become possessed on reasonable terms of two well-established lucrative breweries, in full trade, and in complete working order, in one of the most rapidly increasing towns in the United Kingdom, and within one mile of Liverpool.

The results which have heretofore been attained justify the Directors in stating their confident belief that the shareholders will receive an annual dividend of at least 10 per cent. upon the capital invested in this Company; a return which may be materially increased by judicious extensions of the trade as opportunities present themselves.

The remuneration of the ordinary Directors is to be left to the shareholders, but it is provided that the Board may appoint a Managing Director (an office which will be filled in the first instance by Mr H. K. Aspinall) at a salary to be fixed by the Directors.

No promotion money will be paid.

In the event of no allotment being made to an applicant, his deposit will be returned in full.

The deposit paid on application for shares may be forfeited and the allotment cancelled by the Directors in all cases where the further payment on allotment is not duly made in accordance with the terms of the allotment letter.

The Articles of Association and provisional contracts between the vendors and the Company, with a list of the properties, may be inspected, free of charge, at the offices of the solicitors and brokers of the Company.

Prospectuses and forms of application can be obtained from the bankers, brokers, and solicitors of the Company, and at the offices of the Company.

Applications for shares will be received by the Company's bankers.

This form must be delivered entire to the bankers of the Company, and, after payment of deposit, the application will be retained by them.

FORM OF APPLICATION FOR SHARES.

TO THE DIRECTORS OF THE BIRKENHEAD AMALGAMATED BREWERY COMPANY (Limited).

Gentlemen,—Having paid to your bankers the sum of £ being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number of shares; and I agree to accept such shares, or any smaller number that may be allotted to me, and to become a member of the Company in respect thereof, subject to the regulations of the Company; and I also agree to pay the further deposit of £2 per share on allotment, in accordance with the terms of the letter of allotment; and I authorise you to enter my name on the register of shareholders for the shares so allotted.

ATLANTIC TELEGRAPH COMPANY.

Recovery and restoration of cable and submersion of a second cable between Valentia and Newfoundland.

EXTRAORDINARY GENERAL MEETING OF SHAREHOLDERS.

Notice is hereby given, that an Extraordinary General Meeting of the shareholders in the Atlantic Telegraph Company will be held at the London Tavern, Bishopsgate street, within the City of London, on THURSDAY, the 14th day of September, 1865, at half-past ONE o'clock precisely, for the purpose of reporting to the shareholders upon the present position of the undertaking, and the measures recommended by the board for the resuscitation of the Company's existing cable in connection with the manufacture and submersion of a second cable. And it is further intended at the said meeting to rescind a certain resolution adopted at an Extraordinary Meeting of the Company, on Wednesday, the 9th day of August, 1865, under which the right to a preferential dividend of 8 per cent. per annum was conferred upon certain new capital authorised to be issued at the said meeting; and it is intended in lieu of such resolution so to be rescinded to propose for adoption by the shareholders a resolution conferring upon the same capital, or so much thereof as may then and there be determined, a preferential dividend of 12 per cent. per annum; and it is intended to propose that the right to the said 12 per cent. per annum shall either be a first preference, taking preference over all the other preferential stock of the Company, or that (as may be decided upon in the interim) it shall be a second preference, with right of preference to the existing preferential stock of the Company. And it is further intended by the Directors to take power to convert the said preferential capital, or such thereof as may from time to time be fully paid up, into consolidated preferential stock of the Company; and the Directors further give notice that at the said meeting they intend to take such powers, and propose such resolutions, as will enable them to carry out effectually the foregoing proposals.

Place of Business—184 Tottenham court road, W.

ABRIDGED PROSPECTUS.

This Company is established to purchase, carry on, and extend the well-known fine art, copper and steel plate printing business of Messrs McQueen, Brothers, Tottenham court road.

The present undertaking specially recommends itself to the investor by the following features:—

1st. The business to be acquired by the Company has long been, and is at the present time, in thorough, active, and highly profitable working.

2nd. It is not only unencumbered by liabilities, but shows genuine and realisable assets exceeding £21,000.

3rd. It is susceptible of immediate and most remunerative extension.

4th. It has been carried on uninterruptedly from father to son for upwards of 70 years enjoying the highest credit with the trade and the public, both in a commercial and artistic sense.

5th. Its dealings are restricted to publishing firms of the first class, and are consequently certain and non-speculative.

6th. Its present economic and most efficient management remains undisturbed.

The purchase money has been based upon the certified report of Mr Sandell, the accountant, and includes guaranteed assets in cash and good bills of £8,230, to meet current trade accounts not exceeding £1,900; and the plant of machinery, paper, steel and copper plates, &c., of the estimated value of £15,000. The amount (£22,000) to be paid for the valuable leasehold premises and goodwill is wholly taken in debentures and shares of the Company, with £10 credited thereon.

The business will be taken over by the Company as from the 1st July, 1865, from which date the guaranteed dividend of 10 per cent. per annum accrues to the shareholders. The estimates, however, from the profits of many years past afford considerably larger dividends than the one actually guaranteed.

The Articles of Association, the Agreement with the Vendors, and the certified Balance sheet can be inspected at the solicitors'.

A Form of Application for shares is attached to each prospectus, which can be obtained at the Company's offices, or place of business, and of the bankers, brokers, solicitor, or auditor to the Company.

McQUEEN BROTHERS (Limited)

Notice is hereby given, that the list of applications for shares in this Company will be closed, both for town and country, on Wednesday, September 6th, after which date no applications can be received.—By order,

T. R. EAMES, Secretary.

THE SCOTTISH AUSTRALIAN INVESTMENT COMPANY (Limited).

Established in 1840.

The Directors of this Company are now prepared to receive Applications for further Allotments of this STOCK at par, which will be inscribed on the books of the Company in the names of allottees free of stamp duty or other charge.

The Stock is to be paid for by instalments: the dividend will begin to accrue from the days when the instalments are paid. Interest at five per cent. per annum will be allowed on instalments paid in advance of their due dates.

The Ordinary Stock of the Company is £300,000, fully paid-up. The dividends paid on that stock since the commencement have averaged ten per cent. per annum.

Forms of Application and all further particulars may be obtained from Sir R. W. Carden and Co., Stock Brokers, Royal Exchange buildings; at the European Bank, 83 King William street, London; or from the Secretary of the Company,—By order of the Directors,
C. GRAINGER, Secretary.
Offices: 1 King's Arms Yard, Moorgate street, London, E.C., 1st August, 1865.

SOUTH DEVON SLAB AND SLATE COMPANY (Limited).

Dividend of 7½ per cent. declared 9th August, and reliable prospects of greatly increasing dividends.

Fifty shares to be sold at a great sacrifice owing to the death of late holder. No further call intended, £4 5s being paid out of £5. Apply to Mr Newcomb, 8 Sutherland street, Pimlico, S.W.

CONVERSION AND UNIFICATION of the TURKISH INTERNAL DEBTS.

Bonds are received at the offices of the undersigned from 11 to 2 o'clock (except on Saturdays) for examination, verification and Conversion into Stock of the 5 per Cent. General Debt of the Ottoman Empire, at the following rates of exchange:—
For 100 Medjidies of Consolides there will be delivered £110 sterling of the Bonds of the General Debt.
For 100 M. of Tahvilati Mumtaze, £130 General Debt.
For 11,000 Piastres of On Senelika, £100 General Debt.

At these rates the Conversion will remain open till 14th November, after which Bonds will be convertible only for six weeks and at a reduction of 10 per cent.

Full details at the offices.

For the General Credit and Finance Company of London, 27 Austinfriars, Agents for the Contractors,
JAMES MACDONALD, General Manager.

CEYLON GOVERNMENT 6 PER CENT. LOAN, £1,000,000.

Authorised by an Ordinance passed by the Governor, with the advice and consent of the Legislative Council, No. 19 of 1862, intituled "An Ordinance for raising One million sterling on Debentures for the construction of a Railway from Colombo to Kandy."

Her Majesty's Principal Secretary of State for the Colonies having directed the undersigned to negotiate, on behalf of the Government of Ceylon, the loan authorised by the Ordinance above cited, they hereby give notice that they will be prepared to receive Tenders until 1 o'clock P.M., on the 14th proximo, for Debentures to the extent of £100,000, being the second instalment thereof.

The Debenture Bonds, with interest coupons attached, payable to bearer, will be issued in sums of £500, £300, £200, and £100.

The principal will be repaid by means of a "Sinking Fund," in November, 1872, and interest, commencing from the 15th instant, at the rate of 6 per cent. per annum, will be paid on the 15th of May and 15th November in each year.

The principal and interest are secured on the general revenues of the Colony, and will be made payable in London at the Offices of the Agents for the Loan.

Applications in accordance with the annexed form, endorsed "Tender for Ceylon Loan," will be received by the undersigned till 1 P.M. on Thursday, the 14th September next, and then opened at their offices, in the presence of such of the applicants as may be pleased to attend.

The highest tenders will be accepted, provided the rates offered are not below the minimum, which will be placed in a sealed paper on the table, before the tenders are opened.

Tenders at a price including a fraction of a shilling, other than sixpence, will not be accepted; and in the event of an equality of tenders beyond the amount to be disposed of, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on the 15th, and the balance on or before the 25th of September, 1865.

Debenture Bonds will be issued to the purchasers on production of the bank receipts for the money.

Forms of Tender, with full particulars of the financial condition of the Colony, may be had on application to the undersigned Agents for the Loan.

PENROSE G. JULYAN, } Crown Agents
W. C. SARGEAUNT, } for the Colonies.

Messrs GABRIEL guarantee every case they undertake.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

Plans, sections, drawings, and specification of the work to be erected, together with the general conditions of contract, may be seen at the Company's Offices, on and after the 2nd October next, between the hours of 10 and 4 o'clock. A copy of the specification, &c., may be had on payment of £5 5s.

Tenders, in sealed envelopes, and marked on the outside, "Tender for the Chord Line," &c., must be delivered to the Secretary, in terms of the specification, on the 9th of November next. The Company is not bound to accept the lowest or any tender.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 27th July, 1865.

EAST INDIAN RAILWAY COMPANY.

J EXTENSION SHARES, £15 PAID.

Notice is hereby given, that in pursuance of a Resolution passed at a Meeting of the Board of Directors, held this day, the Proprietors of J Extension Shares in the East Indian Railway Company are requested to pay the fifth and final call of £5 per share, on each of their respective shares, on or before the 10th day of October, 1865, at the Public Drawing Office of the Bank of England.

Notice is hereby further given, that Proprietors whose calls are not paid on or before the day named, will be charged with interest at the rate of 5 per cent. per annum on the amount called up on each share for the time the said call may remain in arrear, and will incur a loss of interest on the same amount for the period intervening between the 10th October aforesaid, and the date at which the Company is entitled, under the contract, to make the next payment to the Secretary of State for India in Council on account of the capital, and that if default is made in payment of this call, the shares in respect of which default is made, will become liable to forfeiture under the Company's deed of settlement.—By Order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, 31st August, 1865.

THOMAS TURTON AND SONS,

Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carraiges, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.
BRIGHTON	At 6 Marine Parade.
LIVERPOOL	At Cook street.
MANCHESTER	At Ducie place.
LEEDS	At Commercial buildings.
BIRMINGHAM	At Upper Temple street.
DERBY	At the London road.
LEICESTER	At 52 Granby street.
WOLVERHAMPTON	At Exchange street.
SHEFFIELD	At Exchange buildings.
NOTTINGHAM	At Maypole yard.
CHESTERFIELD	At the Low Pavement.
STOKE-UPON-TRENT	At Wharf street.
DUDLEY	At Burnt Tree.
WORCESTER	At the Cross.
BATH	At 5 Edgar buildings.
SOUTH WALES	At King street, Bristol
DUBLIN	At Crampton quay.
CORK	At Cook street.
EDINBURGH	At 47 North bridge. At 11 Union street lane.
GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

CARSONS' ORIGINAL ANTI-CORROSION PAINT.—Walter Carson and Sons beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.

March 1, 1865, 9 Great Winchester street, E.C.

CARSONS' ANTI-CORROSION PAINT, specially manufactured for out-door work, s the best and cheapest. All colours. So simple in application that any person can use it. Full instructions are given. No agents. All orders to be sent direct.

CARSONS' ANTI-CORROSION PAINT is twice as durable as genuine white lead. SEE TESTIMONIALS.

CARSONS' ANTI-CORROSION PAINT. 3 cwt carriage free to any station in England and Wales, and most seaports in the United Kingdom. (See list.

CARSONS' ANTI-CORROSION PAINT. Patterns, prices, and testimonials sent post free.

CARSONS' ANTI-CORROSION PAINT for all OUT-DOOR WORK.

CARSONS' ANTI-CORROSION PAINT for WOOD WORK.

CARSONS' ANTI-CORROSION PAINT for PARK FENCING.

CARSONS' ANTI-CORROSION PAINT for FARM BUILDINGS and IMPLEMENTS.

CARSONS' ANTI-CORROSION PAINT for IRON WORK.

CARSONS' ANTI-CORROSION PAINT for POROUS BRICKS effectually resists weather and excludes damp. 3 cwt carriage free to most parts of the United Kingdom.

CARSONS' ANTI-CORROSION PAINT for FRONTS of HOUSES.

CARSONS' ANTI-CORROSION PAINT for BRICK, STONE, and COMPO.

CARSONS' ANTI-CORROSION PAINT for CONSERVATORIES.

CARSONS' ANTI-CORROSION PAINT for HOTHOUSES.

CARSONS' ANTI-CORROSION PAINT lasts twice as long as any other; established 70 years; is only half the expense in application; is the most effectual in resisting weather; and will keep for years in a dry place. All orders to be sent direct to WALTER CARSON and SONS.

LA BELLE SAUVAGE YARD,
Ludgate hill, E.C.,
Three doors East of Railway Viaduct.

PRIZE MEDAL AWARDED.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues by post free.

Also, Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands Canteens, &c., by post free.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

M. COULLET ON THE POLICY OF THE BANK OF FRANCE.

THE high rate of interest which prevailed during so much of 1864 and the deranged condition of the money market which has characterised the period of the cotton famine have had one good effect,—they have drawn European attention to the theory of the money market. In France, especially, the controversy has not only been active, but bitter. A Government inquiry has been commenced, and though suspended during the meeting of the Chambers by the occupation of the Ministers, will, we hope, complete its labours. A crowd of pamphlets and discussions have been the inevitable consequence. The currency is a subject upon which it is pleasanter to write than to read. Among fifty persons who can give an energetic statement of their own notions, it is commonly difficult to find one who can give any decent account of the opinions of others. Whenever the subject is discussed a new literature arises upon it, ignoring what has gone before, dealing only with the world before it. As this is the only way in which this subject can be discussed, it is desirable that it should be so discussed. Each generation insensibly gains; for, though every new controversy on the matter in seeming begins afresh, yet a quiet observer can see each time that some old errors have lost strength, or some new truths acquired vitality.

The work of M. Coullet is one of the most remarkable which the French controversy has called forth. It is evidently the work not of a *litterateur* but of a practical man, who deals with these great matters of business because he perceives the importance of them in business. Any one in any part of Europe who wishes to begin this subject may well begin with M. Coullet's treatise. It goes over the whole subject, beginning with the first principles and going forward with exemplary patience to the practical issues. The defect of the book, as so often happens, is the aggravation of its merits. M. Coullet takes so much interest in his subject that he sometimes fears lest others do not care for it as he does. His explanation is at times a little too copious, but for any reader who comes fresh to the subject this will be a very pardonable error. The style is masculine and clear, and any man of business can understand it as his eye passes over it.

On the cardinal point at issue between the French combatants, M. Coullet earnestly maintains what we believe to be the only true doctrine. The question is a very practical one. What is the Bank of France to do when its bullion is ebbing away? All parties admit it must do something:—What then is that something? Monsieur Coullet says, as we say, that it must at once begin to raise its rate of discount, and continue to raise it till the efflux has ceased. This mode of treating the malady is establishing itself in the practice of Europe. We are not sure that the reasons of it are so much better understood than they used to be, but its experimental effect has been seen. In 1864, the Banks of France and England did pursue this method, and did by it preserve their reserves.

This tenet has one great advantage—the greatest, perhaps, which a tenet can have,—it has no *clear* competitor. It is itself very distinct, but everything opposed to it is indistinct. Monsieur Coullet discusses at length the two antagonist principles,—first, that the Bank at the beginning of a drain should augment its capital; next, that it should sell its securities. But neither of them are satisfactory when pursued into detail; they fade away when most wanted. A bank cannot be always augmenting its capital. At every crisis it cannot run to the public with new shares It cannot on every occasion when credit is disturbed make a fresh demand. Its old shareholders would never permit that, *on system*, the worst possible moment should be taken to issue new shares. And if the capital were increased, the end would not be gained. That end is the augmentation of the Bank reserve. But the new capital might be paid in notes, and its effect would be, at first at least, to diminish the liabilities of the Bank, not to augment its resources,—and in case of a sudden foreign drain, you want money to meet that one liability,—perhaps you do not want to diminish your other liabilities. The same objections apply to the sale of securities. You cannot always have securities to sell. No rule for meeting a panic can be relied on which is directly contrary to the interest of the persons who are to carry it out. But such is the rule suggested; if it means anything distinct, it means that the Bank is to buy Government stock—for that is the most saleable security—when credit is good and money plentiful; and to sell that stock when money is dear and credit is disturbed,—in plain English it is to be a cardinal banking principle, to buy when stock is dear and to sell when stock is cheap. We can conceive nothing more unsafe than to rely for the prevention of the greatest conceivable mercantile calamity, on the adoption by

Digitized by Google

bankers of a habit by which they are to lose much money and by which many of them might soon be ruined. Banking is but a trade, and no system of trade can be economically sound which requires the dealer voluntarily to forego continued profit and voluntarily to incur continued loss. And this rule is ineffectual too. The sale of securities, like the increase of capital, may only, at first at least, diminish the notes out, not augment the gold within. Monsieur Coullet has no difficulty in showing in full detail the insufficiency of these expedients.

On the other great subject which is of practical importance in France and on the Continent,—the conditions under which notes should be issued and the conditions under which they should be prohibited,—M. Coullet's arguments appear to us much less conclusive. He belongs to a school of whom there are not many in England. He is in favour of a single bank of issue, which would alone issue notes and alone keep the bullion reserve of the country. So far he agrees with the advocates of the Act of 1844 in England, but he differs from those advocates fundamentally at the next step. He imposes no limit on his monopolist bank. He is for the Bank of France as it now stands *pur et simple*. a single monopolist bank alone enjoying the profits, and alone exercising the privilege of issue. If he had had Sir R. Peel's omnipotent power, he would have suppressed the country issues, and left the Bank of England unaltered.

We confess that in our judgment this *via media* seems to us to combine the most important defects of the Act of 1844, with the most important defects of free banking.

First, like the Act of 1844, like every central system of issue, it makes no provision for the further development of paper issues. The plain problem before the French Legislature is, how shall we introduce into France that pervading and ramified system of paper credit which exists in Scotland and England? In Scotland and England this was introduced by *conceding* the privilege of issue to local bankers. This enabled local banks to establish themselves in poor districts where mere banking—mere deposit banking—would have been altogether insufficient. There is not a city in France in which the cheque system is employed with half the accuracy with which it is employed in a ninth-rate English town. The principal reason why London is a great money market and Paris a small money market, is that the savings of the English provinces come to London, and that the savings of the French provinces do not come to Paris. The Bank of France does not and cannot work its way through the country. There are no local *in-take* houses, if we may so say, in petty places, where the million fragments of the nation's savings are received, and whence they are transmitted to the great capital, there to form one single vast whole. The direct economy effected by the substitution of a note issue for a metallic issue is considerable, but it is inconsiderable when compared with the economy effected by diffused banking. The introductory use of a note issue is far more effectual than its immediate use.

Secondly, though M. Coullet's system has this great defect in common with the Act of 1844, it has not the advantage of that Act. It does not attempt to prevent "over-issue." If we are to give up the great advantage of local banks of issue, we must do so on the ground that the over-issue of a paper currency is exceedingly dangerous. We are asked to resign a great good because it brings with it a more than equivalent evil. But if so, let us at least prevent the evil. Do not leave a bank which cannot effect the good, free to do the harm. The alternative is plain. If the over-issue of paper is very dangerous, the Bank of France ought to be prohibited from over-issue; if the over issue of paper is not very dangerous, a system of local issue ought to be encouraged.

It is possible that there may be political reasons peculiar to France for the system which Monsieur Coullet proposes, on which economical science cannot pronounce, and on which a foreigner should speak with diffidence; but we deny that there are any valid economical reasons, and we hope to show hereafter that M. Coullet has not found any to urge in its behalf.

MR BUXTON ON CANADA.

At the close of a conversation in which the Prince Napoleon had been giving utterance with his usual eloquence to some of his usual indiscretions, one of the auditors remarked as he came away:—"Le Prince parle bien: il dit admirablement "tout ce qu'il ne faut pas dire." Mr Buxton, too, speaks well; but he says things which if he thought more before he got upon his legs he would not say at all. He has just been making to a meeting of his constituents a singularly injudicious, ill-timed, and inconclusive speech on the subject of our relations with Canada. It is not easy to overestimate the mischief that is done both at home and abroad by these indiscreet crudities of members of Parliament out of Parliament. When uttered in the House of Commons they are at once met, answered, and exposed; the antidote goes forth with the poison; the refutation is pinned to the error; but when given out to miscellaneous audiences who cannot detect their fallacy or their unwisdom, and published in newspaper reports without comment, they go forth to the world uncorrected and sow their tares in many minds.

Mr Buxton is of opinion—as we all are—that we ought to be most careful to offer to our irritable neighbours in North America no possible inducement to draw the sword against us. "Now," he proceeds, "it cannot be denied that nothing "could be a greater temptation to them to plunge into war "than the fact that we had some 10,000 or 15,000 British "troops in Canada, upon whom they might fall with incom- "parably greater numbers and more powerful artillery. In "keeping that handful of troops in that country we are offer- "ing a glittering prize to their ambition, and incurring for "ourselves a most serious risk of disaster and disgrace." Very well! but what is Mr Buxton's practical inference from this premiss? That we should so fortify certain strong positions in Canada that this small force could not be taken so unawares and at such a disadvantage? By no means: he holds that all such fortifications would be a shameful and profitless waste of the public money. That we should keep a large army in Canada since a small one is so tempting and so unsafe? On the contrary: this would be far too simple and logical a conclusion for Mr Buxton to draw;—he declares that no amount of force we could spare would suffice to defend Canada, and that an augmentation of our troops in the colony is not, therefore, to be thought of. That "we should "get rid of the fearful risks involved in our connection with "Canada by bringing that connection to a close?" "Yes," replies the orator, "*I think that is the only effectual method.*"

This is cutting the Gordian knot with a vengeance. Never surely did an honourable English gentleman in all sincerity and openness propose to trail his country's flag in such dishonourable mire. What is the solution he suggests to our difficulty—the difficulty is no doubt extreme—when put into plain words? Avowedly this, and this only: "Because a "vain, covetous, and ambitious neighbour longs for a portion "of our territory, let us abandon that territory. Because our "intention of holding it and our preparations for holding it "stimulate that neighbour's lawless appetite, let us disclaim "that intention and abandon those preparations. Let us give "the sinner no inducement to sin, and let us do this by "making sin as easy to him as possible. Don't let us provoke "him by even avowing that we are resolved to keep our own "property—to protect our own children—to stand upon our "indisputable rights. Because a distant province of our "Empire is threatened, let us abandon it, or at least prepare "to abandon it, at once." 'That is I believe the only effectual method.' Now, if Mr Buxton's language and arguments do not mean this, they mean nothing. If they do mean this, it is difficult to stigmatise them in words too strong for the occasion. It is true that a moment or two afterwards the orator, cowering before the complication and gravity of the question, proceeds to undo his own work and take all sense and significance out of his suggestions,—"'letting "'I dare not' wait upon 'I would.'" It is true, he admits, that if Canada be attacked we cannot refuse to aid her. Why then take so much pains to prove to ourselves and to announce to the Americans that we could not aid her effectually? Why explain to the world that anything we do in that line will be done hopelessly and heartlessly, lukewarmly and reluctantly, merely to satisfy barren honour and keep up decorous appearances? Even if it were correct, which we are satisfied it is not, why go out of our way to proclaim it? Mr Buxton must be aware that there is much difference of opinion among very competent authorities on the very point which he gives up with such easy and self-complacent despair. It is true, he goes on to say, that, though our only effectual way out of the difficulty and the danger is to sever the connection with the colony, "it would be disgraceful were we to "insist on doing so under a *sense of alarm.*" What idle and

Digitized by Google

unworthy verbiage is this! What transparent feebleness of purpose and of morality! What a poor assumption of dignity to throw over a meditated and recommended poltroonery! Why, what on earth is it, *except* "a sense of "alarm," which induces us even to think of severing the connection with Canada? She does not wish to leave us; she has no ambition to stand alone; she feels the need of our aid, and clings with both hope and pride to our connection. What Englishman would ever dream of cutting Canada adrift, if he were not afraid of her involving us in a quarrel with the States? What urged Mr Buxton to make such a foolish speech and to recommend such an unworthy remedy, if it was not a sense of alarm? Does he not avow at the commencement of his address that it is precisely this "sense of alarm," and nothing else, which led him to approach the subject? Why should he attempt thus to throw dust in his own eyes, if it were not that he was beginning to perceive the drift of his own argument and to be ashamed of it?

He goes on with ever increasing feebleness. "The time is "not ripe," he says, "for any sudden or violent disruption, but "we ought to be preparing the popular mind both at home and "in the colony to consider whether it would not be better for "both countries that Canada should be an independent nation." How came it not to strike Mr Buxton's mind that to offer Canada her independence and recommend it to her thus unctuously, when we know that she does not wish for it,—and to do this distinctly and solely because we fear the danger and shrink from the difficulty of protecting her,—is something like a very heartless insult, and is about the plainest and most shameless avowal of national cowardice ever seen? If Canada, with all the resources of Great Britain at her back, cannot defend herself, how could she possibly do so when she stood independent and alone? Would she be a less tempting morsel to American ambition when she was absolutely helpless than when she cannot be obtained, if obtained at all, except at a ruinous cost and after a life and death conflict with the richest, mightiest, and most pertinacious State in the world? Does Mr Buxton really think that the tempting bait to Yankee vanity of the chance of overpowering and capturing a handful of British troops, would induce America to attack a country which she would otherwise have let alone? Does he believe —can he believe—that Canada is better secured against American invasion by saying to the Government at Washington (which would not be true), "There she lies, gentlemen, we "cannot defend her, and therefore are going to make her "'independent'—*i.e.* defenceless—take her when you please;" —than by saying (which we all know *is* the truth), "If you "attack Canada you will have to deal with the whole power "of the British Empire; you will have a task before you in- "comparably the toughest you ever attempted; and one in "which even the most signal ultimate success could not repay "even a fraction of the cost?"

We, as our readers well know, have never represented the possession of our North American Colonies as one of any pecuniary or political advantage to the Mother Country. We should see them independent, if not with joy, certainly without regret, to-morrow, if we believed they could maintain their independence. But we should consider that absorption into the great over-grown Republic of the West, which we believe would follow, as a grave misfortune to the interests of civilisation, because it would establish one type, and that not a high type, of social and political character over the whole of that vast continent, in place of two or three varying and mutually modifying types. And if we were to declare them independent against their wish, or by coldness and unfriendly behaviour or demeanour, deliberately provoke them into demanding independence, with a view to relieve ourselves from an onerous and dangerous obligation, and cognizant of what must be the inevitable ultimate result—(and this, disguised probably even from himself, appears to be Mr Buxton's meaning)—then we say that national meanness could scarcely sink to lower depths.

IRELAND IN TRANSITION.

"The grand periodic year of the Stoics, at the close of which "everything was to begin again, and the same events to be all "re-acted in the same order, is, on a miniature scale, repre- "sented in the history of the English Government in "Ireland." Captain Rock's sarcasm was not without point when it was uttered—some forty years ago; but will any candid Irishman say that it hits the mark of Ireland's present position? If modern English Governments have done nothing else for Ireland, they have at least lifted her out of the rut of centuries, not doubtless without powerful aid from events and from the moral and social tendencies of the time. Distinctions of race and religion—in the past the chief centres round which all political movement revolved—have ceased, thanks to enlightened legislation, to exercise a preponderating influence; and for the rest, the famine, the emigration, and the Landed Estates Court, have gone far towards completing the removal of the barriers which condemned Ireland for centuries to return on the same barren and sorrowful round. A clear field—a field clear at least from all the more formidable obstacles to civilised progress—lies before her. Has that progress yet begun? There are those who tell us that, far from this, Ireland is still retrograding,—nay, retrograding more rapidly than ever; and undoubtedly they are not without startling facts to sustain their view. They may point to the unparalleled fact of a reduction within a quarter of a century of the population of the country by one-third of its whole number; to the continuous decline extending over four years of most of the elements of national wealth, resulting in an aggregate loss, according to Mr Gladstone's estimate, of more than 27,000,000*l*. "Never," said Mr Maguire in a speech delivered a few months since, "have I known so "general a feeling of despondency to prevail with regard to "the prospects of the country." For ourselves—and in this we speak, as we believe, the prevailing sense of Englishmen—we are disposed to take a hopeful view of the present prospects of Ireland. In spite of unfavourable agricultural statistics, in spite of the "exodus" proceeding down to the present moment with unabated force, we believe that progress in Ireland has commenced, and may be recognised by clear and decisive signs. But to appreciate fairly the value of the facts which may be adduced on either side, the state of transition in which Ireland now exists must be kept in view. As an essay towards the elucidation of this transitionary state, we commence to-day a series of articles designed to exhibit the leading tendencies and main direction of her present course.

Perhaps the most salient feature in the present industrial movement in Ireland is the extensive conversion of tillage land into pasture, now rapidly proceeding over the greater portion of its surface. It may not be generally known that this is the direct reversal of a change through which the industry of the country passed about a century ago. Ireland was then mainly a pastoral country. Subsequently, more than half her cultivable land passed under tillage and mostly under grain; and she is now reverting to the condition of pasture once more. The fact might almost seem to afford some countenance to the cyclical theory of Ireland's destiny. But before this can be fairly said, before the present step can be pronounced to be retrogression, that which preceded it must be shown to have been progress; and this, we apprehend, would be a quite impossible feat. In fact it was a violent diversion of Irish industry from its natural course,—a diversion from which has directly flowed all the most serious evils which Ireland has since endured. It will be worth while here to consider briefly the causes and consequences of that movement which committed Ireland for a time to the *rôle* of a grain-producing country; for it will be found to throw some light on the converse phenomenon now presented to our view, the character of which it is so important to understand.

The causes which kept Ireland, down to the middle of the eighteenth century, in the condition of a pastoral country are sufficiently on the surface: they lay partly in the character of her climate, partly in the low civilisation of the bulk of her inhabitants, who, thanks to the wretched misgovernment of England, had, down to the period we speak of, scarcely risen above the primitive mode of living in which the conquerors found them. The penal code, under which the great majority of the people were precluded by law from possessing any substantial interest in land, would obviously also conduce to the same result, since, in the absence of a strong bias the other way, that mode of industry would in such circumstances be preferred which involved the least outlay and needed the least security. But about a century ago a group of causes—the same which about this time changed England from a corn-exporting to a corn-importing country —concurred to give a powerful impulse to the cultivation of grain. The most important of these was the start taken by

Digitized by Google

England in the latter half of the eighteenth century in manufactures and population, coinciding as this did with a remarkable succession of bad seasons—causes of dearness which, before many years, were powerfully seconded by the corn laws, and ultimately by the French wars. Under the influence of these events the price of corn rapidly rose. The prospect of increased rents was as welcome to Irish as to English landlords; and a series of measures passed about this time in the Irish Parliament, in the nature of bounties on the inland carriage and exportation of grain and prohibitions on its importation, attest their eagerness to improve the occasion. As the result of the whole, the industry of the country received that impulse towards the cultivation of cereals which continued down to recent times.

He would have been a bold patriot who should have ventured a century ago to have called in question the wisdom of the course on which the country was then entering; for undoubtedly it was in its first effects advantageous, according to obvious standards, to every class in the community. It would be plainly so to landlords and middlemen; and it was not less certainly so to the masses; for it created a rapid increase in the demand for their labour, which continued without abatement for some generations. The brief glimpse of prosperity which dawned at this time on the political fortunes of Ireland—it was the era of the volunteers—was felt also in her material condition; and for a time plenty actually reigned in Irish cabins. "Generally speaking, the Irish poor," said Arthur Young (his visit to Ireland, it will be remembered, was in 1777) "have a fair belly-full of potatoes, and they "have milk the greatest part of the year."....."Mark the "Irishman's potato bowl placed on the floor, the whole family "upon their hams around it, devouring a quantity almost in- "credible, the beggar seating himself with a hearty welcome, "the pig taking his share as readily as the wife, the cocks, "hens, turkeys, geese, the cur, the cat, and perhaps the cow "—and all partaking of the same dish. No man can often "have been a witness of it without being convinced of the "plenty, and, I will add, the cheerfulness that attends it." It does not give us a high idea of Young's philosophy that he should have contemplated this scene apparently with the most unmixed satisfaction, and even contrasted it favourably with that presented by the cottage homes of England. "An "Irishman and his wife are much more solicitous to feed "than to clothe their children; whereas in England it is the "reverse.....In England a man's cottage will be filled "with superfluities before he possesses a cow. I think the "comparison much in favour of the Irishman. A hog is a "much more valuable piece of goods than a set of tea- "things." History has not sustained this verdict. The type of decency has proved to be of more value in the long run than gross abundance in which the barn-door fowl, the pig, and the wife share on equal terms.

The sure result of this state of things was a rapid and enormous increase in the Irish population—an increase for a time unrestrained alike by natural or artificial, by preventive or positive, checks. We unfortunately possess no accurate returns of the population of Ireland anterior to the census of 1821; and a paper recently published* rather throws doubt on the estimates which Mr Thom has furnished. These, however, inasmuch as they are based on a constant criterion —the number of registered births—may still be taken for the purpose of comparison; and the illustration they afford of the results of the social life just described is sufficiently striking. In 1672 the population of Ireland, according to these estimates, was 1,320.000; nearly a century afterwards, that is to say in 1767, it stood, according to the same authority, at 2,544,000—thus falling short of doubling itself in that period; but in 1792 it had increased to 4,088,000, and in 1805 to 5,395,000;—in other words, on arriving at the period when the extensive cultivation of cereals began, the rate rapidly increased; the numbers more than doubling themselves in 38 years. From this point—the beginning of the present century—though at a less rapid rate (for the growing numbers were already treading close upon the means of support)—the population continued to advance, culminating in 1846, when the catastrophe which had been maturing through a century suddenly came.

What is the lesson taught by this retrospect? Not certainly that an increased demand for the labour of a people is an evil; and just as little that cheap and abundant food is a curse. The language used by some writers on the subject of the potato* would not be more than adequate, if, as Judge Longfield somewhere remarks, potatoes ate men instead of feeding them. At the worst the use of potatoes permitted the population to become somewhat more numerous than it otherwise would have been. The true sources of the calamities which followed lay, *first* in the purely artificial character of the economy under which the Irish now came to live, and *secondly* in the entire absence of any standard of comfort or decency—of any thing in short than mere physical necessity—to regulate the growth of the people. By the first course, the well-being, or rather the existence, of the people came to be identified with methods of industry entirely unsuited to the country where they were established, and sure to be swept away with the progress of civilised rule; and by the second, the numbers supported by such precarious means were multiplied to the utmost limits compatible with human existence. The failure of the potato precipitated the disaster, as the failure of oats or maize might have done, had either of these been the main subsistence of a people reduced to the extreme verge of poverty; but the seeds of it were in the nature of the industrial system which prevailed; and free trade. even without the assistance of famine, would inevitably have undermined the fabric.

Such, as it seems to us, were the leading causes—tracing them no further at present than their social and industrial manifestations—which brought Ireland to the condition in which the potato famine found her. The phase through which she is now passing exhibits a reversal of all the causes from which that condition grew. A natural agriculture is taking the place of one, the result of artificial methods, kept in existence only through the same forcing legislation which gave it birth. Education and intercourse with other countries are slowly, but we hope effectually, generating in the Irish people ideas of decency and comfort—in the last resort the only effectual safeguard against the evil of excessive numbers. The opening of the earlier movement was marked by a temporary rude abundance, which was followed by an extraordinary increase of population; that of the present has been signalised by frightful but temporary distress; and a decline of population, not less notable than the previous increase, has now set in. These are the outlines of the case. We hope in our next article to carry the investigation into some of its details.

J. E. C.

THE SUNDAY TRAINS IN SCOTLAND.

THE resolve of the North British Railway Company to put on two Sunday trains between Edinburgh and Glasgow has excited a storm of indignation amongst the Scotch, and all sorts of harsh things have been said both to them and of them by the strict Sabbatarians of Scotland. It would be very much out of place for us to discuss the theological question whether the fourth commandment is binding or not binding for Christians, and if it is, what it properly decides as to Sunday travelling. But we think the question may be cleared to a considerable extent of debateable elements by admitting at once, whether on secular or religious grounds, or on both, that a day of rest from toil *as complete as possible for the whole population* is the object that we should all strive to attain, and then asking how far that condition of things is impeded or promoted by the running of a few railway trains on Sunday. This is a mode of putting the question to which the more sensible Sabbatarians will not demur. Even the Lord Provost of Glasgow, who took the chair at the meeting called to protest against this innovation, showed, by gleams of reason, that he should not be unwilling to discuss the matter on some such basis. "Had "this proposition of theirs," said the Lord Provost, "been "confined to attaching one or two carriages to the mail train, "I, as an individual, should not have felt myself warranted to "make any great demonstration about it. We have had

* "Observations by W. H. Hardinge, M.R.I.A., on the earliest known manuscript census returns of the people of Ireland," published in the Transactions of Royal Irish Academy, 1865. According to the document brought to light by Mr Hardinge, the total population of the Kingdom in 1659 would be almost exactly half a million. The first estimate given by Mr Thom is for the year 1672, at which time the population is set down at 1,320,000. No possible rate of human increase could within thirteen years reconcile these numbers.

* Mr McCulloch's tirade against the potato is well known. Even Professor G. Smith takes leave of common sense in his horror at this excellent root. "Raleigh had introduced the potato.....the gift, than which the Archfiend could scarcely have offered any thing more deadly," &c.

"that existing on the Caledonian line for some time. These "trains must run for the carrying of the letters of the coun- "try, and any little conveyance attached to them has no "tendency, in my opinion, to foster the desecration of the "Sabbath. They may supply exigencies, but assuredly from "the times at which they run and the method in which "they are conducted, they are not put out as baits to "induce men to travel on the Sabbath day, which is "really the case with the trains which are proposed." Now here we have one or two important admissions—that trains "must run for the carrying of the letters for the "country," and that one or two carriages may even be attached to them to "supply exigencies;" so the Sabbath rest not only *may* be, but *ought* to be disturbed, and certain persons robbed of it for a sufficiently urgent secular end. When the Lord Provost has conceded as much as this, we fancy he has conceded quite enough to justify what the North British Railway Company have done. With any man who is prepared to say that it is absolutely sinful to do anything on the Sunday which can only be done by depriving other men of their Sunday rest, it would be impossible to reason except theologically,—though it would also be difficult to understand how any such person can reconcile himself to existing at all in a society where the domestic servants assuredly discharge their offices (though clearly not absolutely essential unless comfort and order be essential) on the Sabbath no less than on week days. But the Lord Provost is not quite so densely filled with prejudice as to indict society for having its beds made, and its bread cut, and its cloths spread on Sunday as on other days. He will even permit stokers and guards to be employed on the Sunday in order that society may receive its letters as usual on the Monday, and allow gentlemen to travel (though at uncomfortable seasons in order to test the real pressure upon them) so long as there is no "temptation" set before them to do on a Sunday what may interfere with the absolute quiet of the Lord's day. Now, how does the Lord Provost define a "temptation"? There are very few servants who would not feel a very strong, an overpowering temptation to break the rest of the Sunday, on the ground that if they refused to dust, and carry, and arrange the house on Sunday, they would entirely fail to win a livelihood. The Lord Provost thinks it no sin, we suppose, to put that very strong temptation before them, though it clearly has a much more effectual influence upon them than the "temptation" of travelling in a third-class carriage, for which money has to be paid instead of received. In the one case, the servant forfeits a certain livelihood if she refuses to engage in any but spiritual occupations on the Sunday; in the other, an *opportunity* at most of engaging in such occupations (supposing travelling to be an occupation, though it is not inconsistent with reading the Bible all the time) is offered, which can, however, only be bought at a price, instead of involving a heavy sacrifice to refuse it. Much stronger "temptations" than Sunday trains to break the rest of the Sunday with secular occupations, are, we think, evidently offered by the strictest Scotch Sabbatarians every Sunday. But the Lord Provost will say that the temptation offered to domestic servants and mail-train guards to break their Sunday's rest is justified by its object. To make the houses look clean and neat on a Sunday, like enabling the public to receive their letters on a Monday, is a sufficiently important object to override the main rule of doing no work,—while enabling the public to change its abode on the Sunday is not in itself a desirable object, much less an important one; you ought to keep a check on the passion for change of scene on a Sunday rather than to promote it; it is a restless disposition, inconsistent rather than in keeping with the state of mind desired. So, we suppose, he would say, for we are trying to find respectable arguments for him, consistent with the position he has laid down. The answer is very simple. In the great proportion of cases travelling on a Sunday is a far greater rest to those who avail themselves of it than staying at home would be. In very many cases, as appears by the report on the first trains run last Sunday in Edinburgh, the people who took their places went only short distances, to save a long and fatiguing walk to church. Is that an object less important to quiet of mind than having tidy and light rooms on the Sunday? Is it spiritually desirable that in consequence of having no conveyance, or no cheap conveyance, invalids, weak people, and children should either be compelled to stay at home when they want to go to church, or to go to a church where they find no profit to save the fatigue of going to the church they prefer? Is there anything likely to promote hearty worship in a state of exhaustion, or in wet clothes on rainy days, or in compelling attendance on uninstructive teachers? These things we should suppose were much more inconsistent with the true Sunday state of mind than even littered houses or the prospect of no correspondence till the Tuesday. Of course the Lord Provost will maintain that the greater portion of the travellers by these trains travel for pleasure alone, though equally, of course, he knows nothing about it. Well, even in their case we have no doubt the Sunday trains will promote the quiet and respectable observance of Sunday. Many who travel for pleasure would try to find pleasure in any case, and not finding any pleasure so quiet, would be seeking certainly noisier and coarser pleasures. For example, instead of going to stare at Edinburgh, they might, perhaps, play pitch and toss at home. There are a very much larger number of respectable persons who probably think it quite right to give a large part of the Sunday to harmless relaxation. What effect would the Sunday trains have on them, except to economise the time spent in transition from place to place, and give them less excuse for not devoting at least a portion of their Sunday to their religious duties? As a contemporary well observed the other day, the Scotch theory entirely ignores the fact that if the spiritual exercises of the Sabbath are worth anything, they are not relaxations but very active "exercises"—to use an old religious word—of the mind. And those who are most clearly aware of this, will be at once the persons who profit most by them and who are least likely to think it their duty to keep their mind on the stretch through the whole Sunday, For these, who will probably be the *majority* of the persons using the new Sunday trains, the railway will simply be a valuable economy of time, enabling them to distribute their Sunday more exactly according to their own conceptions of duty.

And this suggests the really large view of the subject at which we hinted in the commencement of this article. The Lord Provost admits freely that for certain "exigencies" it is allowable to employ men on the Sunday—even on railway trains—whom it would be far better to leave at rest. And amongst these exigencies he includes the world's want of its letters on Monday morning. Now, does not this logically imply that if the partial evil of depriving men of their rest on Sunday is justifiable for the purpose of averting a secular inconvenience on the Monday, it is still more justifiable for the purpose of increasing to the mass of mankind the legitimate facilities for properly using and enjoying the Sunday? And what is a railway but an immense machine for economising the fatigues and labours of the many by the labours of very few—a mode of rendering each person more completely master of his own purposes, that is of *himself*, than he would otherwise be,—that is for increasing in every way the value of time both to the spiritual man and the unspiritual. Suppose for a moment that men could pass from place to place by some inconceivably more rapid and easy process than any that we know, what Sabbatarian would be so mad as even to wish to deprive them of that power on the Sabbath? Would it not be at once objected that the obstructions thus thrown in the way of wicked and foolish purposes would do no good, since people can be as wicked and foolish at home as abroad, and are often from their ennui more so, while the obstructions thrown in the way of high and noble purposes would do inconceivable harm. An economy of time and labour to the many by the sacrifices of a few, is, if possible, even *more* suitable to the Sunday than to any other day, since it diminishes the waste of life, so to speak, by overcoming mere material difficulties on the one day in the week on which every man, whether Sabbatarian or philanthropist, wishes to see toil and difficulty at its minimum, and the mind of man at its maximum of freedom. It is absurd to object that that freedom will be often abused. Of course it will. But the increase of freedom from the difficulties of the flesh ought, if there be any truth in the Scotch Sabbatarian faith, to multiply the spiritual opportunities of energetic piety infinitely more than it multiplies the opportunities of folly and vice. A powerful instrument for economising time and labour will always do infinitely more in the hands of the wise than in the hands of the foolish. If the Scotch clergy do not reap fresh influence from Sunday trains, it will be their fault, and not the fault of the North British Railway Company.

IRISH UNANIMITY.

IRELAND is once more occupying the attention of newspapers during the dull season; and this, not so much because the season is dull, as because Ireland is turbulent. How is it that that singular people are so incurably unlucky in all their demonstrations—that we never hear of them doing anything creditable, or being anything satisfactory. The phenomenon called "Fenianism" is now up. A certain portion of the population—probably consisting of those ill-regulated and childish natures that are fascinated by mystery, and love to play at "sedition, privy conspiracy, and rebellion," and find an irresistible attraction in whatever is lawless and forbidden—has taken to marching in step and drilling by moonlight. A gunsmith of Nenagh announces that, *in consequence of the withdrawal of the proclamation* by which Tipperary was placed under the "Crime and Outrage Act," he has laid in a large stock of guns, pistols, and ammunition, which he is prepared to sell to the discontented lieges at the lowest price. We regard this Fenianism with no alarm whatever, but, we confess, with very sincere regret. It probably means nothing, but it certainly indicates much. It is silly and contemptible, and in no way formidable as a manifestation against the public peace. But it is very sad, not as proving disloyalty and discontent, or as hinting at any likelihood of action, but as showing with what puerile excitements the Irish people can amuse themselves, in what irrational hopes and feelings they can indulge, how rooted is still the national propensity to grasp the shadow and let drop the substance. Fenianism is a bad symptom, not as showing that the Irish are as seditiously inclined as ever, but as showing that they are just as incurably foolish.

The unprecedented unanimity of sentiment in reference to the cattle disease is a social phenomenon of a different order. For once the Irish people of whatever faith, and the Irish members of whatever politics, have felt and acted as one man, and in consequence have brought to bear upon the Government a pressure which it was thought neither wise nor needful to resist. And under what circumstances, by what influence, have those who never agreed before been brought to agree now? Under the influence of a not unnatural, but a purely selfish and, we believe, an irrational terror. They were seized with a panic lest the cattle disease should be brought into Ireland, and they insisted that, to allay their hysterical alarm, the Government should overstep the law and by an Order in Council prohibit the importation of English beasts across St George's Channel. Now we do not much wonder at their uneasiness, for certainly the *rinderpest* is a very serious calamity; though considering that 50 cows are exported from Ireland to England and Scotland for every one that comes the other way, and that the very scarcity of cattle in England caused by the disease would check even this scanty importation (7,000 a year is the average number), we think the danger far too slight for the terror it has caused, even if the disease were contagious and not endemic. We do not in the least object to the Government, during the recess of Parliment, outstepping the law for an adequate object and in the face of a serious danger:—it is their indisputable duty to take such responsibility upon themselves, on due cause being shown. Nor do we think that in a case like the present, where the mischief of the order was so infinitesimal and the *possible* (though barely possible) evil of refusing it so great, it would have been worth while to hold out. The real objection to the step they took was that it was taken under pressure and against their better judgment; and that with such a people as the Irish, who in their aggregate and corporate capacity are essentially ungenerous as well as unjust, yielding to pressure in this case was certain to encourage the application of similar pressure on every tempting occasion. This has been precisely the result. Already the Irish newspapers, from one end of the land to the other, are filled with pæans of exultation at their victory. "See," they say, "how instantly the Government yielded to our menaces the moment "we were unanimous. Why should we not profit by the "lesson? Why should we not make other demands with the "same unanimity under the same insinuated threats? Why "should we not agree to demand loans, jobs, remission of "taxation, grants of public money, certain to extort them if "we only demand in unison? We cannot, it is true, be unanimous about many things; but surely we may be unanimous "in robbing the Imperial exchequer." The *Belfast Northern Whig* puts this argument forward with a *naive* indecency—a nakedness which, though absolute and discarding even the conventional fig-leaf of public morality, does not even dream of shame,—which is so unique and rich that we must quote the passage nearly whole:—"Seing the beneficial result of this "unanimity, one naturally asks, is this unanimity only "possible when the Irish cows are threatened with a plague? "Why should there not be the same unanimity on general "questions among the Irish members in seasons when there are "no forebodings as to the health of the cattle? Should not "other great questions which are strictly Irish questions—the "taxation of Ireland, the expenditure of the public money in "Ireland, the liberal endowment of educational and benevolent institutions in Ireland, the construction of public "works in Ireland, the improvement of the waste lands of "Ireland—evoke equal unanimity among the Irish members, "and be dealt with by the Irish members as harmoniously "and as successfully as they dealt with the question of saving "the cattle? We can foresee the answer to this. We shall "be reminded that the cattle question was an unsectarian "and non-political question. We shall be reminded that, so "far as we may trust the opinion of naturalists, the Irish "cattle have neither politics nor religion, and that, therefore, "the Irish members of every creed and of every party can "consistently act on behalf of the jeopardised quadrupeds. "This is very true; but the cattle question was not more "thoroughly non-political than any of the other great questions which we have enumerated on paper as proper objects "for unanimous Parliamentary action. Cattle, we readily "admit, have no politics; but, as has been aptly remarked, "neither have pounds sterling.

"*Now, it happens that all the questions which we have "grouped together, with many others which we pass over, are "simply questions of pounds sterling. This they are, and no "more.* They are questions which relate to the public money. "They are questions which relate to our contributions to the "public purse, and to our share in the advantages of the national outlay; and whether we struggle for lighter taxation, "or for a fuller participation in the fruits of the imperial outlay, or for a more liberal scale of State endowments, or for "a less centralising policy as regards Irish public works, or "for a reclamation of those bogs and wastes which, if drained "and broken in, would yield the food of millions, no matter "which of these we ask, we are merely asking that Ireland "shall be more generously or more justly treated in all that "concerns the collecting and the expending of the public "money. Why, then, should there not be a common action "among the Irish members on these points?

"Seriously, the history of the cattle plague agitation, short "as it was, teaches a valuable lesson to the Irish members. "They have had it proved to them, by what it is fashionable "to call the irresistible logic of facts, how much can be accomplished by a unanimity which, while it does a world of "good to the country, demands no sacrifice of party standing "or of individual opinion. No one pretends that, of all the "Irish members whose combined exertions brought about "such a healthy change in Governmental opinion the other "day, *one single representative gave up an iota of his own "peculiar views on special subjects.*"

What comment is possible, or is needed, on this beyond a note of admiration? But Ministers should observe that the first and only effect of their concession has been to encourage the Irish to make further demands in the same menacing and indecorous fashion; that all these proposed demands relate to grants of public money in one shape or other—to paying less or getting more; and that the fact is avowed that only in plans for "spoiling the Egyptians"—*i.e.*, fleecing the Saxon—can consentaneous feeling or united action ever be expected from the Irish people.

Meanwhile we may notice *en passant* that a terrible and malignant disorder is said to be raging among Irish *pigs*, especially in the district of Westmeath. What would the Irish members say if the Government were to deal out equal measures to them, and by an Order in Council close the British market against Irish pork?

In the midst of all this one encouraging feature is still observable,—and perversely enough, this one feature is as usual fixed upon by Irish journalists and speakers for regret. Emigration still continues, and continues faster than the natural increase of the population can make good the gap. The population is still falling off at the rate of nearly 80,000 a year.

That is, the number of the people is anually becoming better proportioned to the demand for their labour, and wages in consequence are everywhere rising. Where agricultural labourers used to earn their 4s and 5s a week, they are now earning 6s and 8s. From returns published by the Board of Trade it would seem that the average is above 7s, and when on task work above 9s. The comparatively small number of Irish labourers who now come over to our harvest shows conclusively how much better off they must be at home than was the case in former years.

Agriculture.

THE CROPS AND THE SEASON.

NEVER was the great dependence of the farmer upon season more strongly illustrated than during the present year. The high promises of April and May received somewhat of a check by a few frosty nights in June, and the absence of rain in July, but still on all reasonably deep soils there appeared to be more than a fair promise for the harvest. Then in August came a reverse, with heavy rains so frequent, that no grain carried after the rains had commenced could have been otherwise than in bad condition. Now again, for the past ten days the weather has taken up and we have had fine and hot days, so that such portions of the grain as had not been previously stacked, have been harvested in a dry state. The night dews, however, have now become so heavy that carting can seldom commence before mid-day. The north country and Scotch gatherings will probably be better than those of the South, though it has been remarked that the effect of the dry early summer was to advance the period of ripening in Scotland, thus rendering the North and South country harvests more nearly concurrent than usual. In the Midland counties, and notably in Warwickshire where the rains were excessively heavy and frequent, we find the wheat far less grown than from the combination of heat with moisture during August was expected. Indeed the wheat is but little grown, though so much cannot be said for the barley.

The difficulties imposed on the farmer by our uncertain seasons are also made manifest by the contrast presented by the grass lands of the midland counties now, as compared with this time last year. Then the springs were dried up, the pastures were bare, and the grazier had to maintain his stock mainly on artificial food. Now the pastures are so full of grass that the common observation is that there is not half stock enough in the district to consume it. Farmers, too, are reasonably shy of purchasing cattle just now, when there may be a chance of bringing the prevalent disease upon their farms. One good effect has been produced by the somewhat exaggerated apprehensions caused by the cattle plague, in the caution exercised in purchasing, as well as in the cleansing and purification of all the stalls and layers where frequent changes of cattle take place.

It may be worth while to notice in connection with the cattle disease the statement made by a correspondent of the *Times*, writing from Constantinople, that by the simple precaution of well washing every morning the nostrils, mouth, and tongue of each animal with vinegar, he preserved "400 head of horned cattle in a village in the Principalities, in which a murrain had broken out with great virulence," from all disease, "while cattle round about not so treated perished by wholesale." He also states that Danubian farmers find datura stramonium thrown into the drink of the cattle constitutes a preservative from the disease. These are simple precautions which might be adopted easily, and could not fail to keep the herdsman alive to the state of each animal.

Where no disease has occurred all kinds of stock have thriven wonderfully, and, we believe, heavier cattle and sheep have never gone from the Midland grazing districts than will go hence during the coming autumn and winter. In the Midland counties the farmers are fully aware of the necessity of making stock their mainstay, and their practice in accordance with their convictions is only limited by the conditions—too commonly extremely burthensome and restricted—on which they hold their farms. The commercial principle, so essential to successful farming, is very imperfectly introduced into the relations of landlord and tenant in the Midland counties.

A very comprehensive letter on the harvest and the crops has been published by Mr James Sanderson (of Manchester buildings), whose very practical communications we have before had occasion to notice. Mr Sanderson's observations are formed on an extensive examination of the crops in most parts of the kingdom, and the general result is less unfavourable than local reports might have led the public to expect. A few of his general remarks are noteworthy. He says "that in the upland districts harvest has not been so early since 1826, nor have crops ripened so equally since that year. Indeed, cutting commenced nearly as soon in the Vale of Tweed as on the banks of the Thames; while from the hot sunshine that prevailed throughout June and July, crops in the upland districts have been as early as those in the lowest." This simultaneous ripening of the crops has rendered labour scarce, and induced a greatly increased use of reaping machinery." Mr Sanderson also says: "All cereal crops have been so variable this season that those in a county or a parish can scarcely with accuracy be designated. Indeed, it was not uncommon to witness two adjoining fields on the same farm—the one yielding a good, the other an almost worthless crop; or two contiguous farms where the crops of the one were a full average and those of the other light." Of all the cereals oats are the most deficient. Potatoes and turnips are everywhere large crops, and mangold wurtzel is unusually good. "Taking the crops as a whole," says Mr Sanderson, "and without reference to the great crops of 1863 and 1864, and taking into account the high average reached in recent years by an improved system of husbandry, I estimate the yield of the wheat crop to be 26 bushels per acre, or four bushels below average; barley, 32 bushels per acre, or eight bushels below average; and oats, 34 bushels per acre, or 14 bushels below average. Peas and beans average, turnips average, mangolds an extraordinary crop, potatoes unusually good, hay average, pastures singularly abundant."

During the past year many farmers have consumed with stock on their farms much of the corn they had previously sold, and in this way found a more profitable result. Unless the farmers adopt a mixed system of husbandry, "it is impossible, with wheat at 40s per quarter, present prices of labour, and ruling rentals, that he can meet his expenditure." This we believe to be strictly true. "The stock-rearing farmer, on the other hand, enjoys a prosperity without precedent." The Scotch farmers have largely availed themselves of the advantages of this state of things. Mr M'Combie, the well-known breeder and grazier of Tillyfour, Aberdeenshire, sent to London during the season of 1864–5 nearly 400 cattle which sold at an average price of 35*l* each.

It seems to be, however, on the sheep farms of the border district that the greatest progress has been made, and that not by the process of laying down arable land to grass, as has been so often recommended by English landowners, but by the contrary process of converting grass land into arable. Mr Sanderson cites the following instance: "A farm containing 600 acres was, prior to the occupancy of the present tenant in 1864, all under natural pasture. The former tenant during a 19 years' lease annually realised for his 'cast' of lambs from 70*l* to 110*l*. During the occupancy of the present tenant the natural pastures have been converted chiefly into artificial grasses, and this year's produce of lambs realised 1,200*l*. Moreover, there has been a corresponding increase in the revenue derived from other produce—wool, full-grown sheep and cattle; and in addition the farm now annually yields upwards of 100 acres of corn." And, adds Mr Sanderson, "There are still hundreds of farms in England and in Scotland from which similar results are obtainable." We quite indorse that statement. It is by such applications of observed facts that Mr Sanderson renders his reports so much more valuable than the bald accounts usually found in our agricultural reports. We wish there was less timidity amongst agricultural writers in dealing with the causes of defective farming.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 7th inst. The return for the previous week is added:—

DEBTOR.	Sept. 7, 1865. f	c		Aug. 31, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	849,749,975	0	.....	916,501,325	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	8,955,167	22	.....	9,564,394	57
Treasury account	155,028,740	55	.....	156,906,534	80

Digitized by Google

The above return, compared with that of last week, shows a decline of 52,000,000f in the discounts, and of 66,752,000f in the circulation of notes; and an increase of 4,738,000f in the coin and bullion, and of 25,407,000f in the deposits. The large fall in discounts has caused a painful impression, testifying as it does to a want of activity in trade. But in a purely banking point of view, the situation of the Bank is considered highly satisfactory, its resources being ample compared to its liabilities.

An official notification, stuck up in the Bourse on Friday last, makes known that from that day, the 1st, to the 30th of the present month, a sum of 398,600f would be employed daily in the purchase of Three per Cent. stock for the Caisse des Depots et Consignations. The announcement was favourable to certain speculators, and was adverse to others, and it caused much grumbling among the persons engaged in the latter. But of course Government cannot and does not take any account of speculations in the Bourse operations which it has from time to time to perform.

The Bourse has not been very active, but considerable firmness prevails. The following are the quotations:—

In the *Moniteur* of this morning is a report from the Minister of Commerce, M. Behic, to the Emperor, on the Murrain in England. Immediately after the malady broke out the Minister charged a commission of eminent men to examine into it, and their opinion is, he says, that it is a contagious typhus, originating in the steppes of Eastern Europe, and that the invasion of it in England is owing "to the importation into that country of Russian cattle, embarked in the port of Revel, in the Gulf of Finland, and disembarked in the docks of the Thames." And not only does the commission thus testify to the Russian origin of the malady, but it declares it is "an exotic in Western Europe, and that it can never be developed there under the influence of the general and common causes to which it has been erroneously ascribed." In Prussia and Austria, the Minister says that the precautions taken to prevent the progress of the malady westward are so efficacious that for fifty years France has been free from it; but that now that those countries have been "turned" by means of imports by sea, it is of urgent importance that France should protect herself, especially as the malady has already been introduced into Holland by a cargo of tainted animals which had been refused admission into England. That protection afforded, the laws and ordinances in vigour will, the Minister declares, suffice to protect the spread of any malady in the interior, inasmuch as they prescribe these regulations:—that owners of sick animals must make a declaration of the sickness; that cattle sheds must be visited, and that on payment of an indemnity, not only the sick animals but others that have been placed with them may be killed; that sick or suspected animals may be sequestrated; that those of which the removal from the places they inhabit may not appear desirable may be marked; that fairs and markets may be interdicted; and that pasturages and drinking-places may be *surveilles*.

In consequence of the report of the Minister, the Emperor has decreed:—That the introduction into France and the transit of cattle, and of fresh hides and of other fresh parts of such animals, are absolutely interdicted by the ports on the coasts from and including Nantes to Dunkirk, and by the frontiers of the North and East from the sea to the Rhine; that such animals and things coming from England, Holland, and Belgium are absolutely interdicted in all ports and custom houses of the Empire; that the animals arriving in other ports and custom houses, and from other countries than those here indicated, shall be visited by special agents, and if found healthy shall be admitted; if sick shall be excluded; and if suspected, or if having been with sick animals, shall be placed in an isolated place for ten days. The Emperor has further decreed that the import into France of all domestic animals, presenting dangers as regards the contagious typhus, may be interdicted, or be subjected to measures which the Minister of Commerce may consider necessary.

M. Langlais, Councillor of State, the new Minister of Finance in Mexico, will take his departure for that country in less than ten days, and will be accompanied by three or four able officers of the finance department. From the investigation he has made into the finances of Mexico, and from the reforms he intends to adopt, he thinks, it is said, that its revenue can without difficulty be raised to about 8,000,000*l* sterling, which sum, it is calculated, will be sufficient to provide for all the expenditure and for the interest on the debt.

Some persons have put forward a plan for establishing forthwith a clearing house in Paris. They have however omitted to state that they have borrowed the idea from M. P. J. Coullet who, many months ago, published a pamphlet showing that under certain circumstances such an establishment would be useful, and explaining its mechanism. They have besides neglected to obtain the co-operation of the great banking houses, without which, of course, the scheme cannot be carried into effect, and the absence of which seems to prove that the bankers on their part do not think that the institution is necessary for the present. The promoters of the project say that a clearing house would give a great development to the use of cheques, and is indeed the only means of inducing the commercial public to employ those instruments in their operations. On both these points they are in error; and their error must be counted as one of the many delusions which the French people entertain on the subject of cheques. A clearing house, as everybody in England knows, is a place in which the bankers exchange the cheques they have on each other, and with which the customers of the bankers, that is, the drawers and receivers of cheques, have nothing whatever to do. Moreover, these customers have no other interest in it than the very indirect one derived from a simplification of certain banking arrangements. It is, then, not a clearing house which would bring cheques into general use, but the general use of cheques which would necessitate a clearing house.

The monthly Customs returns only appeared yesterday—more than a week later than usual. No explanation is given of the delay, but, whatever the cause, the Board of Customs deserves censure, inasmuch as it has such a vast staff of *employes* that exactitude in the publication of the tables might easily be secured. The returns show that the value of the imports for consumption in the first seven months of 1865 was 1,532,972,000f; same period of 1864, 1,383,710,000f; of 1863, 1,348,827,000f:—and that the value of the exports of French production was, in the first seven months of 1865, 1,664,445,000f; same period of 1864, 1,703,807,000f; of 1863, 1,430,751,000f. An increase in the imports of the present year and a decline in the exports will appear to the Protectionist fraternity an unanswerable argument against the treaties of commerce, especially that with England. But your readers know the hollowness of Protectionist theories on these points.

The following is a detail of the principal imports for consumption:—

	First seven months of 1865. francs.	First seven months of 1864. francs.	First seven months of 1863. francs.
Wool	142539000	114172000	118920000
Silk	167279000	148369000	160357000
Sugar	86065000	81726000	79749000
Cotton	237019000	206312000	141338000
Coal	71654000	65274000	56333000
Timber	51941000	52700000	52439000
Cattle	40176000	41135000	38579000
Hides	63870000	60401000	70894000
Oleaginous seeds	30888000	25732000	26779000
Seeds for sowing	20738000	8075000	10260000
Olive oil	22423000	18616000	14864000
Staves	12689000	8671000	12413000
Flax	41949000	30977000	29902000
Hemp	6993000	3440000	2292000
Jute	5312000	4283000	2477000
Tallow, &c.	11145000	22261000	25139000
Oleaginous fruits	10952000	10247000	12317000
Grain and flour	8907000	11133000	32949000
Cast iron	4193000	1864000	12025000
Iron	1449000	563000	3084000
Steel	482000	735000	1112000
Copper	22022000	24319000	20484000
Lead	7399000	5727000	5308000
Tin	6788000	6975000	5684000
Indigo	18656000	13292000	16021000
Wines	3213000	3316000	3617000
Brandies	1665000	1978000	3095000
Beer	960000	930000	1033000
Hemp, flax, and jute yarn	7697000	2859000	4125000
Cotton yarn	4459000	2977000	4317000
Woollen yarn	8307000	5730000	6516000
Goats' hair yarn	9225000	9262000	7306000
Flax and hemp tissues	9225000	9262000	7306000
Silk tissues	3931000	3240000	2324000
Hair tissues	2738000	3456000	3600000
Woollen tissues	20996000	17120000	69164000

Hair of all sorts	12535000	14998000	9759000

Subjoined is an account of the precious metals, which are kept apart from the other imports and exports :—

IMPORTS.

	First seven months of 1865. francs.	First seven months of 1864. francs.	First seven months of 1863. francs.
Gold—Bullion	39,452,064	71,943,873	53,699,127
Coin	243,519,489	299,493,501	186,372,090
Silver—Bullion	56,027,309	34,436,262	17,259,410
Coin	91,452,410	124,531,526	74,389,700
	430,451,272	440,395,162	331,720,327

EXPORTS.

Gold—Bullion	24,071,910	17,928,222	43,424,829
Coin	152,644,956	166,303,620	159,675,691
Silver—Bullion	27,516,351	71,515,940	59,254,628
Coin	42,988,203	125,303,745	53,361,220
	247,221,420	381,051,527	315,716,868

It thus appears that in each of the three periods the imports have exceeded the exports, and that the excess this year is greater than in the other two, being 183,229,852f, which in English are 7,329,194l. In the imports of gold in the seven months of this year were (bullion and coin united) 110,284,188f from England, which were more than from any other country; and of silver, 52,615,468f from Italy, which exceeded the quantity from any other country. The largest export of gold was made to Italy, the amount being 106,823,010f; and the largest export of silver to British India, 19,000,800f.

An official return shows that the quantity of alcohol made and imported, from the beginning of the season on the 1st October to the 31st July, was, including the stock in bond, 1,440,460 hectolitres, and that the quantity taken for consumption was 1,146,332, leaving in bond 294,128.

An imperial decree extends to Great Britain, Belgium, Italy, and the other countries, which have commercial treaties with France, all the advantages conferred on Holland, under the recently concluded convention with her, which they did not possess; and it makes all the stipulations of their treaties applicable to her.

The market report is as follows :—

FLOUR.—The quotation at *Paris*, yesterday, was choice, 50f 50c the sack of 157 kilogs; first marks, 49f; good, 48f; other sorts, 47f. Six marks, current month, 49f 50c to 49f 75c; three months of October, 50f 50c to 50f. Type Paris, disposable, 30f 75c the 101 kilogs.

WHEAT.—In most principal markets there has been a decline. At *Paris*, yesterday, there was one of 50c, new choice white being 28f the 120 kilogs; new choice red, 27f.

COTTON.—Business was more active at *Havre* in the week ending Friday, owing to the advices from England. 7,506 bales were sold. The arrivals were 6,358. The stock was estimated at 34,850. The closing quotations were 5f higher for Tinnevelly, 2f Coconada, 3f China; 5f lower for fine Oomrawuttee, Dhollera, and Compta; other sorts unchanged. Low New Orleans was consequently 235f the 50 kilogs; good ordinary qualities in Broach, 163f; in Tinnevelly, 155f; in Madras, 165f: in China, 148f; in Jumel, 215f. This week, the market has been active, and prices of American have risen: yesterday, New Orleans was 240f, 237f 50c, and 217f 50c; for delivery, 217f 50c and 222f 50c; Mobile, for delivery, 212f 50c. Tinnevelly was 155f, 152f 50c, and 157f 50c; Oomrawuttee, 155f to 172f 50c; Madras, 150f and 155f; China, 142f 50c.

COFFEE.—The demand was regular at *Havre* in the week ending Friday: 570 sacks Hayti Port-au-Prince, 80f to 83f the 50 kilogs, in bond; 229 ditto fair Nassau, 79f 50c; 3,000 Jeremie, for delivery, 80f; 200 Gonaives, disposable, 87f; 150 Cape, 84f; 1,500 Rio not washed, 73f to 77f 50c; 84 Jamaica, from Nassau, 82f. The arrivals exceeded 13,500 sacks. This week, Hayti Cape, 84f, in bond; Rio, 71f 50c to 73f 50c, and for delivery, 81f to 83f; washed, 103f; Hayti, 83f; Port-au-Prince, 82f; Gonaives, 87f; Bahia, 65f 50c. At *Bordeaux*, last week, 450 sacks washed and not washed, 80f to 102f; 400 Mysore, 118f; 300 La Guayra, 94f. This week, Mysore, 118f. At *Nantes*, last week, there were no sales. This week, Reunion pointue, 140f, duty paid. At *Marseilles*, last week, there were no sales. This week, by auction, Brazil, sound, 60f 75c to 69f: also, some damaged.

SUGAR.—At *Havre*, in the week ending Friday, 50 casks French West India were taken at 47f 50c the 50 kilogs, duty paid, and afterwards 500 went at 47f. Some usine went at 58f 50c; and some ditto second jet, 52f 50c; 117 casks Havana, 30f, No. 12 in bond. The arrivals exceeded 3,000 casks and 1,300 sacks. This week, French West India, 47f and 46f 75c; Havana, No. 13, 29f 50c, and by Spanish flag, 28f 50c, No. 12, 30f. At *Bordeaux*, last week, 810 casks French West India, 46f 50c; some usine at different prices, and at 55f to 56f 25c; 7,000 bales Mauritius, 52f 50c, bonne quatrieme, duy paid; 600 casks Santiago, at prices not stated. No sales this week. At *Nantes*, last week, 7,988 sacks Reunion, 50f 25c, bonne quatrieme; 1,000 Mayotte, at prices not stated; some French West India, bonne quatrieme, at 46f to 45f 75c; usine, 49f; and low quality, 40f and 42f 50c. This week, Reunion inferior, 42f 50c; French West India usine, 51f 50c; bonne quatrieme, 45f 50c and 45f. At *Marseilles*, last week, 300 casks Martinique, 27f, bonne quatrieme; 10,000 bales Mauritius, in the liquidation of Rostand and Co., 27f; and 2,500 casks Havana ditto, 27f 50c. The Mauritius was imported in English, and the Havana in Spanish ships. This week, Pernambuco, by English ship in the port, 24f 75c; No. 10, Mauritius, from Rostand, 28f; and Havana, 27f 50c, No. 12.

INDIGO.—At *Havre*, in the week ending Friday, sales were insignificant: 5 chests Bengal at established prices, 1 Caracca at prices not stated. This week, Guatemala at prices kept secret, Bengal at a premium of 55c. At *Bordeaux*, last week, 45 chests Bengal at about 25c lower, and 5 Kurpah at established prices. This week, Bengal and Madras at prices not stated.

HIDES.—The sales at *Havre*, in the week ending Friday, were 850 La Plata dry, 71f 50c to 90f the 50 kilogs; 1,800 ditto salted ox, 53f 50c to 59f; cow, 43f 50c: 320 Rio Grande salted ox, 53f 50c; 100 Pernambuco salted, 45f; 280 Nassau salted, indifferent quality, 39f; 350 Sainte Marthe drysalted, 54f; 411 Martinique salted, 51f 50c to 54f 25c; 180 Valparaiso dry, 72f; 300 ditto drysalted cow, 66f; 949 New Orleans, salted for delivery, 39f; 4,122 Monte Video horse, salted, 43f 50c. The arrivals exceeded 33,000. This week, Monte Video salted ox, 58f 50c; cow, dry, 90f; Pernambuco salted, 45f; Rio Grande salted ox, 56f 50c; La Plata horse, salted, 43f 50c. By auction, Monte Video salted ox, sound, 40f; Bahia dry cow, 64f 53c; Porto Cabello dry, 61f; Nassau, salted, 35f to 50f.

WOOL.—At *Havre*, in the week ending Friday, 355 bales La Plata unwashed, 1f 60c to 2f 35c the kilog; and 8 washed, 2f 20c. By auction some damaged was sold. The arrivals were about 1,700 bales. This week, Monte Video unwashed, 1f 92½c to 2f 20c; Buenos Ayres unwashed, 1f 10c to 2f 10c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were active, and prices advanced. 520 pipes and 6 tons La Plata disposable, 52f 25c to 53f 75c. 1,200 pipes for delivery, 53f 25c to 54f 75c; 15 casks New York a la marque, 50f; and 10 tons New Orleans, 51f. The arrivals were 766 casks. This week, La Plata for delivery, 53f 50c to 55f 50c, At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 122f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 50f and 49f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 63f; 3-6 beetroot, first quality, 90 deg., 58f.

COMMERCIAL AND MISCELLANEOUS NEWS.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 19th day of August, 1865 :—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300185	497734	281203
Royal Bank of Scotland	216151	52[illegible]725	367[illegible]2

Central Bank of Scotland	42933	61551	28157

The annexed statement of the Calcutta money market is dated Aug. 1 :—"Money is now so abundant that there is a difficulty in finding employment for it, even at one per cent. under the Bank rates, which are as follows :—Discount Loans on Government Securities, 4½; Interest ditto, 5; on Private Bills, 6 and 7; and on Bills accepted by local banks, 5 and 6 per cent. Some of the banks and private houses are lending at 4 per cent. on Government paper. All feeling of uneasiness in regard to the position of monetary matters in Bombay has subsided, and transactions in Government securities and other investments have been resumed on an extensive scale. Bank of Bengal shares continue in good

Digitized by Google

demand, and have again advanced. The share market generally wears a more lively appearance. In sterling exchange but little has been doing since our last report. Rates close for Bank Bills at 6 months, 2s 0¼d; Credits ditto, 2s 0¼d to 2s 0⅜d; Document Bills ditto, 2s 0⅜d to 2s 0⅝d. A considerable business has been done in Bank drafts on Bombay, at following rates:—On demand at par, 60 a p rs 2 discount. On China, we hear of transactions at 30 days' sight at 216 per 100 dollars."

Messrs Clason and Co., writing from Bombay on the 8th of August, thus allude to the state of monetary affairs:—"The quiet state of our general markets is acting as a relief to our present difficult position, and a gradual improvement is observable. The deposits in the Bank of Bombay are steadily increasing, while the discounts are gradually diminishing; and the latter process is still going on but slowly, and the bank experiences much difficulty in the recovery of moneys outstanding. The rate of discount has been reduced to 2 per cent., but in the choice of securities the greatest caution is exercised. Shares are flat again, and speculation is fast subsiding. Confidence is far from being re-established, and even good securities are difficult to place."

The following intelligence has been received from India via the Persian Gulf:—Bombay, Sept. 2.—First class ships commenced loading at 20s. 7 lb shirtings, 7 rupees; active demand. Exchange on London, 2s ¼d. Calcutta, Sept. 1.—Exchange on London, 2s ⅛d. Government Securities—Four per Cents., 91; 5 per Cents., 103¾; 5½ per Cents., 110¾.

The annexed return shows the state of the currency in India—in the Madras Presidency on June 24, and in the other Presidencies on July 1:—

The imports of bullion into the United Kingdom, during the week ending Sept. 6, were:—Gold, 316,061*l*; silver, 246,274*l*. The exports were:—Gold, 137,281*l*; silver, 181,368*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 6th day of September, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,072,140	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,422,140
		Silver Bullion	...
	28,072,140		28 072,140

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384 209
Rest	3,739,107	Other Securities	21 365 336
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,985,710	Notes	6 370,4"5
		Gold and Silver Coin	900,135
Other Deposits	14,207,995		
Seven Day and other Bills	534,273		
	39,020,085		39,020,085

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,236,008	Securities	31 846.545
Public Deposits	5,985,710	Coin and Bullion	14,322 275
Private Deposits	14,207,995		
	42,429,713		46,168,820

Dated the 7th September 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,739,107*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An increase of Circulation of	£103,327
A decrease of Public Deposits of	109,075
A decrease of Other Deposits of	284,039
No change in Government Securities.	
An increase of Other Securities of	108 620
A decrease of Bullion of	167,337
An increase of Rest of	231,070
A decrease of Reserve of	271,012

The above return is unexpectedly unfavourable. Although 135,000*l* in foreign gold is known to have been sent into the Bank this week, the demand for coin for harvest and pleasure purposes has proved sufficiently heavy to cause a decline of 167,337*l* in the bullion. The increase in the other securities and the withdrawals of other deposits indicate that the demand for money has lately been less moderate than was generally believed.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	21,133,661	21,895,385	21,646,811	21,367,124	22,236,008
Public deposits	7,591,337	8,768,329	6,997,402	6 022,373	5,985,710
Other deposits	10.970,353	13,809,642	12,909,484	12,904.085	14,207,995
Government securities	13,031,088	11,111,067	11,091.284	10,797,095	10,384,209
Other securities	16,637.227	19,296,460	18,731,259	20,308,310	21,365,336
Reserve of notes & coin	8,075,271	11,225,978	9,069,188	6,8:0.582	7,270,540
Coin and bullion	14,217,376	17,611,538	15,245,488	12,970,447	14,322,275
Bank rate of discount	4 p c.	2 p. c.	4 p. c.	9 p. c.	4 p. c.
Price of Consols	90⅞	93⅜	93⅜	87¼	90
Average price of wheat	74s 10d	58s 4d	49s 2d	42s 3d	46s 7d
Exchange on Paris (short)	25 17⅞ 27½	25 20 25	25 27½ 35	25 32½ 40	25 17½ 27½
— Amsterdam ditto	11 16 16½	11 15 16½	11 16½ 16⅝	11 19 12	11 18 19
— Hamburg (3months)	13 8½ 9	13 7½ 8½	13 8½ 9	13 10½ 10⅝	13 9⅝ 10½

In the corresponding week of 1855, news had arrived of the insurrection in India. The harvest prospects on the whole were more encouraging, and considerable progress had been made in gathering in the crops. Great commercial activity continued in France. The Bank of England had raised its rate of discount from 3½ to 4 per cent.

In 1862, the Senate at Frankfort had voted its adhesion to the commercial treaty between France and the Zollverein. Her Majesty the Queen of England had set out on a visit to Germany. Increased dulness prevailed in the stock markets.

In 1863, the Confederate reverses in America had acted prejudicially on the market values of stocks here. The Conference of the Princes at Frankfort-on-the-Maine had been opened. Great ease prevailed in the money market, and a further advance had taken place in Government securities.

In 1864, the Emperor Napoleon had signed a decree appointing the Duke of Magenta Governor of Algeria. The Rigsraad had been closed at Copenhagen. Business had been resumed at Tunis, and the caravans had recommenced their journeys. News had arrived of a defeat of the Maories in New Zealand. In America the Confederates had been repulsed with heavy loss in an attempt to cross the Potomac. The Bank of Frankfort had raised its rate of discount to 4½ per cent., and the Bank of Prussia to 6 per cent. Greater stringency prevailed in the money market here, and the funds were dull.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 5,666,874*l*; in 1862, a deficiency of 5,486,817*l*; in 1863, a deficiency of 5,821,775*l*; and in 1864, a deficiency of 7,404,225*l*. In 1865, the deficiency is 7,157,341*l*.

Discount and Money Market.—The expectation that the Bank rate of discount would be lowered yesterday caused the money market to be easy in the earlier part of the week, the general terms for the best short paper being 3⅞ per cent., and and in many cases 3⅝ only. The comparatively unfavourable Bank return, however, has led to increased stringency, and no transactions have taken place to-day below 3¾ per cent., the usual charge being 3⅝. At the same time, there does not seem to be any real deficiency in the supply of money as compared with the commencement of the week. Annexed are the current quotations for bills of various dates:—

30 to 60 days	3⅞ per cent.
3 months	4 per cent.
4 months	4¼ per cent.
6 months—Bank bills	4⅜ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange money has been in demand, owing to withdrawals of loans by country bankers, partly for harvest requirements and partly for the railway dividends. The terms for advances on Government securities were 2 to 2½ per cent. in the morning, subsequently rose to 3 to 3½, and at the close were 4 per cent.

The following are the rates of interest allowed on deposits:—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3½ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

The sum of 100,000*l* in sovereigns was taken from the Bank yesterday for Buenos Ayres, while 13,000*l* in foreign gold was sent in to-day.

Digitized by Google

The biddings for Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were—to Calcutta, 134,600*l*; to Madras, 9,000*l*; and to Bombay, 100,000*l*. The minimum prices were as before, viz., 1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. Tenders on Calcutta and Madras at 1s 11¾d will receive in full, and on Bombay at 1s 11⅞d, about 72 per cent.; above these prices, in full.

The return of the Bank of France this week shows the following changes :—

	£
INCREASE.	
Cash in hand	190,000
Current accounts	1,000,000
DECREASE.	
Notes	2,672,000
Commercial bills	2,080,000
Treasury balance	70,000
Advances	13,000

The Crown agents for the colonies are inviting tenders, receivable until Thursday, the 14th inst., for Ceylon Government Six per Cent. Debentures to the extent of 100,000*l*. This is the second instalment of a loan of 1,000,000*l*, which has received the necessary authorisations. The principal is repayable in 1872.

Messrs J. Henry Schröder and Co. are inviting applications for a 7 per cent. loan of 400,000*l* for the Bay of Havana and Matanzas Railway Company. As security for the loan, the company offer a first mortgage on the Coliseo Railway, and also a mortgage of the Bay of Havana and Matanzas line and its branches (which have cost together 1,056,000*l*), subject to the existing mortgages of 350,000*l*.

The Committee of the Stock Exchange have appointed special settling days in the shares of the following companies :—London and Brazilian Bank (Limited), new 20*l* shares, to-day, Sept. 8; Ceylon Company A shares, Thursday, Sept. 14. Both are to be marked in the official list.

The Committee of the Stock Exchange have also fixed Tuesday next, Sept. 12th, a special settling day in the shares of the Peruvian Railways Company (Limited), which are not to be marked in the official list.

Subjoined are the rates of discount in the chief cities of the Continent, showing a rise at Berlin and Hamburg :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5
Berlin	5	5
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	4
Madrid	9	...
Hamburg	...	4¼
St Petersburg	6	6½ 7

ENGLISH FUNDS.—Consols were firm in the commencement of the week, but have been since rather dull, on the unfavourable Bank return and consequent maintenance of the rate of discount at 4 per cent. The price last Friday was 89⅞ to 90 for money, and the closing quotation this evening was 89¾ to 89⅞. For the new account in October, the latest transactions have been at 90 to 90⅛, after a temporary improvement to 90⅛ to 90¼. Reduced New Three per Cents. left off at 88⅜ to 88⅝; and India Five per Cents. at 105⅛ to 105⅜, showing in the latter case a reaction from the late advance.

Exchequer bills have improved to 2s discount to 2s premium. India bonds are nominally 20s to 25s premium.

The Government broker continues to purchase 10,000*l* stock daily for the sinking fund, chiefly of New Three per Cents.

The interest on Exchequer bills for the half-year to March, 1866, will be at the rate of 3*l* per cent. per annum.

FOREIGN STOCKS.—The foreign market has shown increased strength this week, and in several descriptions an advance has taken place. Turkish stocks have been especially in demand, and the Consolides have improved to 49 to 49¼. The new 5 per Cent. scrip is also rather less weak at 6 to 5½ discount. Among the more speculative securities, Spanish Passive and Certificates and Mexican have chiefly risen. Greek bonds have been comparatively stationary. A good demand prevailed for Egyptian 7 per Cents., particularly the last issue. On the other hand, Brazilian 4½ per Cents. have again fallen owing to the continuance of the war in South America. Buenos Ayres bonds were also at one period lower, but have since recovered. The Confederate loan has not been favourably influenced by the result of the meeting of bondholders, and remains heavy at 6 to 7, with however scarcely any transactions. United States 5.20 bonds left off at 68⅜ to 68⅝.

French 3 per Cent. rentes closed this evening on the Paris bourse at 69f 40c, showing a rise of nearly a ¼ per cent. over last Friday, and of nearly an eighth compared with yesterday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

RAILWAY AND OTHER SHARES.—The railway market this week has partially lost its recent buoyancy, owing to some realisations on the late rise, together with speculative sales on the non-reduction of the Bank rate of discount and the general absence of business. In most cases, however, prices are steadily maintained, and occasionally a fresh advance has taken place. Metropolitan stock continues chiefly in request, but there has also been a good inquiry for Great Northern, Manchester and Sheffield, and Caledonian. Lancashire and Yorkshire, on the other hand, has been more offered. The market remains intrinsically firm, the supply of stock being moderate, and the public rather buyers than sellers. Support is also derived from the favourable traffic returns.

The principal movement in colonial descriptions has been a rise in Grand Trunk stock and Great Western of Canada shares. There has been little change in Indian guaranteed securities, but East Indian stock shows increased firmness. Foreign shares are buoyant, especially Bahia. South-Austrian and Lombardo-Venetian have exceptionally declined.

In the miscellaneous department the shares of the financial associations have advanced, Credit Mobilier and Foncier of England being chiefly in demand. The inquiry for joint stock banks remains rather active, the principal rise this week being in Imperial Ottoman.

City of Milan Improvements shares have been steadily improving, owing to the satisfactory accounts received from Italy. London Merchants are nominally quoted 4 to 3 discount.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

FOREIGN EXCHANGES.—The rates this week have shown increased steadiness, especially this afternoon.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our last circular of 31st August have been limited, and comprise only 32,560*l*, per the Douro, from the Brazils; 102,000*l*, per the Sussex, from Melbourne; 86,000*l*, per the Etna, from New York. There is no export demand at present, and consequently 125,000*l* has been taken to the Bank of England during the last week. The only shipments have been 3,500*l*, per the Ripon, to Alexandria, and 1,700*l*, per the same ship, to Madras. 50,000 sovereigns were shipped to Alexander per the Marseilles steamer of the 9th inst.

Silver.—The fine bar silver brought by the Seine from the West Indies has been sold at 60⅜d per oz standard. Owing, however, to the very limited supply on hand, and to a rather increased demand within the last two days, the price has risen to 60½d to 61d, but the transactions at these rates are limited. The only shipment has been 1,400*l* per the Ripon to Shanghai.

Mexican Dollars.—Our market is very quiet, and the price has a downward tendency, from 60d to 60⅛d being the nearest quotation. The shipments per Ripon were as follows:—25,000*l* to Singapore, 11,500*l* to Penang, 220*l* to Yokohama, 1,156*l* to Shanghai.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 11⅝d to 2s for Bombay, and 1s 11½d to 1s 11⅝d Calcutta and Madras. The Council drafts sold yesterday were disposed of as follows:—Calcutta and Madras at 1s 11⅜d in full, Bombay at 1s 11⅞d, 72 per cent.

India Government Loan Notes rule at the following rates:—109 to 110 for 5½ per Cents., 101½ to 102½ for 5 per Cents., and 89 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 74s 9d to 75s 3d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅛d to 5s 1d per oz std; ditto, containing 5 grs gold, 5s 1d per oz std. last price; Mexican dollars, 5s 0⅛d per oz, last price; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The outgoing steamer to Brazil will take 104,840*l* in gold (including the 100,000 sovereigns withdrawn from the Bank yesterday), and 8,000*l* in silver.

RAILWAY DIVIDENDS.—The directors of the Varna Railway Company have notified that six months' interest at the rate of 8*l* 6s 8d per cent. per annum, in accordance with the terms of the prospectus, being 2s 6d on the shares on which 5*l* has been paid, including the call of 1*l* per share due 1st Sept. inst., and 10s on the shares paid in full, becomes payable on the 17th inst.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Vice-Chancellor Sir W. P. Wood proposes, on the 30th October, to appoint an official liquidator of the Beariz Tin Streaming Company (Limited).

An adjourned meeting of the creditors of Messrs John T. Bell and Co., East India merchants, who failed on the 6th of July, was held on Thursday, when printed statements of the affairs of the Bombay firm, and also of their native broker, which had been submitted to the Indian creditors, were laid before the meeting, with certain amendments, as prepared by Messrs Coleman, Turquand, Youngs, and Co. It was resolved that the statements thus amended should be forwarded to the inspectors at Bombay, and communicated to the creditors there, together with the draught of a deed of inspection prepared in this country, according to the principles of the Bankruptcy Act, which the meeting here invited the Indian creditors to execute.

PUBLIC COMPANIES.—It is announced that the Anglo-Austrian Bank will be prepared to pay on and after the 15th inst., out of profits of the current year, the sum of 3s per share, equal to 5 per cent. per annum, free of income tax.

At the half-yearly meeting of the London General Omnibus Company, held on Tuesday, a dividend and bonus at the rate of 7½ per cent. per annum was declared.

The meeting of the Railway Passengers Assurance Company took place on Wednesday, when a dividend of 4 per cent. per annum was declared, and 29,715*l* carried forward to the current half-year's account.

The report of the Mauritius Land Credit and Agency Company has been issued. The net profits for the nine months ended 30th June last are stated at 3,502*l* 16s 11d, and a dividend at the rate of 10 per cent. per annum, free of income tax, is recommended.

At an extraordinary general meeting of the London and Colonial Bank yesterday, the resolution passed on the 23rd August for winding up voluntarily was confirmed.

A meeting of the London Merchants' Company is called for the 12th instant to amend the articles of association, so that any increase of the capital will be made contingent upon the assent of the shareholders at a general meeting. A modification in the terms of purchase of the businesses of the three firms on which the company is based will also be proposed. Any shareholders, however, who are desirous of withdrawing from the concern, and receiving back their deposits, are requested to send their proxies to Mr J. S. Cousens of 62 London wall.

Messrs Everitt and Lucas are instructed by the contractor of the Sevenoaks, Maidstone, and Tunbridge Railway, to invite applications for the 20*l* perpetual preference shares—6,600 in number—paying interest at the rate of 5*l* per cent. per annum. The London, Chatham, and Dover Railway Company guarantee a minimum rental covering the interest on the preference shares and debentures at 5*l* per cent. per annum, which amount will be paid on the 30th of June and 31st of December in each year. This rent will be paid net out of the gross earnings of the London, Chatham, and Dover main line on the 31st December and 30th June in each year, free of all liabilities for working or otherwise. The line is at present in working order as far as Sevenoaks, and will be open to Tunbridge in the course of a few months.

The Transatlantic Steam Company, with a capital of 800,000*l*, the first issue to consist of 10,000 50*l* shares, is announced this week. The directors propose in the first instance to provide for a regular fortnightly service between Southampton and New York, by means of screw steam ships of 3,500 to 4,000 tons burthen.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.7⅛ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 2-10ths dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109¾ per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

A reduction of Postage has taken place on Letters for the Duchies of Holstein and Schleswig forwarded via Prussia, and, in future, the following rates, British and Foreign combined, will be chargeable on such letters, viz.:—Not exceeding ½ oz, 8d; above ½ oz and not exceeding 1 oz, 1s 4d; above 1 oz and not exceeding 2 ozs, 2s 8d; above 2 ozs and not exceeding 3 ozs, 4s 0d; every additional oz, 1s 4d.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was moderate. A few samples of old and some of the best new wheats were disposed of at 1s to 2s per quarter beneath Monday's prices: otherwise, the produce on the stands was unsaleable, and the bulk was left unsold at the close of business. In foreign wheat scarcely any business was transacted, and the quotations ruled next to nominal. Barley was in limited request at late rates. The malt trade was quieter on rather easier terms. For oats, of which there was a good supply on offer, the trade was steady at late prices. Beans and peas were rather drooping in value. Flour was obtainable on easier terms. This week's imports amount to 20,540 quarters of wheat, 5,920 barley, and 21,850 quarters of oats.

At Liverpool, this morning, the trade for wheat and flour was dull, at Tuesday's decline in prices. Maize sold at a reduction in value of 3d to 6d per quarter. At Wakefield, the wheat trade was heavy: old produce was 1s to 2s per quarter lower than on Friday last, whilst *new* sold at irregular rates.

A very large business has been transacted in the Liverpool cotton market during the present week, resulting in total sales of 113,500 bales,—of which spinners have taken 65,000 bales, speculators 21,000 bales, and exporters 27,500 bales. Quotations are about ⅛d to ¾d per lb dearer than on Friday last. The imports of the week amount to 35,500 bales. To-day's stock is reduced to 361,000 bales. It is rather a matter of surprise that with such large transactions the advance should not have been more in proportion, but many holders have felt inclined to realise at full market prices. Many parcels have been cleared out of weak hands, and spinners having immediate demand for their late purchases, may be expected to keep in the market at present at gradually advancing prices. The market closes to-day a shade easier. After a very animated market such is usually the case, but the sales are 10,000 bales, and lower rates are not accepted.

The stock of cotton at New Orleans on the 17th ult. was 88,000 bales. On the 22nd, the quotation for middling quality was 42 to 43 cents per lb. The first bale of *new* Texan cotton had been received, and sold at 51¼ cents per lb, the classification being "middling fair."

At Mobile, the receipts of cotton during the week ending Aug. 12, amounted to 7,930 bales, and the exports to 6,715 bales; the stock on hand at latest date being 34,424 bales. The trade was very dull, and a heavy fall took place in prices, the latest quotations being as follows:—Ordinary, 28c to 33c; low middling, 32c to 33c; middling, 35c to 36c; strict middling, 37c to 38c per lb.

From Savannah we learn that a further decline had taken place in the value of cotton, the reduction in prices, during the week ending Aug. 18, being to the extent of 1c to 2c per lb. Ordinary quality was quoted at 28c to 30c; middling ditto, 34c to 36c; good middling, 38c to 40c per lb.

At latest dates, the stocks of cotton at the ports of shipment in the United States were as follows:—At New York (estimated) 85,000 bales; at New Orleans, 88,000; at Mobile, 32,200; at other ports about 44,000—total, 251,200 bales.

Postal advices from Bombay are to Aug. 8. During the fortnight preceding that date there had been a steady demand for

Digitized by Google

cotton at fully late rates, and with a slight upward tendency. "The purchases," observe Messrs Nicol and Co., "have been to a fair extent, and, although Oomrawuttee Akote, of which we have the largest supply, has been most in demand, at from 277 rs to 300 rs, there have also been sales made of Dhollerah at 301 rs to 310 rs, Oomrawuttee 285 rs, Kandeish at 265 rs, Broach at 305 rs, and sawginned Dharwar at 375 rs." The annexed tables of prices and exports are from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, Aug. 8.

Via the Persian Gulf, we have intelligence from Bombay to Sept. 2. The shipments of cotton during the week have been about 9,000 bales. For cotton goods, there was a good demand.

The trade for Manchester goods at Bombay in July was very quiet. In most descriptions the amount of business transacted was very limited, yet very few changes of importance took place in prices. The annexed quotations of grey shirtings are from Messrs Rennie, Scovell, and Co.'s circular:—

No.	Inches.			Per Piece. lbs	oz	s	d
13	39	14 by	11	6	0	9	7½
18½	39	14	14	7	0	11	9

41	45	14	10½	7	0	11	4½
45	44	14	12½	8	0	13	3
49	44 to 45	16	16	9	8	16	3
57	50	16	17	10	6	18	10½

We have intelligence from Alexandria to Sept. 5. At that date, fair open-ginned cotton was selling at 17½d per lb, cost and freight. During the week ending Aug. 26, fair open-ginned produce was quoted at 16½d; good fair do., 17d per lb, free on board. The arrivals, from Aug. 18 to Aug. 26, were 2,500 bales, and the sales 2,800 bales. Freight to Liverpool, 11-16d to ¾d per lb.

There has been a fair amount of activity in the markets for colonial and foreign grocery produce this week. In raw sugar, considerable business has been done, at an advance in prices from Friday last of quite 6d per cwt. Plantation Ceylon coffee has been freely dealt in at the late decline in the quotations, and the public sales of tea have passed off with fair spirit, at mostly full prices; but in the market for rice, owing to the fall in the price of wheat, there has been less firmness, and the late advance in the quotations has been with difficulty supported. *New* Valencia raisins have fallen from 42s, the opening, to 40s to 41s, the present quotation, but the cargoes at present received of the *new* crop indicate hasty picking.

Last week, duty was paid in London on 1,123,213 lbs of tea, the export for the week ending Aug. 31 being 629,807 lbs, making a total of 1,753,020 lbs. Advices from China state that the export to Great Britain since the opening of the season had amounted to 36,000,000 lbs. The stock of tea in London, on the 1st inst., was 77,587,000 lbs, against 78,035,000 lbs last year.

Messrs McMinn and Co., under date of July 15, state that the entire export of coffee from the Malabar coast, during the season just concluded, was 172,450 cwts, shipped from Cochin, Beypore, Calicut, Tellicherry, Cannanore, Mangalore, and the small seaports in Malabar and Canara, the destination of which was as follows:—To London, 80,315 cwts; France, 25,864; Arabia, 3,145; Bombay, 29,904; Mauritius, 574; Colombo, 652; Calcutta, 700; Turkey via Persian Gulf, 9,635; Persian Gulf, 4,456; and coastwise, 17,200 cwts.

Both rum and brandy have changed hands to a limited extent at about last week's currency. British spirit is worth 11s 10d per gallon.

"The vintage in the Peninsula and in the South of France," write Messrs Matthew Clark and Sons, "is expected to be unusually early, and in some parts has actually begun. If the weather prove fine during the gathering, there appears every reason to expect a most favourable result both in quality and quantity. We have heard but few complaints of disease, so we may reasonably conclude that there is little prevailing this season."

The public sales of colonial wool continue to be well attended by home buyers; but the export demand is still limited. Good and fine sheep's wool commands rather more money than at last sales, whilst inferior qualities exhibit a fall of about ¼d per lb. Lambs' wool—owing to the limited supply on offer—has advanced 1d to 2d per lb. Privately, English wool is in fair demand at full prices.

The silk trade is not to say active, yet prices rule firm. The sold stock in London on the 31st ult. was 6,718 bales, against 15,398 bales; the unsold stock, 6,868, against 5,788 bales last year. The delivery in August was 4,143 bales, against 6,059 bales in the corresponding month in 1864. Advices from Shanghai report an active market for silk, at advancing currencies; the exports since the opening of the season had been 25,375 bales.

Hemp is firm at 29/ 10s for clean Russian, on the spot. Flax has changed hands freely at last week's currency. The best jute is rather dearer.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on Sept. 1, 1863, 1864, and 1865, Dealers' Stock included Delivered in Aug.

In reference to the state of the tobacco trade last month, Messrs Grant, Hodgson, and Co. write as follows:—An improved demand was experienced last month for most descriptions of American, resulting in sales of nearly 900 hhds; previous prices were fully supported for good and choice qualities, but slight concessions were submitted to for middling and ordinary. Manufacturers have chiefly confined their purchases to good and fine sorts at full prices, in preference to medium and mixed parcels, at relatively much lower rates. Imports—1,389 hhds. Deliveries—885 hhds, against 1,167 hhds in the corresponding month of last year. Stock—19,978 hhds, against 16,461 hhds in 1864; 17,820 hhds in 1863; 20,169 hhds in 1862; 26,520 hhds in 1861; and 17,997 hhds in 1860.

As regards the state of the leather trade last month, Messrs Powell and Co. write as follows:—The leather trade has shown little variation during the past month. There has been some increase in the demand, but with scarcely any alteration in prices. The stocks of dressing leather are unusually small, and prices firm. Sole leather, on the contrary, of nearly every description, is plentiful, and there has been a disposition to make a little concession in prices in order to effect large sales. The imports of raw goods, excepting of East India kips, have been small, while the sales of the month are considerable, leaving reduced stocks of most articles. Prices have been nearly stationary. At the last public sale of the month the heavy Australian hides realised an advance of ½d per lb, and full rates were obtained for East India kips.

The subjoined statement is from Messrs Churchill and Sim's circular:—

STOCK of TIMBER, DEALS, &c., at the PUBLIC DOCKS on Sept 1.

	1865.	1864.	1863.
Foreign deals pieces	1,224,000	831,000	1,145,000
Battens and boards	1,491,000	1,165,000	1,379,000
Fir timber loads	55,100	42,400	58,600
Colonial pine deals & battens pieces	886,000	527,000	613,000
Spruce ditto	788,000	888,000	687,000
Pine timber loads	14,900	10,500	8,400
East Indian teake	19,100	11,100	21,800

Messrs Moran and Co., writing from Calcutta on the 1st of August, thus allude to the prospects of the new indigo crop:—"In Dacca, Furridpore, and Mymensingh, manufacturing has nearly finished; these districts will make very little more than they did last year. In Kishnaghur and Jessore the weather has not been so favourable as could be wished, and the yield from the plant has been generally below the average. Malda, Moorshedabad, &c., have experienced some damage to the standing plant by inundation, but on the whole promise tolerably well. Purneah fares badly, whilst Bhagulpore has every prospect of a bumper season, having far more than an average crop already in the godowns. In Tirhoot and Chuprah there has lately been rain in

Digitized by Google

abundance, and not before it was much wanted in many places. Manufacturing is going on briskly. From the Benares provinces we hear that the Khoontee crop is magnificent, and planters expect a fine result from it. The Doab still promises well."

Scotch pig iron has advanced to 57s 3d cash, mixed numbers. In tin plates, considerable business has been done for export to the United States, and the market for tin is steady, at 88*l* 10s to 89*l* per ton, cash, on the spot. Spelter has sold at 21*l* 7s 6d on the spot. The following, from L. van Houten's circular, relates to Banca tin in Holland :—

	1865 slabs	1864 slabs	1863 slabs
Import in Aug.	16,208	9,019	13,983
Previously this year	115,760	102,288	65,178
Total eight months	131,968	111,307	79,161
Deliveries in Aug.	32,388	55,520	29,766
Previously this year	61,604	68,039	58,977
Total eight months	93,992	123,559	88,743
Stock second hand (on warrants)	141,619	98,900	100,089
Unsold stock	42,668	17,352	21,997
Total stock	184,287	116,252	122,086
Quotation, Aug. 31	55fl	62fl	74fl

In the oil trade, there has been considerable activity, and prices have improved. Linseed oil is now worth 35s; foreign refined rape, 48s; fine palm, 38s 6d per cwt; sperm, 100*l* per tun. Turpentine is dearer, at 48s 6d for French spirits on the spot. Petroleum continues to advance in price, the quotation for American refined being 2s 10d to 2s 11d per gallon.

In tallow, a limited business has been transacted, at 45s 6d for *new* Y.C. on the spot, and 46s 3d to 46s 6d for January to March deliveyr.

The demand for cotton and woollen goods at New York, during the week ending Aug. 26, was very active, and considerable business was transacted, but at a slight reduction in the prices of the previous week. Extensive public sales of foreign manufactured goods had been held, and had gone off with spirit, at fully late rates. Respecting the crops, the accounts received were favourable, but—owing to the news of an important rise in the prices of wheat in England—an active export demand had sprung up, resulting in enhanced rates being paid both for wheat and flour. For grocery produce there had been a good demand at higher prices. The stock of bullion in the banks of New York city, on the 19th ult., was 3,921,930*l*, against 4,158,860*l* last year, 6,804,100*l* in 1863, and 7,117,700*l* in 1862, whilst the balance in the Sub-Treasury was 10,679,280*l*. The fluctuations in the price of gold during the week ending Aug. 26, were from 143⅞ to 148⅝ per cent. The supply of money was large, and prices were easier at 7 to 8 per cent. for the best short-dated commercial paper, whilst the leading banks were making advances on Government securities as low as 5 per cent. The shipments of specie, from Jan. 1 to Aug. 19, were 3,853,480*l*, against 6,315,900*l* in 1864, 5,516,750*l* in 1863, 7,567,190*l* in 1862, and 653,770*l* in 1861.

THE COTTON TRADE.

LIVERPOOL—Sept. 8.

The extension of business recently manifested in the manufacturing districts, the requirements of exporters, and increased operations on speculation, have caused a very general and active demand for cotton throughout the week; but though the advices from America of rather higher quotations, and no immediate prospects of large supplies, have tended to increase the general feeling of confidence, holders have continued to supply the market freely, and prices have only partially advanced ¼d to ⅛d per lb. Sea Island has been in more general demand, and full prices are currently paid. American continues in request, but is scarcely higher than last week. In Brazil, the amount of business has been much curtailed by the smallness of supply and the relatively high prices asked, which are about ⅛d to ¾d over last week. A large demand for Egyptian has been met by holders, and the only advance quoted is ¼d per lb in fair qualities and under. In Smyrna, a moderate business has been transacted at previous rates. East India has again been in great demand, but holders having continued to supply the market freely, prices have only advanced ½d per lb. China has improved ¼d to ½d per lb, the limited supply placing this description in a relatively strong position.

To arrive large and numerous transactions have been reported throughout the week, and the latest quotations were on Wednesday :—Maceio, fair average, ship named, 16½d per lb; Maranham, middling fair, at sea, 18d; Egyptian, fair open, shipping or shipped, 17¼d and 17½d; Broach, fair new merchants ex quay, 13½d; Oomrawuttee, fair new merchants, ship named, 11¾d; and on Thursday, Pernam, first quality, due 18d; Western Madras, fair new merchants, ship named, 11¾d and 12d per lb.

The sales of the week amount to 113,680 bales, including 21,330 on speculation, and 28,360 declared for export, leaving 63,990 bales to the trade.

LONDON—Sept. 8.

The following is an abridgement of the report of the London cotton trade issued this week by the London Cotton Brokers' Association :—There has been a very active demand throughout the week resulting in a large business, especially in Tinnivelly, and as compared with quotations of Friday last, most descriptions on the spot show an advance of ¼d to ½d per lb. For arrival a large business has also been done, the latest transactions showing an advance of ½d per lb on the prices paid last week.

NEW YORK—Aug. 26.

Only a moderate business been transacted in cotton this week. The fluctuations in prices have been confined to a rise of about 1c per lb at the commencement, and to a fall of similar extent towards the close of the week. Middling Upland has sold at 49c, but is now quoted at 44c per lb. The arrivals have been 20,460 bales, of which 9,080 bales are from New Orleans, 1,419 Mobile, 2,561 Savannah, and 4,284 bales by rail. The total import since Sept. 1 is now 380,101 bales. The following are the prices current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a good demand for yarns and cloth in the manufacturing districts this week, and most qualities have realised enhanced rates. The iron trade has been very firm, and tin plates have changed hands freely for export to the United States. Coals have been in improved request.

MANCHESTER, Sept. 7.—A very extensive general business has been done this week, notwithstanding the rising quotations of last week, and the fact that most spinners and manufacturers are well engaged to order. Yarns for the Continent have again been in good demand, and perhaps ½d per lb more has been paid on the average. This advance has indeed been claimed on almost all yarns, and paid as wanted. In cloths, demand has been very active for the nearer markets, the home trade, the Continent, and America, both North and South. For these, fine printers, narrow cambrics and jacconets, domestics and T'cloths have been taken freely. India and China shirtings continue the quietest articles in the market, but even in them some sales have been made at a distinct improvement in price.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—A good deal of wool has been sold since our last report, and at somewhat improved rates. The demand is principally upon bright-haired and other deep-grown wools, the lighter sorts being comparatively neglected. The demand for yarns for home use is very active. For export there is also a better demand. The export demand is chiefly for 28's and 30's single, and for twofold 36's. American houses continue to buy pieces most freely, and their orders are so extensive compared with those of home and other foreign buyers, that manufacturers get filled up, and these latter have already to place their orders for next spring or they could not get them delivered. Prices are fast tending upwards.

LEEDS.—A good attendance of both buyers and sellers in the cloth halls, and the market wore a cheerful aspect. The reports from manufacturers, and also from dyers and finishers, continue cheerful, and prices are firm, having an upward rather than a downward tendency. The rates of wool keep quite firm.

ROCHDALE.—The flannel market has been rather more animated. The sales have been in the plain and fancy departments, but especially in the latter, without any appreciable change in prices. There is a pretty good inquiry for Yorkshire goods of the best quality, but the commoner sorts are very difficult of sale. The wool market is firm.

LEICESTER.—There continues to be a good demand for most descriptions of hosiery goods, and the operatives are fully employed. A fair amount of business is being done in yarns, and prices remain firm.

NOTTINGHAM.—In the lace trade the demand is very quiet, particularly in silk goods. There is rather more doing in plain cotton Mechlins and Mechlin quillings. Cotton and silk laces are both a very dull sale. There is a little doing for the continental trade, but not much for America. The hosiery trade continues active. Yarns have stiffened in price.

HUDDERSFIELD.—Business in most departments has been quiet, as buyers have operated on a very small scale, and only purchased for immediate wants. The inquiry is principally for better class goods, of which stocks are not large. The demand for low goods continues languid and stocks are large, and in some instances they are a little easier to buy.

BIRMINGHAM.—The trade of this town is steady. The orders for jewellery and fancy articles generally have rather improved of late; the electro-platers and those engaged in the metal trades are doing a good average amount of business. In the gun trade generally, there is more activity, and the hollow-ware manufacturers and tin-plate workers are well employed.

SHEFFIELD.—The steel trade continues dull. There is more doing for the home markets, but the orders for America are very small. In most of the old staple trades business is good for the season.

WOLVERHAMPTON.—The tone of trade is cheerful, and sales are effected in both departments of the trade, but chiefly in pig iron. Prices are firm.

NEWCASTLE.—The manufacturing trade of the district is firmer again, and with the exception of the Wear shipbuilding yards, in which there is a dispute between the masters and the men, all branches of business are in full employment; some of them, indeed are particularly active.

NEWPORT.—The iron trade shows more vitality. For railway iron there is a good demand. Puddled bars maintain previous rates, and pigs are stiffening in price. An average trade is doing in steam coal, and there is no change to note in the house coal trade.

CARDIFF.—The coal trade of this district has been in a more satisfactory state, and the demand is increasing from some markets. There is every prospect that the fall of the year will will witness a large trade with the European States. A gradual improvement is observable in the house coal trade, and the collieries are getting better employed. Coke is in average request. Sellers of pig and puddled are so well placed for orders that they show no anxiety to effect sales.

GLASGOW.—Our cotton market has been steady, and long-stapled cotton has advanced from ¼d to ½d per lb. Considerable purchases of pig iron have lately been made on speculative account at gradually stiffening prices

Digitized by Google

BELFAST.—There is no change of importance to note in linens. Demand for all markets, with the exception of Havana, continues good, and prices keep firm, with an upward tendency. The yarn market has been well supported by a brisk continental demand, which has had the effect of enabling holders to realise full quotations, and has still further strengthened the upward tendency of prices. Considerable quantities of new flax are now appearing, and prices are ruling very high. The quality is in general good.

DUNDEE.—Our flax market has continued without special change. There has been rather more disposition on the part of consumers to add to their stocks at present rates, so that a considerable amount of business has been doing, both in goods on the spot and to arrive. There has been rather more doing in jute, and prices are steady. The demand for linens is very active, and manufacturers have generally employment on hand for a considerable time to come.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 26.—Owing to a revival of the export demand to Great Britain, and to considerable transactions for shipment, both flour and wheat have sold readily at enhanced rates. For corn, there has been a fair demand on rather higher terms. The receipts during the week have amounted to 58,662 barrels of flour, 409,526 bushels of wheat, and 609,827 bushels of corn. The following are the rates current:—Flour—State, superfine brands, $6.90 to $7.40; State, extra brands, $7.65 to $7.90; State, choice brands, $8 to $8.25; Ohio, common brands, $8.95 to $9.20; Ohio, fancy brands, $9.25 to $9.30; Ohio, good and choice extra brands, $9.35 to $11; Michigan, Indiana, Wisconsin, &c., $6.95 to $7.40; Genesee, extra brands, $8.30 to $11; Missouri, $11.75 to $14.25; Canada, common, $8 to $8.25; Canada, good to choice extra, $8 to $11 per barrel. Wheat—Chicago spring, $1.55 to $1.58; Milwaukee Club, $1.56 to $1.58; amber Milwaukee, $1.56 to $1.58; winter red Western, $2.09 to $2.10; amber Michigan, $2.15 to $2.18; white Michigan, $2.28; *new* amber State, $2.15. Corn—sound Western mixed 96c to 97c; unsound ditto, 94c to to 95c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing to the continuance of fine weather, and rapid progress of harvest-work in the North of England, as well as in Ireland and Scotland, great heaviness has prevailed in the demand for English wheat, and a fall of from 1s to 2s per quarter has taken place in the quotations. Foreign wheat has ruled heavy in the extreme, at 1s to 2s per quarter less money. Fine barley has changed hands on former terms; but inferior kinds have been much neglected. There has been a full average demand for malt, and the quotations have been fully supported. The sale for oats has been inactive, at barely late rates. Beans and peas have been in short supply, and limited request, on former terms. The flour trade has become heavy, and prices have been with difficulty maintained.

The new wheats have made their appearance in somewhat improved condition. For the most part they weigh well.

On the continent, the transactions in wheat on English account have fallen off, but rather large quantities of barley, oats, beans, and peas continue to change hands for shipment to England. The exports of produce from America are still on a limited scale

In Scotland, the demand for wheat has ruled heavy, and the quotations have not been supported. Most descriptions of Spring corn have sold slowly, but at full prices.

The Irish markets have been scantily supplied with produce: nevertheless, the corn trade, generally, has ruled heavy, at barely late rates.

The supply of English wheat on sale at Mark lane to-day was moderate, and the trade was very dull. The little business done was at a decline in prices from Monday of from 1s to 2s per quarter. Foreign wheat was a heavy sale, and prices must be considered in a great measure nominal. Barley changed hands at previous rates. Oats were in good supply and steady request, at full prices. The value of beans and peas had a slight downward tendency. The flour trade was dull, on easier terms.

In reference to the trade in floating cargoes, Mr George Dornbusch writes as follows:—Arrivals at ports of call, since last Friday, 11 cargoes, viz., 5 wheat, 6 maize, 3 barley, 2 rye, 1 beans, and 1 linseed. Wheat, arrived cargoes, 1s to 1s 6d cheaper; on passage, and for shipment, 2s to 3s lower from the recent highest point. Wheat—11 cargoes sold. Arrived—Odessa Ghirka, at 41s to 42s 6d; Nicolaieff Ghirka, 41s to 41s 3d. On passage—Taganrog Ghirka, 40s. Shipped, or to be shipped—Taganrog Ghirka, 41s 6d to 42s 6d; Odessa, 42s. Maize—11 cargoes sold, tale quale. Arrived—Ibrail, Bulgarian, and Wallachian, from Kustendje and Sulina, 29s 6d to 30s 9d tale quale. On passage—Galatz, Ibrail, and Moldavian, 30s 9d to 31s 4d tale quale. Shipped, or about to be shipped—Kustendje, 26s tale quale; Galatz and Odessa, 31s 3d tale quale. Barley—2 cargoes sold. Arrived—Nicolaieff, 22s tale quale. On passage—Azov, from Nicolaieff, 21s 9d tale quale.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been excited with very large transactions, at an advance of 1s, low sugars attracting great attention. Owing to the liberal purchases by refiners, the supply of West India is now much reduced. Up to yesterday 3,400 casks West India had sold. Barbadoes by auction realised 31s to 36s per cwt. Some parcels of low sugar have been taken upon speculation. The stock in London now exceeds last year's by only 3,300 tons, while the total deliveries are 34,000 tons larger.

Mauritius.—8,620 bags, offered by auction, chiefly found buyers: low to fine brown, 27s 6d to 31s; soft grey and yellow, 31s to 33s; grainy and crystallised, 33s to 37s 6d. A pile of grainy white, 11s 8d duty, was bought in at 42s per cwt. Many parcels have changed hands by private contract.

Bengal.—5,500 bags brown and low date sorts have sold at 29s to 31s 6d. 544 bags white Benares, offered by auction, went at 36s to 37s 6d per cwt.

Madras.—6,000 bags Jaggery are reported sold at 26s 6d to 27s for the lower sorts. 1,794 bags native: brown to low grey muscovado sort, 28s to 31s 6d. 3,170 bags low Jaggery, offered by auction, were taken in at 26s to 26s 6d.

Manilla.—50,000 bags unclayed have sold at 28s 6d to 28s 9d; 35,000 bags clayed at 31s to 31s 6d.

Digitized by Google

Other Foreign.—600 casks Porto Rico have found buyers privately at 34s to 34s 9d. 400 casks Cuba at 31s 6d to 32s 6d. Two floating cargoes of Cuba at 23s for the United Kingdom. Three of Havana, No. 11½ to 13½, 26s to 27s. By auction 650 casks 250 barrels Porto Rico brought 32s to 37s. 347 casks Cuba partly sold at 31s to 33s 6d per cwt.

Refined has been very firm, and is now rather dearer: common qualities of dry goods selling at 42s to 42s 3d per cwt.

MOLASSES.—170 puncheons West India are reported sold at 15s 6d to 16s per cwt.

COCOA.—The market is steady.

RUM.—Some business is reported in Mauritius, at 1s 7d per proof gallon. Other kinds are dull.

COFFEE.—The continued large supplies have not had any further influence upon prices. Low and ordinary qualities are, however, dull, and slightly lower in some cases. 3,677 casks 962 barrels and bags plantation Ceylon, by auction, nearly all sold: pale and low middling, 76s to 78s 6d; middling to fine, 79s to 88s 6d; a few very fine, 95s to 98s. 179 casks 352 bags native part sold: ordinary mixed to good, 65s to 68s: fine, 69s 6d; in casks, as low as 64s 6d. 57 casks 233 barrels and bags Jamaica partly realised 64s to 78s 6d. Fine withdrawn at 100s. 2,142 cases 3,655 bags East India chiefly sold: pale to good, 70s to 86s 6d. 2,669 bags Rio were chiefly withdrawn, a small portion selling at 63s per cwt.

TEA.—The market is firm, with a continued demand for the better grades of green at full prices to some advance. Common kinds of congou meet with partial inquiries for exportation. The public sales have gone off well. There were 27,899 packages offered, and 18,700 sold, nearly all printed "without reserve." A large sale of Indian tea is advertised for Tuesday next.

RICE.—Two floating cargoes of Rangoon have sold for the United Kingdom at 12s; one of Necrancie Arracan at 11s. There is a very limited demand for parcels on the spot. Necrancie Arracan has sold at 10s 1½d; old white Bengal at 14s per cwt.

SPICES.—The sales have been large this week. 4,584 bags Singapore black pepper only partly sold at 3d, with coming-in lots, 3⅛d for good. 1,163 bags Trang at 3d. A small parcel of good Tellicherry at 4½d. 331 bags white Singapore part sold at 5½d. 90 packages nutmegs went rather dearer: brown, 1s 1d to 3s 2d; Dutch limed, 1s 1d to 3s. 61 packages mace, 11d to 1s 8d; good, 2s 2d; Java kind, 11d to 1s. 12 cases Penang cloves part sold at 1s to 1s 1d per lb. 358 cases cassia lignea went rather dearer: fair to good, 87s to 89s. 61 cases cassia buds were chiefly taken in, one lot selling at 10*l* 15s. 667 cases Cochin ginger chiefly sold at 67s 6d to 77s. 433 bags African were taken in at 36s. 80 barrels Jamaica sold steadily at 58s to 65s per cwt. 342 bales Zanzibar cloves realised 3⅞d to 3⅝d. 373 bags pimento went rather dearer, from 2½d to 2⅝d per lb.

SALTPETRE steady. 50 tons Bengal have sold, to arrive, at 24s, usual conditions. On the spot 2,500 bags fine at 23s per cwt cash.

SHELLAC.—A further advance has been paid for button kinds: good, 78s 6d to 84s per cwt.

DRYSALTERY GOODS.—No change of interest has occurred, and the market is rather quiet.

METALS.—Some kinds are in better demand. Speculative business has been done in Scotch pig iron during the week at higher prices. Mixed numbers quoted 57s 3d per ton cash. Moderate transactions have occurred in Straits tin at 88*l* 10s to 89*l*. One contract made for arrival at 90*l*. The market is now rather quiet. Spelter dull and unsettled; the sales effected have been at 21*l* 7s 6d to 21*l* 12s 6d per ton, according to conditions. Stock, 7,400 tons, against 11,003 tons in 1864 at the same date.

HEMP.—Manilla quiet, but firm: 1,764 bales offered by auction were taken in above the value.

JUTE is much firmer, and in some instances prices have advanced. 11,750 bales by auction chiefly sold at 11*l* to 22*l* per ton. A few contracts have been made on the spot and to arrive.

OILS.—The market is firm. Linseed closes at 35s on the spot. Rape in good demand, at the quotations. Cocoa-nut has advanced: Ceylon, 42s; Cochin, 45s 6d to 46s. Palm, 38s 6d to 39s per cwt for fine. Sperm has advanced to 100*l* per tun.

TALLOW.—Since last Friday, Petersburg Y.C. on the spot reached 46s for new. The market has since receded about 6d, and it is steady this morning. First sort now Petersburg Y.C., 45s 6d; for delivery in January to March, 46s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, September 4, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market keeps firm. Including the parcels West India by auction, 1,174 casks sold to-day, making this week's business 4,574 casks. 7,575 bags Mauritius and 2,249 bags Penang obtained full prices.

COFFEE.—218 casks plantation 10 casks 1,716 bags native went at full rates; the latter being only partly disposed of. 1,717 packages East India sold upon former terms.

RICE.—A floating cargo of a Necrancie Arracan has sold for the Continent at 10s 4½d per cwt.

SAFFLOWER.—110 bales Bengal were chiefly taken in.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well maintained this week, and a fair demand for most descriptions of goods, in some instances at slight advance. In Dutch crushed more business has been done in Holland at higher prices.

ENGLISH WOOL.—There is more inquiry for English wool, without any alteration in prices.

COLONIAL WOOL.—The sales progress firmly.

HEMP.—Russian is quiet, owing to recent heavy arrivals, but little business doing.

FLAX.—But few sales this week. Our stock of Russian is small on the spot.

TOBACCO.—The trade have purchased more freely of all descriptions, and the market has presented a hardening character for all sorts of useful home-trade qualities. Considerable sales have been effected for exportation.

METALS.—We have a better feeling in metals, in consequence of the fine weather. Copper is firm in price, and in rather better demand. Iron is steady at quotations. Tin still wants life. Lead shows a rather improved demand. Spelter is neglected. Tin plates in large request at advanced prices.

BARK, &c.—Current prices: English, per load of 45 cwt delivered, in London, 16*l* 0s to 17*l* 10s; ditto Coppice, 16*l* 10s to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 0s to 7*l* 0s; ditto Coppice, 6*l* 10s to 7*l* 10s; French, 0*l* to 0*l*; Mimosa, chopped, 9*l* to 9*l* 10s; ditto, ground, 9*l* 10s to 11*l*; ditto, long, 7*l* to 9*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto, Sardinian, 8*l* 10s to 9*l* 10s; Valonia, Smyrna, 15*l* to 22*l* 0s; ditto, Camata, 16*l* to 20*l* 0s; ditto, Morea, 12*l* 0s to 18*l* 0s; Divi Divi, 10*l* to 13*l* 10s; Myrabolans, 12*l* to 15*l* 0s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 19*l* 10s to 20*l* 10s; ditto, free cubes, 26*l* to 28*l*; ditto, Cutch, 24*l* 0s to 26*l* 10s per ton.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	9
Fat by ditto	2	4
Yellow Russia	47	0
Melted stuff	36	0
Rough ditto	20	0
Greaves	23	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 4.—The total imports of foreign stock into London last week, amounted to 26,208 head. In the corresponding week in 1864 we received 20,533; in 1863, 19,331; in 1862, 11,698; in 1861, 12,067; in 1860, 13,595; and in 1859, 13,269 head.

There was a considerable falling off in the supply of foreign beasts exhibited for sale here to-day. The show of sheep, however, was good, and the quality on the whole tolerably prime. The trade was steady, at full prices. Fresh up from our own grazing districts, as well as from Scotland, the arrivals of beasts were limited. The receipts from Ireland were moderate. The general quality of the stock was very middling, and all good and prime breeds changed hands at full prices; whilst inferior stock met a somewhat inactive sale at last Monday's currency. The general top quotation was 5s 4d, the extreme 5s 6d per 8 lbs. The total supply of sheep on sale was moderate, and the quality, generally speaking, was tolerably good. For most breeds there was a steady demand, and last Monday's currency was well supported. The general top figure was 6s 8d per 8 lbs, but really first-class Downs sold as high as 7s per 8 lbs. About 3,000 Irish sheep were in the pens. The lamb season must now be considered over, but the few choice breeds on sale to-day realised 7s per 8 lbs. Calves were in very moderate supply, and the trade ruled steady at full prices. The top quotation was 5s 4d per 8 lbs. For pigs there was a fair demand, at quite previous rates.

SUPPLIES.

	Sept. 5, 1864.	Sept. 4, 1865.
Beasts	6420	4270
Sheep and lambs	26570	27820
Calves	324	243
Pigs	490	340

THURSDAY, Sept. 7.—The supply of English beasts on sale at our market to-day was limited, but that of foreign was tolerably large. The trade for good and prime beasts ruled firm, at fully late rates, the top price being 5s 6d per 8 lbs; otherwise the beef trade was in a sluggish state, at barely late rates. The market was fairly supplied with sheep, for which the trade ruled quiet, but at quite previous quotations. The general top figure was 6s 8d per 8 lbs. Calves were a fair demand, at Monday's currency. The pork trade was steady, and prices ruled firm. We understand that a cargo of foreign beasts, numbering about 300 head, was seized at the wharf this morning, some of the animals being in a diseased state.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Sept. 8.—Our market is fairly supplied with new hops. Most qualities are in steady demand, at the annexed quotations:—Mid and East Kents, 115s to 160s; Weald of Kent, 100s to 130s; Sussex, 100s to 115s per cwt. For yearlings the demand rules quiet, at 95s to 140s per cwt.

Digitized by Google

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 8.—The supplies of potatoes on sale are moderate. Good and fine samples move off steadily, at 50s to 80s per ton. Inferior qualities are dull, and are selling as low as 30s per ton.

COAL MARKET.

FRIDAY, Sept. 8.—Wallsend Haswell 20s 6d—Hetton 20s 6d—South Hetton 20s 6d—East Hartlepool 20s 3d—Tees 20s 3d—Gosforth 18s 6d—Hetton Lyons 18s 6d—Kepier Grange 19s—New Belmont 19s 3d—Eden Main 19s—Russell's Hetton 19s—South Hartlepool 19s 6d—Tunstall 18s 6d—Byass's Bebside West Hartley 18s 3d—Holywell Main 16s—Wylam Moor 16s per ton. Ships at market, 34; sold, 14; gas contracts, 17—31; unsold, 3; ships at sea, 30.

HAY MARKETS.

THURSDAY, Sept. 7.—The various markets are but moderately supplied with hay and straw, and the trade rules firm, at full prices.

Per load of 56 trusses

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	95 to 120	95 to 126	95 to 120
Clover	100 to 140	100 to 147	100 to 140
Straw	36 to 42	38 to 45	36 to 42

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 8.—Our market has been rather quiet this week, but with improved harvest prospects holders are very firm in their demands, and seem disposed to hold off rather than press for sales, seeing that there is no diminution in the rate of consumption in the manufacturing districts.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 8.—Moderate attendance. Wheat limited demand. Unchanged rates. New amber, 9s ex quay. Flour dull, at former prices. Indian corn, 3d lower for mixed American, and 6d on Arabian. Beans steady. Oats ½d per bushel, and oatmeal 6d per load lower, with a very small business.

The Gazette.

TUESDAY, Sept. 5.

BANKRUPTS.

J. B. Abello, Coleman street, merchant—J. G. Barnard, St Paul's road, Highbury—J. F. L. C. Becker, Caledonian road, manufacturing jeweller—J. Cook, New Church street, Lisson grove, coachmaker—W. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 26th of August, on 12,241 miles, to 749,042*l*, and for the corresponding week of last year, on 11,889 miles, to 712,036*l*, showing an increase of 352 miles and of 37,006*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,759 miles, to 618,182*l*, and for the corresponding week of 1864, on 8,448 miles, to 591,194*l*, showing an increase of 311 miles and an increase of 26,988*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept 4.—In the share market to-day the home securities generally closed with a firm tendency, foreign and Canadian railways were also firm; but Indian railways were disposed to flatness, and the other descriptions showed average steadiness. Of English railways, North-Western recovered ¾ and Lancashire and Yorkshire ½, Great Northern advanced 1, Caledonian and Metropolitan District (paid up) ½ each, Manchester, Sheffield, and Lincolnshire ¼, Metropolitan a further 1, ditto (new) a further ⅛, and ditto (extension) a further ¼. In colonial, Atlantic and St Lawrence advanced 1, Grand Trunk of Canada ½, ditto (4th preference) ½, Great Western of Canada (paid up) ¼, and ditto (new) ⅛; and Madras (4½ per cent.) and ditto (4¾ per cent.) declined 1 each, ditto (5 per cent.) ½, and Bombay and Central India (F shares) ¼. In foreign, Paris and Mediterranean improved ½, Dutch-Rhenish ¼, and Sambre and Meuse ⅛.

TUESDAY Sept 5.—In the share market to-day there was no increase of animation, and the descriptions generally remain without material average change; but there was a further upward tendency in banks and English railways, of which last-named description Great Western (South Wales) advanced 1, Great Northern (A stock), Midland, and North-Eastern (Leeds) ½ each, ditto (York) ¼, and Lancashire and Yorkshire and Manchester, Sheffield, &c., a further ½ each. In colonial, Grand Trunk of Canada improved ½. In foreign, Great Luxembourg advanced ¼, and West Flanders ⅛, and Lombardo-Venetian declined ½. In America, Illinois Central shares recovered ¼, Erie shares (paid up) advanced ¾, and United States (5-20) declined ⅜. In British mines, Wheal Buller advanced 4½, East Bassett 1, in addition to a rise of 5 which occurred yesterday, and East Lovell ½; and New Seton and West Chiverton declined 2½, Herodsfoot 1, and Clifford Amalgamated ½, in addition to a fall of 3 which occurred yesterday.

WEDNESDAY, Sept. 6.—In the share market to-day, although the amount of business remains unimportant, prices were generally disposed to firmness, mines being an exception. Of English railways, Great Northern advanced 2, Great Western ¼, ditto (South Wales) a further 1, Lancashire and Yorkshire further 1½, Midland a further ½, and South-Western and Metropolitan ½ each; and ditto (extension) receded ⅛. In colonial, East Indian and Grand Trunk of Canada (4th preference) improved ½ each, ditto (deferred) and ditto (3rd preference) 1 each, Great Western of Canada shares (paid up) ½; and ditto (new) and Buffalo and Lake Huron ¼ each; and Punjaub declined ½. In foreign, Western and North-Western of France improved ½, Sambre and Meuse ¼, and Antwerp and Rotterdam ⅛ each. In American, Atlantic and Great Western (1st mortgage) and Marietta bonds improved 1 each, Illinois Central sterling bonds 2, and Erie shares (paid up) a further ½. In British mines, Wheal Mary Ann advanced 1, East Bassett further 3, and Wheal Buller further 2½; and West Seton declined 5, Wheal Seton 2½, North Roskear 1, Tin Croft ½, East Grenville ¼, and Clifford Amalgamated a further ½. In foreign mines there was no alteration.

THURSDAY, Sept. 7.—In the share market to-day dulness was the prevailing feature, and English railways showed a tendency to depreciation in the closing prices, but the other descriptions closed with more or less average firmness. Of the English railways, Glasgow and South-Western and Scottish North-Eastern (Aberdeen stock) advanced 1 each; Lancashire and Yorkshire, Midland, and Great Western relapsed ¼ each; and ditto (Newport) declined 1½, Great Northern (A stock) ½, and North-Western ¼. In colonial, Great Western of Canada (paid-up shares) improved ⅛. In foreign, Bahia, Dutch-Rhenish, Sambre and Meuse (preference), and West Flanders (preference), improved ¼ each, and Antwerp and Rotterdam a further ⅛; and Great Luxembourg receded ⅛. In American, Pennsylvanian Railroad bonds (2d mortgage) advanced 1, and Erie shares (paid up) a further ½. In British mines, East Bassett relapsed 1; and South Caradon declined 10, West Caradon 1, East Lovell ½, and Marke Valley ¼. In foreign mines, Washoe Gold (of both descriptions) improved ½ each, East del Rey ⅛, and Frontino Gold ⅛.

FRIDAY, Sept. 8.—The railway market was dull, and the variations in prices were chiefly in an unfavourable direction. Great Northern stock receded 1 per cent., Caledonian ½, and Metropolitan, Midland, and Great Eastern ¼; South-Eastern advanced ⅜ per cent., and London and North-Western ¼. Lombardo-Venetian Railway shares were in demand, and improved in value. There was also some inquiry for the Indian lines. Canadian Railway securities were little dealt in.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

London: Tweedie, 337 Strand.

PRICE 6d EACH VOLUME.

Preparing for Publication,

THE YOUNG MAN'S LIBRARY OF USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire; and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BECAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having affected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

LOANS ON DEBENTURES.

J. H. NORMAN, Manager.

Head office, 80 King William street, London, E.C.

ANGLO-AUSTRIAN BANK.—

Notice is hereby given, that this Bank will be prepared to pay on and after the 15th of September, out of profits of the current year, the sum of 3*s* per share, equal to 5 per cent. per annum, free of income tax. The Directors desire to explain that the rate of the present payment has been fixed at 5 per cent. (instead of 6 per cent. as paid in October, 1864), solely in order to conform to the terms on which the shares of the Bank are dealt in on the Vienna Bourse (viz., with 5 per cent. accruing on them).

The provisional shares are now in course of preparation, and notice will be given when the same will be ready to be exchanged against the Scrip Certificates.

F. BREUER, General Manager.

Anglo-Austrian Bank, 7 St Mildred's court,
Poultry, E.C., London, Sept 5, 1865.

(Certificates must be lodged at this office, between the hours of eleven and three, for examination, four clear days previous to payment.)

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London bridge,"

and the ox, when contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

BAY OF HAVANA & MATANZAS RAILROAD (in the Island of Cuba).

Loan of £400,000 sterling, in bonds of £100, bearing interest at 7 per cent. per annum, payable half-yearly in London.

AGENTS.

In London—Messrs J. Henry Schroder and Co.
In Havana—The Bank of Commerce, Francis Fesser Esq., Manager.

This Company was formed in 1857, obtained its concession the same year, and in 1861 the main road was completed from Regla, in the Bay of Havana, to Matanzas, a distance of 54 miles.

Since then branch lines of considerable value have been constructed.

The cost of construction to this date is £1,056,000: of this sum £448,000 was raised upon shares, subscribed in the Island.

£250,000 was raised in London, in 1861, by a first mortgage loan, bearing 7 per cent. interest, and repayable by the operation of a sinking fund of £25,000 per annum, commencing 1867, which will redeem the entire loan in 1876.

£100,000 was similarly raised in 1863 for the construction of two branch roads, secured by a second mortgage on the road, and guaranteed by the Bank of Commerce, repayable by the operation of a sinking fund of £4,000 per annum, commencing in 1873.

A considerable portion of the remainder of the capital has been supplied from time to time out of the earnings of the road.

The results of the undertaking have been very satisfactory, and show the following returns:—

	Gross Receipts. £
1862	100,000
1863	122,000
1864	143,000
and 1865 gross receipts from January to June, £93,000 against same period 1864	82,000

The Bay of Havana and Matanzas Railroad Company has now effected the purchase of the Coliseo Railroad, running from Matanzas to Bemba, a distance of 35 miles, a very valuable road, and of immense importance to the Bay of Havana and Matanzas Company, inasmuch as it is in direct junction with that road at Matanzas, traversing a district rich in sugar produce, and being connected at Bemba with the Cardenas and Jucaro Railroad, becomes a section of the central road of the island, which will very shortly reach Villa Clara by the completion of the Cardenas and Jucaro Railroad.

The returns of the traffic of the Coliseo Railroad are as follows:—

	Gross Receipts. £
1860	49,100
1862	59,580
1864	71,200
and the returns of 1865 from January to May 20	£49,000
against 1864 same time	45,000

To complete this purchase the Bay of Havana and Matanzas Company desire to raise a loan in London of £400,000, bearing interest at 7 per cent. per annum, payable half-yearly in London.

As security for this loan, the Bay of Havana and Matanzas Railroad Company will effect a first mortgage on the Coliseo Railroad, its rolling stock, appurtenances, and all properties; and also a mortgage on the Bay of Havana and Matanzas Railroad and its branches, subject only to the existing mortgages of £350,000, of which the first mortgage of £250,000 will be paid off entirely in 1876, by the operation of the sinking fund which commences in 1867.

The property thus mortgaged is as follows:—

The Coliseo Railroad to be purchased out of the proceeds of this loan, producing a gross revenue in 1864 of £71,200.

The Bay of Havana and Matanzas Railroad and its branches, costing £1,056,000, producing a gross revenue in 1864 of £143,000 (subject only to the above-mentioned mortgages).

It will be noticed that the revenue of the Bay of Havana and Matanzas, as well as that of the Coliseo Railroad, has for some years been steadily increasing at the rate of 20 per cent. per annum, and it is beyond a doubt that the amalgamation of the two roads, by a natural increase of traffic and a large saving of expenditure in the administration, will produce a far larger revenue, and may be fairly estimated for the coming year at £250,000 gross, or fully £100,000 net revenue.

For the repayment of this loan a sinking fund is arranged for, whereby £20,000 is to be paid off annually, either by the purchase of bonds or public drawing, its operation to commence in 1877, by which time the first mortgage loan of £250,000 will be entirely redeemed.

The bonds will be issued in sums of £100, and bear interest coupons, payable 10th June and 10th December, at the counting house of Messrs J. Henry Schroder and Co.

The first coupon will be payable 10th June next.

The subscription price is 90 per cent., payable as follows:—

£5	on application.
25	on allotment.
30	on 10th November.
£30 0	
Less 14	interest at 7 per cent., per annum upon previous instalments.
29 6s	on 10th December.

Interest at 5 per cent. per annum will be allowed for prepayment of any of the instalments.

Applications for an allotment to be made to

Messrs J. HENRY SCHRODER and CO., 145 Leadenhall street,

or to the Brokers,

Messrs LAURENCE, SON, and PEARCE, No. 7 Angel court, Throgmorton street.

145 Leadenhall street, London, 7th September, 1865.

SALOM'S NEW OPERA AND FIELD GLASS.

—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE RECONSTRUCTION OF THE UNION.

We have of late abstained from writing about America, partly because the subject is a painful one and partly because it is so obscure. Our information as to what is going on there is very imperfect and fragmentary, very confusing and contradictory, and often quite unreliable. Out of the multitude of obscure and perplexing statements that come over to us, however, we may collect a few facts about which there exists no doubt. One of these is that the degree of ruin and destitution which prevails over the chief portion of the Southern States surpasses anything that had been imagined. It exceeds anything that can be accounted for by the devastation committed by the Federal troops, merciless and extensive as this was; for it exists in districts and over vast areas where the Federal troops never penetrated. It cannot be accounted for, except in a very limited degree, by the disorganisation of industry, the flight of a large portion of the labouring population, the abandonment of plantations, and the general interruption to ordinary agricultural occupations. This does much no doubt in four years, but there is something beyond what this alone would explain. Property appears rather to have vanished than to have been destroyed. The wealthiest men seem now to be actually destitute. Those who were worth hundreds of thousands, not to say millions, of dollars before the war, can scarcely now find means of subsistence for themselves and their families. Numbers who used to be in more than easy circumstances are now desperate solicitors for aid from Northern friends to enable them to live from day to day. Stocks of food and other necessaries of life have disappeared; seed-time has been neglected, and harvests are in consequence alarmingly scanty. It is in fact a case of absolute *want*, prevailing over nearly a whole country. The Federal authorities are in many districts called upon to provide rations not only for masterless negroes but for destitute and starving whites;—and how long this state of things may continue it is impossible to foresee. The truth is that the efforts made by the South to conquer their independence were even more stupendous and exhausting than any one imagined. The expenditure of life and capital was enormous; each State sent its last dollar and its last man; and the conflict was not given up till the means of further resistance were literally at an end. The completeness of their prostration is shown in the general admission, that, though their feelings of hostility are as bitter as ever, they are absolutely without power to give effect to them. There is not the faintest attempt at a guerilla warfare, or the remotest whisper of any renewed insurrection, either soon or at any future time. The most zealous Southerners confess that their defeat has been complete and crushing; and they can do nothing but submit to the terms imposed upon them by the conquerors, and prepare by political management and intrigue to recover, indirectly and by degrees, an influential if not a predominant place in the re-constructed Union.

It seems clear that Slavery as an institution, as it existed, that is, before the war, as a legalised and recognised status, is at an end. This result appears to be accepted, avowedly and formally, by the Southerners themselves. In fact, it may be considered as the condition on which alone the President allows them to re-organise themselves and re-enter the Union, and as such they have submitted to it. They will attempt, no doubt, and may to some extent succeed in evading or neutralising the full results of the admission by indirect measures, more or less insidious, oppressive, and unwise. But they are evidently not going to contest the point openly or in force. Meanwhile, however, the accounts which reach us of the condition of the unhappy negroes, and the treatment they meet with on all sides, are deplorable and painful in the extreme. Liberated from their old masters and unable to find new ones for themselves,—helpless with the helplessness natural to men who have never been taught or allowed to initiate or arrange their own actions, and not knowing how to set about any work which is not prepared for them and ordered to them,—calling, therefore, for support and aid upon those who conferred this impoverishing freedom upon them, but calling for the most part in vain, because their liberators, with the best will in the world, simply *cannot* provide sustenance or organise employment for such vast and sudden numbers,—little inclined to labour at all, as might be expected, because labour in their minds is associated with slavery and liberty with idleness,—despised and not loved (to say the least) by the great mass of the Northerners, and actually detested by the Irish,—hated at once with the mortification of defeat and the bitterness of destitution, by those to whom they were a short time ago both slaves and wealth,—and exposed, therefore, on all sides to ill-treatment and neglect against which, and the consequences of which, nothing short of ubiquitous omnipotence could effectually protect four millions of suddenly emancipated serfs,—these unhappy

victims of philanthropy and civil war are dying, we are told, by thousands; numbers are shot on the slightest provocation or from sheer brutality by the miscellaneous ruffians who abound there; numbers more sink under disease and famine; numbers emigrate northward, to fare no better; the law does not protect them; the civil authorities will not; the military authorities cannot. The Federal Government is evidently doing its best to discharge its duty to the poor freedman, as Major Howard's interesting though not very hopeful account recently published made clear enough; but the task is beyond their powers;—and what will be the fate of the liberated slaves when re-organisation shall have been completed and State rights shall begin to be re-asserted, it is more easy than agreeable to conjecture. The difficulties might be got over, perhaps, were Southern proprietors wiser and better than ordinary masters, and emancipated negroes less ignorant and wilful than ordinary men; but as it is, we fear, they will task even American capacities beyond their strength and range.

The third point that is clear amid the general obscurity is that those were right who prophesied that the worst difficulties of the Federals would commence after the war was ended, though the difficulties experienced are not precisely of the kind that were anticipated. There does not appear to be much need of *keeping down* the South by military force;—the work of subjugation and defeat was too effectually done for that to be required generally, or to demand a large force in the few districts where it may be required. But there is the difficulty of having an entire population *on hand* in one form or another; of having a dissolved society to re-organise; of having to perform this task through the instrumentality of men who are for the most part hostile, recalcitrant, and sinister in their designs; of being compelled to commit the practical management of political details to a conquered people who act with a different design and pull towards a different end from their conquerors. President Johnston appears to have deliberately, and perhaps wisely, adopted the principle of leaving the work of reconstruction in the several conquered States to the loyal or quasi-loyal citizens of those States. Possibly he could scarcely do otherwise. But in the meantime, as nearly the whole of the citizens profess to be loyal, fully admit the fact of their total discomfiture, and readily take the proffered oath of allegiance, the function will practically fall into the hands of those who, though accepting the Union and perhaps in a manner reconciled to it as an inevitable fate, yet hate the North as bitterly as ever, and think of nothing but recovering by politics the ascendancy which they have lost by war, and who though, accepting the abolition of slavery in name, have no idea of allowing it as a complete, genuine, and unresisted fact,—who intend still to make the negro work, whether he likes it or not, and, though prepared to pay him for his labour, purpose to pay him at a rate determined by themselves. Two great and knotty questions, therefore, still remain for solution before the difficulties of reconstructing the Union can be at all considered to be got over, and both these are complicated and perplexing ones, on which the greatest difference of opinion prevails even among zealous Northerners, and which will probably be found to involve some extensive constitutional innovation. The first is, whether the Federal Government must not retain in its own hands, or enact or assume if it do not possess, the power of disallowing any *State* law or ordinance which would clash with or defeat its purposes,—a claim which would almost seem to be necessary at this crisis, but which would be a complete extinguisher to the still popular doctrine of State Rights, and would in effect reduce the several State Governments to the position of Colonial or Provincial Legislatures. The second is, whether in order effectually to protect the negro, it will not be essential to insist on negro suffrage. This, again, would be an equal invasion of the constitutional idea of State Rights—each State having, and having always exercised, the indisputable privilege and power of determining its own electoral franchise. Now, of course, the Southern States—even that portion of the population of them which is deemed loyal—have not the slightest notion of admitting either of these claims, and in their objections they will be sustained by a very large proportion of the Northern people, especially the old democratic party, who are anything but friendly to the negroes, and who are little inclined to increase the powers or the ascendancy of the Federal Government. Both questions are full of difficulty:—the one proceeding would at a stroke convert a Confederation into an indivisible Republic, and make the United States a sort of democratic Empire with one elective head; and the other would confer a substantive, and it might at times prove a *deciding*, influence over the policy of the country upon a race whom the mass of the people dislike, whom all except a few despise, and whom not even their friends and admirers profess to believe are *yet* fit for the franchise. Moreover, a new and curious question arising out of the Emancipation Proclamation has just been laid before the President by a committee of Boston Abolitionists, which must be grappled with at once. This was ably and clearly explained in the *Spectator* of last week; but, in common with the two other questions we have just named, it is too important to be discussed at the end of an article.
